Extracts from the *Menetekel* of the years 1956 to 1975

Title: **Invisible TRUTH**

(Something nobody wants to believe)

Questioner : Medialer Friedenskreis Berlin
 Mediums : Uwe Speer (17) and Monika-Manuela Speer (15)
 MESSENGERS OF LIGHT: ELIAS, ARGUN, AREDOS

This particular theme deals with contacts with the spiritual realm and *indicates the dangers that exist*, when the LAWS of proper contacts are *disregarded*. The Medialen Friedenskreis Berlin, a Christian/spiritual community, psychically received the text to this theme between 1956 and 1975. These messages are part of the *Menetekel*, a collection of about 4,000 A4 sized pages of protocols, collected over 20 years, which were recently reorganised. These mediumistic messages are complete and were left in their original quality, even when similar questions were repeated. The work of the two mediums began when they were 15 and respectively 17 years old. The total production is considered the absolute pinnacle of psycho-scientific exploration. Other spiritual circles have tried to copy their work, but its quality was never achieved. The distribution of these recently re-catalogued messages and protocols is *explicitly encouraged* and is not covered by any copyright.

—

Preface by the editor

It really is a scientific scandal that man, being the pinnacle of this planets creation as it were, is not even clearly *informed about it's own existences*. The reason for this is that the definitions natural sciences apply are always directed at *the exterior* and not the creature. The result is this strange malady of the brain, the German philosopher Schopenhauer calls the *metaphysical frugality*, which quite often endures for a long time.

This illness has adopted the guise of a scientific system called *materialism*, these days. The materialist acknowledges the *mechanical* ingredient only, and because he accepts only legitimately acting forces, nature appears to be a game without rhyme or reason to him. Neither our world nor our own existence has a purpose from his point of view.

- Mechanical legitimacy and senseless purposelessness are identical concepts for him. This is the fundamental design of materialism - but also its fundamental aberration.

To give you an example:

Goethe's „Faust“ can be dissolved by *natural science* because the paper it's written on is fabricated

from rags and printers ink; Natural science will declare an aria from Mozart a series of consecutive vibrations in the air. But Goethe and Mozart would be affronted if such definitions were considered *satisfactory*; and the more prudent amongst people have always been offended by the fact that they should be obliged to accept the natural scientific explanations about our world.

The world is indisputably a natural scientific problem, but besides that also an *aesthetical*, *ethical* and a *metaphysical*. Throughout the ages, everybody who's spirit wasn't only concerned with superficiality, has recognised this.

- Even if it's hard to accept: Human knowledge is patchwork knowledge!

Experimental sciences today are still far removed from being completed even now and it's an absolute certainty that new branches of knowledge will come into being over again. The beginning of *new* knowledge and signs of *new and vital* areas of research are found in psycho-sciences and parapsychology. But this is not a case of new directions of faith, but *planned* knowledge.

- Psycho-scientific doctrine and parapsychology *don't* relegate things back to the dark *ages*, but *far ahead into the future* and are destined to shape the view of the world in the future, which amongst other things also includes the solution to the riddle of man.

More and more people are interested in spiritual questions about life and *question* the possibilities of making contact with the invisible spiritual SPHERES of EXISTENCE. Private experiments are carried out so see what this is all about. Reports in the mass media about successes or failures, but also fraudulent intent, are on the rise.

In regards to techniques promoting contact, for instance the use of *automatic writing and voice mediums*, the *greatest care is advisable*, then a spiritual entity, if it's still in close proximity to the Earth, initially remains as before, the only difference being that it is without a physical body.

- To accept statements as authorised, just because they originate from someone on the other side, is naive!

Results indicate just how often grave ignorance is involved when dealing with the other side. It is an absolutely necessity to gain the required knowledge beforehand, as the dangers lurking are great. An unbelievable starry-eyed approach to the subject, arrogance and feuds within the various groups has been the downfall of many a working circle. The end-result is quite often a visit to the psychiatrist!

- *The inner quality of the members of a circle and thereby also the quality of the spiritual connection are above everything else, mirrored in the resulting protocols. This is a very simple exercise to test how valuable a psychic working circle really is.*

The universal LAW „each to his own“ is absolutely effective here, that is to say, the energetic field, the aura enveloping every human being, will always *attract* those spiritual entities that are in *concordance* with its VIBRATION. Comparable to reflexions from the spiritual home of the person or group of people concerned.

The time spend living on Earth shrinks to a short but very important episode, ending with physical graduation. Whoever fails this examination, *repeatedly* returns back to Earth and passes through the earthly school of life again and again.

- *The wheel of reincarnation can only be escaped from by spiritual ascendancy. Time factors can come into play that render the earthly numbering system obsolete.*

But this time factor can be drastically reduced, if one *is prepared* to undergo spiritual training. There are *authorised* TEACHERS in the spiritual realm, having already passed through GOD'S schools, only *wait for* an opportunity to communicate the necessary KNOWLEDGE to someone who is faithfully searching for the TRUTH. The CREATOR put everything in place to achieve this. But the way to a positive connection is long and dangerous, as the spirits of hoaxes and lies wait for those with less noble intentions. The Church is quite correct to warn you about this!

- *All opportunities for indoctrination are present, but to create the necessary working environment for the SPIRITUAL TEACHER is the job of the person involved!*

A biblical proverb states: *Test the spirits!*

But if you want to test the spirit entity, you must know the *correct yardstick to carry out this test*. False yardsticks lead to false and sometimes absurd results. There is enough literature in the "esoteric supermarket", but most of these cause more damage than benefits and frighten many of the searcher who get their hands on these texts.

- *The most valuable psychic messages are those who resonate within a person. Everyone can apply this test, by testing the overall value of the answers in this way.*

The Mediale Friedenskreis Berlin was one of the few excellent examples, of how one can perform *solid* and *reliable* spiritual research for the benefit of mankind. Some of the visitors were member of parliament, theologians, educators and detectives, people looking for first hand experience, there was also correspondence enter into with the Max-Planck-Institute. Amongst the readers who received the Menetekel Protocols were well known names like: Adenauer, Churchill, the Pope, Prince Philip, various governments and Church authorities.

Newspapers and magazines reported and the Zweite Deutsche Fernsehen (a major German television station) filmed during one meeting. Movie producer Mr. Libik asked for an interview to discuss a movie, but the circle was forewarned about falsified representations by the mass media. The result of these misrepresentations was that the medium Monika-Manuela was mobbed and mocked by youth in the street. The circle realised that bringing this subject openly to the public, could not be accomplished this way. What was left was to publish it themselves, which was associated with a lot of work and cost, but the positive way is generally *the more difficult* way.

Over a period of over a quarter of a century, the MFK-Berlin (Medialer Friedenskreis Berlin) practiced and published quality of the highest order. Practical experience in all the various fields of spiritism and SPIRITUALISM was collected and evaluated. The attained research results were published in 288 editions of the monthly journal "Menetekel" from 1958 to 1975, comprising over 4,700 pages of text. In addition, a further 23 brochures, comprising over 1,700 pages on the subject of UFOLOGY were published.

