Protocol extracts from the *Menetekel* of the years 1956 to 1975

Theme : **Spiritualism versus spiritism**

Questioner : Psychic Peace Circle Berlin (MFK-Berlin)  
 Mediums : Uwe Speer (17) and Monika-Manuela Speer (15)  
 MESSENGERS OF LIGHT : ELIAS, ARGUN and AREDOS

The texts to this theme were psychically received between the years of 1956 to 1975, by the Medialen Friedenskreis Berlin, a Christian/Spiritual community. These transmissions are a part of the *Menetekel*, a collection of 4,500 A4 pages of freshly catalogued protocols, amassed over 20 years. All of these mediumistic messages were left in their original form, even if similar questions were repeated. The work of the two mediums began when they were 15 and respectively 17 years old. The total production of the MFK-Berlin (Medialer Friedenskreis Berlin), the *Menetekel* and the 21 transmissions from the space-brothers are considered the absolute pinnacle of psycho-scientific exploration. Other spiritual circles have often tried to copy the work of the MFK, but its quality was never achieved. The reproduction and distribution of these rearranged messages and protocols is *explicitly encouraged* and is not covered by any copyright.

## 1. Preface by the editor

The idea that one can gain absolute knowledge has become the principle in all efforts to expand one's knowledge and it has always gone hand in hand with scientific progress. Religious beliefs on the other hand, occidental Christendom for instance with its various characteristics, has always asserted a claim for an assuredness that was supposed to be different and independent from any scientifically gained, verifiable knowledge. But both types of certitudes have been exposed to doubts by various forms of scepticisms right from the beginning. The chance of absolutely guaranteed knowledge and the unassailability of religious beliefs were exposed to sceptical criticism as well. But in view of the apparent successes of scientific thought, the way it came into expression through its technological implications, the advocates of scepticism have never been able to prevail against the claim of absoluteness of scientific knowledge. Religious credence on the other hand was exposed to increasing

doubt and criticism, because it seemed impossible to equate it with the view of the world established by the sciences.

Theology had to fight rearguard actions and relinquished established positions in order to bring the results of scientific progress to harmonise with its faith. But the situation has radically changed these days, faith in progress has been shaken to the core. Scepticism has now infiltrated scientific doctrine *also* and it challenges not just the sciences and their methodologies, but rational values too. The time has come for mankind to return to the genesis of religious thought with the help of metaphysics, but not by drumming dogmas into children once again, but by presenting adults with *verifiable facts*.

Christian spiritualism and its associated doctrine of the soul proves itself to be of far-reaching importance, also in a practical sense, because it brings transcendental psychology *into the equation*. It solves the riddles of the world and slowly but surely mankind will gain the insight that the universe *constitutes a school for human souls*. Psycho-science does not represent a new religion, but an objective doctrine, based on *verifiable facts*. Knowledge about man's existence represents the only way to redeem the world.

Bad Salzuflen, February 1993

## 2. Spiritualism (Author: H.V.Speer, leader of the Medialen Friedenskreis Berlin, [Psychic Peace Circle, Berlin], MFK)

- *Human life here on this Earth would be unthinkable without esoteric thought.*

Even the most primitive people deal with esotericism, if only within the distorted tenets of a cult that might not quite represent the TRUTH, but that might at least contain some PARTIAL TRUTHS. We are not dealing with a foreshadowing anchored within man, but with experiences a naturally psychic person has with supernatural phenomena. But these phenomena are unfortunately misinterpreted most of the time.

Esotericism is not an established science, it is still within its beginnings (1963) and it is constantly developing. It isn't just designated for the initiated, but it represents a *higher thought process*, something that should be reflected upon by every human being.

- Only higher thoughts can help the progress of man. This is the reason why it is *the duty of the academic sciences to include* esoteric thought and knowledge in their natural science.

Esoteric thought is *not a religion*, but the acknowledgment of the human spirit, which can develop to a much higher degree than the physical body will ever be able to. The physical body is subject to very tight and very strict laws. The human spirit on the other hand is not subjected to any boundaries whatsoever, because due to its immortality, it can develop right up into GODHOOD.

The great pertinence esotericism has for man is easily recognised from this perspective. It is actually the absolutely defining, original philosophy mankind has to abide by. Esoteric thoughts are based upon *spiritual experiences*; they form a part of the spiritual development of man; they determine his

behaviourism, his morals and his relationship with the supernatural and with his fellow man. Present day's scientific standing is still far removed from esotericism.

World politics is not bothered about this at all, because it is only concerned with mundane life and mundane powers. World peace is absolutely unimaginable and also impossible without the acceptance of esoteric experiences. It is therefore necessary that the academic sciences begin to familiarise themselves progressively more with the basic outlines of esotericism.

- *Through the acceptance of esoteric TRUTHS alone, this uninterrupted state of war here on Earth can be prevented.*

Just how far the sciences are still from this situation is proven by the ravaging *tobacco industry* and world wide *alcoholism*. The *meat industry* has also travelled ways that contravene natural laws.

- If the international sciences had esoteric guidelines, the breeding of pigs would certainly not be an option.

This meat is harmful to man to the highest degree and Moses correctly acknowledged this when he was around. These animals are condemned to a heightened metabolic deficiency. In regards to human consumption, eating this meat is not without consequences. The consumption of meat has generally been *overemphasised* to such a degree that many illnesses and a reduced life expectancy are the result of this. One should also take into consideration that the preservation, salting and seasoning of meat endangers the human organism.

If academic science wasn't so far removed from esotericism, it would have to be their divine concern to expose all sources of dangers facing mankind and to eliminate them with all available means. But sciences look at these vices and mistakes quite unperturbed. Esoteric knowledge is *not* the secret science of a *select* few!

The experienced researcher of the hereafter cannot understand that there are scientific researchers who *reject* the notion of *life after death*, because they consider it an impossibility. If one reviews this behaviourism one finds that the experienced researcher of the hereafter has amassed more experiences in this field of knowledge than other scientists. The academic scientist hears about this and that phenomenon and would like to repeat these phenomena in front of his colleagues in a laboratory. But this course of action brings many failures with it or a successful attempt is nevertheless misinterpreted due to insufficient knowledge.

- It must be mentioned here that *most* spiritual phenomena are *localised*. This is why they cannot be successfully repeated in a laboratory, because entirely different circumstances prevail there.

For instance, if one were to copy the situation as near as possible, these measures could also be unsuccessful, because it primarily depends on the *spiritual situation*. If the situation in the spiritual realm is not right, the earthly situation will not bring the desired results! But the spiritual situation cannot be right, if one wants to challenge GOD. The academic researcher is most of the time of the opinion that he *has to demand* the recreation of a particular phenomenon.

- The spiritual realm will not reveal the highest proof and knowledge on command, but only *as a reward* for a *merited* willingness to believe and for a *truthful* SEARCH for GOD!

There are situations where the thoughts of the testing scientist are so atheistic that the lower spiritual world has a field day. The messages are accordingly so indecent and blasphemous that one might conclude that the medium is quite mad. The judgement of these “experts” will be: “The medium is hyper-hysterical!”

The genuine researcher of the hereafter knows the laws of the spiritual realm! The academic scientist unfortunately doesn’t know them or chooses to ignore them. A *religious respect for the spiritual realm* is an indispensable prerequisite; no spiritual protection can be expected for the experiment without this respect.

- Academic science must acknowledge that everything *is superlative* in the spheres of the spiritual realm. The spiritual realm reacts *superlative* in regards to any doubt and any atheistic thought accordingly.

University science makes the great mistake of *ignoring* the formulated research results of serious research of the hereafter. It would like to start *anew* and pursue their *own* ways, which are largely based on physical research and on psychological conjectures. Psychology is of no advantage at all in this case, because it doesn’t possess any genuine insights into the human soul.

The experienced researcher of the hereafter knows that spiritual entities will help him, if he thinks and acts properly in every respect! One cannot treat the soul the way one dissects a human corpse! Often enough an otherworldly tragedy unfolds in front of the researcher of the hereafter that finds no equal here on Earth. This fact alone represents one of the most convincing pieces of evidence in this field.

Above all, everybody who delves into this must get used to the fact that he is dealing with something invisible and intangible. But this doesn’t hinder the otherworldly consciousness to reveal itself.

- *He, who becomes conversant with the spiritual realm, also gains FRIENDS.*

An often used phrase reads as follows: “How do I tell this to my child?” These words can also be applied in regards to spiritualism, because it is really an almost impossible assignment to verify a conscious existence after death with a few words. The Medialen Friedenskreis Berlin is certainly in possession of evidence that has been formulated from well over a thousand séances (1961). But if one talks to a doctor, who should actually also be an expert in regards to psycho-science, he will only shrug his shoulders and say: “Nothing really has been properly verified and it all needs more detailed clarification”. The broad masses make the mistake of falling for this opinion. Even the representatives of Church religion allow themselves to be irritated over this. The conscious survival of the soul freed from physical bondage is in reality not an assumption or a theory, but a factotum of unsurpassed, absolute reality.

The dissemination of this TRUTH is faced by extraordinary difficulties from various quarters. The Church to begin with is very reluctant, because in its unparalleled fanaticism it is dogmatic and

unwilling to admit mistakes. How could GOD be so wrong? But it *isn't* GOD that is wrong, *only people* can make these sort of mistakes!

Furthermore there are the so-called “chosen one’s” who hear “GOD’S VOICE” or converse with “CHRIST” for hours with hatred in the heart, something only they experience. The results of this are fanatically proclaimed to the world. There is never a shortage of enthusiasts willing to give complete credence to these “prophets of god”. These “mediums” preach hatred. This “voice from GOD” represents revenge on the world personified and threatens the demise of all of creation - naturally with the exception of those prophets and their credulous devotees. Because this prophesying is a misguidance choreographed by Lucifer, it has the opposite effect in regards to being an alleged line of argument.

We can add to this the profane home-spiritism one could call an amateurish hobby. These actual supernatural contacts are experienced by hundred of millions of people; they do contain the verifications of a conscious life after death, but these are so ridiculous and profane or pure blasphemy, that most of them guard against informing their uninitiated fellow man. This results in a kind of “secret science” of enormous proportions. In addition this there are the so-called para-psychological tests and experiments, for which there is no adequate protection, because one *cannot* proceed to areas of the positive SPIRITUAL WORLD *without* FAITH in GOD and *without* religious respect. But as one is of the opinion that these things have to be approached with clear-headedness, one will not progress across the threshold that is safeguarded by godless souls.

- For as long as para-psychology is of the opinion that one can properly research the hereafter *without truly* LOOKING for GOD, any line of argumentation will always face difficulties. Only when *the will to learn*, respectively, the will to allow oneself to be indoctrinated *is actually present* and springs from the heart, can one count on results. All of these types of evidences show the international tendencies of accepting that there is a GOD who created an otherworldly ORGANISATION that controls EVERYTHING there is *and this infallibly just and fair*.

But this fact seems to be the one point researchers balk at.

Atheism is not a key to Heaven. Due to their ignorance in regards to spiritual LAWS, many who are interested in spiritualism believe that otherworldly manifestations, respectively evidences, ought to be able to be reproduced at any given time and at any location. As a matter of fact there are spirit entities present at any possible location and at any time of day and they could indicate their presence if certain prerequisites were on hand. And in a lot of cases they will do so. But *the quality of the spirits isn't always good* and this is why these communications mount to nothing. Profane house spiritism doesn't care much about quality, it is quite happy to have a number spirits announce themselves, even if the communication stutters a little.

- *These are the reasons why spiritualism does not have the international reputation it should actually enjoy!*

The ignorance amongst people is so profound that most people erroneously believe that spiritualism or anything otherworldly for that matter, are simply crazy illusions, suggested self-deceptions that a normal, educated person can only smile about. This derisive smile also exists amongst well respected

scientists, but it had to be vigorously emphasised that these people have really no idea what genuine spiritualism is all about, even if they are of the opinion that due to their extensive studies and knowledge in other areas they're entitled to voice their opinion. They might have tested mediums. But if *their doubts* were not allayed, they could never have been dealing with genuine and reliable mediums.

A genuine and reliable medium has a spiritual GUIDE. But it isn't always possible for this GUIDE to function at any time and in any place. In contrast to your average spirit, the spiritually more advanced SPIRIT GUIDE is *more sensitive* and obstructed by spiritual LAWS of DEVELOPMENT. The medium needs a PROTECTIVE AGENCY that will provide a shield against any lower entities from the spiritual realm. Under difficult conditions, a radio broadcast can only be received with an appropriate filter in place; otherwise the static drowns the desired radio reception. The above mentioned prerequisites never apply under normal laboratory test conditions. One tries to test a medium even if everything goes *against* all spiritual LAWS! This is why mediums who work with a skilled circle and at a very appropriate place are the best.

- Every connection to a BEING of LIGHT is an experiment of *the highest synchronization*.
- There *must* be harmony, also the corresponding *open mindedness*, and *friendship, loyalty, honesty* and *respect* must be taken into consideration.
- The success of a convincing séance depends on absolute reciprocity.
- The spirits and the participants and above all the medium must be honest and very interested in the progress of people and souls in the here and the hereafter. *Whenever these conditions are not fulfilled, lowly otherworldly entities immediately take control and have their frivolous fun and amusement in order to prohibit any persuasions.*

Therefore do not just test the spirits, but **also the participants** of a séance!

Especially the medical fraternity has always endeavoured to *invalidate* spiritism and also its higher relative spiritualism. In spite of all its efforts it has not managed to do so. This actually verifies that the contra-argumentations and facts the specialised, spiritual sciences are in possession of are that strong that they cannot be categorically abrogated with the help of any thesis or definition. This fight amongst scholars is unfortunately an internal one, because the general public is not accurately informed about in whose favour this altercation is resolved. One can certainly observe that the definition tabled by medical experts isn't exactly a fair one.

Let's take a full materialisation as an example, because it represents one of the more splendiferous occurrences of phenomenology. In the case of a good materialisation, the phantom forms outside of the medium. It portrays individual clothing, a divergent appearance from that of the medium etc. A female medium can produce a male phantom, with a full beard for instance and other distinctive characteristics. The phantom can play the violin or perform virtuoso concerts on a special instrument. Things the medium might almost certainly be incapable of. This undoubtedly verifies the individuality of the spirit, especially if the spirit is capable of speech thereby able to confirm his identity with that of a departed person.

This doesn't fit in with the knowledge of medical science. It will not accept this most towering of phenomenon. Reason: "The phantom represents a materialisation by the subconscious of the medium. It is a phenomenal accomplishment on behalf of the medium that produces a phantom by splitting its consciousness, virtually creating a spiritual child of its consciousness." Is this really fair?

Because of these aspersions, one will not be able to settle this dispute. This dispute between spiritualists and the medical fraternity would come to an immediate end, if one would be kind enough to accept the TRUTH. But it is all too clear that the same obstinate and evil wilfulness prevails here as it does in politics.

Let's assume that one of GOD'S ARCHANGELS would fully materialise here on Earth and that everybody would be able to see and to recognise HIM. Even if HE had wings, the academic scientific community would categorically insist that based on their existing policy of disaffirmation, one was dealing with a case of mass-hysteria that affected all of mankind. - But we will not make any progress like that! One can only come to the conclusion that fairness does not reign here.

There are also occurrences of quackery in present day medicine and this quackery is rejected by responsible doctors. But it would never enter a spiritualist's mind *to condemn all of* medical knowledge based on experience due to such occurrences and to describe it all as quackery, only because this occurs within their science.

But academic science proceeds in this fashion!

They condemn the spiritualists *because a fraud is perpetrated every now and then*. Responsible spiritualists also reject fraud. The self-delusions many mediums fall prey to are *not* listed amongst their evidence.

- The knowledge spiritualism has gleaned through serious research and experiments in regards to man *are not less valuable* than the knowledge gained by psychology or medicine. Universities have so far neglected their duty to inform and this has led to a world situation that doesn't just represent a great danger to the physical man, but also to his eternal soul!

When academic science sometimes doesn't find an answer for a spiritual phenomenon, one insists that this phenomenon was observed or analysed by hysterical people or by people who are uneducated in regards to the natural sciences. One puts the objectivity of the observer and the advocate of the spiritual acceptance in question. These "experts" who deal with their utterances so frivolously do not know that amongst the observers of spiritual phenomenon are actually experts whose academic education and experience are beyond question!

*The Swiss psychologist Dr. C. G. Jung*, whose reputation is appreciated around the world, visited a cottage in 1920, where he spent a number of nights. Whilst there, he personally experienced a number of spiritual phenomenon triggered by ghosts. These phenomena amplified in severity while he was there. C. G. Jung made the following statement in regards to this: "These apparitions included raps, as well as conspicuous and unpleasant noises and smells, intense movements and also the dripping of fluids." On the last night of his visit he saw the materialised head of a woman on his pillow. One eye

was wide open and stared at him. Dr. Jung then lit a candle whereupon the phenomenon disappeared. Deeply impressed by this *personal experience*, the Swiss psychologist spent the rest of the night sitting in a chair. Dr. Jung is one personality that is not easily duped by any trickery. He is also a most obstinate sceptic and would never consider siding with those who believe in a world of spirits. His confession therefore gains a lot of credit for this reason alone.

We have the evidence here that it isn't always a case of biased observations and appraisals by non-scientists. This is not an isolated case. There are hundreds of admissions like these that have entered the annals of paranormal science, but they are simply ignored by the pundits of science.

*The German Nobel prize laureate Thomas Mann* participated in a spiritistic séance. He took part in a spiritistic circle and held the wrist of the medium that was in a trance. Another witness controlled the legs of the medium. The very critical author Thomas Mann wrote the following lines about this: "Eventually something happened that according to the circumstances couldn't possibly happen. But may lightning strike me if I tell a lie! In front of my eyes, which were completely free, uninfluenced and conditioned to see nothing where nothing was to be seen, a claw like hand shook the curtains a number of times whilst a ringing bell hovered in the air. But in the middle of the room a typewriter was actually being used by an invisible hand. Apart from this, other phenomena also took place."

If Thomas Mann had not been so deeply impressed by this he would certainly not have written about it. But he was a SEEKER of the TRUTH and he spent a lot of time thinking about this event. He offered his services to the public as a witness and he actively verified the TRUTH. But there are many famous and well respected personalities who made their own experiences in this way, but *never* came forward to testify unless they did so to friends and confidantes only. The powers of ridicule are still too great.

If one endeavours to discuss spiritualism with a layman, his immediate reply is that science has not yet acknowledged spiritualism (1966). The layman therefore endorses their adjudication and rejects everything else hook line and sinker. He purports that he is a layman and not a scientist and one could not expect of him to accept something the scientist, who would have to know better, is not willing to accept. This is a standpoint one cannot ignore from a logical point of view. The spiritualist has to succumb to this line of reasoning.

But what does the reality look like?

Science doesn't acknowledge spiritualism as one of *their* disciplines. It regards this type of research as part of religion. Furthermore the scientist is not somebody who "must" know better. This is an error of judgment by the layman. But the layman who encounters a spiritualist makes the mistake of disregarding the spiritualist's competence.

- *Spiritualism is absolutely not a field of knowledge that is exclusively within the domain of religion. On the contrary, it is an important natural science.*

Most academic scientists are of the opinion that spiritualists, and this includes mediums, are religious fanatics, respectively dreamers. These scientists maintain that these characteristics makes them biased and that they easily fall prey to self-suggestion.

The reality is completely different here also.

The spiritualist *must not* necessarily be of a religious character. It suffices for instance if he has a character in tune with *natural-science*. He can even be successful with an atheistic attitude. There is a spiritual circle in America that is visited by Jews, but they leave CHRIST completely out of the picture. On the other hand there are other sects that even leave GOD out of their proceedings. Many circles are utterly irreligious *but* still maintain *good* contact with the spiritual world. But:

- It is important that these people are *good inside*, that above everything else, they have *their heart in the right place*.

The MEDIALER FRIEDENSKREIS BERLIN has gone beyond many of these levels:

- *We accept GOD and HIS PLENIPOTENTIARIES* with the one we call CHRIST first amongst them.
- *We no longer look for proof*, but correspond with spiritual TEACHERS of the highest quality.
- *We accept that the spiritual realm is organised along Christian principles*. Our cult is moderate, because every exaggeration and over-enthusiasm leads to the lower spheres.

The same applies to light conditions:

- Spiritualism is certainly not afraid of bright lights. It even works *in full sunshine* and this has been objectively verified under bright Jupiter-lights inside a television studio. We have also sat in complete darkness. But we maintain good contact today with the help of *seven candles on a table* and with *two additional altar candles*. Apart from that we use an additional *five electric blue-light lamps*. Red light is more appropriate for physical spiritism, for instance with attempts of materialisations.

But if one attempts to discuss this with academically trained scientists, one comes across complete ignorance in regards to this field of knowledge most of the time. Academic arrogance is a very dangerous attitude. Scientists make a great mistake here by shutting their eyes to this enormously important KNOWLEDGE. This field of knowledge is no fairground for the mediocre, but for highly intellectual people. *But it absolutely depends on a positive attitude!*

If someone experiences extraordinary perceptions, one will suspect that he suffers from hallucinations. But *not all* of these perceptions stem from mental disturbances. There are perceptions of an otherworldly nature. They can be perceived because the senses are temporarily arranged for pure spiritual activity. The effect of these perceptions is *then much stronger* than perceived through the normal activity of the organic senses.

If a dog picks up a scent nobody would accuse the dog of suffering from hallucinations, even though people don't perceive any of the dog's perception, not even with the aid of instruments. One accepts as a matter of course that the dog possesses a "sixth sense". If everybody had extraordinary, that is

extrasensory perceptions, one would accept it the way one accepts this with dogs. But as there are only a *few* people that *can* pursue these kinds of “tracks” they are disbelieved and they are considered to be either ill or crazy. How can a medium differentiate whether it is hallucinating or not?

- *With every genuine supernatural perception that is not a hallucination, the mind remains completely unaffected. The thought process is not curtailed, but absolutely objective.*

The corresponding supernatural perception is accompanied by another perception most of the time and this will verify the supernatural origin of the perception. What can happen is that the medium perceives the wonderful *scent of flowers* for instance. This on its own could be a hallucination. But in addition to that the medium might *see* a wonderful *figure* or *hear a voice* that proclaims: “I bring you a floral salutation from the spiritual realm”. There are infinite variations to this.

