Meeting from the 19th of October 2003

Question : To answer the question whether Iraq has atomic bombs, EUPHENIUS ANSWERED:
"We answer this in the affirmative. Iraq also has biological weapons it can employ.
The question is, will he use them?"-
It is obvious that you were wrong, as no such weapons were found. The mass media
is talking about pure propaganda on behalf of the allies, to enable them to "sell" this
war to their own people. In reality, it was all about getting their hands on the oil
reserves of Iraq. What do you say to that?

SETHAN : We would like to tell you that Iraq indeed has atom bombs, which at the present time
have not been discovered, respectively located. Iraq also has these weapons of mass-
destruction, but they haven't been deployed because the superiority and the powerful
propaganda on behalf of the Western World is too great. In spite of everything, this
country is a rich country and has money at its disposal to utilise these kinds of
powerful elements. These powerful elements are DARK ELEMENTS. They have the
necessary resources to produce these kinds of weapons of mass-destruction. But they
will be careful not to publicize and to propagandise this, as they would have to
confront a superiority, which serves as an element of alliance with the people. They
will not engage these weapons at this time, because they know too well that their
chances of survival would be zero.