SPIRITUAL TEACHERS, MESSENGERS of LIGHT and SANTINER announced their presence, for instance:

IKARUS	: SPIRITUAL TEACHER and <i>FOUNDER</i> of the MFK
RALF	: SPIRITUAL TEACHER and leader of the MFK
MARZELLA	: LEADER and <i>GUIDING SPIRIT</i> of the MFK

CHRISTIAN	: SPIRITUAL TEACHER
DANIEL	: SPIRITUAL TEACHER
ANASTA	: SPIRITUAL TEACHER and LEADER of the MFK
ELIAS	: MESSENGER of LIGHT and LEADER of the MFK
AREDOS	: MESSENGER of LIGHT and LEADER of the MFK
ARGUN	: MESSENGER of LIGHT and LEADER of the MFK
ARMAND	: MESSENGER of LIGHT and <i>spiritual DOCTOR</i>
HUSIAN	: MESSENGER of LIGHT
SANDRUS	: MESSENGER of LIGHT
SEMARUS	: MESSENGER of LIGHT
FORTUNATIO	: MESSENGER of LIGHT and <i>LEADER of SECURITY</i>
JOHN SHERIDAN	: MESSENGER of LIGHT and <i>draughtsman</i> . Drew 200 portraits.
VERITAS	: MESSENGER of LIGHT . (The soul of the German philosopher. More about this in the special edition "What VERITAS tells us").
ASHTAR SHERAN	: SANTINER and WORLD-LEADER. Guardian of a sector of the universe. Has contacts in other parts of the world. Only appears when the circle operates under <i>absolute harmonious conditions</i> . There are a lot of forgeries in circulation under his name!
SETUN SHENAR	: SANTINER and <i>deputy</i> of ASHTAR SHERAN
TAI SHIIN	: SANTINER and assistant of ASHTAR SHERAN
ASHRAPH	: SANTINER
OTHAR SHIIN	: SANTINER
TAONITAS	: SANTINER
and others.	

The *Menetekel* is one of the few high-quality INDOCTRINATIONS on this Earth.

The resonance coming from the readers so far is *extraordinarily positive* and reinforces my willingness to continue this time-consuming and sometimes financially costly exercise. There are Dutch, French, Italian, Portuguese, English and of late also Russian translations of the *Menetekel*. During the years of 1989/90, a soviet translators in Kiev started to translate the ASHTAR SHERAN messages into Russian.

It would have been interesting to trace the time period these ASHTAR SHERAN brochures were released, but we have no idea of how many editions were published. Commenting on the latter, I would like to say how much I regret the fact that - like a falling star - these publication were available for such a short time and are therefore rarely found these days, this is especially regrettable in regards to the younger generation. These brochures certainly deserve to be published again! A large section of the total output went to Brazil in 1975, this happened shortly before the Circle was disbanded.

- There are the odd ASHTAR SHERAN brochures on the market, but they have been "revised" and *falsified* by branches of the media. Because one feared a negative reaction from Church circles, many paragraphs *were deleted*.

An unbelievable fact!

There don't seem to be *enough* forgeries in this world!

The quality of the original proves that not just *genuine* contacts with the other side *are possible*, but that beyond this, a deep and amicable connection with exalted TEACHERS from the spiritual realm can be established. Such a contact can be fostered and expanded over decades, if the people involved can *maintain* the achieved high standard *among themselves*, respectively even *improve* it.

But with many psychic working groups, the reality looks completely different!

The co-operation with MESSENGERS of LIGHT for instance is not that simple and it's connected with specific *preconditions* and LEGALITIES:

- *The will to SERVE,*
- *absolute honesty,*
- *a active mind and*
- *a LOVE for GOD and HIS CREATION*

are indispensable preconditions for making contact with an authorised TEACHER of GOD.

- If these important conditions are only *vaguely* heeded, the meetings *haphazardly* prepared and there is *hardly any harmony* within the group, connections with MESSENGERS of LIGHT are *impossible*. If someone alleges something else, he's lying to himself.

In a case like this, the VIBRATIONS of the group concerned *don't* resonate with the VIBRATIONS of the exalted TEACHER. The resonance factor is not produced.

But contact with the spiritual world can be established *in spite of this!*

Entities will turn up whom *present themselves* as “exalted teachers” and in the worst case, feed off the vitality of the circle members and especially off the medium. To compensate, so-called “truths” are sporadically *interspersed* in the psychic transmissions, to lull those present into a sense of security and *to keep them interested*.

It's also possible that an *initially* positive connection *can't be maintained* because of negative changes within the earthly circle and it ends up as a *negative* connection. A negative change can take place *instantaneously*, comparable to a situation in the mountains, where the slip-up of one single mountaineer can suddenly bring the whole team tumbling down.

- Pride and obstinacy create fresh karma and contradictory protocol messages poison those souls looking for the TRUTH.

Every member of the circle bears *complete responsibility*, which also takes effect in the otherworldly existence most of the time. These people have so little conscience that they never even consider their own fate, when they finally enter the spiritual realm.

It is written:

- “Everything, *but sinning against the HOLY GHOST*, can be forgiven.”

Therefore once again:

- Test the spirits!
- But also test the earthly contactee, they are the mirrors of the spiritual world!

- Test *the quality* of all the psychic messages published by a working circle, these are the mirror image of the *whole* working circle, here *and YONDER!*
- Positive INDOCTRINATIONS are identifiable by the TRUTHS, which are of a *common* interest and importance for *all age groups*. Private questions and arrangements *don't* correspond with this high standard!

Genuine INDOCTRINATIONS are a *positive learning process of the highest order*, shortening the individual path of spiritual evolution considerably and reduce a lot of unnecessary sorrow.

Bad Salzuflen, June 1994

B e l s a z a r

by Heinrich Heine

As midnight drew nearer;
 Babylon rested in silent peace.
 Only high up in the king's castle,
 lights flickered, the king's vassals clamoured.
 Up there in the throne room
 Belsazar enjoyed a king's repast.
 The vassals sat in shimmering rows
 and emptied beakers full of sparkling wine.
 The beakers clanged, the vassals cheered;
 the king enjoyed the tumultuous mood.
 The king's cheeks glowed:
 the wine gave him bold courage.
 The courage blindly carried him away,
 and God was blasphemed with sinful word.
 He throws out his chest and curses wildly:
 the vassals bellow their approval.
 The king exclaimed with prideful gaze;
 the servant rushes off and then returns.
 He carried lots of gilded gadgets on his head,
 taken from the temple of Jehovah.
 And the king grabbed with sacrilegious hand
 a holy chalice filled to the brim.
 He quickly downs it till it's gone
 and calls aloud with foaming mouth:
 "Jehovah! I declare with eternal scorn,
I'm the king of Babylon!"

But hardly were those words pronounced,
 the king felt a muted fear.
 The shrill laughing came to an end;
 a solemn silence filled the hall.
 And look! and look! on whitewashed wall
 there appeared as if by human hand
 and wrote, and wrote on whitewashed wall
 letters of fire and wrote and vanished.
*"MENE MENE TEKEL UPHARSIN"*¹
 The king sat mesmerised and stared,

¹ The mysterious writing that appeared to Belsazar is often quoted as a divine warning, even in our time. "*Mene mene tekel upharsin*" means "*Weighted and found to be too light (therefore) ended and divided*". When camping, this glowing writing was seen in the night sky!

with quivering knees and pale as death.
 The vassals sat there, grey and cold,
 sat still and muted one and all.
 The magi came and new not what
 the words of flame had to say.
 But Belsazar was during that night
 slain by the vassals at his side.

Lies make everybody unhappy (Transmission from the year 1957)

Life on this Earth is no picnic -, it is punishment. When a soul has just reached a stage in life where it starts to reason, its parents feel obliged to lie to it and confuse it. It gets to hear about *Father Christmas*, the *Easter Bunny* that lays eggs, about the *Stork* who brings the children, the *Boogie Man* and about the “*Dear Lord*”, who punishes everything.

But GOD’S punishment is depicted completely differently from what it *really* is.

Once the children have grown older and have gained more experience and logic, they gradually realise that they only *heard lie after lie*. But the childhood years are very important for the overall development of a person. But the parents and educator transgressed badly and *encouraged* the children to distrust and lie.

But there are a series of hard to understand TRUTHS, namely those written in the bible: DIVINE MIRACLES and PHENOMENON.

- But if the Stork and Father Christmas represents a fantasy early in life, how can one *believe in transcendental TRUTH*?

Adults are often *uncommunicative* and *distrustful* or *spiteful* towards their fellow human beings, *because they have fallen prey to many lies*, presented to them right from their childhood. Fathers and mothers, uncles and aunts and siblings too, teachers and educators, they all tell lies to children with enthusiasm.