- It takes *all* of the activities of the supernatural senses to form a uniform picture, respectively confirmation that the perceptions are supernatural.

It can happen that somebody suffers such a mental shock that it impairs their sense organs. Every ill person will then actually hallucinate, either seeing or smelling something that is not present. But what *will be lacking* is the supernatural adjunct, the explanation that one is actually dealing with a perception from the spiritual dimensions. A doctor will have to make a precise distinction here and he will only be able to do so, if he has studied spiritualism very meticulously, otherwise he might come to the wrong conclusions, for instance the conclusion that the medium converses with its own subconscious. - The mediums that do possess *real* supernatural perception guard against talking about it most of the time, because one immediately assumes that they are crazy. Who wants to be regarded as mentally insane? Mediums are unfortunately incapable of depicting their perceptions in a way that might seem plausible to a doctor, *the details* that are so important *are lacking*.

This is the reason why spiritualism *expects the same standards* as psychology or medicine. We are dealing with a natural science here. Religion comes into it at a later stage. But religion does offer the opportunity to establish contact with higher SPHERES, whereby the messages gain a *higher status*. But contact with the spiritual realm is also possible without religion, but only with the lower spheres and the messages that come from there are less plausible.

- *The spheres can be recognised by their odour and by the way their verbal communication is conducted. Spheres also have a certain social background.*

The lower social background of parts of the spiritual world correlate to the social background of our own Earth. It is the sphere of the so-called “proletariat”.

- *It is not the affiliation to a specific religion that determines one's grade of development, but one's self knowledge and one's good will!*

Opponents of spiritualism are not pleased that spiritualism portrays a kind of religion. They use its religiousness *as a point of attack*. According to atheists, everything to do with BELIEF in GOD is simply an unproven assumption, therefore pure theory.

- Spiritualism has nothing at all to do with theories and *blind faith in GOD*. On the contrary - more than any other religious denomination, it is mainly based on *praxis* and on *tangible experiences*.

Even though Christian Churches have adopted parts of documentary spiritualism, they do not practice spiritualism. This is why their religion is wholly dependant on biblical accounts.

Even when discussing this theme with physicians and physicists one is continually faced with the common view that spiritualism represents an *unverifiable religion* and that it must therefore be rated like any other religious denomination. This attitude is false and it proves that the scientists responsible for the sector of empirical natural sciences are not informed about what spiritualism actually has on offer.

This educational gap represents a great evil for all of mankind!

A well known physician once said that he didn't believe in anything he couldn't see with his eyes or touch with his hands. This resolution is applied worldwide and is even quoted by the most simplest of people. It now looks as if spiritualism was a religious theory; a delusion that didn't exhibit anything tangible. It must be energetically emphasised here that this opinion *embodies a mistake* that couldn't be greater.

- In this sense of the word, spiritualism is *not a religious theory*! We are dealing here with absolutely *perceptible* utterances of spiritual life that exists in another dimension. It is the ascertainment of spiritual intelligence, which reveals itself often enough either visibly, tangibly, controllable and also through presentations of the highest order.
- A spiritualist is not a convinced believer, one that is guided by statutory decrees. Every genuine spiritualist *demand*s, just like every other scientist, *irrefutable proof*, he would never accept spiritualism without it.

The all-important question of whether spiritualism can fulfil the demand for objective evidence with irrefutable reliability remains.

This question must be answered in the affirmative.

Objective argumentation is recorded in writing, photographic evidence, through protocols and through statements from exemplary personalities. We can completely ignore intentional fraud here, because we are not dealing with it here. Genuine argumentations that refute the deceptive opinion of an imagined religion *are accessible to any serious person*, because they are available all over the world!

The question therefore has to be why do *most* people *not* bother with this fountain of knowledge?

We have dealt with a lot of people who have voiced their opinion in regards to this. There are various reasons that result in rejection. But the main reason is timidity when it comes to the conclusive and august TRUTH.

- One can deal with a religious theory. But a RELIGIOUS TRUTH is a dangerous thing for everybody, because it conspicuously warns everybody that they *must change* with repentance and with speed.

Almost everybody *wants to remain as they are*. If one rejects self-evident spiritualism one believes that one's "inner swine" may remain the same. One is *not willing* to confess to one single TRUTH, even if it is irrefutably verified, because one *wants to lead* a life of inconsiderateness and vice.

*This is the real reason!*

Spiritualism, that is to say the connection with the spiritual realm *cannot* be interpreted with one *uniform concept*. Spiritualism also exists in *various forms and on various levels*. But due to its close relationship with religion, it is naturally influenced by every religion and every sect. There is a *Christian* spiritualism as well as a *Jewish* spiritualism, also a *Persian* and a *Mormon* spiritualism.

The Catholic Church who allegedly rejects spiritualism and spiritism possesses its own kind of spiritualism just the same: The *Last Supper* alone is full of spiritual meaning. *Guardian angels*, *amulets* and *calling on Saints* represent spiritual ceremonies.

And on the other hand there is a scientific spiritualism and it would like to distance itself from all religions. Whether this is at all possible is very much in doubt. Even though this was our intention initially, we were also not successful. But our GUARDIAN SPIRITS have given us certain instructions in regards to this; they asked us to comply with certain cultic conditions in order *to be able to work with us at all*.

- This is the reason why we entertain *a mixture between scientific and Christian spiritualism* and it has served us very well.

A scientist from Switzerland send us a question asking if it wouldn't be better to *extricate* spiritualism from the imaginary arenas of the mystical, occult and religious domains and to adopt a *purely scientific* attitude.

This question is certainly of significant importance.

- *It is a fact that the religious aspects often cause great mischief amongst spiritualists. A lot of people are prone to hysteria and eventually go completely mad.*

The spiritual realm naturally features many spheres. These spheres also differentiate in *various* religions. We therefore address *certain* spheres here on Earth. One cannot expect spiritualism to *progress* in its cognitions, if it addresses the intelligences of those spheres *that must also still wrestle with cognitions*.

- We have ascertained from this experience that one can forge ahead with *Christian spiritualism* very well when it comes to the redemption of mankind. The support provided with illnesses and mental conflicts is also guaranteed and enhanced. The otherworldly INTELLIGENCES therefore talk about a CHRIST SPHERE.

Whether one can achieve *something positive* from an atheistic base is *more than just debatable*.

- We have also ascertained that for instance Buddhism, with its beliefs in demons, actually *attracts lower entities*.

If cut and dry science believes that it can manage to explore the spiritual realm *without* a certain cult, respectively *without* ethical concessions, we can say right now with certainty that it will achieve *negative* results that are scientifically manipulated to such a degree that it will “jump for joy“. Nothing will then be verifiable as OBJECTIVE TRUTH.

- *All we can do is to continue to point out that a “golden mean” must be adhered to. In any case, the higher developed souls in the hereafter love GOD and they also adore CHRIST. These souls love our sincerity and they also love flowers and candles. We take their wishes into consideration. Why shouldn't we?*

If academic science would announce one day that the results and doctrines of spiritualism *are correct*, it would result in an *unimaginable about face*. If they would take that step, it wouldn't constitute a mistake or a lie, but a justified step towards the TRUTH. The question is though whether such an announcement would come within the realm of competence of natural science.

A contradiction exists in the relationship between religion and natural science:

Natural science spontaneously offends religion, because due to its knowledge, it cannot accept religious views unconditionally. With this antagonism in place, can we expect that FAITH in GOD, with all its associated mannerisms, will emerge the winner sometimes in the future?

Mistakes are to found on *both* sides!

Religions, with their deistic beliefs have *not yet undertaken the required cleansing procedures*. Almost all of these religious denominations unfortunately contain *all too many inaccuracies* and *unscientific* considerations and that leads to even greater reservations. The natural sciences have not yet seriously looked into this field of knowledge at all. Most of natural science's present day (1965) knowledge cannot be applied in regards to metaphysics or the transcendental.

Natural science *lacks the foundation* for an objective assessment of this field.

Natural science never cared much about insights and verifiable evidence from the spiritual world; with their hedgehog approach they have actually completely ignored it. This causes mankind to live in *dangerous ignorance* and it has a negative effect on the behaviourism of the people on Earth.

- *The whole sociological view of the world is disturbed by this dangerous ignorance.*

Natural science lags behind in many areas, because it avoided the TRUTH in an irresponsible fashion. One therefore has to come to the conclusion that religion and natural science *err* in many of their important observations.

Isn't it about time that a decisive change is made here?

This change is not to be expected or even demanded just from the major Churches. Science must also declare itself prepared to finally deal with this "hot potato". The sciences must also admit their ignorance in regards to this field of knowledge; it may not persist in its inflated pride, because this pride has quite evidently become a grave enough danger for all of mankind! Mankind has literally gained enormous knowledge and made enormous strides during the last centuries. But in spite of this has remained static in regards to its mentality, one could say that in some areas it has even *lost ground*.

- FAITH in GOD in line with *objective* GOD REALISATION isn't just the domain of the Churches, but to a large degree also the *concern of natural science*.

There is no rationalization why spiritual factors should *not* be a part of natural science. An enormous number of people, of all possible levels of development, live here and also in the hereafter. Exploring otherworldly potentialities, the spheres etc, is a part of the universal existence of mankind!

- *It is beyond science's good reputation to drive a wedge between the here and the hereafter, because the hereafter is the one sphere that every human being will inevitable be destined for after their life here on Earth comes to an end. If science is willing to show an interest in the most distant stars, they can surely deal with the spiritual realm also!*

One false assumption blocks all spiritual research! We are dealing here with the speculation that thought, respectively one's whole consciousness, is something that takes place *exclusively within the brain*. This assumption is certainly not correct, because it is *unequivocally refuted* by spiritism and spiritualism. In spite of this confutation, academic research into spirituality hardly makes progress, because this research *is limited to within the confines of the human brain*.

We don't want to talk about spiritual evidence, because there is more than enough of it all around the world. More important is the fact the all this evidence is *not taken seriously enough* by academics. We certainly don't hold the opinion that everything within this field of knowledge should be accepted unconditionally. But we are compellingly convinced that amongst all this evidence there are sufficient examples available that deserve full recognition from academic science.

Our otherworldly TEACHERS furnish their evidence mainly through their individual nature. In addition to this is their enormous specialised knowledge and an otherworldly experience we completely lack. Their individuality defies any barriers the medium or the members of the meeting might care to confront them with.

Man's brain activity naturally captured our attention to a high degree. We were originally of the opinion that man's thought processes did not take place within the brain at all, but that it was of a purely cosmic nature. With the help of our otherworldly friends we have abandoned this point of view.

- After our painstaking research into this field we have now arrived at the conviction that one's consciousness *does reside within the brain*, but that this consciousness is fed from the cosmos.

Soviet-Russian dialectic materialism (DIAMAT) is not completely wrong when it states that consciousness is coupled to matter. One has probably come to that conclusion after many scientific tests. But this theory contains one crucial mistake just the same, because: What belongs to matter?

Up to now, academic science has known all too little about the hereafter, respectively about its structural composition. With the help of our spiritual TEACHERS and with the support of our SPACE BROTHERS, we now know that the hereafter actually has a *stable composition*. It is a realm of “anti-matter” and like our physical world, it is systematically organised.

- *Human consciousness, well advanced of any other life form, moves from its physical abode after death, respectively after the exodus of the soul. Consciousness therefore also adheres to a brain after its earthly disembodiment, a brain that consists of the appropriate substance in the new dimension.*

If Soviet-Russian dialectic materialism really wanted to do justice to the TRUTH, it would have to *add* to its theory that one’s consciousness is coupled to Earth’s physical matter during one’s earthly existence, but that it changes over to an “anti-matter” brain after evacuating the secular brain. This conclusion is of immense importance from a scientific point of view and momentous in regards to the overall assessment of human intelligence and existence. But it is also a great disappointment for atheism, which had managed to conquer a vast political field and also managed to keep planet Earth’s mankind in constant turmoil. This mankind must first discover all the things that are a part of physical matter. Physical matter *doesn’t* simply cease to exist outside of our coarse material dimension.

It is naturally very difficult to comprehend that an otherworldly soul announces itself and provides us with information through a medium. This fact alone is no reason to reject this phenomenon. During our séances since 1964, we have conversed with otherworldly intelligences for over 2,000 hours. We asked with our voices, they answered *in writing*.

- All participants and guests have come to the conclusion that *it takes more than one hour* to ascertain whether one is *actually* dealing with otherworldly INTELLIGENCES.

The difficulties of convincement mainly exist with those that unfortunately cannot participate in a circle. But there are people with the opportunity to do so, but in spite of that simply reject everything because they consider all of this to be either a lot of nonsense, superstition or pious deception. These people think that they are very clever and that according to their opinion they need neither indoctrination nor any sort of evidence like that. The cooperation of otherworldly INTELLIGENCES is beyond doubt. Any negation or rejection can only relate to actual deceits and deceptions, but never ever to *genuine* contacts.

An otherworldly reveals himself through *his individuality*. He is a knowledgeable person, experienced in otherworldly affairs, a soul that exists in another world and therefore able to give account of a life in the hereafter without hesitations. The answers contain technical terms, special knowledge and the unmistakable spiritual deportment of ANOTHER WORLD.

But it is also apparent that the otherworldly observe us, that they are informed about everything, yes, even know our innermost secrets. In spite of this, they (meant are the positive souls) are very discreet and they would never harm or expose us in any way.

We have observed that they can understand even the faintest whispers and under certain circumstance even pick up our thoughts.

An outsider cannot begin to imagine the enormous probative force of these contacts. We continually experienced situations where especially *very sceptical guests*, participating for the first time at one of our meetings, *became bewildered* upon hearing the TRUTH, actually completely lost control.

- *If an otherworldly INTELLIGENCE is replaced by another during contact, the style of writing also changes, a style that never displays the graphical style of the medium anyway. The tempo changes immediately, the way the writing is arranged on the paper and the whole notation also changes.*

Every spirit displays his own characteristics, he always maintains these and is immediately recognised by them. The fact remains that large societies have come into being to carry out these so described otherworldly contacts.

- It bears well that spiritualism is *not* a general Church, it is positioned *well above* the Churches and represents the foundation of all religions!

However, spiritualism and also spiritism is managed by dilettantes worldwide. This unfortunately leads to derailments and they discredit true, noble spiritualism. In order to damage spiritualism, the opposing sides *almost exclusively* point to these derailments, the same system is applied in regards to the Churches.

But the Churches look upon spiritualism as a dangerous competitor, one that corrects their dogmas. They fulminate against it and call it a “hellish spook” and a “union with demons”. This makes it articulately clear that the Churches continue to make the same old mistakes made in the Middle Ages, with one exception, there is no inquisition.

One can only recommend to every scientist to deal with this *in earnest*, in order to make up *their own* mind. The common view does not apply! It is a judgment of the negative side and has nothing to do any genuine contact. It has not been the intention of the natural sciences up to now to take an interest in anyone of the religions. This is the reason why spiritualism has not fared better than all the other religious denominations.

- *Religion is worship, adoration.*
- *Faith is a matter of trust.*

Which “truth” can people trust, if the “truth” *contradicts* itself in many cases? The sciences really ought to leave religion out of the equation. But the sciences ought to take a *greater* interest in the TRUTH. Spiritualism is also a truth. If there are any contradictions, one should earnestly look into them and one ought to try to eliminate them.

It is completely inexplicable why private scholars do not find recognition in the public's eyes. They often do more than an academic with high credentials.

Because academic scientists *are unwilling* to include the doctrine of the immortality of the soul into the curriculum of universities, private scholars who have studied this field from the ground up and who are willing to deal with this "hot potato" without regards to their own personal reputation, must step into the breach.

This fields of knowledge is certainly not uninteresting and in view of the latest medical insights, *very important*. If one endeavours to approach your average citizen in order to discuss this theme, one immediately encounters considerably resistance. This resistance is one of the greatest mistakes a human being can make. Because this is all about the most important part of his ego - namely *about his soul*.

- Without knowing about his extended existence beyond the grave, man is *incomplete* and also *never objective* in his observations.

Spiritual insights are only available to those *that show an interest in them* and endeavour to *inform themselves* accordingly. The Churches are unable to provide sufficient information about these insights, at least not beyond the contents of the bible.

What kind of TRUTHS has spiritualism on offer?

Its line of investigation into individual phenomenon is closely related to the methods of criminology. Thousands of pieces of evidence are collected in order to convict the spirit of "perpetrating an offence". Through infinitely detailed work and with precise logic and control, every movement, every lead is investigated and analysed in order to eliminate any deception. A lot turns out to be deception, but *a lot more* turns out to be *genuine* proof of the phenomena of immortality and supernatural intelligence. After all of these pieces of evidence have been presented, the judgement by the "jury", namely the members of the circle, is as follows: The spirit has been identified as the "culprit".

He, who denies these facts is either poorly informed or not informed at all. We'll disregard any deliberate lies here. If somebody insists to have taken part in many circles and that this still *didn't* convince him, he must have been participating in *very bad* circle and they are to be completely excluded from any line of argumentation. But there are circles that will withstand any scrutiny and they furnish an abundance of evidence.

These spirit entities take great care not to cover up their tracks. In addition to this is their own "confession": They explain in great detail what happened to them and where and how they now live. Just because the Churches ignore this evidence, there is no reason for academic sciences to follow their example.

It is a well known fact that any *exploitation* within the spiritual arena can cause *severe disorders to one's state of health*, possibly degenerating into insanity.

- *Spiritism isn't harmless!*

The layman is *urgently discouraged* from any experiment unless they inform themselves extremely well beforehand. Contact with the hereafter demands know-how and above all positive characteristics. One has to differentiate between whether somebody doubts life after death or whether they simply reject communication with otherworldly entities. Both categories are opponents of spiritism.

- *If spiritism was simply imagination or a deception or if it was simply a ridiculous superstition, it could certainly not be that dangerous.*

Many theologians and physicians express the opinion that it would be much better if one would *not deal with this at all!* One wants to avoid any potential illness. But one could also say with emphasis that one doesn't want to acknowledge the TRUTH! Nursing someone isn't exactly harmless either. It is essential and demands increasingly more knowledge. The sciences are aware that in many cases one can protect oneself against infections. Spiritual science acts exactly the same. An experienced spiritualist knows exactly how he has to protect himself against a "spiritual infection". But a *careless layman doesn't* know this!

You can see from this that it *is wrong* to simply reject spiritism or its *ennobled form* spiritualism without dealing with it in more detail. Otherwise one could demand the same from the field of medicine, which is obviously also exposed to the dangers of severe infections. Through expanding one's knowledge and through continuous experiments one learns to *recognise* the dangers *more easily* and one learns to eventually deal with them.

What certainly can be said is that the care of mentally ill people (1964) is still completely in its infancy, because vital spiritual factors *are not taken into consideration*. In particular psychiatrists ought to familiarise themselves meticulously with the knowledge gained by experienced spiritualists and this from the verifiable side and not from the perspective of doubters and opponents.

- "Mad" patients are not always organically disturbed, they don't always suffer from brain damage. The majority of so-called mentally disturbed people are spiritually ill. The bible calls these ill people "possessed". Possession is *not* an organic illness, but a *mental* illness. But the soul of a human being represents an *immortal system* within the universe.

It is therefore necessary and imperative that the system of the soul as well as the spiritual realm is thoroughly researched. But this cannot be achieved through scientific ignorance.

- *This is the reason why qualified researchers should band together to form additional psycho-scientific research communities, which will then be able to penetrate the spiritual mysteries without fanaticism and religious fantasies, so that the gained experiences can benefit mankind.*

Above all, it is a case of not fighting against an alleged superstition, but to help this *alleged* superstition gain acceptance by declaring it an empirical science.

*Any actual superstition still adhering to this science can be eradicate immediately, once the sciences are willing to add this thousand year old child of psycho-science to the rest of the university sciences.*

## 2.1 What does the bible say? (CHRIST'S promise)

When one observes the behaviourism of Christians free from any bias one can detect a strange fact: The most unpretentious believers right up to the highest Church dignitaries believe that every human being deals *directly* with GOD or *personally* with CHRIST. One maintains that:

- GOD sees everything.
- GOD listens to and answers prayers - or maybe not.
- GOD deals with all personal problems in great detail.
- GOD is responsible for all the worries and sorrows of every single human being, etc.

The same is applied in regards to CHRIST, it all depends on which one of the two these believers select as their contact.

Does this opinion actually coincide with the realities of the divine devotion in regards to the people on Earth?

This line of thought must have a cause and a source that continually feeds this opinion. The number one source would have to be the bible, to be more precise, certain passages like the one's quoted below from the Good News Bible:

**Leviticus 11:44** : I am the Lord, your God.  
**Leviticus 26:12** : I will be with you; I will be your God.  
**Exodus 17:1** : I am the almighty God.  
**Joshua 1:5** : I will always be with you; I will never abandon you.  
**Ezekiel 43:27** : Then I will be pleased with all of you, I, the sovereign Lord, have spoken.  
**Jeremiah 31:34** : I will forgive their sins and I will no longer remember their wrongs.  
**Jeremiah 32:44** : I will restore the people to their land, I, the Lord have spoken.

Or from CHRIST:

**Matthew 11:28** : Come to me, all of you who are tired from carrying heavy loads and I will give you rest.  
**Matthew 18:20** : For where two or three come together in my name, I am there with them.  
**Matthew 28:18** : I have been given all authority on heaven and on earth.  
**Matthew 28:20** : And I will be with you always, to the end of the age.  
**John 10:11** : I am the good shepherd.

And many more passages ...

It does actually give the appearance as if GOD and CHRIST were the *sole* “players” in heaven, in the spiritual realm as it were, that the people on Earth deal with. Angels, saints and celestials get a mention, but only in passing.

The assumption that *only* GOD and CHRIST are responsible and directly active on our behalf is based on a very simple *mental short circuit* and the pertinent passages in the bible are not correctly appreciated in their existing validity and are therefore not integrated into one’s own thought processes.

One of CHRIST’S own promises makes this perceptibly clear to us. He assured us that we would receive other HELP during the time that he was no longer here on Earth. This other HELP does *not* correlate to GOD or CHRIST, because that was clearly expressed by him.