In the ensuing years, these young people read *novels*, *science fiction* and *horror stories*, of which *most are also more or less fictitious lies*. Then they progress to philosophy - *it lies even more so*, and last but not least the sciences, which have *stumbled from mistake to mistake* for thousands of years.

Now man lives in the “glorious” age of technology. Here man can see the results, they couldn’t be lies anymore, they believe technology to be *visual* progress and it therefore determines the whole thought process of man. If something doesn’t fit the technological image, it is not believed! But technology also lies, it certainly isn’t a yardstick for measuring absolute TRUTH. Technology isn’t a yardstick to measure logic either!

- *Technology exploits planet Earth*, it extracts valuable resources, which serve to preserve life and survival, from Earth.
- *Technology pretends something is right*, even if things are completely different most of the time.

- *Technology doesn't create harmony* - it creates furiousness and time factors, it badgers people, creates unrest, deprives them of sleep and promotes metabolic illnesses, it makes people discontent and listless and makes them covetous and unhappy!

Who stands behind all this extolled technology?

Lucifer!

- Be true to yourself, *don't lie* and *don't exaggerate*. Lies lead to exaggerations - and exaggerations lead to lies!
- You must *stay within the boundaries* in all things and it's important *to know exactly* where the boundaries are, so they are not transgressed. Of all the existing boundaries the *invisible ones* are the *most dangerous* ones. - Exaggerations can lead you there!

Is there a TRUTH? (Transmission from the year 1961)

To be sure, the human spirit researches *everywhere*. He doesn't just turn his attention to the reality of this Earth, no, he goes well beyond into the immeasurable regions of eternal space. But he is all too easily fooled by his observations. Everything not clearly recognised and observed is compensated for by his pondering and by *the speculations of his assumptions*. This method is extremely questionable, then how easily can one speculate past the TRUTH.

Can man recognise GOD?

No, he can see HIS CREATIONS, but he knows what it means to create. The immeasurable vastness of space with its innumerable stars give him such a shock, that he finds it impossible to believe that any spirit, be it ever so immense and almighty, could ever have created such a universe, a universe full of movement, full of LAWS and life.

A "level-headed" scientist might say: "There is only one explanation for all of this: Space with all its contents could never have been created; it has always been there."

- The result of this definition is *pure world-atheism*, the *rejection* of a CREATOR, who supposed to have achieved such a miracle, such a gigantic construction.

The human intellect, in quest of the TRUTH, despairs at the sight of the incomprehensible vastness of the universe and his belief system crumbles, because he recognises how *infinitely small he really is* within this CREATION.

By rejecting the GREAT PLANNER and PERPETRATOR, man believes to grow spiritually and *deludes himself* into believing to be the *mighty* spirit and the most important intelligence of the whole universe. With this lie, he accomplishes exactly the same as a *really great spirit*, namely Lucifer, accomplished, who was also shocked at the sight of the MAGNITUDE of GOD.

- *The despair felt at the sight of GOD'S MAGNITUDE is the result of an inquisitiveness, which actually requires a higher level of maturity.*

The human spirit enquired *too early* into GOD'S ETERNITY. It's unfortunate that he omitted to *look within himself* first, which would have enabled him to recognise the whole OMNIPOTENCE and CREATIVE FORCE of GOD *within him*. He never recognised the origin of his existence to a

degree that befitted the TRUTH! - But the human spirit rushed out into the distance, into the infinite and wasn't able to comprehend the miracle he *carries within* for his own contemplation and education.

- *What could the stars reveal to man, if his own heartbeat cannot tell him anything?*

GOD cannot be recognised through a telescope and no rocket can penetrate space to where HE is. But man *isn't happy* with this fact. He asks the question: "How did the universe come into being, if it didn't exist before?" - Well, this secret does not remain concealed from anybody. You can observe it on a daily basis in the growth and progress of flora and also fauna.

GOD our LORD created HIS LAWS - and according to these, everything come into being, the whole immense CREATION. But these LAWS are GOD'S LAWS. They might be at the disposal of man, but they are *no human laws*.

- *All the LAWS of the cosmos and the universe are combined within one single human being, eternity as well as conversion, LOVE as well as propagation, higher development and decline.*

Something to think about (Transmission from the year 1970)

Mankind continuously moves towards a very specific goal, one you cannot see. When this goal is reached is a question of time. Unfortunately mankind on planet Earth is seized by great impatience and:

- *Impatience hinders normal progress.*

We possess a great overview over the development of Earth's humanity, placed on one of the most beautiful planets of redemption.

- Whether quickly or slowly, everyone on Earth has *the assignment* to redeem himself as well as he can on this planet. Only *after the cleansing* of the immortal spirit can man enter a REALM, where paradisaical conditions are found.

Many say: "What do I care what happens *after* my demise. I have no part thereof." - The whole ruefulness of thoughtless ignorance is hidden behind these words. Everyone wants to know what the future brings, but it's only the question of a future here on Earth. The future *after death* is completely uninteresting, because one *doesn't believe* in a spiritual future, respectively, one doesn't *want* to know that it exists.

The measuring stick of bliss on Earth is wealth. - But nobody ever considers that every wealthy person will find himself *pauperised* in an *unknown realm* after death, where *different yardsticks are in use*.

The economic situation, determined by industry, has an enormous influence on the spiritual development of man. Nobody can escape this controlling influence. The economic situation adapts itself only to the *mundane* needs, *never to the development of the soul*. The enormous industry is not interested in an objective that lies in the beyond, but is *only interested in consumerism*. The choice of products industry has on offer only *hampers* spiritual indoctrination. It thereby does a disservice to man, as the major development of man proceeds in a completely unilateral fashion and man has no idea, why he exists here on Earth.

I know that one doesn't want to believe in the existence of the devil these days. But this doesn't eliminate the fact that he exists. The devil is familiar with the power of industry and therefore incorporated it into his plans. He, the great antagonist of GOD, reigns over the planet's industry and completely controls its behaviourism.

These are facts one cannot ponder over enough!

Whatever industry has on offer *must be scrutinised by the intellect*, then it could be that the greatest traps a superlative brain can conceive, are set here. (Television, video, etc.) - CHRIST very appropriately said: "What would one gain if one would win the whole world, but loose one's soul?"

- There are former millionaires in the spiritual realm, who, equipped with their present knowledge, would have renounced everything on Earth, if they could only have been told *a glimmer* of the TRUTH.
- *The absolute, objective TRUTH from the spiritual realm cannot be paid for by any currency. Its value is incomparably more precious and no industry can offer even a fraction of it.*

Materialistic thoughts *hinder* spiritual development!

Man must endeavour to pay *less* attention to what industry and economy have to offer and give spiritual values more consideration. This is his earthly duty.

Misconceptions (Transmission from the year 1970)

There are some grave problems, which can only be figured out by a handful of people, whilst *the majority* of Earth's population quite heedlessly ignores them.

But the consequences affect *everybody*!

There are scientific objects being build on Earth that cost billions. These installations serve to research matter. But on the other hand, there is *hardly any money* available for researching the SPIRITUAL LIFE. One considers this research for *unimportant*.

- If other civilizations on other stars are vastly superior to Earth's humanity, it is *the result of spiritual research keeping pace* with research into matter. Spiritual FORCES are immensely strong; *but one has to know them!*

These FORCES can act positively, but *also negatively*. It is a fact that the spiritual FORCES are so powerful that they can counteract Earth's enormous gravitational pull. But as soon as one talks about spiritual FORCES, one puts on airs, wears a superior smile and dismisses the whole thing with a gesture, as if one deals with a superstition conquered long ago.

We, from the OTHER SIDE can't understand this stupidity. At a time when such incredible constructions and equipment is developed on this Earth, this spiritual regression is inconceivable and one asks in vain for an explanation that makes sense.

It's unfortunate that we have to depend on only a few mediums and circles with the necessary ambition to deal with the secrets and powers of the SPIRIT. All of these circles and mediums, as highly developed instruments of the SPIRIT and by no means inferior to the scientifically minded,

could achieve completely different results if they would receive more recognition and also more financial support.