**John 14:16** : I will ask the father and he will give you *another* helper, who will stay with you forever.

We are not dealing with one individual personality on this occasion, because of the billions of people here on Earth, this personality would be hopelessly overextended. The promised HELP is provided by an adequate number of divine HELPERS, who are active on our behalf in all kind of areas - even if we’re unaware of it!

In regards to this HELP, CHRIST said the following:

**John 14:17** : He is the spirit, who reveals the truth about God. The world cannot receive him, because it cannot see him or know him.

**John 15:26** : The helper will come - the spirit, who reveals the truth about God and who comes from the father. I will send him to you from the father and he will speak about me.

**John 16:12-13** : I have much more to tell you, but now it would be too much for you to bear. When however the spirit comes, who reveals the truth about God, he will lead into all the truth. He will not speak on his own authority, but he will speak of what he hears and will tell you of things to come.

We can gather from these words from CHRIST that:

1. The TRUTH lies with GOD and comes from HIM.
2. The TRUTH is not brought to us by GOD or CHRIST, HELPERS and mediums are designated to do so.
3. These TRANSMITTERS have been *authorised* to do their responsible assignment and their dependability is constantly monitored.
4. The authorised BEARERS of the divine TRUTH will not use allegories (parables), but they will talk to us in plain language in order to avoid any misunderstandings and to guarantee clarity.

In other words:

The people on Earth know *virtually nothing* about the reasons for their existence. The existing gaps in their knowledge must be filled, the extent of their knowledge expanded and mistakes and errors that have crept in must be eliminated. All established interpretations, dogmas and religious indoctrinations must be *reviewed* in regards to their CONTENTS of containing the TRUTH and if need be *rectified*.

In his day and age, CHRIST did not make any empty promises!

The HELP he announced has materialised. But in order for it to become reality, specific circumstances have to be taken into consideration. He pointed them out at the time.

**Matthew 7:15** : Be on your guard against *false prophets*; they come to you looking like sheep on the outside, but on the inside they are really like wolves.

He left us valid and practical advice in regards to differentiating and separating the good from the false and evil.

**Luke 6:43-46** : A *healthy* tree does not bear *bad* fruit, nor does a *bad* tree bear *good* fruit, Every tree is known by the fruit it bears, you do not pick figs from thorn bushes or gather grapes from bramble bushes. A good person brings good out of the treasure of good things in his heart; a bad person brings bad out of his treasure of bad things. *For the mouth speaks what the heart is full of.* Why do you call me Lord, Lord, and yet *don't* do what I tell you?

This statement is applied in every day use and applies to a high degree when the SPIRIT of TRUTH is expected to come down to Earth with the help of mediators (mediums). GOD and CHRIST *guarantee* purity and quality.

- One decisive factor is *how we are as human beings* and how we *behave* in regards to this matter.

Are we good and healthy trees or do we belong with thistles and bramble bushes?

The quality of HELP that is provided in all areas always depends on our own behaviourism. Clever folks are aware of this and they endeavour to raise their insights and cognitive faculties to a higher level with the help of divine TRUTH. The copiousness of gaps in one's knowledge and false religious tenets verify that the TRUTH that comes from GOD *looks entirely different* in a lot of cases, different from the way one has *made it out to be* over thousands of years.

- *It is far better to accept an unpalatable TRUTH than to lose oneself in oh so beautiful assumptions.*

GOD is always right, even if we, as human beings, are reluctant to accept this!

*We have the choice* to make something good or bad out of it.

The reception of *genuine* INDOCTRINATIONS has been inseparably tied by GOD to a very high, human responsibility in regards to all of CREATION and all of one's fellow man and this is why it bears this particular characteristics.<sup>1</sup>

### 3. About the true QUEST (Transmission from the year 1962)

Well, civilised man considers himself to be *enlightened*, especially in regards to the things one looks upon as “superstitions” these days. Only a number of people are aware that the material development has made enormous progress, but that the spiritual development has made *retrograde* steps. The majority of the people on Earth never ever even think about this.

Man is continuously looking for something new; *he cannot stand still* and invents, plans and constructs. His technical knowledge grows by the hour, it becomes ever more extensive. Man already reaches for the stars. He wants to conquer the universe.

But this search for something new is a search for something that hasn't existed before. Every construction, every machine and every relay is a completely new configuration, something that was hereto not within the reach of man on Earth. With the help of these inventions one tries to discover something that is already there, but not already known, respectively to unveil the secret.

But there are also other ways of searching:

This important SEARCH has lapsed into oblivion more and more, but it certainly isn't less interesting and important than the search for new material opportunities. The search for material opportunities pays off, but the search for spiritual insights *usually costs money*. People therefore prefer to choose gain over loss.

It is quite unbelievable *how petty* man is when it comes to acquiring spiritual knowledge. One would even like to participate in a school or a seminar *for free*. They expect the state to cover the cost of this education. The Church is also expected to cover the cost for providing spiritual knowledge from their internal revenue. If someone wishes to gain additional indoctrination or higher knowledge, he also expects to receive this free of charge, or at least at the best possible price. The cheaper choice of product is naturally of a corresponding quality.

In all areas of higher knowledge the search for the TRUTH eventually comes to rest. One becomes convinced that is isn't all that important to worry about “abstract concepts”, because the search for material things progresses *much easier*. Profit offers all the benefits of a pleasant lifestyle here on Earth.

- But the possibilities of an *otherworldly comfortable life cannot* be achieved through material means. Spiritual SEARCH is not abstract. This KNOWLEDGE is *far more important* than anyone could ever guess. CHRIST emphatically indicated this.<sup>2</sup>

---

<sup>1</sup> This vital basic prerequisite was most exemplary applied by the *Medialen Friedenskreis Berlin* under the leadership of Herbert Viktor Speer and the results were accordingly excellent.

Every human being must one day leave planet Earth and undertake a great journey. They will then travel to a completely unknown land:

- *Completely different LAWS* apply there.
- Living conditions are *different* there.
- *Different FRIENDSHIPS* have validity there.
- There is a *completely different ADMINISTRATION OF JUSTICE* there.
- There are *completely different OPPORTUNITIES FOR TRAVEL* there.
- And the *CONCEPT OF FREEDOM* is *different* too.

But most people have omitted to inform themselves about this land beyond their life on Earth. They feel like strangers in an enormous REALM and this REALM cannot become their home, because they have shown not interest in it whatsoever and they have not prepared themselves either. They feel homesick for planet Earth, *because they are infatuated with material things*, but these things will then be inaccessible to them.

#### **4. The cooperation** (Transmission from the year 1957)

We endeavour to bring you every possible spiritual help. This help includes insights, knowledge, censure, praise and medical support. But we are subject to certain limitations and we have to respect them as much as you respect the limitations and laws you have set for yourselves during your life on Earth. But you can expand your worldly limitations and accommodate our endeavours to a high degree in spite of that.

- *In as much as you possess a genuine spark of FAITH in GOD and if you try very hard to find a little harmony, you create a passageway we can utilise to come to you.*

Most people on Earth are economically and in regards to their health not well off, because they have blockaded the spiritual *passageway* the *good* spirits use to reach them. There is no other way! All other ways are dark and no ENTITY of LIGHT is game to use these dark passageways, even if their intentions are good.

LIGHT BEINGS are under the supervision of GOD our heavenly FATHER to whom we have to give account for everything we do. We have promised HIM eternal loyalty and obedience and we intent to keep our promises to HIM. Over us reign the HIGHER ANGELS entrusted with HIS AUTHORITY. This is why CHRIST said: "Come to me, all of you who are tired of carrying heavy loads and I will give you rest." (Matthew 11:28) He didn't say: "I will come to you", but: "Come here, *to me!*"

The same applies to us. It is the same LAW. In your thoughts, your prayers, your faith, your hopes, your adversity and your regrets you must come *to us*. You know the way, because it has been pointed out to you in so many ways. Therefore take heart and come to us, because we want to and we can help you the way you want to be helped.

---

<sup>2</sup> Matthew 16:26: "Will a person gain anything if he wins the world but loses his life?"

When somebody wants to receive a present, he cannot expect that it will simply *come to him*. Those that demand something from GOD will have to make *an effort to get it!* But most people think that it *isn't really necessary* for them to make an effort and they end up wondering why things are going backwards.

- There are spiritual LAWS in place that make it simply impossible for us to approach some people, because they find themselves in deep spiritual darkness. Their cry for help remains elusive, because they're pig-headed and we're not able to penetrate *that deep* into the spiritual domain of your Earth in order to operate *there*. *You must approach us*, you must rise HIGHER so that ENTITIES of LIGHT can make contact with you.

We are here to bring you this greatest of HELP and GOD'S BLESSING. Please make it a little easier for us! - We are pleased when somebody comes to us in thought, approaches us. We recompense every approach with precious spiritual gifts and they will sooner or later also have a *physical effect* in your world.

The truths within the bible are educational and factual - at least *most of them*. But guard against the things people *add to it*, because they think they are *oh so clever*.

- **It is a grave mistake** to think that CHRIST redeemed every single human being with his blood so that they can continue to sin, because CHRIST or the FATHER are merciful and forgive everything. The mistakes you make *are not forgotten* and *also not forgiven*; but you can make them disappear and stub them out through a new life, one pleasing in the eyes of GOD.
- CHRIST'S act of redemption allows us to help you and it assures that everybody lost in the dark spheres of the hereafter is helped also.

But you have no idea just how long it takes and how infinitely difficult it is to draw a soul from this darkness once it is *stuck there*.

## 5. Beyond the senses (Transmission from the year 1959)

Man on Earth is unfortunately a willing pupil of the anti-spirit you call the devil. But man could be GOD'S most willing pupil. The word "hereafter" already indicates that there is something *beyond the senses* and that this is difficult to comprehend in the here and now. Man placed all his hopes and dreams in technology, because he erroneously believes that only things that can be grasped and registered with the help of technology actually exist. Man's senses are not just of an organic nature, but in their last effect *spiritual* and the soul stands head and shoulder above technology. Something no apparatus is able to detect might under certain conditions be detected by the soul, even if it is encased in a body, living here on Earth. This process is so complicated that your average citizen with his general education is unable to imagine an invisible soul. *Due to his lack of better knowledge*, he simply rejects the possibility of such an existence.

But it is a sad state of affairs that prominent researchers in the fields of medicine, physics, psychology etc. also reject these things. This negation only happens because these experts *are used to* verifying everything that exists through scientific and technical means. Scientific aids and knowledge are *not adequate enough* to document and measure the FREQUENCIES that lie *beyond* all *physical* rates of vibration. But the supernatural world assists us here and responds with undreamt of ENERGY and INTELLIGENCE.

For as long as man prefers to be a pupil of the anti-spirit rather than GOD'S willing pupil with complete open mindedness, he will never progress in his supernatural education! Every human being, no matter what his social standing and reputation, planning on *ridiculing* psychology or *distorting* already attained insights without proof to the contrary, sins against the well-being of all of mankind and should be publicly accused.

- *It is the divine duty of every human being to not just bother about material things, but more than ever bother about things to do with the soul because these things are of eternal importance.*
- *Recognise all things that poison you, destroy your heart and soul, undermine your health and make your death struggle an agony and beyond that, bring you endless misfortunes.*
- *Look after your soul, because it doesn't just heal your body, but it also leads you on a journey of discovery and insights ever upwards towards the eternal LIGHT!*

Take a close look at the divine PROCESSES in nature. Nature is the archetype of patience, because particularly patience leads to consonance with the harmony of the universe.<sup>3</sup>

- Free your thoughts *from rubbish* and remember that your memory will *last well beyond your earthly existence*, yes, it will last for a thousand years and more unless it is interrupted by an intermediate incarnation (reincarnation) here on Earth.
- *GOD'S POWER is eternal. All of you have emerged from this DIVINE POWER and this is why the soul has inherited something from this DIVINE POWER, namely GOD'S immortality!*

The way the body inherits something physical from the parents, the soul inherits something from the pure spirit of GOD. Every soul is endowed with the same immortality as the GREAT CREATOR. If GOD'S SPIRIT *was not eternal*, *no physical world could have developed*, because this physical world, this universe takes an *inconceivably long time* to establish.

- *GOD'S LAWS are eternal. Man's soul also belongs to these LAWS!*

## **6. About the right INDOCTRINATION (Transmission from the year 1970)**

Well, every human being needs GUIDANCE, you wouldn't cope with the physical world without it. This is the reason why the GREAT SPIRIT has specified that every human being kept watch over and influenced. He, who lets go of GOD'S HAND must bear the consequences.

That is not enough!

---

<sup>3</sup> There are unfortunately a great number of people who find any suggestion of exercising patience problematic and react to it like a bull to a red flag.

Man must also receive indoctrination. This is why people have organised schools. Then there are also trade schools and universities. All of these institutions ought to provide education.

That on its own is not enough either!

- Man also needs *another* education, one that these schools *are unable* to provide him with. He needs *strengthening of the heart, character building and discretion* and he needs to learn *consideration for his fellow man* and he needs the TRUTH for all his decisions.

All educational institutions run by human beings fail in this respect.

In order to compensate for this failure, man is instructed and indoctrinated through MESSAGES from the spiritual realm. Most people are not aware of the enormous number of these MESSAGES circulating within this physical world. But unfortunately only a relatively *small* number of these MESSAGES are *genuine*.

An example might serve you here:

CHRIST does not babble. His messages contained important INDOCTRINATIONS. A positive INDOCTRINATION does not have to be formulated in beautiful and imaginative words; it must only contain the TRUTH and demonstrate how one has to behave and the corrections one has to make. It therefore basically depends on the RIGHT INDOCTRINATION. Let's take a closer look at all the numerous transmissions that are extolled as psychic messages: There are canticles, all sorts of hallelujah and three amen in the NAME of GOD. But if one takes a look at the whole message one finds that it *doesn't actually contain a message that would help man's progress* but only *empty lip service*, something that is never abided by and also completely senseless.

There exist messages full of hatred and contempt. There is fulmination and GOD is portrait as a merciless avenger, not made of LOVE, but consisting of bellicosity and hatred.<sup>4</sup> They are full of threats after threats. All of this is not the workings of a divine HIERARCHY, but the work of the devil or even the work of those mediums, whose craving for recognition, thirst for revenge and envy, bring forth such subconscious thoughts. Use CHRIST as an example! He never used such words; but such words are insolently proclaimed in his name in spite of this. Just where and when did CHRIST ever preach hatred?

It is astonishing how many people listen to these messages, why, because they please! There are enough underdeveloped people about who fancy themselves to be good and knowledgeable, but are just about destroyed inside by hatred. They would like to see mankind suffer divine damnation. They would like to see the destruction of all people just for their own gratification. But they forget that such a divine damnation would also be applicable *to them*.

- *There are no massive threats forthcoming from the spheres of DIVINE INDOCTRINATION! We are only concerned with appropriate indoctrination and good examples. Where communication is difficult, we employ parables. CHRIST did also do that.*

---

<sup>4</sup> See bible, Leviticus, Chapter 26, Verse 14 - 46.

- **Exercise more criticism in regards to what you're presented with!**

## 7. Justice is interrelationship (Transmission from the year 1960)

Well, you know that the universe exists. But you are very concerned about how this existence managed to arise from “nothing”. Your whole thought processes fail at this point. The mistake lies in the way you contemplate everything from an *earthly* perspective.

- There is no such thing as “nothingness” and such a condition has never existed. What you *consider to be* the origin of this “nothingness”, has always been very much existent, namely something that was, is and remains GOD.

Such an intangibly great universe has *not always* existed. But an intangibly great GOD instead, intangible in his enormous LOVE and in HIS POWER!

Primitive people *sense* GOD’S MIGHT and they observe the signs of apparitions coming to them from the spiritual realm with great interest. These people are not influenced in their way of thinking that they have bring other comparisons into the equation every time they perceive something supernatural.

But these days, a mankind that regards itself as enlightened and omniscient, has not the courage to call the supernatural by its correct name. The masses of all nations fasten their attention on just a few people and they seem to display a virtually *pathological trust* in them. They assume that these people are studied and clever enough to always recognise the TRUTH in great detail. This blind faith in science is culpable and irresponsible!

- You are not willing to apply this blind faith when it comes to believing in GOD’S EXISTENCE, where it *would have sole justification*, nor are you willing to apply it in regards to believing in “life after death”.

Thinking is *cosmic* and memory is also only possible from a *cosmic basis*. *Telepathy*, something you have already scientifically recognised, is also *cosmic*, otherwise thought and pictorial images could not be transferred into the consciousness of another person that might be 20,000km away. These perceptions are part of the functions of the physical, but they can gain their independence as soon as the connection with the physical is severed (after death).

- This means that the actual death is just *a transition to a place where the soul regains its independence*.

This activity and condition will unfortunately not enter the mindset of a so-called matter of fact person. They have *a complex* and this makes them recoil from such a possible justness. Apart from that, *they don't want to admit* that the bulk of the insights, inventions and discoveries are ascribed to the intelligent cooperation of the spiritual world. They would like to see the recognition of their own intelligence assured in any case and this makes them deny something they have somehow suspected for a long time.

Many INSPIRATIONAL SPIRITS and otherworldly TEACHERS have emerged from the academic sciences of this Earth. Some of the scientists active in the hereafter are highly credentialed and based on what they have learned in the hereafter, they would like to prove to their scientific colleagues and successors that - contrary to their secular doctrines - they continue to exist beyond the grave. But they have deridingly rejected GOD and his REALM during their earthly sojourn and must now shed many a tear over that fact that their earthly colleagues and scientific heirs, pupils and successors are *also ignorant* and *unconvinced* about the spiritual realm.

- *GOD'S JUSTICE is an interrelationship that does not allow one single exception!*

## 8. GOD'S HELPERS (Transmission from the year 1959)

Experts evaluate the spiritual world; their assessment proves that they do deal with matter, but it also proves that they have hardly an inkling about the TRUTH. There are cooks whose cuisine is their vocation, but their fares are still tasteless. But there are laymen that can prepare delicious meals, which are also very healthy into the bargain.

But woe, if a nameless, an unknown person publishes HIGHER KNOWLEDGE, knowledge that contradicts all existing theories and definitions of empirical science. In a case like this, an outsider will always be accused of an inexcusable lack of knowledge, because he does not possess the proper scientific diploma.

- *A poor old cripple might see an ANGEL from GOD in his painful throes of death, but nobody will ever believe him - because he is not the pope.*

This world *judges wrongly* and too harshly and this allows the pseudo-truth to deceive!

There is no area where the weeds of aberration do not proliferate, but the highly educated advocates of knowledge *dare not* touch these nettles; they don't want to be burned. But the little man of the street, the lover of untainted nature, in tune with nature, knows how to handle this weed; and if he gets stung or burned, he is not too concerned about the blisters.

You should therefore not be astonished that any knowledge about a far greater world has made so little progress. The TRUTH is like fungi: Fungi grow in the forest, some are fit to eat *and* others are poisonous. But it has happened that mistakes were made when collecting fungi and these people became ill or died. Because of this occurrence some people shout: "For heaven's sake, don't eat fungi any more! They are *all poisonous!*" - And even if one knows them very well, how can one feel protected from dying?

- *The messages from the spiritual realm are like fungi, they look very much alike, the good ones and the poisonous ones.*

One has to be an experienced collector of fungi if one wants to differentiate between *genuine* MESSAGES and apocryphal messages. But this doesn't give anyone the right, not even priests and scientists, to insist that *all messages* from the spiritual realm are either demonic or apocryphal.

- *If the spiritual realm didn't provide you with billions of spirit GUIDES and HELPERS from within its divine-christian ORGANISATION, who guide and protect you in an invisible and hardly perceptible way, not one single human being would be living on Earth anymore. Mankind on Earth would have become extinct thousands of years ago.*

You have no notions about the invisible dangers that are lurking around you!

The devil's forces and intelligences alone go all out to remove every single human being from this planet of redemption. Hardly anyone has ever given this too much thought. On the contrary, one asks for GOD'S help. One denies GOD, because nothing happens - and nobody ever comes to the conclusion that GOD'S HELPERS *make* a superhuman effort and that they are here for you in a sacrificing way and with boundless LOVE. They do so without reward. For the most part they do so under reproach.

Oh, you poor and clueless priests! You torment your brains when it comes to writing your Sunday sermons. You labour over the small article you're asked to write for the local newspaper. *Why don't you seriously contemplate the spiritual realm?* There is enough information available for you to talk about. Do you seriously believe that GOD has only a handful of ANGELS to guard over and observe this humanity? - GOD'S HELPERS are beyond count! Only GOD knows their numbers. The numbers here on Earth represent *less than one percent*; that's how immeasurable great the OVERALL REALM of the ALMIGHTY and almightily loving LORD is!

## **9. Concerted effort** (Transmission from the year 1964)

Let us never lose sight of the enormous field of operation!

You live in a period of great misery, a time where many souls are grief-stricken, where many souls bleed in despair and many backs break under the burden they carry. There are millions that do not know where to turn, who think that their life has been robbed of any hope. In their desperation, many people therefore look for a glimmer of hope.

- We therefore have a lot to offer, namely the wealth of the SPIRIT. We can help with *sympathy, faith, trust*, with *steadfastness, certainty* and *determination* and this to a higher degree than anyone else is capable of doing.
- Let us never forget that we are instruments of a great, divine assignation that needs us - *every one* of us!
- Let us acknowledge that we are vessels from whence the balsam, that helps to uplift the downcast, is distributed from.
- Remember that there is a POWER present that is *infinite* in its effect and it is *at our disposal*. This is the POWER of the SPIRIT and it can solve any problem that mankind is faced with.

We can measure our success on the number of souls that *are freed* from bondage, on those that *do not cry anymore*, unless they shed tears of happiness. All those whose body and soul have been *uplifted* once again and who no longer wallow in agony also count. The success of our mission is also proclaimed by those that are no longer affected by the serfdom to false faith and doctrines created by the Churches. All those *consciously aware* of the majesty and the power of the spirit also proclaim our success.

All of this is the result of our service and the contribution of those that work with us, whose life is devoted to the noble assignment of delivering mankind from the earthly shackles of ignorance. But there are still a myriad of people that have to be approached first in spite of this!