It is unfortunate that the Churches consider SPIRITUALISM and space travel *unwelcome* rivalry, which keeps a close eye on them. But it's exactly those divine TRUTHS that the Churches are responsible for - or at least want to be. If the Churches would at least make a start, a *crucial step* towards COSMIC TRUTH, *science would surely follow*. It has always been a strong desire on our part to see the sciences and the Churches strive *conjointly* towards the same GREAT OBJECTIVE, instead of fighting one another, thereby giving atheism a free hand.

- *ETERNAL LIFE is not a dream, but a true reality. There is enough evidence available.*

We do everything in our power to *repeat* this evidence over again. But even our greatest efforts are *distorted and disputed* by tenacious atheists. If it would be possible to make the TRUTH so interesting that it became a bestseller, it could not be stopped from spreading. The TRUTH is interesting enough, but it gets confused with superstition, which modern man is inclined to dismiss.

Therein lie the main mistakes when contemplating this.

It is of immense importance to eliminate these wrongful contemplations!

But what has COSMIC TRUTH, the INDOCTRINATION of ETERNAL LIFE or the INDOCTRINATION of REINCARNATION to do with superstition? - I say to you, all the warmongering is superstition, because it's *inhuman*, insane and *illogical*. The same applies to any kind of animosity. But nobody thinks of making fun of warmongering and animosities the way they do with COSMIC TRUTHS.

- *Terrible teachers end up with terrible students. - The same applies here on Earth!*

A few words on enlightenment (Transmission from the year 1972)

A great many people believe themselves to be "well-informed".

A superficial knowledge about science and technology tends to make people arrogant. If events take place on this planet that *don't seem* to abide by the LAWS of nature, they're *dismissed* as *nonsense*, because one considers oneself "well-informed". The unfortunate result of this kind of explanation is that mankind has reached a low point, not just morally but also ethically.

Where do the masses get their information from?

The masses don't usually study the natural sciences. But in spite of that, one permits oneself judgments as if one knew something that was *beyond reproach*. This type of enlightenment of the masses is *not very objective* and damages the normally healthy perception of man. This *false* knowledge is taken from the daily newspapers and accepted as the latest truth. This is a type of education is based on completely misplaced trust.

Who writes for the daily newspapers?

The majority are *young* and *inexperienced journalists*, equipped with only the experience drummed into them at academies and universities. These newspaper people are completely helpless when

faced with extrasensory phenomenon, as they have nothing to compare it with. But they still feel “well-informed“. Their explanation is that anything to do with the transcendental, is superstition.

- *Knowledge is always based on experience. There is a lot of knowledge based on experience, but it is not taught at any academy or university.*

Academics believe that any knowledge *not* accepted by universities cannot correspond with the truth. This is an **enormous mistake** many journalists fall prey to. One doesn't take note of the fact that besides all this academic knowledge, there is also an *enormously important knowledge based on experience* accessible, which is also available in print. But one doesn't find it necessary to inform oneself about it.

A very good proverb states: “Put everything to the test: but keep only what is good”.²

There is scarcely one journalist who knows anything about the KNOWLEDGE that exists in the private sector. If somebody insists that he's so well-informed that he doesn't believe in peculiar phenomenon, he really wants to say that he's not one of the foolhardy, who thoughtlessly accepts any kind of nonsense. This applies to all judgement they offer the masses. They then accept this defamation for intelligent elucidation and agree with the opinion of the journalists. But what is really unfortunate is the fact that a great many of the more notable scientists also accept the “well-informed' newspaper knowledge and thoughtlessly judge and think along those lines.

- *I therefore warn mankind not to depend on newspaper intelligence, as newspapers are not universities and journalists are not professors.*

Significant specialised knowledge exists outside of universities everywhere.

All one has to do is deal with this!

School-acquired wisdom (Transmission from the year 1965)

Where would man be without his school-acquired wisdom?

But it's not *quite enough* to be able to deal with life. There are young people who do not know what to do with this gained wisdom, once they leave the university. It takes more than school-acquired knowledge to deal with life.

- *More important than handed down knowledge is one's own common sense, the ability to think clearly and make one's own decisions; in short, self-criticism.*

There are schools and universities, who succeed in robbing their students of their own logic, so that they end up believing only that, which somehow coincides with their school-acquired wisdom. But if they're faced with an incongruity, their own thought process *breaks down* and anything beyond their experience is considered an impossibility.

Schools and universities are in this respect *antagonistic towards GOD!*

² First letter to the Thessalonians 5, Verse 21 states: "Put everything to the test: but keep only what is good".

There are young people who had a *very Christian upbringing*, but once they've attended an academy or even university, they turn *against GOD* and are not just ashamed of their Christian faith and Christian upbringing, but also their parents, which they consider to be backwards and superstitious.

I know that the major Churches don't proclaim the absolute TRUTH. But there is at least *enough TRUTH present* to tower over atheism.

- *It saddens the spiritual realm enormously that it hasn't been possible up to now to pass-on the true SPIRITUALISM to the major Churches.*

If you tell someone that SPIRITUALISM is an actual religion, he will mock you. School-acquired wisdom managed to *impair his objectivity*. The public hardly knows anything about this great religion. Is it due to an error or lies, that the public knows so little about it? The yardstick for this might just be wrong.

- The *majority doesn't* decide what the TRUTH is going to be, *only* the TRUTH can do that!

There are over 200 million spiritualists in your world that do not belong to any great Church, don't pay church taxes and are unregistered. The public has no idea that there are any *serious* spiritualists at all. It only has *images of witchcraft* when dealing with the subject of spiritualists and is of the opinion that it is all about ancient and primitive concepts.

There are over 100 million people suffering from leprosy in your world and not all of them are registered or visibly walk amongst you. The world at large has no idea of the huge number of seriously ill people, which are visibly affected. Is this a reason to disown them? Will one insist that they are well? - Well now, the spiritualists more than double their numbers. Is one going to insist that they don't exist or that they are devotees of an ancient superstition?

- *This school-acquired wisdom is inadequate to make this observation. Man must utilise the WISDOM he was given by GOD at birth.*

Mistakes should not be integrated into this so-called school-acquired wisdom! - But how often has this happened? Who controls this school-acquired wisdom? - Who watches over this mistake and over the TRUTH? Alas, it's always controlled by people already full of school-acquired wisdom and by those that won't allow *anything else* to come near them. I have to mention here that primitive man has an advantage over the more cultured man: He doesn't complicate things. - He's not burdened by any school-acquired wisdom!

Words on philosophy (Transmission from the year 1960)

The philosopher Spinoza stated: "Intelligence and will are characteristics *human beings have*, but we ascribe them to GOD." This philosopher *reversed* the meaning of this phrase, then it should actually state:

- *Intelligence and will are GOD'S characteristics and man has just a few of those.*

School-acquired wisdom is certainly *a solid basis* for scientific thought, but it is *undoubtedly not enough*, nor does it guarantee an objective understanding of those processes one has to scrape together from nature. There are thousands of examples where excellent scientists have been completely wrong in resolving the most important and critical problems and thereby *arrested*

progress. Actual experiences of the modern era require an absolute *unforced* and *unprejudiced thought process*, and should not be restricted by the shackles of school-acquired wisdom. The understanding of the most secretive mysteries of nature require a decisive move away from those “immovable laws”, as those kinds of laws cannot have limits that the great wonders of nature can *surpass*.

- It is *not* the job of philosophy to explain things and events around man, but only those things and events that *take place inside of man* and thereby explain his existence.

Philosophy, the crowning glory of the sciences *neglected* its main duty, namely to promote the recognition of a divine WORLD PLAN, wherein man, next to the spiritual entities, plays the most important role in the universe.

This most important TRUTH, the actual essence of all BEING, must compel everyone to take the responsibility and apply themselves, on behalf of the divine WORLD PLAN, *with all their might and LOVE*. This decision allows everyone to go through his or her mundane existence as a veritable human being. It replaces the study of a theology that spans the world and it *doesn't ask for a specific* religion, then this decision is so benevolent that it doesn't need any other insight.

- *A cult doesn't prove true humanness.*

A cult is *unnecessary*, as it's a *purely outward* activity, an attractive game. But a TRUE CULT is *an inner affair*. A great responsibility, a promise and contemplation are clearly deciding factors when deciding to adhere to one direction or another in regards to world events. A TRUE CULT is an important decision that has repercussions way beyond the earthly existence.

- *Someone who doubts GOD is not an ungodly person, but is someone who is searching in all this uncertainty.*

Those who doubt GOD are not negative people, but they're *confused by scientific mistakes*. It is those who have an *exaggerated* opinion of academics, universities or other scientific compositions. Their trust in science and publications is greater than their trust in their *own* opinion. The word “GOD”, so often dragged through mud, repels them, because due to lack of experience and their own opinion, it isn't possible for them to defend this often abused word. National libraries and universities store stacks of philosophical books, considered valuable knowledge, even though one knows that they contain error after error.

- *Practical experience rates far higher than any philosophy - but one still grants philosophy such a high-exalted position.*

But when Spinoza for instance had to create a God out of human need and wish, he *constructed* a God who can't call him to account. But whoever believes in this philosophy, only does so because he want's to escape his own sins and their consequences with the help of *an idol*. These philosophers are *murderers of their own soul*; they want to be completely dead on their day of demise, because they fear the results of true JUSTICE.

Rational thought (Transmission from the year 1960)

You would like to know what you could expect in the near future here on Earth. For thousands of years, a glimpse of the future has always awakened your interest. Predictions of prophets and

mysterious seers, *Nostradamus* for instance, find all sorts of interpretations and to some degree feed mankind's superstitions. If you build aeroplanes, U-boats or power stations, you are bound by nature, which can destroy your ingenious workings *in a matter of seconds*, in spite of your excellent technology. You're not safe from any enormous catastrophe for one second, then even the whole solar system could explode.

GOD certainly created the whole universe. HE is the greatest ARCHITECT of the whole universe. In spite of that, HE left the running and safeguarding of the universe, starting from the gigantic spiral nebulae to the smallest microcosmic unit, to HIS billions of INTELLIGENCES, which would otherwise be superfluous if they had no mission to fulfil.

- *We find divine INTELLIGENCE behind matter, that is to say, individual thought processes within the boundaries of a divine REALM!*

The majority of people on Earth are *too shallow* in the way they think and therefore *too unreliable* and *thoughtless* in their judgment. Whatever some people *assume*, is *repeated parrot fashion*, because one places great trust in their extreme practicality and intelligence or one defends their opinion with bombs and cannons.

We also find the LAW of GOD behind matter, it's responsible for continuation and progressive operation. It would be *impossible* for any movement to take place within the universe, *without* INTELLIGENCE and *without* rational thought.

The rational thinking process on the *spiritual* plane is *even more intensive, logical* and *expertly* than in your physical world. What envelops your soul and what surrounds your soul externally is the result of rational thinking according to the LAW of the SPIRIT (GOD), who started with this. There is however a UNIVERSAL ENERGY, which is at the disposal of the spiritual INTELLIGENCES. But on its own, this ENERGY would be aimless and without benefits, if it *didn't have a soul*, that is to say, if it wasn't correctly *guided* and *monitored* by highly intelligent and reliable THOUGHT.

- *There isn't one dust particle in the whole universe that isn't guided and inspired by THOUGHTS that are unimaginable and incomprehensible to you.*

A dust particle might seem superfluous to you, but it's *never superfluous*, even if it has separated from something larger or is destined for a major amalgamation. In any case, every molecule and every atom is one building block of the divine HOUSEHOLD.

The universe consists of islands. But in many billion years from now, it will be an entirely different situation, then these island will slowly *merge* to produce unimaginable continents, into a homogenous REALM of GOD, wherein every living thing of CREATION will find enough space and sufficient opportunities to enjoy a meaningful existence. But everything is still in a developmental stage, in a precursory position, even if many a small island in the universe has reached a remarkable stage. You *haven't recognised* the reason for your being, because you believe that life begins when you're born and ends the day you die.

What a nonsense!

What kind of irrelevance you bestow on the CREATOR? HE created life *out of HIMSELF* and you have no idea what life really means, namely LIFE and not the opposite! But death can *change* this.

- If life could die, GOD could die also!

On superstition (Transmission from the year 1969)

Well, there is superstition and it's a fanatical exaggeration of an invisible existence. Everything else is not superstition, but *blatant nonsense*. It is very hard for some to maintain their objectivity, so they can determine what is superstition and what is not. But there is a faith that is part of natural scientific knowledge, which has *nothing* to do with proscribed superstition. One has to be able to *differentiate this accurately*. Most people unfortunately can't do this and are too quick and *too superficial* with their judgment.

The number of people who have some association with the supernatural runs into the hundred of millions. People who live close with nature and one considers primitive, for instance. They might seem to you to be an unimportant example in relation to superstition. But they are *vastly superior* to you in that respect, the difference being that through their own experience with the supernatural, they have drawn the *wrong conclusions*.

- Primitive races know a lot more about the existence of spirits. But as they generally deal with the *lower spheres*, their experience is usually *negative*. Their whole culture is geared to avoid displeasing the evil spirits, so they are not subject to any sort of revenge.

The more cultured person makes the mistake of *not taking* these primitive races *serious* for that particular reason, because he considers this spirit cult to be primitive or for ancient imaginary traditions. But *because* they are primitive in that respect, they still have *unspoiled* and therefore, *better psychic attributes*. - It finds a parallel with dogs: The less spoiled he is the better he is. Such a dog finds it *a lot easier* to detect a trail than an over-bred dog with marred sensory organs.

- *A sense for the other side is also part of the sensory organs.*

Negroes and other coloured people have these sensory organs partially intact. On the other hand, these primitive tribes could insist that the cultured person has *lost* a very important sensory organ.

Superstition is an important part of the human experience and it still has to be clarified. But the way one tries to achieve this is *completely wrong*. One has to differentiate between what there is in the partially invisible and the behaviour of people who come into contact with it.

- It can be a case of precise knowledge and precise experiences, but *behaviour could lead to superstition*. Even the major religions are no exception here.

This situation can become very dangerous, when dealing with *political* relevancies. This sector wants to declare *every* religion a superstition, because it wants to get rid of these "dangerous imaginations" completely. But not one of those noteworthy sociologists has ever thought of doing an analyses to find out what *could be true* and what could be part of the erroneous behaviour pattern of man.

- *This enormous mistake gives rise to thoughts of redemption, which bypass the TRUTH completely.*

But there is also a *scientific* superstition, namely the superstition of the *nonrecurring* existence of man, from birth till death. This superstition is *not* decriminalised and *not* persecuted. But as soon as someone insists that the soul is immortal, he will be branded a devotee of superstition.

To ponder this takes a lot of practice and a certain period of time.

The exploration into the spiritual realm (By Herbert Viktor Speer, from the year 1965)

We give you the *observations* and *experiences* our working group has acquired during its communications with the spiritual realm, next. We hope on the one hand that we can provide support for the media and the circles and on the other side, we hope to provide more insight into *SPIRITUALISM* for those that have doubts and those that have *no* opportunity for any practical experience.

During well over a thousand circle meetings, respectively séances, we have collected a copious amount of experiences. We dealt with the exploration of the other side very intensively, in as far as it stayed within the boundaries of the *SPIRITUALISM of revelation* and as far as our finances allowed it. We can rightly claim that we have taken a *leading role* in this sector. We hope that our experiences can break the ice barrier build up by academics burdened by *prejudice*.

We reported about *television* in our November issue of the Menetekel periodical from 1964. Let's go back to these experiments for a moment:

- We never believed that it would be possible to record an authentic séance on television film. All the circumstances were against it. In spite of that, a genuine, non-staged contact was established. It lasted for about 30 minutes.