Let us hope and pray and contribute, in as much as it is within our power, so that we are successful in this, namely to reach and touch many of these people, so that they too can attain and acquire the security they are still lacking. They should also be able to recognise these ETERNAL TRUTHS, which represent a refuge for the human race. We must make sure that these people *become aware* of the POWER of the SPIRIT, so that they can be revitalised by this FORCE, renewed through this POWER, consoled by the present and ennobled by the purpose. Those that are presently still far removed from this will soon participate in spreading the LIGHT of the SPIRIT over all of mankind.

And this is how the NEW WORLD will come into being:

- *Thrones will topple, rulers will resign, tyrants and dictators will disappear. But people will by and by find their way back to themselves and the SPIRIT will triumph in everyone's life. This is what past efforts are suppose to achieve. I will never despair, because I see the constant advancement of the human spirit towards its freedom.*

The certainty of a continuation of human life has been established for you. This is why you can dedicate yourself to the great assignment of eliminating everything that stands in the way of perfecting the human spirit, which embodies man's natural inheritance. All greed, avarice, blood guilt and selfishness ought to be wrestled down.

All those that have been denied their incontestable right up to now, must be helped to lead their life in the way their status as children of the GREAT SPIRIT *demands*!

## **10. Questioning the dead** (Transmission from the year 1958)

GOD'S realm is a world of LOVE, because GOD is the source of all LOVE! This realm is unimaginably larger and more versatile than the physical plane, which is also visibly apparent in your sky. But this spiritual realm, consisting of a composition beyond any physical perception, is organised into many levels, that is to say spheres. All of these spheres serve as abodes for people's souls *and also the souls of many animals*, because they virtually represent *classes* in GOD'S MACRO-UNIVERSITY.

There are also some spheres near your Earth that do not belong to the higher categories. The reason lies mainly with the behaviorism of the souls that physically live on Earth, because they attract souls that have distanced themselves too far from GOD like a magnet and this according to the law of “each to his own”. GOD might be everywhere, but these souls have little contact with HIS great SPIRIT of LIFE. *This is why the Earth is surrounded by a “realm of the dead”*. In order to explain this better to you:

- *Innumerable souls live in close proximity to all the people who live on Earth and they are strongly connected to this earth sphere. We are dealing with souls here that have stepped off Earth’s plan without having found divine FREEDOM.*

The “realm of the dead” has many disadvantages, particular *because LOVE is dead* there and all the souls there are in some way or other *ill*. The spiritual contact to these “LOVE-dead”, who have not been awakened to the true faith and knowledge, reveals all the signs of pathological conditions. One cannot be careful enough! The Church mentions demons and condemns this world of spiritual darkness - without the right to do so - to eternal damnation.

- *We do not condemn this world, because CHRIST does not condemn it, we feel sorry for its denizen and we try to help them through prayers and LOVE!*

You must be quite clear about the fact that every spiritual contact with the spiritual world also represents a contact with this “realm of the dead”. He, who converses with these dead, that is to say, these loveless souls, has the duty *to help* them and not the mission to question them! What pertinent answers can a damned soul give, one that brought all the mistakes made during its earthly existence with it to the hereafter, mistakes it cannot shake off? MESSENGERS on the other hand are “authorised” TEACHERS from the CHRIST SPHERE and they come to you to indoctrinate you and to bring you knowledge from other worlds and the realm of GOD. But these souls have to descend through the realm of darkness in order to find their way to you. This entails making great sacrifices and it takes a lot of LOVE and tons of courage to do so!

- *Strive for contact with HIGHER SOULS, you will then not be questioning the dead and you will not be disappointed!*

The reason why spiritualism is still in its infancy is reflected in the fact that questioning the dead - which actually represents a kind of back-stairs spiritism - does not stand up to logic and is *rightfully* denounced by the major Churches. But no shadow without light! You cannot expect logic from the “dead”, from loveless souls who find themselves in a situation that is far worst than the worst life on your Earth. Lies, treachery, defamation, hatred and ungodliness are the characteristics of these unfortunate souls. I say as CHRIST said, “dead”, *because all positive characteristics are dead*, especially LOVE for their fellow man.

**Luke 9:60:** JESUS answered: “Let the dead bury their own dead. You go and proclaim the Kingdom of God.”

**John 8:51:** “I am telling you the truth, whoever obeys my teaching will never die.”

Only LOVE may save these souls. We given them this LOVE, but *you condemn them!* The Christian Churches warn you: “Leave the dead alone!” But the dead *do not leave you in peace*, because this peace your great Churches preach *does not exist*. How can a Christian Church warn you about the dead, how can they not converse with them, when this Church believes in the resurrection on “Judgment Day” and preaches this dogma with great pertinacious ness?

## 11. Christian spiritualism (Transmission from the year 1974)

Dear friends, well, it is unfortunately the case these days that many people turn up their noses when they hear the word “Christian”. As if it was a disgrace to call oneself a Christian. One seems to have nothing against being labelled a Marxist or some other political party member. But one cannot be a Christian by simply belonging to a religious community. In order to be a Christian, one has *to become* a Christian first!

- *One doesn't become a Christian by being christened or by belonging to a cult, but only through showing excellent humanness.*

In order to be a *genuine* Christian one has *to become a human being*. The word “Christ” therefore means nothing else but “human being”. Why is one ashamed of these words if they mean human being and not animal?

- *Christian therefore means as much as humane!*

But *Christian* spiritualism has existed for many years. With this terminology the mockers receive water for their water mills. As if we're dealing with superstition, witchcraft and devilry or with exploitation and deceit. No, dear friends, mankind errs enormously in this case, because we are dealing with human contact with the spiritual realm here!

All the many Churches and religions have not been successful in convincing the rest of the world that a spiritual realm exists. There is enough evidence, but the sciences make a powerful effort in order not to have to admit what it knows - but others have no interest in. Woe, woe, the eyes of those in power are cast over the sciences and they mean business, because they don't just decide over the way things are run, but also over life and death. But the nation is not in a position to undertake its own enquiries; it is unfortunately dependent on acknowledging what the press, radio and television dishes up.

But who is willing to insist that this information always represent the objective truth?

An expert knows what lies are utilised in this arena!

- Christian spiritualism is *not* sectarianism, but a scientific exploration of the universe of the divine DOMAINS.

However I have to admit that great mistakes are often made. But experienced contactees (mediums) know very well how to deal with these spirit entities.

- Hardly anyone ever contemplates the fact that every religion on Earth *obtained* its knowledge, analogies and dogmas *through contact with the spiritual world*.

Once the Christian Churches realised that failures resulted from their labours they soon abandoned their efforts. Aside from that they listened to the inspirations of scientists, thereby making the source of KNOWLEDGE and INDOCTRINATION to ebb away.

- *But the spiritual realm will not be silenced! Mankind will continue to receive the TRUTH anyway.*

## **12. Religious dreamers cause mischief** (Transmission from the year 1957)

You, who are optimally informed about life after “death” are very surprised that the rest of mankind has so little faith in this kind of knowledge. You feel that there has been enough evidence produced to eliminate all doubts and you cannot understand why the doctrine of a life in the hereafter has become an object of ridicule in the minds of all too many people.

- We are *not always* dealing with adversaries who hinder and oppose this.

The world beyond has been morning the fact that this disbelief has been so deeply rooted within you for thousands of years. All uninformed people that leave their earthly existence, their great testing period behind in order to come to us, the great realm of REALITY, are *bewildered and horrified* that they are still alive. This realisation gives them such a jolt that they often take years to overcome the shock.

They would like to convey the fact that they are still conscious and physically alive to their relatives and this with all their might. In some cases they might be able to make themselves noticeable for seconds or even minutes and this in turn give the relatives they left behind also a sizable shock. But then to good neighbours and know-better, the pundits, journalists and many, many other friends turn up and they take great pains to prove that these contacts with the hereafter are mental delusions.

It's a completely different situation with mediums.

They are *well aware* that their contact with the hereafter *is genuine* - and nothing can mislead them. One cannot argue the point with them, because their experience *goes beyond* theory. They often put up with ridicule and prefer to be labelled mad, than to falsely admit that they are mistaken.

- But there are some amongst these people, amongst these highly sensitive mediums, *who do more damage than is good for them* - and they destroy people's faith and unintentionally attack GOD'S PLAN.

The scientists, physicians, psychiatrists, psychologists, politicians etc, stalk these people. They provide “evidence” that spiritism and spiritualism are pure humbug.

- Religious dreamers demand the greatest of humility, the greatest of FAITH in GOD, the greatest LOVE from their fellow man, but are *not willing to make their own positive changes*. They look upon themselves as *chosen ones*, because they are “GOD’S instruments” and GOD must therefore be completely happy with them.

They lose all objectivity in this insanity and fall prey to the sinister forces, which reassure them in their oh so agreeable craving for recognition. These mediums and their followers *cause mischief* and they might just end up in a lunatic asylum!

I know of one case - one of many - I will hint at:

There are religious dreamers who believe to have been called upon by GOD to perform great deeds. They allow themselves to be duped by reincarnations and they believe to have been CHRIST in a past life. They believe in the witchcraft of karmically encumbered mediums who transmit positive and negative messages wantonly jumbled up.

Some people allow themselves to be completely dominated by mediums, like for instance the tsar of Russia in times gone by. Some people have a powerful psychic disposition and it affects their environment in an extremely dangerous and destructive way; because with their psychic ability they listen to words from a different world - it is the *lower* region of the hereafter *in theses instances* - one strongly believes in them. All who warn are correct in this case.

- *Do not rely on messages that enhance the craving for recognition!*

### 13. Questions and answers to this theme

Question : What are the reasons why spiritualism receives so little recognition?

AREDOS : The divine TRUTH has the absolute right of scientific recognition and care; but fanaticism furthers the cause of superstition, thereby making the TRUTH unbelievable and ridiculous. This is the basic problem with this humanity and the greatest service afforded and possibly afforded to the mighty, but negative angel Lucifer.

- *Fanaticism is devoid of all logic and doesn't allow anything else to hold sway.*

Question : What drastic means can be applied in order to convince mankind about life after death?

AREDOS : The most common assertion is that nobody has ever returned from the hereafter.

- *Ghosts verify the opposite!*

Millions of people on Earth experience the spontaneous appearance of departed friends and relatives. Most of them do not talk about it, because they know that they will only be laughed at or felt sorry for. Much more convincing are the demons of lower souls, who

(different from spiritualism) make themselves known in spiritism; we are really dealing with *drastic* evidence of an existence here that is different from that of man on Earth, that is to say, proof of their continued existence beyond the grave. Apart from that, GOD is not closefisted when it comes to MIRACLES, they are there to be seen by all and sundry.

Question : Most people doubt the existence of the hereafter because they ascribe these types of messages and contacts to religious ecstasy, respectively to delusions. How can one best meet these objections?

AREDOS : *Well, the best evidence of an existence in the hereafter consists in that a contact with the hereafter - if it is genuine - immediately reveals heaven and hell.*

Great LOVE and harmony on the one hand and unbelievable malice and blasphemy on the other hand confront one another very distinctly. These superlative extremes represent particularly powerful evidence of the fact of an intelligent, otherworldly existence, because a spiritual battle develops.

This is also the reason why even Church fathers recoil from contact with the hereafter and why they warn about spiritual demonology, without endeavouring to vanquish evil with good. The sciences have no explanation for this battle and that is why they don't mention this phenomenon.

Question : Can this demonic side not be prohibited?

AREDOS : This would be a grave mistake, because it clearly shows that an infernal state *exists*, something CHRIST already mentioned.

Question : What is the difference between “questioning the dead” and “spiritualism”?

AREDOS : One ought to leave the dead alone, as you know, they have their own assignments.

- *If a departed soul announces itself of its own accord, it quite often has permission to do so.*

Spiritualism is not questioning the dead, it represents a *religion supported by evidence*, with the assignment of bringing inner peace and peace on Earth.

Question : Can one say that so-called questioning the dead, forbidden according to the bible, represents contact with those otherworldly entities that have *no permission* to entertain psychic contact with the people on Earth?

ARGUN : Approximately. Many departed souls are virtually conjured up by house-spiritism. It is different in our case. But I have to say that many evocations *lack the invocation of GOD*. It is as if these people try to *coerce* contact with their departed relatives by force.

Question : Spiritual miracles take place every day, but most people do not want to believe in these miracles. They maintain that these types of phenomenon are pure jugglery. Wherein lies this?

AREDOS : One knows that people like to be in a mood for mockery and antics. But as one *doesn't know* how a spiritual phenomenon comes into effect, one looks for the simplest of explanation - and *it is incorrect*.

Question : There are many great contradictions in regards to spiritualism. This divides this religious belief system just like the major Churches. What is your opinion in this regards?

ARGUN : We can only advance if we *recognise* and *sort out* our mistakes! This is why we may *not lose ourselves in dreams and ecstasies*, otherwise one's objectivity is dazed.

- We must face everything from a *neutral* position and only judge *objectively*.

This is why the presence is of utmost importance; it contains a lot of untruths and this is why we must bring about a change for the better with all our might.

Question : From which group or source will the renewals of faith come from?

ARGUN : Naturally only from a community that avows to the TRUTH *without* exceptions! If spiritualism has managed to undo the first knot to start with, all other knots will be easier to undo until the thread is stretched out again.

Question : How can we convince others with our indoctrination *even better*?

ARGUN : Words unfortunately cannot express the complexity that should actually be communicated. But thoughts have a different ENERGY and this is why telepathy would serve us better. But telepathy has unfortunately atrophied and only a small remnant remains.

- *Only genuine logic can extricate the TRUTH - and it must be convincing!*

Question : Wherein lies the major difference between the more popular religions and spiritualism? Spiritualism, as a more cultivated way of communicating with spirits, is generally regarded as imagination even now.

AREDOS : Spiritism is *as important* as spiritualism, *because it delivers evidence* of the existence of disembodied spirits that consciously continue to exist. But spiritualism does not communicate faith, it communicates KNOWLEDGE gained from *practical experience*!

- Religion is not regulation, but *an attitude of a spiritual person in relation to GOD*.
- But certitude leads to responsibility, *to recognising one's obligation* and to the ennoblement of the soul.

Religion as something mandatory, external has had dire consequences and is something the state recognised Churches should have avoided and prevented.

- *But he, who avoids the SOURCE of divine TRUTH, will die of thirst.*

Question : It is an unfortunate fact that a lot of people endeavour to attack or persecute spiritualism. What will be the result of this?

Answer : I say to you that you cannot lose this battle. Christianity was also unstoppable, even though it was persecuted right from the start. Those that proclaimed the TRUTH then, had to suffer a martyrdom that cannot be compared with your worries and hardships. It lasted thousands of years in spite of that.

- *I am of the opinion that the persecution of a doctrine in particular gives it the most important impetus to spreading it further. Persecution transforms the intended effect into its exact opposite.*

The exact same is happening in your time and your generation. You have a lot of enemies and they try with all means to prevent the spread of this indoctrination. Especially moralists and Church representatives act in an unchristian and alienating manner in regards to ethical and moral maxims. Their behaviourism is not a religion that could serve as a shining example. But all of these endeavours are powerless against the WILL of the GREAT SPIRIT!

The TRUTH will remain with you, who stand by it so truly and devotedly and you will enjoy the resplendence that will be poured over you. A “new broom” is already in service and it will sweep away everything that is negative. Naturally also dialectic materialism, respectively all other nonsense too. LEGIONS are at your disposal in this battle and they will be ready when called upon!

Question : What does the spiritual realm have to say about any physical research in regards to the spiritual?

Answer : It all depends on *what kind* of research you have in mind. The word “physical research” leaves a bad taste in most spiritualist’s mouth. All these meetings, experiments and séances are, according to the letter of the word, proper research, because the spiritual realm searches with all possible energy for means that will allow the power of the spirit to make itself known and manifest itself to a large degree in your world. We learn from you and you learn from us.

- *I am in favour of any research whose motive is the wish for higher KNOWLEDGE.*
- But those that are *given* this KNOWLEDGE have to contribute to the welfare of all human beings. This imposes *a duty* on them at the same time. Those who have found GOD along the way are *obligated* to show others the way they have so successfully trod upon.

But there is a lot of research like this that ends up in a dead end. This especially applies to Church dogmatists who tentatively chose the way of the spiritualist.

- *He, who cannot extricate himself from the dogmatic will end up in a blind alley.*

But I certainly find any research as unnecessary, if it endeavours to destroy the accomplishments of genuine mediums and extraordinary phenomenon by sowing *permanent doubt*. One can talk about proper research concerning this matter, if the motives are *genuine*.

- *Legitimate research always has the approval of the spiritual world.*

The spiritual world quite often calls upon the co-operation of lower spirit entities when dealing with the creation of difficult physical phenomenon.

Question : Is UNIVERSAL SPIRITUALISM the main religion throughout the universe?

ELIAS : Yes, that's correct, but this spiritual religion is also *the most tolerant* amongst all religious denominations. For as long as it continues to acknowledge all colours and races as well as all inhabitants of other stars systems and all denominations, for as long as it reaches ever upward, that is to say to GOD, this religion will be *the most progressive*.

Question : Can you tell us what's so special about this religion?

ELIAS : UNIVERSAL SPIRITUALISM, the way ASHTAR SHERAN describes it and sees it, is *the least dogmatic* of all the religions you're familiar with - with the exception of a few little dogmas, because a few guidelines must surely be in place. But there is *nothing extreme* about it. This religion is by all means a healthy one.

Question : Spiritualism on Earth is not unified, because there are *various* views in regards to the doctrine of reincarnation. How did this discrepancy arise?

ELIAS : It has been expressed often enough in England that human beings are reincarnated. This is because England has excellent spiritual connections and spiritualism has made great strides there. It is paradoxical though that the English, I means the spiritualists there, relate this reincarnation only to other planets, but not to within the regions of planet Earth.

Question : Will spiritualism become the world religion one day?

SILBERBIRKE (Silverbirch):

- *The plan is that the TRUTH should not just infiltrate through one instrument, but through tens of thousands!*

Remember that people always recorded progress whilst the power of the spirit *was in operation*. The spirit now begins to assert a claim on his INHERITANCE, assert a claim on his spiritual freedom. Intuitiveness and inner compulsions are so powerful that they *can* no longer be denied. New ideas affect millions throughout the world and they now call for the freedom of body and soul.

Question : Dear ELIAS, could you direct a few solemn words at all spiritualists?

ELIAS : Yes, I can do that: Dear readers and listeners, this is ELIAS speaking and I'm speaking on behalf of the spiritual realm.

- *Do not shut the TRUTH out!*

Don't think that all roads lead to Rome anyway. They certainly do, but a lot of precious time is lost if you reach Rome the long way round. Spiritualism is a very precious gift for man, but it can also turn into a maze.

- *Therefore don't fritter too much and apply good criticism; be logical and just and you will recognise the objective TRUTH!*

Question : How can one best explain the doctrines of spiritualism to others?

Answer : This is a very difficult question. It always depends on who this person is. You must take into consideration that everyone comes to you with *different* concerns and that everyone stands on a *different* level of spiritual development.

It is quite understandable that many yearn for the sound of the voice and the touch of the hand of those that no longer linger amongst them, because an expression of LOVE remains. Others are not concerned with personal elements; they search for a *scientific* approximation; others want to solve *religious problems* whilst others concentrate on *philosophical problems*, but many *are not prepared sufficiently enough* into the bargain.

This is the answer for everybody, therefore hear what is true:

- *Life continues on a conscious level after the so-called death and you, the individual spirit, continue to exist.*

Everybody ought to come and by means of *sound* research *test* that everything we say *is true*! This will eventual convince all sensible men and women. But you'll achieve nothing with the unreasonable. All efforts are lost there.

Question : What does the spiritual realm have to say about the attacks the pioneers of TRUTH are exposed to?

Answer : I can see the mighty POWER of the spirit *break through* and I know that it will be victorious.

- *Many will have to suffer, but that is the price you have to pay for being a pioneer. You must remain steadfast and you may not abandon your post. That is all you can do.*
- *Watch over this precious jewel call TRUTH you have been entrusted with. Live an exemplary life so that nobody can point at you with contempt and say: "See, this is the result of the so-called spiritual doctrine!"*

But whatever happens, no matter who is attacked, the work must continue! The ill demand a cure, broken hearts await alleviation, the TRUTH demands to be spread and people wish to find themselves.

I must repeatedly to say to you:

- There is *no power* that could prevent all of this, whether it comes in the garb of religion or not. *It is too late!*
- Once mediums are attacked it might *even get worse*. But they have to fulfil their divine DUTY *just the same*. - CHRIST also fulfilled this divine DUTY and he paid for it with his life.
- Fear can be transmuted into courage and hatred into LOVE.

Some might think that these DOCTRINES are difficult to accept. The senses encompass a huge range of feelings and emotions. If you manage *to hold sway over* them, you begin to develop and *mature* and the base is transformed into something higher.

I always teach that life consists of *opposites*: Hatred is reversed LOVE and fear is reversed COURAGE. These have all the same qualifications, but they are expressed from different polarities of one's emotional state.

- *In emphasised that you can fall as deep as you can ascent on high!*<sup>5</sup>

Question : In spite of all the progress parapsychology has made, spiritualism doesn't come off well, because spiritual phenomena are misinterpreted. How do you see this?

Answer : You know that the introduction of Christianity - as you call it - was not delayed because CHRIST'S disciples and pupils were persecuted. According to your records, they had to endure tortures that could not be compared to *your* persecutions in any way. In spite of all the animosities, suffering and agonies these enunciators took upon them, the MESSAGE of Christianity has managed to survive for all times. Many are of the opinion - and I'm one of them - that the persecution of an important doctrine gives it that particular impetus of dissemination.

- *The persecution of a doctrine brings about the complete reversal of its intended effect.*

---

<sup>5</sup> In view of some psychic working groups a very true statement.

Some time ago I drew your attention to the fact that your enemies will try to defeat you with their *old* aspersions, by catapulting them at you in a *new* garb. They try to attack you with all the means at their disposal, means like the *press*, *radio* and *television* and with the help of *certain* laws. But the POWER of the SPIRIT *can no longer* be suppressed. It is already too late. We are already an army of men and women who are ready to furnish evidence that the human existence is *endless*, that *every* human being continues to exist and *not just the few* that call on “CHRIST”.

Eternal life is a *natural factotum* and LOVE is *immortal*. Any mourning is unnecessary, because divine LOVE and INSPIRATION abound and they are at the disposal of *everyone*.

Apart from those that possess a *sincere* heart and a *humble* disposition, those that *wish to preserve* KNOWLEDGE and are ready to dispose of old fables and myths; all who long to discover the TRUTH and as soon as they have gained it, are willing to serve it, nobody else has special privileges. But I include all those that *would like* to live a free and meaningful life as citizens of a new world, a better world.

No Church, no law can make the FOUNTAIN of INSPIRATION dry up; this vital STREAM will *inexorably* continue to flow.

- *Continue to fear nobody and nothing.*

Remain determined crusaders of the TRUTH that will deliver these people from slavery and release them from the shackles of ignorance.

Question : Why does one not encounter the power of the spirit in the major Churches? Why do we *not* find INSPIRATION from the POWER that flows from the SOURCE of all KNOWLEDGE there?

Answer : The Churches have erected a bulkhead between the here and the hereafter and it prevents any expansion of the spiritual within the Church. But the divine TRUTH *is already* amongst you, in as far as you will to accept it. The tears of mourners and the grief of the distraught *cannot* be alleviated through the reciting of proverbs and phrases or through manufactures doctrines. People burdened by sorrows once again turn to those places where the POWER of the SPIRIT shines. These places *are sacred* because LOVE dwells there. All those that think that this development can still be arrested are mistaken.

- The circle of influence of the divine SPIRIT is *particularly great* on this Earth.

Question : There are also fanatics amongst spiritualists who are of the opinion that the physical plays a very subordinate role. The spiritual is *overemphasised* and this puts people on their guard. Do you see it like that also?

Answer : It is a fact that the number of those aware of their psychic abilities are few compared to those that are not aware of them. This is the reason why I find it imperative to *highlight* the eternal values in order for everyone to receive the correct explanation.

- *I never teach you to neglect the duties you have to fulfil in regards to the world around you!*
- *Once you are aware of the spiritual TRUTHS, you are endowed with a much greater sense of responsibility because you know your place in the universe.*

You are better citizens, not just for your country, but for the whole world. You start to appreciate the PLAN that *affects* your life and you know your station in life.

If you are smart, you *live* your life accordingly!

The body has certain duties to fulfil, because it is the living TEMPLE of the SPIRIT. You must *pay attention* to the instrument utilised by the spirit to function on Earth. It would be just as wrong to ignore spiritual realities as to neglect your mundane duties.

I can muster very little sympathy for all those that I think assume that they have to abide by the wishes of their egotism by withdrawing from the world, by not feeling any responsibilities for the world around them and for all of those that seek a kind of satisfaction in aesthetic or mystic contemplation. *You must strive for a healthy balance!*

You should *apply* your knowledge on all *levels*. You must be *aware* of your INHERITANCE and your purpose, *only then* can you fulfil the purpose you have come to Earth for.

Question : Why does the Church regard spiritualism to be work of the devil?

ELIAS : Because the Church fathers cannot make the distinction between spiritism and spiritualism:

- *SPIRITISM doesn't always* have good contacts, it also has bad ones.
- *SPIRITUALISM* represents contact with *positive* TEACHERS.

Question : Can you explain this to us in more detail?

ELIAS : Spiritism had its roots in America and flooded right across Europe. But because it was practiced by many people everywhere *without prior knowledge* and *with material gains in mind* most of the time, maleficent derailments eventuated. The Church banned spiritism, because on these experiences. This couldn't really be faulted. But spiritualism represents a *higher form*. To paint them both with the same brush is incorrect.

Question : In other words, contact with the hereafter is made more difficult because hoaxing and lying spirits wreak havoc?

AREDOS : The spiritual world is a world of superlatives.

- *Everything is enhanced in the hereafter and this also includes the sensory activities of the soul.*

He, who lied often and with glee on Earth will not find it difficult to continue with this particular habit. But everything in the spiritual realm is superlative, that is to say, *very much enhanced* and this is why negative souls are compelled to lie and hoax *superlatively*. He, who was particularly negative during their life on Earth will be *even more negative* in the hereafter than during their life on Earth and these souls find it immensely difficult to let go of this particular habit.

- *Whatever man acquired mentally on Earth will remain with him, even when he enters the spiritual realm.*

All talents and other mental abilities remain intact. Every language learned, every spiritual insight, everything remains, only matter loses its value, it doesn't count anymore.

He, who was affectionate and considerate here on Earth will express this *more than ever* in the hereafter. LOVE is also superlative there. LOVE in the hereafter is *far superior*; it is more powerful than here on Earth!

Question : What influence does a spiritual meeting have on the participants?

ARGUN : This varies a lot. A good circle can bestow energy on all the participants. But a bad circle, no matter how small it might be, can result in a lot of damage.

- In a profane house-circle (Backstairs spiritism) *the participants gradually lose their independence* and with their inquisitive questioning of the dead, they play right into the hand of lower spirits, which in turn will dish up the most incredible lies and *evil instructions* that are then carried out with *hypnotic obedience* and without criticism.

Question : Is there a marked difference between the messages received from an unknown MESSENGER of LIGHT and those from an ANGEL?

ARGUN : *The best messages depend on the genuine humbleness of the mediums and the circle participants.*

This has nothing to do with their esteem or with the trade or profession they're in. The simplest of person can receive the best messages if he is *genuinely* humble and modest and devoid of any craving for recognition. A *humble* person will not immediately regard himself to be one of GOD'S chosen ones and assume that an ANGEL from the highest spheres, a representative of GOD'S ELITE of all people, comes to him.

- *But where there is no humility, the divine COGNITION, the primary prerequisite for an excellent connection, is lacking.*

Would you, an eminent SPIRITUAL BEINGS full of KNOWLEDGE and INSIGHTS, reward the presumptuous first or would you like to prefer to reward the humble, in spite of all your LOVE?

Question : Can you explain to us what genuine humility is all about?

ARGUN : *There is no humility without merciless self-criticism!*

He, who gains divine INSIGHT through self-criticism will come to the conclusion that he *is infinitesimally small*. He is aware that he is infinitely minuscule and that GOD is unimaginable large. After having made this discovery, he must realise as a positive person that he can only grow by realising that even though he may be small, he still represents a *minute particle* of GOD. Because he *is* a PART of GOD *he can grow* and this means in this case that he *near*s GOD. But he will also be aware that even though he might be small, GOD'S enormous POWERS *are at his disposal*.

Question : Whereby does one recognise a MESSENGER of LIGHT?

ARGUN : *Not* by his "IN THE NAME OF GOD" or similar words.

- Solely by his *good manners* and his *unobtrusiveness*, by his *patience* and above all by his *great LOVE* for all mankind.
- A MESSENGER of LIGHT *does not give orders*, he only *teaches* or *admonishes*.

The free will to choose always remains preserved, it is *respected absolutely* by every MESSENGER of LIGHT. A MESSENGER of LIGHT will never say: "You must!" Therefore comply with this great example you have learned from the ANGELS. Only the evil say: "You must!"

Question : Why are even pious people so often subjected to hoaxes when they participate in common house-spiritism?

AREDOS : The spiritual LAW states: "Do not destroy hope!" This is why material and personal questions are futile. This mistake is made everywhere where house spiritism is practiced; one is very surprised after when all the many positive promises do *not* eventuate. These are virtually pious lies, but we reject them also. One doesn't take things all that precise in the lower spheres.

Question : In many circles the participants form a chain by holding each others hands. What are the advantages of this praxis?

ARGUN : This method is better suited for producing *physical* phenomena. (Materialisations)

Question : Is it better if spiritualism continues to grow in its present form or should it be an officially *organised* religious indoctrination?

SILBERBIRKE: I deny that fact that it is a religious indoctrination; because it is simply KNOWLEDGE! Nobody can control the breath of the wind and this applies to the growth or the dissemination of knowledge too. The TRUTH wants to blossom in its *own way*; this cannot take place along prearranged lines. The only thing that can be done is to *create the means* whereby the TRUTH is made more accessible to more and more people.

The effect this KNOWLEDGE has cannot be ascertained beforehand; no more than rules or standards for the way it should be disseminated can be drawn up. All you do is to subject yourself to your own *honest responsibility*. Your *performance of duty* within the LIGHT of your understanding. You must help wherever you can and you must pass your KNOWLEDGE on and allow the efforts of the spirit *to go its own way*.

Question : Do thoughts possess real ENERGY?

SILBERBIRKE: Thoughts have ENERGY. *Thoughts are life's creative PROCESSES*. They show their *own* forms of expression in reality, but they are limited according to the sphere they're utilised in. Thoughts *are real*, but this is an unknown in your reality, because they have no substance. In our world, where there is no bondage of the flesh, thought have a far greater reality; because we live in a world of thoughts, of the spirit.

Question : What is the answer to the cleric's assertion that spiritualism has *nothing new* to offer the world?

SILBERBIRKE: I say that this is not an assertion at all. We have nothing new to add to this world but what we *teach as religion based on evidences* - and this for the first time in history - namely what we indicate and teach from the realm of religious creed, hope and speculation to show just what *can* be achieved. Aside from this fact there is nothing new present. But I'm not aware that CHRIST taught something that was new. It is true, this indoctrination isn't new or modern. But what about the TRUTH?

Question : Where do you obtain your knowledge from?

SILBERBIRKE: We have access to knowledge in a form that you're not familiar with; you depend on knowledge that is collected by individuals. All sources of information are *open* to us, even how one can grasp knowledge *instantaneously*. One of life's miracles in our world consists of a superior and glorious CORRELATION that isn't just available in regards to knowledge, but also in the realms of the spirit, literature, art and music. All of this is *immediately accessible* and *whatever is still unknown to us* is also at our disposal.

Question : Why is it that we don't always receive the correct, respectively an *exhaustive* answer to many questions and themes?

ELIAS :The TRUTH reigns here, where we are. Many questions are conditional to the respective sphere. We always teach you the things that *your level of development* allows you to *correctly comprehend*. If we teach you the TRUTH in a way you *cannot* understand, we only achieve the opposite result or your interest in our HELP will abate. The soul can only progress level by level and no level may be skipped in the process.

The soul will gradually begin to comprehend the things that were impossible to comprehend before. I was just about to talk about things that can only be debated in the highest of spheres. You might have understood *some of it*, but certainly not everything. You might have misunderstood this completely and that could have created a lot of damage within you.

Question :Wherein lay the mistakes when *consorted* information is produced?

ELIAS :The spiritual realm is *not* to blame, but *the interpretation of the communication is*. In regards to reincarnation it is wrong, because a *preconceived* idea prevailed in England. This is the reason why a dogma was applied that always hindered the interpretation of any *correct* explanations in regards to reincarnation. This unfortunately happens over again.

- *Reincarnation represents a fact that cannot be disputed in any way. The moment a reincarnation takes place varies infinitely.*

Those present at these séances categorically reject any thoughts on reincarnation, because they prefer to believe in a beautiful heaven. They abhor their sojourn here on Earth. Especially English spiritualists think that the Earth is the worst vale of tears that exists throughout the universe. They think that being reborn on this planet is something most horrid.

From this mental attitude spring all the differences of opinion in regards to the doctrine of reincarnation in *other* places also. But these people forget that times change continuously and that planet Earth is one of the most beautiful in the universe. What kind of image of our present day world would the people have had during the time when pestilence ruled the world?

Question :Are there souls in the hereafter who would *gladly* return to Earth?

ELIAS :There are also people on Earth who have this yearning to leave their place of birth and go to a foreign country and when they're there, they lament the fact that they are not at home anymore.

Question :As a member of a circle, how should one behave so that the reception of messages is not disturbed?

Answer :*Every preconceived idea represents a hindrance to any message.*

It is your assignment to be *receptive* and *not* to bombard the atmosphere with authoritative thoughts.

- The more you concentrate on receiving answers to a specific question - *and only that question* - the more you jam the whole “transmitting installation“.

This is an installation that *can* transmit a lot, but it can only happen when it is *free* and when it doesn't have a thought barrier imposed on it. It only takes *one single* participant to completely jam it!

We can only reach you when you're in a *sympathetic* and *receptive* mood, when you open the doors to your heart and your soul and when you say: “I am ready to receive something”. But if you concentrate on a specific theme and if you *only* want to hear something about this specific theme and nothing else, it will have an inhibiting effect and you create great difficulties.

Question : What kind of opponents can spiritualism expect to encounter?

ARGUN : Your opponents are *everywhere*, sometimes veiled, most of the time in the open. They lie in wait for any opportunity to counteract GOD'S PLAN. But there is one thing you can rely on:

- *Spiritualism will one day be the world religion!*

Question : Why are even humble mediums duped by during séances? Why don't they have PROTECTION, or wherein lies their failure?

AREDOS : He who publicly *asseverates his humility* is unbelievably *vain*. He wants to be *recognised* and *lauded* by the public. His asserted humility is unfortunately just a cover and it only just hides his great sins. But the otherworldly world *sees everything*. It is generally known that some of these apostles of humility are able to go on a fast in order to make an even greater impression with their play acting.

Question : Is it the sciences or the Churches function to promote spiritualism?

Answer : A great endeavour still awaits its fulfilment, namely the *complete eradication* of all the *old* ideas and the doctrines that stipulate that man is limited to his five senses. Spiritualism, with its associated new knowledge, must be presented to everybody on your planet. The sciences must leave all sighted and verified material at the disposal of the Church so that it can *orientate itself correctly* in order to change direction.

Question : There are no indications that the orthodox Churches change their minds.

Answer : These testimonies exist and they allow us to recognise that attempts are being made to synchronise the *old* views with the *latest knowledge*. The Orthodox Church's history of the last century indicates a constant effort of interpreting the old, specified religious tenets

on hand of all that new knowledge. One tries to explain that things are not quite as previously taught, that some of it is more of a *symbolic* nature.

This conversion has been noticeable for quite some time. One will recognise this more and more and one will say: "The existing views can no longer sustain their validity; the sciences, with their research, discoveries and inventions have uncovered a much greater world than our forefathers have ever dreamt of".

Others try to gain time and clothe this new knowledge and these new indoctrinations in *old* clothes. Thoughts have become *more adventurous*. Dogmas can no longer maintain their validity. Most people - even if they belong to one Church or other - search for *new TRUTHS, TRUTHS* that fit in with their logical observations. But the religious mendacity of the past makes them very sceptical.

Question : Might the word "spiritualism" bring forth this scepticism?

Answer : Yes, an incorrect word can have a huge effect. Most people have a completely false concept when they hear this word. They take this to be alleged communications with the supernatural, which in reality is just a superstition that brings ridicule upon oneself.

But we are in reality dealing with one of GOD'S INSTITUTIONS, there to give mankind *spiritual support*. This terminology is indeed not appropriate for such a great ORGANISATION. We are *not* dealing with an ordinary communication with departed souls, but with contact to highest INTELLIGENCES of spiritual existence.

- An enormous world of the spirit is ready to indoctrinate and inspire millions of people. No *genuine* searcher is rejected.
- All this enormous knowledge isn't here for just a "select few"; it is available to *all of mankind*. However, simple people must also be taken into consideration, people whose general education is not enough to inspire them. This is why this eminent knowledge is offered *in various forms*.

But as the intelligence of the general public is in a constant flux of development, Church based religion is no longer enough. You have never ever had a better offer than this. *Who or where you are* is unimportant. You will *always* have access to the world of the spirit!

- *Once you have learned to harmonise with the spirit, all the treasures of the spirit will pour over you and this is only limited by your capacity to absorb them.*

How marvellous is the TRUTH? - But there are unfortunately too many in your world that still refuse to accept it. *Only the spirit can change your world!*

Question : Are there enough spiritual circles on Earth that a good religion can spring from them?

AREDOS : There are such a lot of Churches and temples in the world that a lot of circles *could* be formed. But the Churches represent a *traditional* power and they unfortunately prevent this from happening. Priest like to hear the sound of their own voices and they have no intention of allowing the newly revealed WORD of GOD to be proclaimed.

Question : There exist circles that insist that they are in contact with the archangel MICHAEL or with CHRIST, well, even had contact with GOD. Is there something to this?

AREDOS : Why do you ask? - You know all too well that there are scores of entities in the spiritual realm that like to cause mischief.

- *These circle participants cannot give credit to good TEACHERS. They are not satisfied with names from an ORDER that doesn't mean anything to them. They want more! They want GOD and if there was something even higher than GOD they would want that too. This is why they succumb to hoaxing and lying spirits and these spirits know exactly what's expected of them.*

Question : Why are the followers of your common house-spiritism invariably and ingeniously duped by lower, otherworldly entities?

Answer : *The lower spheres surround the whole of Earth's globe. The opinion that the Earth is a domain of the devil, the antagonist, is hereby confirmed.*

Lower, that is to say, *undeveloped* souls inhabit these spheres close to Earth. These souls engaged in animosities here on Earth, they exploited one another, they continuously lied and cheated one another and fought one another, even killed one another. Why?

- *What is lacking is a truthful INSIGHT, an intelligent, informative RELIGION and the certainty of life after death.*

They now take revenge on *every* human being *they come into contact with*, because they are very unhappy in the hereafter, in their lower sphere. They desperately need our help and we can provide it by being good role models and not through empty promises, through curiosity and through the pacification of our own egotistical and mundane desires.

Question : Is there a marked difference between Church religion and spiritual knowledge?

Answer : The overwhelming difference lies in the fact that with spiritual knowledge you know that you *are never alone, not for one second*. You are therefore *aware* that warmth, LOVE, fellowship of spirit and friendship *accompany you everywhere*, wherever you go.

- *You have the important knowledge, that an enormous POWER will guide you, if you make a little effort to accomplish something good and positive.*
- *You have a feeling that friendly and helpful ENTITIES are at your side and that it is their desire that your very best is brought to the surface and developed in your life.*

*This is* what spiritual knowledge gives you. - But those that do *not* know this are far less happy and content than you are.

Question : What is absolutely imperative if one wants to start a spiritual circle?

ARGUN : I would like to say to this that when a circle *is formed*, every member of the circle *gets* PROTECTION *allocated* and this in the form of a MESSENGER of LIGHT, who would like to fulfil the MISSION of creating a little paradise out of a garden full of weeds. He must accomplish this labour with the help of the medium. This is certainly not easy.

*But it is never a case where FRIENDS of LIGHT from one circle change from one location to another.* No, certainly not, because this wouldn't allow the BEARER of LIGHT to build up a rapport. Every FRIEND remains in his position.

I may be so bold and emphasise that I have to fulfil *my* MISSION here *in this house* and *not* anywhere else. But my dear friends, I am always at your disposal. But if you hear something expressed in my name somewhere else, you can be assured that it certainly didn't come from me.

Question : Due to their dangerous ignorance, many spiritualists believe that when an otherworldly entity announces itself with "GREETINGS IN THE NAME OF GOD" or if it adds an "Amen" that this guarantees that they are dealing with a MESSENGER of LIGHT. What does the reality look like?

ARGUN : *Nobody* finds it difficult to announce themselves like that. But were dealing with hoaxes most of the time. Many talk, respectively, write like that. The danger lies in the fact that they express themselves so cleverly that one finds it difficult to interpret their statements. They sometimes express themselves very well, but they make mistakes in spite of that. The mistakes they do make expose the otherworldly immediately. Here is an example: "The beloved, glorious Lord on a throne garlanded with roses". This type of babble indicates immediately just *with whom* one is dealing with.

- What is even worse is *when the participants of a circle are lauded*.
- *But the worst situation arises when the medium is lauded!*

Here is another example: "My dear, dear child, because you are such a good person, CHRIST has opened his heart to you. You have been chosen to redeem the world; but you must be absolutely obedient". The whole circle reverts to fanaticism and is destroyed from that moment on.

Question : Parapsychologists *warn that* contacts with the world beyond ought not to be abused to such a degree where the circle participants and the mediums become absolutely dependent on the spirits. What do you say to this?

Answer : That is correct. Man on Earth must *decide* and *also act on* everything of his own accord, because he *bears his own responsibility*. He can *only then* expect spiritual support, when he *takes control of his actions*. Whatever you do, you're not alone. But this doesn't exclude the fact that everyone has to fight their own battles.

But there are unfortunately a lot of people who would like to reject their responsibilities. They demand that GOD should serve up everything on a plate. But when this doesn't eventuate, they turn to the *world of spirits* with the *same* demands. A situation is then created where they expose themselves to great dangers, because this gives evil spirit's the opportunity to approach these people.

Some spiritualists allow themselves to *be dictated to* about everything they do. It's a similar situation with many devotees of astrology who only abide by what is written in the astrology columns of newspapers. These people also expose themselves to an absolute dependency on astrologers, thereby losing their individuality; they become unstable and even ill.

- *Before someone trusts the stars they should rather show more trust in divine GUIDANCE, because it is certainly there to benefit mankind.*

Evil spirits will *never* do anything positive for mankind and this is why you should not be flippant when dealing with the world of spirits!

Question : It sometimes happens to spiritualists that they are attacked and ridicule by their fellow man. Is there an explanation for this?

Answer : Always remember that people have to be shown the ideal situation before *positive results eventuate*. If everything that can be achieved could be achieved very easily, progress would *slow down*. Development only takes place in stages.

- You have a *little bit of an advantage* over the others and this is why you naturally have to pay the price for this, because *nothing* is free.

As soon as people become *aware* of their own situation they are ready for the *next* step; but this has to take place step by step. One thing at a time.

- *The idea that everything should be achieved all at once is not important at all.*

As soon as the realisation that progress has to be made dawns, progress is realised, because the realisation that development is necessary is a sign that these people are no longer blind.

Question : Are these SPIRIT TEACHERS bound by a *specific concept* or are they free to teach they way they see fit?

Answer : There are authorised and unauthorised teachers.

- *Most of the existing circles that correspond with the spiritual realm deal with unauthorised teachers.*

These self-appointed teachers enjoy the freedom of *being able to say* whatever they feel like. But therein lies the great danger of *disseminating inaccuracies* and rumour mongering. But there can also be good teachers amongst them, but they are difficult to recognise.