We now know what's important: It is certainly not any external circumstances that could prevent such an experiment, as assumed, but mainly the KEY VIBRATIONS, that is to say, the overall mood of the participants and technical staff also. The television team was extraordinarily calm and collected. The medium naturally played the leading role. It didn't allow itself to be influenced in any way by all the action around it, but placed itself at the disposal of the other side uncommonly calm and relaxed.

We were mainly concerned to serve the TRUTH!

The medium mentioned after the séance, that it never ever managed such serenity and that it was completely uninvolved, therefore *completely passive*. If the medium had displayed just the slightest interest in personally playing a part on television, it would have been enough to bring the whole house of cards tumbling down. We *didn't* change our routine.

- We *lighted the candles*
- We played our *usual music*
- We made our *introductory appeal* (prayer)
- And on the table in front of the medium, there is always *a dish with fresh water*.

The religious aspect was *not over emphasised*, but the necessary devotional mood wasn't lacking either. The question of space is probably very important and this is why we hardly changed anything. Everything ran within the same parameters, the way we have tried and tested it a thousand times before.

- What is of importance under any circumstances is that *to the right or to the left of the writing hand of the medium, there is always at least one square meter of the floor space left empty*. This is where the spiritual GUIDE is situated.

If someone occupies this space, even if for a moment, a magnetic disturbance is created, which takes a few minutes to rectify. We kept an eye on all of these things, even whilst recording the television program.

- *A small deviation from the norm can have immense negative results!*

The light, even if it was very bright, didn't directly shine onto the face of the medium, but was aimed at the medium from the side. It was certainly advantageous that all the footage was taken over the shoulder of the medium.

- *Excellent harmony is the ground rule for any contact with the other side, especially if positive results are expected!*

During the automatic writing contact, the medium is *not* in a trancelike state. The medium is *wide-awake* and able to read every written page immediately. This refutes the false theory of a religious ecstasy. Any contact with the other side is a natural process!

- *Practice and passivity* are the secrets of this type of communication.
- The graphic and linguistic characteristics of the spiritual entity guiding the hand even remain the same, if the medium is replaced.
- The otherworldly entity can be recognised by many peculiarities, even if it works through a different medium.

If the medium doesn't turn the page it's writing on quickly enough, lack of space to write on develops. The writer from the other side is then forced to write *between the lines*. Another typical clue, indicating that one is actually dealing with someone from the other side, is the fact that the medium could make it a lot easier for itself, if it was acting on its own accord. But it is completely passive.

- A truly *fully automatic* medium doesn't know one single syllable of what it is psychically writing! The medium doesn't track the text it's putting down on paper, this is the reason why the subconscious cannot participate.
- The medium is *not allowed to ask questions*, as the subconscious would start to participate. In spite of that, the medium can show an interest in a question asked from this side. The medium is surprised by the given answers most of the time.

The TEACHERS from the other side write with the hand of the medium either slower or faster or even at an angle or straight, depending on their own temperament. These characteristics remain, even if a different medium makes contact with the TEACHER from the other side. This is a very good way to *identify* the otherworldly entity, even if the medium is substituted.

MESSENGERS of LIGHT are souls from the other side who ones lived on Earth. They have undergone extra training in the spiritual realm and they have the greatest sympathy for us Earth dwellers. They *sometimes* return to Earth to instruct us because of a vow they have taken. They can communicate with us with the help of a medium relatively very well.

- *The medium is continuously controlled by the otherworldly entities with certain tricks, to see if it can still be guided or if it shows a tendency to act independently.*

All of these tests *are necessary* so a genuine transmission of the communication can be guaranteed. This quality is more important than the quantity of the output. The MESSENGER of LIGHT, writing through the medium, shows his fundamental character traits at every stage of the proceedings. The medium would really have to *invent* these character traits *first*, if it were to work independently.

- *These important character traits and the superior KNOWLEDGE of the MESSENGER of LIGHT reveals itself through any other good medium.*

Séances have nothing to do with telepathy, as *the MESSENGER of LIGHT quite often chooses the theme discussed*. What is also remarkable is the fact that only appointed circles produce a useful result. Self-delusion is completely impossible here. It is important to differentiate between the genuine and the fake, to be able to hold the striking proof in your hands. MESSENGER of LIGHT and SPIRITUAL TEACHERS consider this training especially valuable.

- *A true spiritualist is not a believer in miracles, but an experienced researcher and someone with knowledge.*

Questions and answers

Question : What is the significance of candlelight for the other side?

ELIAS : Candlelight is *a tradition that* has a lot of merit, candlelight for example is a very calm light. The flame of the candle seems subdued and shines with pure fire.

- *The element of fire has cleansing properties.*

But it isn't just the brilliancy of the light that adds to the ceremoniousness of the occasion, the smell of burning candle wax has a strange and solemn influence on the mood also.

- *Fire and light are rated higher than matter.*

Question: Does candlelight have magical properties?

ELIAS : Yes, that's correct, it has a hypnotising effect. It's therefore suitable for any meditation. Souls from the other side are *attracted* by this living light, whilst the negative *avoids* this type of light. It's the same with smoke, respectively aromatic essences.

- *Everything that has an effect on the senses has magical relevancy, on this side as well as on the other side. Frankincense also has a harmonious influence on the sense of positively motivated people.*

Question : Does frankincense also have an influence on atheists?

ELIAS : An atheist considers frankincense to be something ridiculous, just the way any religious act is deemed ridiculous.

Question : The bible portrays hell akin to fire. What's the opinion of the spiritual realm in this regard?

ELIAS : As I mentioned before, fire is something *pure* and related to light.

Question : What's the reaction of the spiritual realm to *electric* candles on the Christmas tree?

ELIAS : From a safety point of view, we are *for* electric candles, even though there is no doubt that the natural light of ordinary candles intensifies the festive mood *completely differently*. But one can certainly use one lighted wax candle next to all this artificial illumination. That would be enough.

The exploration of the spiritual realm (Author: Herbert Viktor Speer)

Considering that the medium has no inkling of the theme or any of the questions, it's amazing that every answer is given *immediately*. When another SPIRIT takes over, the style of writing and the tempo also change. This medium for instance *never* learned the old style of German writing (Sütterlin), it's sometimes utilised very rapidly in spite of that.

- *Any foreign language is possible - all special characters also.*
- *The written text can be presented from any direction, even in the shape of a spiral.*

If one observes the medium at work, one can make some very important deductions from the tiniest of movements of the hand that is guided by the other side. The way the hand is guided with automatic writing, shows the intense interest of the SPIRIT, which might stop immediately, rapidly change his mind and will cross out a started sentence, at the hint of a whisper amongst the séance participants. In spite of the high speed involved, the style of the written text shows a *very distinctive individuality* and creates a lot of interest amongst the participants. But the medium continues to stay completely *passive*!

The secret of a *good* medium is the fact that it acts according to the Christian tenet: If you give first, you will receive something back. Such a medium must enter into the honourable service for the spiritual world for the benefit of society, with *joy in its heart*.

- *Any craving for admiration and any perceived advantage is very damaging indeed!*

The medium uses a *refillable lead pencil* to write down the messages from the other side. The pencil is inserted into an ordinary cork of a wine bottle, which is then grasped by the hand. The medium couldn't write one single psychic word without this cork. If these messages originated in the subconscious, as many erroneously believe, the medium should be able to do the work "psychically" with any normal pencil.

There are thousands of other characteristics that can verify a *genuine* contact. The otherworldly entities can also demonstrate their individuality in the way they supervise the circle. The way they express themselves, their courtesy or the way they ignore those who force their attention on them, has an *educational* effect. We don't just learn from their DOCTRINES, but also from their display of good manners.