- All the authorised SPIRIT TEACHERS have undergone decades of training and they *are under supervision*. These TEACHERS work *within concepts* they have to abide by. This has the advantage that they may not deal with things they're not allowed to deal with.
- These TEACHERS of an ORDER are *appointed* by HIGHER SPIRIT ENTITIES in order to help mankind.
- They deal with circles that *have developed to some degree* and with circles that are *positively managed*.
- But these TEACHERS of an ORDER *do not deal* with mediums that work by *themselves*, without the backing of a circle.

Question : We know that you are TEACHERS of an ORDER. We know that you are called MESSENGERS of LIGHT. Can you tell us something about the concepts you work with?

Answer : It is our main objective *to prove* to everybody that man's spirit does not know a physical death.

- *Those that do not believe in the survival of the spirit after death actually suffer a death that will detain them like prisoners.*

Such a soul will *roam about*, because it is unable to find its bearings. But this is what we want to prevent, because this is a spiritual catastrophe.

Question : We ask ourselves at times why the spiritual realm does not have the power to disseminate the TRUTH that is offered accordingly?

AREDOS : The *spiritual* sector is here *with us*, but the *physical* sector is *with you*. But in spite of this we are a large sum total. Do not despair, because we will never abandon you. This is no empty promise. No matter what might hinder you, we will never cease to indoctrinate and advice you. But we cannot provide you with physical things; you have to procure them through your own initiative. But you have already learned how to face many an unpleasantness.

- He, who serves the TRUTH, serves mankind and he, who serves mankind, serves GOD!

This fact alone bears remuneration *within*, something you are presently unable to assess. There is a lot of talk about religion, but we know that mankind on Earth has not yet grasped what religion really is.

Question : So please, tell us!

AREDOS : *Religion is devotion*, that is to say, the VENERATION of GOD. But these terminologies are incorrectly interpreted. This doesn't mean that one should complain to GOD or that one humanises HIM. One should *not* pray in *phrases*; there should be *no lip service*. People should also *not be afraid* of GOD, just because they know that they are sinning.

- Religion is an awareness of being a member of a community of people that makes no distinctions between races or nationalities.

He, who feels part of this collective humanity has already partially grasped what religion is all about. Let's assume that an American millionaire is about to drown and a coloured pauper saves him. This is just an example, but it represents the beginning of a religion.

Question : What kinds of advantages have those that are better informed about spiritualism?

Answer : *Knowledge in all kinds of subjects is always important*, this also applies to spiritualism. Knowledge brings joy, luck, cheeriness, serenity and a lot more.

- But he, who has the kind of KNOWLEDGE we teach in spiritualism has the advantage of *being informed about his future*, a future he is absolutely and inevitably confronted with. He is prepared and he intimately knows the way he has to take in order to reach a lofty goal.

Question : Does genuine spiritualism provide comfort to the soul?

Answer : Absolutely - yes, and more! One can say that the soul is already *accoutred* during its life on Earth. We actually *provide comfort to the soul* far better than the Churches ever do, because *we know* the TRUTH and we therefore bear the associated responsibility.

- *Those that abide by our directives will certainly progress. Man's journey is infinitely long; it goes well beyond one's earthly existence and there is no end to it, only way-stations.*

Question : When some people hear the word spiritualism they immediately answer: "Don't talk to me about spiritualism!" - What do you make of this situation?

AREDOS : The general public has not quite grasped the difference between spiritism and spiritualism. Spiritism doesn't enjoy the best of reputation, because it will always be a "questioning of

the dead” and it doesn’t concern itself with good TEACHERS, but only with communicating with the hereafter.

Great prophets and mediums were almost always branded sorcerers and witches by the fathers of the Church and therefore persecuted, tortured and burned at the stake. Most new revelations that existed *outside* of the texts of the bible were branded lies. If GOD’S VOICE selected a simple shepherdess as HIS medium, the Church hierarchy declared this girl to be either arrogant or crazy. According to their opinion, GOD may only approach a priest and HE will have to ask for permission as to whom HE may choose beforehand. GOD’S ANGELS also have to rigorously abide by these specifications. If they fail to do so, they are rejected and denounced as demons. All of this is caused by the fact that one has no idea who or what the HOLY GHOST is.

- *The HOLY GHOST is not a person, but consists of an ORGANISATION of SPIRIT ENTITIES. The spirit TEACHERS at your disposal and at the disposal of a number of other groups and people are a part of the HOLY SPIRIT.*

But tell this to a theologian. He will laugh at you and he will deride you into the bargain.

Question : Why isn’t it possible for the many spiritual circles to force the sciences to accept contacts with the hereafter for what they are?

AREDOS : The scientists are *untrained* in regards to this field of knowledge and this is why they *cannot assess* the results. You know all too well that it takes a lot of experience to prevent oneself from being hoodwinked by lower otherworldly entities.

- *The way the questions are put is enormously important and decisive.*

But no academic scientist is capable of asking the MESSENGERS of LIGHT *even half pertinent, correct* questions. The questions that are asked are *unimportant* and *egotistical* or they go along the following lines: “How much money do I have in my bank account?” or “How much money do I have in my wallet?” There are naturally also other questions, but there is no difference to their meaning.

There is no desire for HIGHER KNOWLEDGE and scientists are not interested because they are of the opinion that any HIGHER KNOWLEDGE stems from them. Apart from that they are well aware that they would be immediately attacked by their colleagues, if they would accept something that may not be.

But one shouldn’t give up that easily. Constant drops will wear away a stone. Technology cannot be attacked the way it is possible to attack a human instrument (medium). One tries to, but technology will eventually improve the opportunities for contact with the hereafter even more.

Question : Is it possible that one medium is enough when trying to correspond with the spiritual world or must there be a number of participants present?

Answer : Individual mediums that work *without* qualified participants are not only exposed to deception, but they also *risk their health*. They don't really do spiritualism a great service, because most of the time they are subject to hoaxes.

*The circle participants are just as important as the medium. It is absolutely imperative that there are more than two people*, because there is no satisfactory interaction between two people in regards to the necessary ENERGIES. If there is not enough ENERGY present to open the DOOR, there certainly is no control over just who will pass through this otherworldly DOOR.

It is a completely natural consequence that all kinds of spirits and undesirable entities force their way through an *unguarded* DOOR. This is why I don't think that you would achieve satisfactory results if you would work with a circle of *unsuited* people.

- It would be preferable to have *less people* in the circle in this case, but they would have to be *experienced* and *tested* participants, people with some spiritual training.
- *What is of great importance is the leader of the circle, because he is the guardian at the door and he must be able to recognise who is making contact.*

Question : Scientist accuse spiritualist of being a little too gullible. What is your opinion?

AREDOS : Scientists who are completely unable to show faith are completely unsuited. These people are not satisfied with any direct evidence, *they have an explanation for everything*. Spiritualists who work *in earnest* are unfortunately still a minority and this doesn't give them enough weight to push their line of argument.

- *But doubters will always represent a hindrance to genuine contacts.*

Positive messages can therefore only be realised by tried and experienced spiritists and spiritualists.

Question : Some scientists insist that spiritual phenomena are produced *by the medium*, because they possess a CHI-POWER that delivers the necessary ENERGY. It is supposed to be mainly a case of young people, people still in their puberty years. What is your opinion on this?

AREDOS : The mediums naturally *participate* when a phenomenon occurs, but we are dealing with a *co-production* here, the mediums provide an ENERGY that can be manipulated by the otherworldly. This is why there are special mediums and they can deliver an exceptional ENERGY. But there are always otherworldly thought bearers involved.

Question : What comes into force when objects move controlled by will of the medium?

AREDOS : If the medium has certain intent on its mind, for instance direct an object in a certain direction, it is only natural that the ENERGY OUTPUT is a lot higher, because willpower

plays a part. But if one is *not prepared* to believe in ghosts, the only explanation left is the effort of the medium.

Question : Why has parapsychology only just now found recognition as a branch of science?

AREDOS : Any extrasensory perception was branded a heresy or devilry in the past. Any such phenomenon was understood to be in connection with GOD'S antagonist. Mediums were persecuted and tortured and this made the best mediums cautious in regards to the Church and the public. This is the reason why one failed to progress in this direction.

Question : Can one regard spiritualism as an educational tool?

AREDOS : This is certainly the case. The right insights can completely change a person. The Churches have always failed to correct their religion and to bring it up to scratch with the latest scientific findings.

- Spiritualism represents contact with people that have already left their earthly sphere of existence, but *are still ready to serve mankind in spite of that*. Spiritualism is therefore a modern DOCTRINE, one that *forms* man *spiritually*.

According to our opinion, this educational tool must be rated *very highly*. Other religions do not prepare people *truthfully* about what they can expect once they have to enter the spiritual realm. This is a bad situation!

Question : Medicine men of coloured races know magic LAWS. They can for instance pray for rain. What can we make of this?

Answer : The spiritual world has nothing to do with these ceremonies. There exists a difference between the LAWS of the SPIRIT and the laws of matter, of nature. These laws are absolutely *not* the same.

- Many people speak of *astral* and *spiritual* as if the two terms were interchangeable. But these two words do not express the same at all.

Many native tribes are so well informed about the workings of psychic law that they can easily deal with magic things. They can therefore *influence elements* that come within the domain of their ceremonies. This is not a miracle, but *the application of occult laws*, laws as yet unknown to scientists. But medicine men of native tribes are well versed in them.

Question : Does spiritualism have a future?

Answer : *Spiritualism is the only religion throughout human history that backs itself, respectively, is based upon verifiable facts about man's continued existence after death.*

Question : As soon as an extrasensory phenomenon becomes knowledge, there are immediately people at the ready who try to interpret everything as fraud, deception or superstition. What can you tell us about that?

Answer : All I can say to you is:

- Always do what *you* consider to be right. You are well trained. Don't give any thought to what the world thinks about you, what people around you say, only do what *you* deem appropriate.
- Never do what seems *convenient* or *expedient*, but only *what your insides demands*. When you become aware that your inner POWERS are convinced that the line you pursue is the right one, let nothing dissuade you from it.
- *Everything is simple*, but your world will unfortunately not listen to plain simplicity; it *prefers* complexities and complications. It is suspicious of simplicity to as degree that it has virtually reached scarcity value.

One continuously tries to put phenomenon initiated by the hereafter at the feet of the *medium*. The world of the spirit is simply *ignored* by so-called scientists. These people have so little conscience that they are not concerned about what *happens to them* when they enter the spiritual realm. It is said: "Everything can be forgiven *but* sinning against the HOLY SPIRIT." But this is unfortunately just hot air as far as these pundits are concerned. - We presently contemplate how we can enhance these phenomena.

Question : What are the main differences between spiritualism and other religions?

WHITE EAGLE: In the true sense of the word, spiritualism is not a religion, but a DOCTRINE that *triggers* true religion within man, namely LOVE for GOD. One further aspect of these *inner DOCTRINES* is *the insights* about an invisible, eternal existence that are conveyed to man. They provide information about the wonderful world man enters once his soul detaches itself from the body.

These doctrines indicate that man has to return to a physical body *until* he has learned *to master through self-discipline* all the FORCES that influence his existence or to put it in other words, until he has matured from a child to a perfect son or daughter of the living GOD.

Once the soul has achieved what one calls MASTERSHIP, it will have complete authority over these POWERS and it will know *how* to apply them in order to bring body, soul and spirit with all their perceptions to perfection. It will then know how to create the perfect form of divine man.

- *Once man has gained control over himself and also over the physical and ethereal POWERS, he no longer has to die.*

You must have heard about some *verified* cases, where a MASTER didn't physically die but rather *ascended* from this Earth. Many may smile when they hear this and explain that this would be completely against any natural laws. They say that "everybody must die". - We say that "everybody *must live*"!

- *If a body, a physical body is treated within the divine LAWS of life and if it is kept under perfect discipline, it will neither get ill nor can it die.*

It is a phantasm if such a body seems to dissolve, because the body consists of atoms and they will be restructured; the newly created body will be of a finer structure than the old one. The body of an adept, an inaugurated one is pure and flawless. A saint is always healthy!

Question : What does the spiritual realm envisage a spiritualist to be?

ELIAS : If you want to call yourselves not only *spiritualists*, but also want to be *genuine* ones, you must possess the following virtues:

- Above all you should *show consideration* when dealing with your fellow man.
- You should try to be a *good* person.
- You should *respect* those close to you even if they are beneath you, especially in regards to education.
- It goes without saying that a spiritualist must have *a high regard for GOD and the spiritual realm*. But that doesn't mean that man has to behave in a cultic way.
- *But something that is indispensable is knowledge and faith in a life beyond physical death*, the "going home" of man on Earth. He must know that every human soul is absolutely *immortal* and that it can be *reincarnated over again*. He must believe in these reincarnations and he must act accordingly.
- The spiritualist must also know that *there is something called karma*, a duty to atone.

In order to develop further, man must constantly work on himself. He must pay close attention so that he doesn't suffer a relapse.

Question : Many spiritual mistakes are defended for years. Why are these mistakes not redressed from the side of the spiritual realm?

ARGUN : Spiritual circles and communities also have *their traditions*; they therefore reject any amendments, because they believe that they have leased the TRUTH for years to come. This is the reason why we place *more value* on *psycho-scientific research* than on a religious community with its usual cult. The TRUTH is better guaranteed in this way.

- *Cult only attracts cult spirits and they are no APOSTLES of the TRUTH!*

Question : The Churches are not yet ready to accept spiritualism; they hold onto the letters of the bible and opinionated as they are, they won't allow anything else. What has the spiritual realm to say to this?

Answer : We continue with the great task to shatter any falsehood so that the TRUTH, who will win, can take its rightful place in lofty heights. Let us always remember the sacredness of the mission we are undertaking. Let our minds recall the fundamental TRUTHS we like to establish.

Never forget that you live in a world full of misery, hardship and distress. The number of those looking for alleviation and those who yearn for consolation grows daily, because the old slogans no longer satisfy their open minded spirit. They reject the things that were accepted in the past, because the authority of the clergy has waned.

When troubles creep into their homes and their hearts, when life seems empty and worthless to them, when all hope has gone and every promise remains unfulfilled, they are at the height of their despair and confusion and their cries for help echo out into empty space; they hope to receive an answer, but they don't know whether their screams will be heard. The desire for KNOWLEDGE, TRUTH and for a MESSAGE of SALVATION that may take away the pressures of life, resides in many hearts.

The Churches have managed to contrive a situation where even the greatest mistakes in the bible were *unconditionally believed* and are still being believed and those that express their doubts are branded infamous heretics and victims of the devil. One entices people to go to Church with threats and not with new revelations; because if there are no believers left, the power of the priests is at an end.

Question : Is there a religion on Earth that comes closest to the TRUTH?

AREDOS : *No, not yet*, because there is no religion that teaches LOVE for one's fellow man in a fitting manner.

Question : Is spiritualism superior to all the other religions?

AREDOS : *No, not really*, because spiritualism is *not a religion*, but a doctrine of natural science. But if man does *make* a religion out of, it can only be good for his spiritual development. But never forget that there is also *negative* spiritualism!

- *Not all circles work on the basis of TRUTH.*

There are a lot of circles and mediums that are taken for a ride by unclean spirits. This is treated as a great joke and entertainment of considerable extent to these otherworldly souls. *The participants* of these "also-spiritualist circles" are unfortunately *no better*; they

make fun of the otherworldly and they don't forebode the blasphemy they commit by doing this.

Question : How is it possible that professors who deal with parapsychology *still* doubt that life after death is a fact?

AREDOS : Due to their doubts, these scientists have no opportunity to make genuine contact. Even if they bring a good medium into their laboratory, it must fail, because the otherworldly support *is lacking*. These professors are not looking for the TRUTH, they constantly think of how one could express the evidence of the TRUTH differently, that is to say, they look for explanations, namely that there are no otherworldly spirits.

- Scientific parapsychology endeavours to explore the psychic abilities of man in order *to utilise them for negative schemes*. It wants to investigate these abilities so it can utilise and develop them *as weapons*.

But if this is so, it will be impossible for scientific parapsychology to avoid *getting to know hell*. But once these scientists have realised this, they will have to reluctantly admit that there is also a spiritual CREATOR. In this way one comes slowly but surely closer to the TRUTH.

Question : Why are most spiritual circles not taken serious, but are considered to be some supernatural cult?

AREDOS : This is often the fault of the Churches, because they have no real concept of what spiritualism is all about and they are very much burdened by all their prejudices. They only see idolatrousness or blasphemy in this. Due to the fact that priest and theologians *are forbidden* to deal with this, they lack any instructions; they therefore cannot orientate themselves either way and remain stuck with the old.

*Most* of these kinds of circles are *unable* to deal with the hereafter correctly; they believe the otherworldly to be omniscient and they want to hear how they could be better off, respectively what the next Lotto numbers will be and similar nonsense. This methodology makes sure that they only deal with evil spirits and they have great fun with their hoaxing. It is unfortunate that they *cannot see what* kind of spirits they deal with!

Question : Spiritualism has amassed an enormous amount of KNOWLEDGE. But in spite of this, it hasn't been successful in incorporating all this immense experience, which incidentally coincides internationally, into Church religion. If correctly practiced, we are actually dealing with religious matters of the highest order. Why is this so?

AREDOS : This is also our greatest heartache. But the devil plays the *greatest* part in this. He prevents this from happening with all his powers and ingenuity. This is why he ridicules these insights and portrays them as fraud. He knows all too well that once spiritualism triumphs, his chances will be gone forever and GOD will be and remain the final victor in the BATTLE of ARMAGEDDON.

Question : Is it just one of those things that spiritualism is ridiculed in all openness these days? Are its followers for ever holding their peace?

AREDOS : You must remember that spiritualism has made some progress here and there. But generally speaking, spiritualism is *not mature enough* to presents itself as the only way to a true RELIGION and to the TRUTH. Spiritualism has some proponents that ought to reside in a mental asylum! Others are so *fanatical* that they lose their objectivity. This is why you shouldn't condemn people when they mock; they do so because they regard spiritualism to be a corrupting affair, one that makes people go mad. Therefore be tolerant and try concentrate on cleaning up your own ranks instead of criticising others. Once spiritualism has been cleansed enough, it will automatically find respect and recognition in the world at large. The main focus, namely the TRUTH, lies presently with only a *few communities* and they are yet too fragile to unite into a great RELIGION.

Question : Has spiritualism made progress with the help of parapsychology?

AREDOS : There are unfortunately still *too few reliable* circles. This is why it is very important that especially these circles remain intact for as long a possible, because a situation can arise where we must have these receiver stations at our disposal to convey extremely important messages to you.

- *Things can take place in this world that might make a divine MESSAGE for the world, respectively for mankind, imperative!*

But you are our messengers and you are elected to do this, even if we might need the last man to speak on our behalf.

You cannot imagine the terrible things that are spread throughout the world. GOD'S antagonist has complete control over a number of scientists. He puts all his eggs in one basket *in order to destroy the world*. You know that the BATTLE of ARMAGEDDON is in full swing and you know that the "king of pestilence" has laboratories working for him that are in the hands of the great powers. Atom bombs *are nothing* compared to the infernal destruction that is already planned.

- *It is therefore important that there is a positive wave, one that works against this. Every positive thought and action must therefore be extremely highly rated. You now know why I count on you.*

Question : Does spiritualism have the prospect of being shown in a better light in the future?

AREDOS : The disciples of spiritualism worldwide number *around 10 million people of all races*. But spiritualism is unfortunately *managed incorrectly most of the time*. Uniform basic rules are unfortunately lacking. Due to the failures that result from this situation, one regards spiritualism to be a real danger.

- *It is therefore necessary to cleanse spiritualism from religious fantasies and fanaticism. The prospect of worldwide success can only then be fulfilled.*

Question : Is it correct to say that 70% of spiritualism is plagued by demons?

AREDOS : This completely depends on the circle and the medium. Spiritualism actually *always* starts with demons, *even if one is of the opinion* that the spirits that make themselves known are ANGELS.

- *It always depends on the clever and logical leadership of the circle and the medium to gradually eliminate demons from the proceedings until the positive WORLD of the SPIRIT is able to reveal itself.*

Question : There is an enormous amount of scriptures that solemnly warn about *any* contact with the world of spirits. This is the reason why spiritualism is hindered in its development. What can one do about this?

AREDOS : These scriptures are *partially justified*, but they are one-sided. They *fail to disclose* the second opportunity, namely the wonderful communication with spirit TEACHERS. Something CHRIST had to say about this *should always be pointed out*: “You will see the FATHER’S ANGELS ascend and descend from heaven.”

Question : A psychiatrist, Dr Kurt Koch published a brochure about spiritualism. He resolutely rejects everything about spiritualism in it. How can one proceed against such defamation?

AREDOS : As you know this psychiatrist admits that he has never participated in a spiritualistic meeting and that he *will never do so*. There are innumerable authors without actual experience, but they write down and disseminate their doubts just the same. They are not psychiatrists in our eyes, only people who doubt the constant flow of NEW REVELATIONS from the divine SPHERES. This doubt can only be stamped out by facts and it is therefore *your assignment* to present these facts - they way you do already.

Question : This psychiatrist bears reference to Leviticus, Chapter 20, Verse 27: “A man or a woman who is a medium or a wizard shall be put to death; they shall be stoned with stones, their blood shall be upon them.” What do you say to that?

AREDOS : This Christian psychiatrist bears reference to a Jewish scripture, one that was criticised by CHRIST to such a degree that he was killed. He therefore is a Christian who can hardly remember the New Testament. Apart from this, this verse is absolute nonsense, because the real answer to this is “Thou shall not kill!” You can see how threadbare the scriptures, that are supposed to invalidate spiritualism, really are.

Question : Is it correct that there are about 150 spiritualistic newspapers in Brazil?

AREDOS : Yes, it is correct. Some Brazilian spiritualists even have their *own radio station*. Many of these kinds of newspapers exist in other countries too. Circles and communities can be numbered in the thousands.

Question : How is it possible that in spite of the wide dissemination of publications about spiritualism this objective DOCTRINE and TRUTH has remained hidden in the background for *most* people?

AREDOS : This is due to the fact that many psychic enunciations *contradict one another*. This is the reason why spiritualism is *not credible enough*. Mediums and circles work in *too many different ways* even thou generally speaking, there are clear guidelines. But the details are completely unclear.

Question : Does this failure lay with the mediums or with the otherworldly that make use of them?

AREDOS : The blame naturally *always lies with the medium*, because a *good* medium *never* has a *bad* otherworldly GUIDE.

- *Unauthorised otherworldly spirits can only announce themselves for any longer period of time through immature and ineffective mediums.*

Question : If you would have to give spiritualism another name, what would it be?

ELIAS : I would *not* use the term “research into the hereafter”, but DOCTRINE of KNOWLEDGE!

Question : Which is the best way to start one’s studies of spiritualism?

AREDOS : Naturally *right from the beginning*. One has to get used to the fact that one is dealing with something *purely SPIRITUAL*.

- The best progress is made by *generally accepting* any technical literature on the subject *at face value* to begin with. Once one had made progress in that direction, one can begin to separate the negative from the positive.

When studying this subject, doubt is *extremely inhibiting*, but one must be aware that one will be able to make the *right* distinctions *only later on*.

Question : Is there a kind if “encyclopaedia” one could refer to?

AREDOS : There are hundreds of thousand of technical books on the subject, but there is unfortunately no such thing as an encyclopaedia.

Question : Apart from spiritualism, are there other avenues that lead to results *even faster*?

AREDOS : *No*, the best way is still a healthy ability to make the correct decisions.

- *Contact with the spiritual realm represents the only opportunity to find out about the spiritual realm.*

All religions and views of the world obtain their doctrines through spiritual contact. What they do with it is their own affair.

Question : Many people are of the opinion that it is possible to make contact with departed souls immediately after their demise. Is this possible?

AREDOS : No, if were dealing with *undeveloped* and *unprepared* souls, *it is near impossible*. It is akin to punishment, when the departed souls cannot communicate with those left behind.

- Contact *is more likely* when we're dealing with prepared and positive souls. But most of them already have some assignment and that hinders them from these kinds of contacts anyway.

Question : Those in the know would like to convince other people also. What is the best way to go about this?

AREDOS : They must *awaken an interest for this*.

This is best achieved by *pointing out the international co-operation* that is in progress.

They may *not become obtrusive*, they must over again emphasise that this science is extremely interesting and educational.

Question : There are some who show an interest that maintain that one should give spiritism preference *over* spiritualism, because in the case of spiritism, the evidence is more on a physical level and can *therefore be better understood*.

ARGUN : *No, we object to this*. It is our opinion that spiritualism represents a *much better* form of connection with the hereafter. The soul either submits to what is offered or it doesn't have a true sentiment for these divine messages, whose overall purpose is that of leading the soul back to the FATHER.

- In regards to spiritism, it is *mainly the lower* sphere that participates. In most cases one can use the phrase: "Woe, if they are unleashed!"

Question : Is spiritualism going to develop into a general religion or is it going to be accepted as one of the natural sciences?

Answer : Religion is always veneration. When it comes to spiritualism, veneration is not all that important, that is to say, the cult around it is not that important, because the emphasis *is on KNOWLEDGE* and it will advance man's development to a level that will *make him mature* enough for a higher level of existence.

What I would like to see is that this knowledge will bring a *new understanding* in regards to the divine PLAN with all its opportunities to all those willing to accept it. They will grasp religion's place within the divine PLAN and they will recognise the reasons behind this science; they will value and appreciate the arts and they will comprehend the importance of the best possible upbringing. This TRUTH affects all areas of human activity and every one of them will be illuminated by the brilliance of the spirit. It is better to go through life with *knowledge* than in ignorance.

Question : Is there not a certain risk that people might use spiritualism only to make contact with the dear departed and thereby completely *forget their duties* in regards to their life on Earth, thereby obfuscating GOD'S VISION?

Answer : The risk that this knowledge will be abuse is always there. Everything can be used to do either good or evil. This represents a great problem and it is imperative that this is not disregarded. There are naturally those that look upon spiritualism as a means to alleviate *their own misery* and I say that where there is sadness, consolation must be forthcoming. Misery ought to be assuaged, sorrow ought to be banished.

- Do not pay less attention to the things that give mourners comfort. These things are very necessary and *they sometimes affect a turning point in the life of a person*.

It would be absolute selfishness to search for nothing else but the fulfilment of one's *own* interests, once grief has been reconciled and tears have been dried, once melancholia has disappeared, the burden lightened and KNOWLEDGE has banished ignorance.

Question : Why is it that most people have a completely erroneous opinion of spiritualism?

AREDOS : This is due to the fact that these people do not have a sufficiently advanced development behind them.

- Spiritualism asks of people to apply *good logic* and to utilise their *special experience*. Above all, it asks for a *certain respect*.

People who apply different concepts of right and wrong, of good and evil in their life find this difficult to understand. Their education begins at the very bottom. But these people think that *it no longer necessary* for them to begin their education from the very bottom. They are arrogant and self-opinionated. This makes the whole mission more difficult.

This is the reason why academics *are especially difficult to convince*. Most of them hold the opinion that nobody has to teach them anything, because they already know so much. But in spite of their extensive knowledge they are quite unaware of how little experience they really have in regards to this theme and just how much education *they* are in need of.

Question : Most people hold the opinion that there is only happiness and peace in "heaven". But heaven apparently doesn't quite fit this image. What do you say to their opinion?

Answer : Heaven is spiritual and this is why spiritualism also has its enemies *in the hereafter the way is has them here on Earth*. There always exists a certain anger. But we are not dealing with a war between fallen and good angels. This is just *symbolic* imagery. But there are sufficient negative intelligences where we are and they do not look with favour at our endeavours to spread the TRUTH. They try to assert their influence wherever they can.

They are present at almost all sessions *like these here*.

- They have *no power* to interfere at meetings where *harmony reigns*, where *genuine co-operation* between your participants and those on our side exists.
- These powers record *the best results* where conditions *are chaotic*, where the atmosphere is *convulsed by disharmony*.<sup>6</sup>

This explains to some degree all the many false messages that are received all over the world. It is a kind of *sabotage of the TRUTH*?

The world of spirit is filled with entities that once lived on Earth. It is certainly not a world full of ANGELS; you find a diverseness of entities there, from the poorest in spirit to the greatest of SAINTS.

For as long as people on your Earth do *not* conduct their life *in a pure, selfless and helpful* manner, the number of undesirables is *continually growing on our side* and they need constant indoctrination, attention and help.

- *These undesirables have the opportunity to turn their attention to Earth, where conditions are similar to their own. This is the LAW of EQUAL VIBRATIONS.*

People in your world can live in close proximity to one another, even if they are very different from one another. This is *not* possible in our world! Entities can only live *in a specific* sphere, one that befits their development.

Question : Why are there supposed to be so many American Indian guides for spiritualists, if one takes into consideration that individual tribes were pretty barbarous in the way they waged wars? The American Indian SILBERBIRKE must surely have been a member of such a warmongering tribe?

Answer : What a strange question this is? - The white race has *demonstrated* during the last World Wars that it too can wage war in a most unimaginable and bestial way. I am aware of the cruelties committed during conflicts between American tribes. But believe me, they are *not in the slightest* comparable to the atrocities committed *by those* that call themselves “highly civilised” only because the colour of their skin is *white*.

---

<sup>6</sup> Because of internal quarrels many working groups disbanded. Nevertheless, it has been and is said to have a good connection to the spiritual world. If so, the Menetkel would not be right.

When the white man *tried to justify* his exploitations of other races, he always painted a dreary picture of poor and evil people that he had to “*save*” in the name of his religion. But the reality is that he only tried *fill his own pockets*.

Your world commits a great error if it assumes that superiority is expressed through the colour of one’s skin. Superiority can *only* be achieved through service.

Question : What kind of people are the most dependable when it comes to spreading spiritual knowledge?

ELIAS : *Due to their own research* science will inevitably discover the TRUTH. But once it has the TRUTH in its grasp it is imperative that it utilises the age old experience of spiritualists in order to be able to deal with the TRUTH. This will be *your* time! This is a part of GOD’S PLANNING.

- GOD’S PLAN might be abandoned every now and then, but that will not change the fact that HIS PLAN *will be fulfilled!*

Question : How does the spiritual realm evaluate the spiritism brought to life by the Fox family in America?

Answer : The Fox sisters were mediums and they introduced this new spiritism. They were prepared and utilised by the spiritual realm and they carried out the assignment allocated to them. They deserve a lot of respect for that. This great endeavour must continue and there are a lot of instruments at your disposal these days. I am convinced that the main battle is already over (1966). This battle was won many years ago. Brazil testifies to that.

There was a time when the fate of the absolute TRUTH was hanging on a thin thread. It seemed in those days that the antagonist, in connection with the powers of errors and superstition, was going to win. *But these days have long gone*. Those that work in the field of activity of disseminating the TRUTH are not asked to make the same sacrifices as the mediums of the past.

- Whatever you have to suffer, it stands in no relationship to the sacrifices that had to be made in the past.

The great battle for the TRUTH has already been fought - and it has been *too* late for any attempts to turn back the clock for quite some time. Literature has already established the absolute TRUTH. All that is left to do is to make this literature *accessible to everybody*, that is to say, *to make it so interesting* that it will be read and abided by all and sundry.

The TRUTH is anchored in the heart of many people and it can no longer be denied. The power of resistance will be broken more and more. One can no longer say: I forbid you to console those that grieve, to heal the sick, to cheer up the downcast and the help and guide the tired and the lost. The future doesn’t belong to those that have placed obstacles in your way.

But you will be asked the following:

- *Show faith in the LIGHT you have been entrusted with and*
- *disseminate the KNOWLEDGE that is given to you by the spiritual realm all over the world.*
- *Point out the great POWER of the SPIRIT to all and sundry, it can drive away any sorrow and any illness. Only the power of the spirit can restore the terminally ill to good health.*

The power of the spirit flows through many mediums, even if we're dealing with inspiration. The effects of this power can be found amongst the poor, the lonely and the unpretentious.

Encourage the ignorant, because they need to be encouraged!

- Everyone has to play only *his part* in regards to the absolute TRUTH. Nobody is asked to perform the impossible.
- *But make sure that your actions harmonise with your new KNOWLEDGE, because many eyes are upon you, you who speak of the TRUTH.*<sup>7</sup>

When it comes to these new REVELATIONS, you are the role models; you are eyewitnesses to the fact that the GREAT SPIRIT has always revealed eternal TRUTH and that your present world, a world looking for leadership, *can* receive this TRUTH from the spiritual realm, if it so desires.

The whole world is undergoing a rapid change. If leadership here on Earth fails, you turn to a higher AUTHORITY, one that cannot fail. Do not look upon mediums as if they were abnormal people, but see them for what they really are, namely mediators between GOD and man.

Question : According to this, the work we do here in our circle is a spiritually *prepared* endeavour, one that will be accepted by academic science at a *later* point in time?

ELIAS : Yes, but before it comes to this, some sifting will have to take place. There is presently such a mess in the world (1967) that it makes one shudder. Everything must be reorganised. Many sects and “magic circles” will be able to shut down.

Question : (Circle leader) During the last Congress of Parapsychology I talked to people that called themselves spiritualists and insisted to be old hands in regards to this theme. But I found that they were mentally still at the lowest level in regards to this knowledge. This is why I direct this very decisive question at you: *Is man really in a position to assess himself?*

---

<sup>7</sup> One of the most important aspects of all times.

ELIAS : *This is an impossibility here on Earth.* - One gains a better insight only after a longer period of time in the hereafter. But it will still be difficult even then, very difficult indeed. Self-overestimation is a very dangerous precipice one faces in one's development. This precipice ought to be approached *with humility*, otherwise failure can be guaranteed. Knowledge alone is not enough.

- KNOWLEDGE brings with it the *obligation* for *better* thought and *better* action!

Question : What effect will our teamwork have in the future?

ELIAS : When the point in time I already mentioned is here, the time when the great reorientation takes place, that is to say, when the sciences have the GREAT KNOWLEDGE in their hands, our assignment will have been fulfilled and our teamwork will be at an end.

Question : We hold the opinion that many circles *show too little objectivity*. Craving for recognition is placed in *first* position everywhere. How do you see this?

ELIAS : Well, we accept a certain amount of craving for recognition. *Every* human being possesses some of that in one form or another. But we are talking about extreme cases here. It very much depends on common sense.

Question : One is going to say that the doctrines of spiritualism are ancient superstitions. What can we do about this?

AREDOS : One ought to explain that if one *remains logical*, this "superstition" can lead to the TRUTH in spite of this.

#### 14. Message from the spheres of LIGHT

*Spiritualism verifies* that a fully conscious existence exists after one's physical death. The "dead" as you call them, continue to live here with us. They can return and they do return, but there is more to this. Through contact with the spiritual realm, the people living on Earth can find out *why* they continue to live:

- What is their continued existence all about?
- What *effects* has their present life *on Earth on the new life* they begin after their demise?
- What is the relationship between the two stages of being like? What did they experience as they stepped across the threshold called death?
- Did whatever they *did, said* or *thought* on Earth turn into *a help* or *a hindrance*?

- What have they learned that will help them progress?
- Of what composition are the more *permanent things* once one's material possessions have been left behind?
- What *effect* have our DOCTRINES on religion, science, politics, economy, the arts, international communication and racial issues?

Well, all of these questions are touched upon during spiritual communications. The NEW KNOWLEDGE brings *an elucidation of the problems* that have tormented humanity for an eternity. Apart from this constant battle for an update of knowledge, we also wage a war against all powers of darkness, retrogression and against all those *involved in it*.

But above everything else, we fight against fear!

Under certain circumstance the association and communication between you and us, that is to say, between those that live in our world or yours, is either made easier or more difficult. There exists a hindrance, but it can be removed, this hindrance is called *misunderstanding, animosity and ignorance*.

It is of course *easier* for us to reveal ourselves if you are mentally and spiritually prepared *to assimilate*. You are spirit entities *within* a human body, but we are spirit entities *without* such a physical body. But there is a connection present, something that we share, namely *the connection through spirit*. You are spirit entities when you are *here with us*, but you are also spirit entities when you reside in the world of the flesh. It is *not* death that imparts a spiritual body to you. Death *only releases you* from the confinement of the flesh and removes your shackles so that you can fly to freedom like a bird whose cage has been opened.

Strictly speaking, you have now and always all the gifts, characteristics and qualities of the spirit. *Is lays dormant within you*. You can learn to awaken them, to give them expression, so that they can reveal themselves and so that they can claim their glorious inheritance.

- All of us *who come to you* must make *a sacrifice*, because we have to descend to the lower regions. We have to transform spirit into matter in order to reach you and we must loan this matter from you.

Most of you, well, actually the majority of human beings are unable to gain the heights of the spirit. They *cannot perceive* these VIBRATIONS, because these VIBRATIONS are too delicate, too sensitive, and too subtle to be intercepted. Only a small fraction of people are successful in doing so. Those that want to make themselves known to you must descend very deeply and this diminishes their exquisiteness to a high degree, an exquisiteness you cannot imagine. It would be better if you were able *to meet them half way*, you would be highly delighted over the ABUNDANCE that is presented to you.

## 15. Message from the MESSENGER of LIGHT SILBERBIRKE

The leader of the Medialen Friedenskreis Berlin, H. V. Speer writes:

The following is a message from SILBERBIRKE, an American Indian soul that acts as an excellent GUIDE in England. It is of great importance that the opinions of the most significant SPIRIT GUIDES essentially coincide with one another completely. Even though the spiritual GUIDES and the mediums are separated by oceans and continents, the *doctrine runs along completely clear lines*. This fact also *verifies unequivocally* the existence of COSMIC TRUTH, which finds it oh so difficult to establish a broader base here on Earth because of the difficulty of breaking through human ignorance.

SILBERBIRKE: You have been placed on Earth to fulfil an assignment. All of you are *eternal pilgrims* on an *eternal* march. You must select your accoutrements *with great care*; may a healthy common sense and intelligence guide you! You will find parts of your accoutrements in many books and through many lives. This is why *you should only select the things that appeal to your heart*. You should not accept things just because some body said: It is good, wise and holy. *Nothing* should be revered just because it *can help* you on your earthly journey. This is what I can recommend you to take to heart.

- Accept what *appeals to your judgment* even if you discard it at a later date, when you have gained more KNOWLEDGE.
- *Do not restrict yourselves to one book, one teacher and one guide.*

I am not a source of infinite wisdom. I do not have the monopoly on the world of the spirit. I am just one of many that help your world and I do not profess to be perfect and infallible, because I am as human as you. My outlook is *a little more advanced*, because I have progressed a few steps further on life's journey and I return *to share* my new horizon with you in order for you to accept the things that I have already experienced. It is part of our assignment to bring KNOWLEDGE to your world. The great MISSION has entrusted us with this.

Many of my peers have recognised that there is too much ignorance on Earth. The results of this ignorance are unfortunately *all too obvious*. They are reflected *in the state your world is in* and they also reflect into our affairs.

According to *the imagery promulgated by the Church*, people immediately transform into radiant and indescribably happy beings after passing through death's door. They will have left all worries, hardships and fears behind.

**But this is certainly not the case!**

This imagery is far removed from being a true account.

Spiritualism managed to establish a religion based on unshakable *certainty*. People may argue about theological dogmas nobody can verify, but oh so much satisfying evidence

has been *provided* about an existence beyond death that every sensible human being can be convinced. But this is only the beginning - not the end.

- All those *not in possession* of this graphic account must by necessity gain the assurance that the basic principles are true and genuine.

Returning to your world is not something one could describe as pleasurable. But being conscious of the imposed ASSIGNMENT and the help I receive through your LOVE make me return to do whatever I can to help those that need my help and *appreciate* this glorious ASSISTANCE. It is the immortal SPIRIT that connects us all with one another!

- *TRUTH remains TRUTH, eternal in its GRACE, infinite in its essence and its reality.*

The TRUTH cannot be proclaimed in a way that the masses could comprehend it straight away, because everybody occupies a *different* level of development and souls still in a state of growth react *differently* to the *same* TRUTH.

I always taught that GOD'S PLAN does *not* foresee a situation where a great number of people are changed *all at once*, because we are aware that such a method would *not bring permanent* results. The masses would be fascinated and astonished *for a while*, but once the mass-suggestion began to wane and people began to look upon themselves as individuals again, the inevitable reaction of a rude awakening would eventuate.

- *It is our PLAN to appeal to individuals, one after another, in order to create uniformity so that we can administer this KNOWLEDGE according to their spiritual understanding.*

Most are instructed by their loved ones here in *our* world. The spiritual TRUTHS absorbed in this way will be alive and no storm and no adverse circumstances will be able to shake these solid foundations.

- *There is no technique to bring conviction to a great number of people, certainly not one that would achieve satisfactory results.*

Remember, the soul *must be ready* to be able to receive spiritual TRUTHS; if this wasn't so you would hit a brick wall. But as soon as the soul is touched by sorrow or sadness *the hard outer shell dissolves* and this exposes a material that is easily manipulated, it is *receptive* and ready and *willing* to learn.<sup>8</sup>

- I deny that spiritualism is a religious indoctrination. It represents concrete KNOWLEDGE!

---

<sup>8</sup> What SILBERBIRKE explains here also applies to our mission. ARGUN told us that the spiritual world is not interested in creating a great spectacle. The spiritual TRUTHS are directed at those with a genuine interest. CHRIST expressed the same opinion, because he sent all those that merely stood there out of curiosity or disinterested away. This is why he always said: "*Those with ears may listen!*" To use our present day vocabulary: "*He, who is really interested and wants to know the TRUTH, listens carefully!*"

Nobody can control the breath of the wind and the same applies to the growth or the dissemination of KNOWLEDGE. The TRUTH will blossom in *its own good time* and it cannot be directed along preordained tracks.

- *The only thing that can be done is to create the means through which the TRUTH can be made accessible to more and more people.*

The effect KNOWLEDGE will have *cannot be ascertained beforehand*, neither can rules and regulations for the way it is disseminated be drawn up. Whatever you do is your *own responsibility* -, your performance of duties within the LIGHT of your understanding.

- You must help where you can and you must pass on you KNOWLEDGE and allow the consolation of the spirit to go *its own ways*. Everybody must contribute his best according to his abilities.

## 16. A scientist ask a circle participant questions

What follows is an exchange of thoughts between the leader of the circle (Zirkel Leiter, referred to as Z.L. below) called Medialen Friedenskreis Berlin and scientist Dr. B. who visited the circle in 1961.

Dr. B. : Science does recognise supernatural phenomenon, but science assumes that the cause lies *with the medium*, that is to say, *not* with the hereafter, nor with souls that continue to exist after death.

Z. L. : Science *doesn't acknowledge the soul*, but only the function of the human brain. All of their explanations about the supernatural *start from there*. They should not try to explain something they're unfamiliar with. Research of the hereafter has left science behind in this respect, because they know there is a soul activity that goes beyond the function of the brain.

Dr. B. : How can you verify this?

Z. L. : Spiritualism and also spiritism have furnished thousands of pieces of evidence. Spiritism *verifies the continued existence of departed souls* and spiritualism *entertains contact with otherworldly TEACHERS*, which give us detailed information about all of this.

Dr. B. : Experience has taught us that these types of assumptions can be interpreted one way or another. Everything is so very vague.

Z. L. : Otherworldly TEACHERS do not interpret, but *they explain* and *verify* at the same time. This can take place as follows: During a séance with a suitable medium qualified to deal with physical phenomena, the sound of knocking can be heard, these knocks are controlled by an intelligence and the sound can come from various locations. With the co-operation

of the otherworldly intelligence, one can organise a “yes” or “no” or the complete alphabet. There might be a medium amongst the participants that is unaware of its abilities. Success is verified through otherworldly knowledge the participants in the experiment *do not possess*. Apart from that, physical phenomena support this form of communication.