- MESSENGERS of LIGHT are those souls who have already achieved a *higher* level of development. They are placed *above* the GUARDIAN ANGELS and are trained as TEACHERS for mankind. Everything is very well organised. The MESSENGERS of LIGHT also have a GUARDIAN SPIRIT that looks after them. THEIR GUARDIAN SPIRIT is a BEARER of LIGHT.
- *It's really up to you to provide a basis for the INDOCTRINATION by the MESSENGERS of LIGHT and the GUARDIAN SPIRITS. They will not force themselves on anyone!*

Our medium is *never* in an abnormal state during a séance. It stays fully conscious and only allows the GUIDE from the other side to control its hand. The medium leaves the movements of the hand at the discretion of the spirit and this in a *detached* and *mentally passive* manner.

A really *good* medium *doesn't* suffer any mental or physical damage from participating in a séance. It is fully functional in its chosen occupation and cannot be differentiated from other normal people in any way. There are mediums who have served, besides pursuing their own professional occupation, as a tool for the otherworldly intelligences for decades.

- *What is of great importance is LOVE and infinite patience in carrying out the sublime MISSION.*

The exploration of the spiritual realm (Author: Herbert Viktor Speer, 1961)

Having to deal with the “fact” that the bearer of human intelligence and consciousness is supposed to be a complete “nothing”, is for every materialistically minded person an unfathomable puzzle. The academically trained mind is reluctant to accept this.

But the human consciousness is a conglomeration of an enormous sum of concepts. These concepts can be mixed or assembled into chains of concepts in infinite succession. Every single concept can be replaced acoustically or by characters. This is the only way we can understand a language we hear or read, etc. It is therefore not a problem to convert any possible concept into VIBRATIONS. The only question is, where do these WAVES remain?

- *According to our spiritual researches and experiences, these VIBRATIONS remain individually attuned in the COSMOS and are confined, by a still unknown immaterial MAGNETISM, near the individual. These VIBRATIONS circle the human soul and, like the sun, continually radiate their rays, they continually reflect. Whatever is useful, can be filtered and then received.*

This tells us that consciousness *is* already cosmic and that it *doesn't* have to undergo any changes after “death”. It's only the brain that is not utilised anymore.

- *As the brain is only there to maintain a connection between the body and the cosmos, it doesn't have a role to play after “death”.*

The human soul, sited within the physical body, can develop an independent sensorial activity only with the greatest of difficulties. One calls the exception to this “psychic”. The organic connections of the senses is switched off at “death” and the soul has to rely on its *own* sensorial activity which is of a cosmic nature, and depending on its mental state and development, it will become independent either slower or faster.

The problem all spiritual researchers and scientists face is the fact that the activities of the soul *cannot be measured*. This is the only dilemma speaking *against* a conscious existence after death. But whatever cannot be gained through the direct approach, can be verified *indirectly*, that is to say, the otherworldly, respectively, spiritual activity can be measured and this very accurately indeed.

Up to now, one has concentrated on measuring the ENERGY of the human soul, a “phantom”, directly. When ghosts *materialise*, temporary matter is created and *it* can be measured. One has attributed this temporary matter *only to* the mediums in the past.

The participants of all spiritistic and spiritual séances, if they are a success, loose ENERGY - they get tired, loose vigour and depending on the type of contribution made, they feel drained. This enfeeblement can be verified and also *measured*. The LOSS of VIGOUR - respectively, LOSS of ENERGY by the mediums can therefore be accurately verified. This loss of energy is on account of the hereafter, because *they have expended* this energy.

- *An automatic writing medium that would create its messages from the subconscious, would never be this drained and weakened as it happens during a genuine contact with the other side.*

The exploration of the spiritual realm (Author Herbert Viktor Speer, from the year 1961)

The most decisive question one can ask SPIRITUALISM is: *What evidence* can SPIRITUALISM offer that provides prove that the manifestations by the medium are definitely from the hereafter and have nothing to do with the subconscious of the medium?

The answer to this can only come from experience gained over many years in this field. A scientific observer wouldn't arrive at the same conclusions just like that, unless he had witnessed the development of the medium over many years. But it is very rare that such a medium can be observed and scientifically controlled over many years.

The so-called conventional spiritism (house and garden variety) offers a better opportunity for these kinds of observations, because the circle participants aren't always up to the task of testing the medium or their knowledge of the spiritual possibilities available is inadequate. The results are absolutely convincing for these people, but not necessarily for sceptics outside the circle.

Within the *Medialen Friedenskreis Berlin*, the mediums could be observed over many years right from the start. Because the children involved were *those of the leader of the circle*, their education and talents were well known. The answer for the above question can only be:

- The medium achievement must be something that doesn't fit into its subconscious, or into the subconscious of any of the participants, under any circumstances. This achievement has to be *so alien*, that it could only come from an entity that can't be grasped or detected by the normal, earthly-physical senses. This entity has to demonstrate a *higher* intelligence, surpassing the intelligence of all participants by a mile.

Such an achievement would not have to be produced a thousand times, then one singular piece of this kind of evidence would be irrevocably objective.

- *The reality is that there are thousands of these achievements!*

Science usually dismisses all of this by stating that they're confronted by an enigma. But there really is no such enigma, because it would only come into existence by bypassing and denying the TRUTH.

There is the super-normal, otherworldly INTELLIGENCE behind the achievement of the medium. Even if the medium *had* a subconscious ability to look into the centre consciousness of all participants, this enormous telepathic achievement would establish that consciousness *isn't* coupled with the physical, respectively, doesn't spring from it.

How can such an alien achievement be articulated?

We recite a case from our own experience:

The medium was *17 years old*. The war was responsible that her education was very limited. The result of so little education brought with it limited knowledge. Neither the medium nor the participants of the séance had any knowledge of the *cinematographic process* developed in the United States at the time. But the medium was able to draw technical details, like the bend projection surface, position of the loudspeakers etc. to the millimetre and guided by the handwriting from the other side, explained every particular detail in English, using correct technical terms! Such spontaneous surprises are to be found in all subjects.

- *Tests have shown that otherworldly entities could read the page of an open book, even if it was placed facedown on the table. The text was not known by any of the participants of the meeting!*

The exploration of the spiritual realm (Author: Herbert Viktor Speer, from the year 1964)

A *senior medical officer* participated in our séances for many years. He had the opportunity to study the work of the HEREAFTER and the mediums in detail. This completely convinced him of the reality of life after "death". This is also the reason that he became a stalwart devotee of the working circle and revered our FRIENDS of LIGHT from the other world.

This senior medical officer corresponded with various authorities in the field of medicine. During many discussions with his colleagues, he tried to convince them of the reality of SPIRITUALISM. But it was impossible! All of these doctors were completely unapproachable in regards to spiritualism and would not believe a single word of their professional colleague.

Because of the sad outcome of his endeavours, this friend of the spirits eventually gave up his "attempts to convert" anyone. He was derided and ridiculed by his colleagues, one even teased him about his advanced years and spoke to him unreservedly: "Let it rest my dear, we know what you mean. It happens to all of us, we all gradually calcify."

This occurrence shows how hard it is to fight against a *prejudice acquired at school*. Even a convincing physician isn't able to rectify this terrible mistake on account of his authority. - There is a whole string of similar occurrences.

Some academics are completely convinced, because they had the opportunity to familiarize themselves by being *eyewitnesses*. But this familiarisation simply and solely applies to them *personally*, because it's well nigh impossible to convince anyone who *hasn't* been an eyewitness.

- *Academics lack the necessary open-mindedness in regards to something that is difficult to understand.*

Questions for the leader of the working circle

Question : The medium answers questions, which are answered by people who allegedly live in the hereafter. Wherein lies the difference that one assumes that the answers come from the hereafter?

Speer : Those on the other side possess an unimaginably *quick intellectual capacity*, because they don't have to rely on a physical brain.

- This is the reason that the answers to every question are forthcoming *without the slightest hesitation!*

This is an achievement, which according to our experience, *isn't possible* with ordinary earth dwellers. Those in the hereafter surprise us with this.