- Dr. B. : This is surely based on imagination or autosuggestion, well maybe even mass hysteria. This doesn't furnish evidence!
- Z. L. : The sounds of knocking do not have to occur at the table. It happens quite often that it does start at the table to then continue in a corner of the room or a distant piece of furniture, well, they sometimes continue even on the ceiling. One can even ask for the rhythm of a melody, it will be complied with. Gravity can be abrogated, so that an object, for instance a table, will hover in the air, completely free from any support.
- Dr. B. : A prearranged trick! It isn't difficult to trick the participants under subdued light conditions.
- Z. L. : Why does the light have to be obscured? This also takes place in broad daylight or by illuminating the room with 100W lamps. Apart from that, the table can be freely observed from a distance and this from all sides. It might change position or height and if possible, it might even leave the room. I once tried to keep a table from hovering by pushing it down with both hands, it was well nigh impossible, because it bobbed up and down like an empty vessel on water. If I pushed one side down, the other side came up. What if a family decide to have a séance at the spur of the moment, not the slightest would have been prepared beforehand. These types of phenomena can also eventuate under these circumstances.
- Dr. B. : What kind of differences exists there between spiritism and spiritualism? They both cover the same subject.
- Z. L. : No, these are *two different* subjects; because there is GOOD and evil! We maintain that the more *physical spiritism* is more on a lower level, whilst *spiritualism in principal forgoes* all physical “miracles” and only concentrates on messages that originate from higher REGIONS.
- Dr. B. : The participants wish for something, don't they? These wishes could be fulfilled through the power of suggestion.
- Z. L. : None of the participants in an *evolved* circle wish for anything but indoctrination, because all of them are already convinced. But something spontaneous turns up quite often, something none of the participants ever expected. *The positive otherworldly always want to convince doubters through some surprise or other.*
- Dr. B. : Those scientific experts who reject any existence after death should not be regarded as somewhat dense. Why can't *they* be convinced like your circle participants?

- Z. L. : Due to *lack of self-experience*! A circle participant is prepared to be convinced in any possible way and this without prejudice. It doesn't have to happen straight away at the first séance, because he is willing to wait and this is why he becomes a permanent member of a circle. During that time, he will receive many details that will add to his self-experience, so that one will not have to tell him that life continues beyond the grave. No, he actually comes to his own conclusions based on his very critical observations. But those scientists and journalists that want to have all evidence serialised, do not allow themselves the time for self-experience, or their pessimism upsets the whole process.
- Dr. B. : How do you control an otherworldly influence and how do you know whether it is actually genuine?
- Z. L. : There is a human intelligence behind every supernatural phenomenon - if it is genuine. *Spiritistic knocking* develops a kind of "Morse code communication". With a *materialisation*, the movement and the voice are behind it. With *automatic writing*, the intelligence of better knowledge and otherworldly experiences are behind it, so that the memorandum turns into direct answers or information, respectively indoctrination about the otherworldly existence. The WRITER from the other side acts as an individual acts, but quite different from what's been expected.
- Dr. L. : Anything that someone is able to answer of their own accord can never be taken as evidence. Mediums are able to reveal their intelligence in rapturous meditation.
- Z. L. : I cannot discount that, but we're *not* dealing with *mediums* here, we're dealing with *particularly gifted* ones here. A genuine medium plays the violin without ever having had one in its hands. It can for instance write *Greek* or *Latin*, without ever having learned these languages. It can report about events the rest of the world is still unaware of. An otherworldly TEACHER or MESSENGER of LIGHT can see behind the masks of the participants. He knows more than will ever be possible for any human being to know.
- Dr. B. : Why don't these TRUTHS penetrate so decisively that they become general knowledge for all of mankind?
- Z. L. : Because the Churches have never undertaken one single step in regards to any objective RESEARCH into the TRUTH, party politics were against it and there are too few people interested. Apart from that, the DISSEMINATION of the TRUTH usually fails due to finances. This is why we are so dependent on the self-production and dissemination of these protocols and journals. *The real TRUTH doesn't lend itself easily to profits!*
- Dr. B. : I thank you for your explanations. But to be honest I have to admit that I have certain reservations in regards to these TRUTHS, because they completely go against many of my acquired opinions. Above all - one would have to undergo a complete change.

## 17. A journalist from the German magazine “Bunte” asks questions

The leader of the Medialen Friedenskreis Berlin was interviewed by a journalist from the “Bunte” in 1966:

Question : The colossal spread of atheism in all the communist countries is probably going to suppress any religion. It’s probably just a question of time.

Z. L. : This is due to the inability of Churches and sects, they are not able to explore and teach the real TRUTH. The Churches only search through the old manuscripts. They are not inclined to establish a *useful connection* to GOD and HIS spiritual realm. This inability is exploited by atheists.

Question : Has spiritualism really got enough completely verifiable evidence in hand so that there can be no doubts about it?

Z. L. : *This is absolutely the case.* He who alleges otherwise does not have all the indisputable information at hand. There are large organisations all over the world that deal exclusively with spiritualism. In regards to the public, this is a little known fact (1966), because one is not dealing with Churches or sects.

Question : What do you call “indisputable information”?

Z. L. : I mean the protocols from absolutely above-board séances. We, for instance have realised over 1,000 séances. As we are conversing with otherworldly spirits, we’re dealing with written answers, we are talking about 2,000 hours that are devoted to the hereafter. Do you find it possible that a community of seriously searching and critical observers allow themselves to be duped for 2,000 hours or that they are victims of a deception for such a long time?

Question : Atheistically minded people are of the opinion that spiritualism is not irreproachably verifiable as long as the sciences do not render an appropriate acknowledgement on its behalf. What do you say to that?

Z. L. : This is a mistake made by the world at large, respectively the masses. *They only believe in what their leaders put in front of them.* I could also verify that in a lot of instances, academic science has denied and fought against the greatest of their own insights, but *they belong to the best evidence available nowadays.*

Question : If you were to be very critical, do you really find it impossible to think that you might be incorrect in regards to this?

Z. L. : *This is absolutely impossible*, because my work within this mission is based on self-experience. We have accepted nothing without first testing it. We have also ascertained that the other world is very much in favour *that we test everything*. They don't resent our mistrustfulness. On the contrary - the otherworldly world resents anyone *who believes everything without any doubt!* These people will eventually end up victims of the lower world of spirits, which is very interested in destroying any faith.

Question : What kind of examinations and tests do you apply?

Z. L. : To list them all would fill a large book. The most important evidence to us was the fact that the otherworldly world sets nifty traps - and not the other way around. Every time we did fall into such a trap, we had the evidence that the intelligence and the knowledge the OTHER SIDE displayed about us was *much greater*. Due to their many incarnations, the KNOWLEDGE of these otherworldly TEACHERS is immense!

### 18. Epilogue by H. V. Speer (Leader of the Medialen Friedenskreis Berlin)

Spiritism is more widely spread than commonly assumed. Its practice is usually carried out behind closed doors (1966). One does not like to be looked upon as a backward and superstitious people. In one word: One is ashamed of it!

The question of whether spiritism is doing something wrong that it *has reasons* to be ashamed in the public's eyes pops up immediately.

This situation cannot be analysed and openly discussed enough. Science and theology has to deal with this theme *without fanaticism* and *without prejudice*. From our practical point of view we would like to particularly emphasise the following:

- *About 80% of all house-spiritism practiced these days is pure blasphemy!*

This high percentage encourages the Churches to wage war against spiritualism and there is also a passage in the Old Testament forbidding contact with the "dead". But there is no proof that this interdiction is based on a revelation. It seems more like it to us that dreadful experiences during contact with the hereafter were also made during biblical times.

- *This interdiction once again proves that contact with the "dead" is possible.*

On the other hand, this contradicts all dogmas in regards to "eternal peace" and "rest in peace" of decedents.

We concur with those that insist that there is very little merit when it comes to conversing with departed souls. It is very easily ascertained that one is dealing with spirits, but to establish the real identity of a departed relative is even difficult for an expert in this field.

- *Lower entities like to make themselves out to be a relative in order to attract attention.*

Most people that deal with spiritism have a completely false concept in regards to the hereafter and its spirit entities. *Not all* spirit entities are omniscient; their intelligence and experience *varies greatly*. This is why it is so important that one mainly realises contact with really experienced and intelligent spirit entities (SPIRIT GUIDES). But that isn't easy! We should not loose sight of the fact that we are basically dealing *with human beings* when we deal with inhabitants of the hereafter. All of these people have their *weaknesses*, just the way we have.

- *But we have ascertained that every political discussion attracts low, well, even demonic entities.*

We should unambiguously recognise from this fact alone that politics is a *very vicious arena*. This is why we can express our views on this subject only very guarded and with care.

- *We have furthermore observed that every conversation about GOD'S antagonist, namely about Lucifer, also conjures up demons.*

"Heaven and hell" make quite a distinct appearance. Certainly evidence that these terms *were not invented*, but evidence that they do have justification. But heaven and hell are naturally quite different from the way the Churches exemplify them.

All significant mediums have had *concurring experiences* in regards to the world beyond. All of them encounter demons. This is probable the real reason why the Churches are *against* any contact with the hereafter.

But along side of these demons is wonderful realm we call Heaven (not in the spatial sense of the word). With the help of sincere LOVE and the best intentions one can overcome this world of demons and make contact with the SPHERES of LIGHT of the spiritual realm. We have verified this consummately. But nothing is for free, *one has to earn it!*

The psycho-scientific doctrine, that is to say, spiritism and spiritualism are not sects. Only once one begins to openly deal with this does one find out about the enormous proliferation this natural science really enjoys. It is profoundly spread across the whole world, well even in communist countries. Pooled together, the adepts, respectively those in the know, make up a large Church community, let's call it a denomination. The difference lays in the fact that there are no believers as such, but only *adepts*, meaning *those who know*, because there is a great difference between faith and knowledge. The psycho-scientific doctrine certainly has natural-science characteristics. It is not to be accepted after only a few explanations.

- This doctrine demands a very *logical* and *penetrating thought process*, *harsh criticism* and *a coming to terms with many prejudices*.
- *There are no dogmas*, only verifiable facts.
- *There are no illogical promises*.

- This doctrine demands *discipline and devotedness*.

There is unfortunately no public coherence. The roof is missing, senior leadership lacking. This circumstance is the reason why the psycho-scientific doctrine can not gain a foothold.

In order *to correctly understand* this doctrine, which entertains *direct contact* with the hereafter, one must possess a certain amount of knowledge. It is not as simple as with other religions, which only preach a faith that the follower has to accept unconditionally.

These are all facts that most people are unaware of. - The image the public has of the psycho-scientific doctrine (1966) is completely false. Even academic circles do not know the truth, but only know a falsified image, as is usually the case. Those privy to this knowledge keep their insights to themselves most of the time.

The major religions with their various denominations have managed to bring about a situation where most people have a healthy mistrust of any religion. This mistrust naturally also carries across to the psycho-scientific doctrine. In addition to this is this situation where most people avoid any indoctrination they allegedly feel as *unnecessary*.

- *We have invariably made the experience that guest at our séances were immediately acutely surprised and overcome by what they were confronted with, that they started to cry.*

Why this shock?

It is the natural reaction, because there is a *sudden* realisation that the real religion looks completely *different*. One recognises oneself and immediately recognises how wrong one's thoughts have been and how wrong one's life has been lived. Those that have not experienced this emotional turmoil personally or at least witnessed it first hand cannot pass judgement on this doctrine of awareness. But academics do so. They only know the *negative* side of spiritism and they have certainly not heard of spiritualism or hardly ever anyway. But they believe that their knowledge suffices to make an academic judgement.

Only he, who finds it possible to *fathom* this doctrine will find the unadulterated TRUTH. This takes generosity of thought and a willingness to test oneself and to recognise oneself. Nothing comes from "above" of its own accord. The rule goes: "Knock and doors will open". This "knocking" *must* take place. He, who is searching for the TRUTH must have a *faithful* heart. But one must be willing to start with the *lowest\_rung* of the ladder that leads to the top, one cannot be on top right away. The *psycho-scientific doctrine* would be the greatest source of knowledge imaginable for academic science. It pays to reap the benefits, but one cannot exploit it!

There are broadcasts on radio or television on the occult every now and then. In as far as we were able to survey these presentations, we unfortunately have to ascertain that reporters deal with a subject they *have no ideas about its facts and laws*. The assignment they set for themselves is called: "A fight against superstition." But they assume that all of the occult, with all its branches, represents amassed and concentrated superstition. The expert soon realises that this fighter against superstition is *an atheist of the highest order*, one who attacks *every* phenomenon with blind rage and purposeful

derisiveness, but one that has never completed any studies in regards to these phenomenon. Their ignorance is incomprehensible!

What should be emphasised here is that every esoteric and every spiritualist is a fighter *against* superstition.

- The difference between a reporter and a spiritualist lies in the fact that in contrast to the reporter, the spiritualist has undertaken a significant amount of studies *in regards to phenomena and the psycho-scientific doctrine* and that he also possesses a *comprehensive amount of self-experience*. He assesses these things differently and does not label everything in sight as superstition. A distinction must be made here.

According to our experiences, which are quite extensive, we have gained the impression that superstition represents incorrect behaviourism in regards to many facts. But we have also witnessed that scientists and doctors *can be quite superstitious*, whilst rejecting spiritualism and actually all of the occult and any religion. They use playing cards to lay *patience*, believe in the *astrology columns you find in papers and weekly journals* and they fear *Friday the thirteenth*.

Superstition is of course psycho-science doctrine's greatest enemy.

- Only when all this superstition comes to an end will the psycho-scientific doctrine become part of elementary education.

The masses unfortunately find it *impossible to distinguish* whether the accounts presented on radio, television or reported by the press express the truth. But they accept everything that's reported *as gospel*, because they believe that these institutions are better informed.

We had the opportunity to talk to and work with a television team from the ZDF (Zweites Deutsches Fernsehen). It is quite devastating to discover that these people deal with themes they *are completely unfamiliar with*. But this error infection is extremely dangerous, because it influences the political thought processes of all nations.

It is extremely deplorable that expert knowledge in this field *is particularly insignificant here in Germany*. One is a lot better informed in countries like England, the USA and in many other countries here on Earth. This elucidation is not an acknowledgement of democracy, but a *serious desire to explore* a TRUTH that is still partially hidden beneath the surface of our knowledge.

It will surely take a while before these difficult obstacles will be overcome. But the *foundations* for its exploration have already been established through the founding of the *Para-Psychological Institute*. One has been virtually dealing with a secret science up to now. But the spiritual realm will find ways and means to also bring the TRUTH to these institutions. Private research communities and private circles presently still possess the better mediums. But there can be no exact exploration of the spiritual realm without these excellent mediums.

It cannot be denied that university taught science *has often been wrong*. All the mistakes made in the past *must be admitted*. A lot of things it insisted upon for years was *later recognised to be false*, but in

regards to psycho-science, respectively to life after death, nothing has changed over the past thousands of years. Political interests try to disown any psycho-scientific insights, but they have not been successful in producing any counter evidence.

There was very little interest shown in psychology just a few decades ago. It has become more popular these days (1966). Take a look at the great popularity psychology now enjoys in the USA. The psychologist ought to help! But whatever psychologists have asserted with great success in the past is now being looked upon with scepticism. One now finds that the exact opposite is true. One has asserted up to now that deep-sleep brings the best recovery. One has now been able to test the sleeping state with very delicate instruments. A *whole series* of new discoveries have been made that do not coincide with past sleep research.

But we only want to pick out the things that are related to psycho-science, that is to say, what can be explained on hand of our own research results. It has now been established that infants, respectively babies, have *very vivid dreams*. With the help of electronic probes attached to the skull, one has measured impulses within the centre of the brain that clearly indicate the presence of dream impulses. Brain specialists and psychologists are now confronted with the question of:

- How can infants dream when they have clearly not experienced anything so far?

These dream impulses are certainly not faint. On the contrary - they indicate a specific, important dream experience. It can therefore not solely revolve around the mother's breast or the bottle of milk.

Our psycho-scientific doctrine comes to our rescue:

We know that a new earthling is *incarnated from the spiritual realm*. But we also know that children have *a closer relationship* with the spiritual realm than adults. An infant has not been on Earth for a long time. Its earthly experiences are virtually zero. But its experiences from a *past life* and from an existence within the spiritual plane are so much greater.

- If an infant does display strong dream impulses, we can be dealing with memories that are connected to the spiritual realm or with a past incarnation.
- But it is also possible that these infants have very distinctive astral experiences, respectively converse with astral beings.

An earthly language is not required in this case, because telepathy excels beyond any language and replaces any dialect. In regards to the sector of telepathy, every human being is always his or her own translator.

In the light of our research, the results of measuring dreams are very important and ratifying. If one is informed about psycho-science, the explanations are at hand. University taught science could save itself a lot of arduous detours if they were better informed in this respect.

- We ascertain at any rate that the infant and also the baby have a very strong relationship with the hereafter. Only during the course of its life on Earth - mainly due to civil influences - is this relationship *displaced* or *obliterated*.
- In relation to native tribes that are *less affected* by civilisation, this relationship with the hereafter last longer. Their whole behaviourism substantiates this.

This indicates to us just how important research into and acknowledging these types of events really is.

Psycho-science also tries to accomplish its best.

A lot of thought has gone into figuring out the activity of the human brain, but one has been unable to solve this enigma. After a lot of deliberations one has come to the conclusion that engrams develop within the brain, respectively within the substance of the brain and that these engrams can be scanned like the magnetic tracks on a recording tape. This interpretation is still advocated quite often even now (1966).

If we want to bring engrams into the equation at all then only on a *cosmic basis*.

The theory of brain-engrams can *definitely be refuted*.

- The five year old son of a fisherman, Kosras Janaika, from Tinos in the Aegean Sea never learned to read or write, because he never went to school. This five year old was the talk at universities, because he solved the most complicated mathematical problems.

This example alone suffices to support the explanation that Kosras Janaika's brain does *not* work with the help of engrams. His brain therefore has no resemblance to a computer. This boy had *no experience* with mathematics. Such engrams just couldn't sustain their presence. So where did his incomparable knowledge come from, because we are not dealing with a talent here? Mathematics is based on experience and it demands a certain amount of practice!

According to spiritual experiences, there is a different definition for this:

At age five, this boy still had *a very powerful association with his past life*. The frequencies of his past life were not quite extinguished. He therefore had a cosmic connection to his memory-engrams, which *are recorded in the universe*. He had the experience due to a past incarnation.

We are *not* dealing with an isolated case here!

Infant prodigies are not such a rarity.

Reincarnation is indeed even disputed by a few spiritualists. But there is earthly evidence present that verifies that reincarnation is a fact. We have tried to clear up these contradictions.

There are people on Earth that balk at any thought of reincarnation. Even after entering the spiritual realm, they still hold fast to that opinion. One could therefore not expect to receive spiritual elucidations from them. There are furthermore otherworldly souls that are in no position to gain an

insight into reincarnation, because they are not on the corresponding level of knowledge. But there are also spiritually enlightened people who know something about reincarnation, but who do not make comments about it.

Let's take a closer look at a case from England:

Some spiritual circles in England have decided to leave reincarnation out of their proceedings as much as possible. The Church there is *not* antagonistically inclined towards spiritualism. But this apparent friendship stops immediately when the word "reincarnation" enters the scene. The Christian Church prefers to stick with its dogmas and it does not like contradictions.

But there are authors that write very beautiful books about the spiritual realm and their inspiration is beyond doubt. These authors want to sell their books and they don't want to antagonise those of a different faith. They simply leave reincarnation out of their books or they simply reject it so that their sales are assured. We know from our own experiences just how difficult it is to teach someone who thinks along different lines the TRUTH.

- *Well over 1,000 séances with good SPIRIT TEACHERS have certainly established that there is temporal and planetary reincarnation.*

The doctrine of reincarnation, or physical re-embodiment, is certainly neither a new doctrine, nor a purely spiritual concept. This doctrine already existed during biblical times and played a prominent part in religion at the time.

- *This doctrine was eliminated from Christian doctrine by a majority decision in the year 553AD. This eliminated the most important factor of the psycho-scientific doctrine.*

Due to *the absence* of this BASIC TRUTH the Christian doctrine has moved from one untruth to another. The results are catastrophic:

Millions of graves proclaim this mistake!

Lie after lie is chiselled in stone!

According to the doctrine of re-embodiment, there is *no* "eternal rest". All otherworldly messages confirm this. The fact that the representatives of Christian Churches *preach sermons* that cause acute despair in those left behind is even more shocking. We will give the theme of re-embodiment our greatest attention!

Our brothers from other stars, as for instance ASHTAR SHERAN, are also emphatically against any Christian nonsense and any other nonsense for that matter. The whole subject is too serious for that. Eminent thinkers and poets have confessed to believing in reincarnation, Goethe, Voltaire, Hebbel and more than one hundred other eminent personalities are amongst them.

- *Spiritualism represents the most essential immersion of all the religions of this world. The resulting KNOWLEDGE cannot be gained through any other method.*

It is easier for you to move mountains  
and to stop the world in its tracks,  
than to prove to someone something  
he's not willing to accept!

Many cases of people remembering major events from past lives have been reported recently. The famous Italian singer Gargano reported that her successes were due to the fact that she had been a prominent singer in a past life on Earth and that she is able to remember it in relatively exact detail.

The Churches do not make the slightest attempt *to revise* the doctrine of reincarnation in order to right the great wrong from the year 553AD, in spite of all available evidence.

- The doctrine of reincarnation is part and parcel of spiritualism; it represents *the core item of research into the hereafter*.

It is a sad situation that there exists a discord amongst spiritualists in this respect; it throws a dark shadow over this science. Our spiritual TEACHER ELIAS had something to say about it, namely that every human existence here on Earth would be meaningless and that there could be no justice, if reincarnation *didn't* exist.

- *Everything man has achieved in regards to the advancement of mankind's development, its culture and its dealings with the planet during his lifetime will benefit him over again in a future existence.*

The doctrine of reincarnation literally states: "One life on Earth can no more prepare us for heaven than one single day of our childhood can impart the maturity of an adult on us. *Many* days on Earth are required to impart perfection on us". - Almost everybody has a completely false concept in mind in regards to "Heaven".

- However CHRIST said that Heaven *was within us*. We are therefore dealing with *a feeling of contentment, security and the assurance of being surrounded by GOD'S LOVE*. Heaven is certainly not a specific place.

THE END