Question : Most will agree that mediums have unusual abilities, which come into play subconsciously. Could this ability not be an unusual function of the subconscious?

Speer : No, this is impossible for various reasons. A TEACHER from the other side, ARGUN for example, finds the "needle in the haystack" virtually *instantaneously*. He can see right to the heart of the matter as if he had x-ray vision. His answer therefore is absolutely logical and formulated accordingly.

- Ordinary participants take time to consider, so they can give a passable answer.
- The other thing is that those from the hereafter are *much better informed* about events on Earth. They therefore include things in their answers, that neither the medium nor the other participants could have known.
- Besides that, the otherworldly know all about the spiritual realm. *Only they* can give us information about it, *no one* from Earth can. These statements generally coincide with other communications. Even if the mediums are oceans apart, the information given is consistent.

The way the otherworldly express themselves is absolutely *individual*.

The exploration of the spiritual realm (Author: Herbert Viktor Speer)

An artistic effort can *also* happen *psychically*, if it's carried out with the hand.

If the psychic ability is properly trained, the *otherworldly EFFORT* encounters no difficulties. The artistic effort can comprise a drawing, even a painting in oils or a sculpture, for this very reason. The size of the object doesn't really matter that much. One only has to differentiate whether the otherworldly EFFORT is carried out *consciously* or *subconsciously*.

Mutual support during of a psychic co-operation sometimes happens subconsciously. The artistic efforts were always conscious in our case, that is to say, they were accomplished during a séance or on call. But if the otherworldly is no artist of any standing, the effort of the medium is accordingly. The longer contact with the otherworldly artist is fostered, the better will the results will be.

- We have experienced that a medium that *wasn't a talented* draftsman, *couldn't work* with an excellent otherworldly artist, even thou the medium had great psychic abilities and was also an excellent automatic writer.

The famous artists Leonardo da Vinci and Michelangelo undoubtedly belong to the great mediums of the arts, they were certainly used by the hereafter as instruments. This explains their great fortitude and overview across very large perspectives. Many of the pictured figures from the hereafter also indicate some co-operation with the hereafter. Eminent mediums like that are usually also great automatic writing mediums, receiving in this way their respective directives. This also applies to psychic *composers*.

- Psychic abilities are latent in *everybody*. It can be brought to the surface and trained. The results are naturally diverse. But the necessary patience is lacking most of the time!

The psychic ability amongst native tribes is more pronounced. But the native tribes relate to the intelligences from the hereafter with fear. This is the reason why a superstitious cult comes into being.

- The *fear of the hereafter* always attracts the *lower* spirits!
- One can only deal with higher SPHERES with *open mindedness* and *fearlessness*!

If scientists have had only limited or even no success at all in this field, it's due to their *own behaviour*. Even with a very pronounced psychic ability, the astral LAWS *have to be observed rigidly*. The actual spiritual contact doesn't create any difficulties.

- The difficulties start the moment one tries to make contact with *positive* OTHERWORLDLY ENTITIES. Plain psychic ability isn't quite enough to do so. It must be coupled with *high ethics*, a special *willingness for charity* and *positive* development.
- But above all, the medium as well as the working circle must be absolutely *dependable* and *veracious*! Piety or religious romanticism *don't* matter, on the contrary - *dangers lie everywhere*!

Compared to psychic speaking, psychic writing (automatic writing) offers *better results*, even thou these contacts are a lot slower and more complicated.

With trance mediums, the messages are often distorted due to the guilt of the medium. The subconscious creates a mental blockage; especially if the medium is strong-headed and has a dogmatic attitude, which the otherworldly can't overcome. In spite of that, there are masterful trance mediums.

The exploration of the spiritual realm (Author: Herbert Viktor Speer)

As those otherworldly souls can *write* and *draw* according to their own talents, if they can find a suitable medium, we have received a number of *symbolic* drawings from them. These drawings are very informative and often tell you more than a whole discourse.

These drawings come into being *within seconds*. They are easily interpreted and their momentous statements leave an extraordinary impression. One picture for instance shows a person with its arms extended downwards, hanging out of a closed book. The interpretation of this is easy: The soul, having arrived on the other side, is allowed to have a look into the “BOOK OF LIFE”. The burden of the recorded sins in this book nearly crushes this soul. This picture, in its simplicity and fateful warning, substitutes a parable of CHRIST.

These psychic drawings, happening so quickly and spontaneously, even surprise the medium. But there are even larger pictures drawn, with even more varied and profound messages. One is a picture of a landscape with a border running through the middle of it. Footprints can be seen this side of the border but stop at the border. Someone has left items of clothing and other utensils behind right at the border. This impressive drawing indicates quite clearly that the people from Earth have to leave everything behind and that only the soul may cross this border.

All of this belongs with all the other *innumerable evidence* we received from our otherworldly FRIENDS. They went to a lot of trouble to eliminate any doubt, may it be ever so slight.

- *Once the last doubts were removed, they could begin with the brilliant INDOCTRINATIONS, we can now offer our readers.*

We don't feel the need for encouragement through evidence anymore. We know exactly which otherworldly INTELLIGENCE we're dealing with during every séance.

Unsavoury spirits, who's symbolic drawings were even more convincing in demonstrating to us the lower spheres we call “hell”, interfered at the very beginning. These drawing happen *against* our moral and decent perceptions. Once a very rude drawing started to develop and before it was completed, it was energetically crossed out by another spirit. The GUARDIAN SPIRIT wrote underneath: “I forbid you to deal with riff raff!” These words were directed at the medium, which didn't put its pencil down fast enough. But experience is important in everything we do and we also had to make our own experiences right from the start.

To be able to validate the messages or drawings from the hereafter, those on the other side have often enough changed the perspective of their calligraphy. They drew or wrote diagonally or upside down, sometimes even used mirror writing. They make use of every one of their mental potentiality.

- The famous *Leonardo da Vinci* also wrote mirror writing with exceptional speed. This fact alone should be definite proof that the famous painter was *a medium*.

Views of a theologian (Published in 1964)

The following are the views of a theologian, questioned about the subject of automatic writing and the problems of the materialisation phenomenon. Published in the Menetekel journal of the year 1964.

1. About automatic writing mediums:

In regards to revelations by an automatic writing medium, the parapsychologist recognises a psychic automatism, an awakening of subconscious contents. It's without doubt that one doesn't necessarily have to think of a revelation from the realm of the dead or the hereafter.

If a medium considers himself to be a prophet afterwards, who's supposed to delight mankind with his revelations, he's fallen pray to an arrogant spirit. In this case it's not a direct demonic possession, but an indirect one.

2. About materialisation:

The nature of phantoms is nowadays explained psychologically: The medium emits energy and condenses this energy into matter. This transformation is possible, according to the latest knowledge of nuclear physics. Physical matter is nothing else but concentrated energy. This equation is expressed quite clearly in Einstein's formula: $E = m c^2$.

If I may use another equation from physics I would like to mention the following: If one million volts energise a Roentgen valve, particles and anti-particles are created at the cathode. This is also a process where energy - electro-magnetic waves - deposit matter.

Apart from this, these psychic processes are a subconscious tapping into knowledge and psychic modulations, the creation of transformed energies in correlation with the matter tapped into. At the end, the phantom is controlled and the deceased from the "realm of the dead" is complete.

Comments by the MESSENGER of LIGHT AREDOS

It is strange that theologians consider themselves to be *scientists* and act as *lecturers*. Their explanation gains significance, because it's *published* in brochures, which poison the relatively *healthy* judgement of the majority. Man actually has an inherent *natural* logic, which can be applied in many situations and comes often into play when decisions are made. But this natural logic is ruined by so-called wise guys, because they encourage the ramblings of these other wise guys.

Talking of automatic writing mediums, there are naturally a great variety of them, some are more and some are less talented. A suitable medium gains access to a LEADER, who is authorised to verify his otherworldly existence as an *independent* individual, beyond any doubt. This is the only way larger groups can be created to deal with the exploration of the otherworldly realm.

Because of the unrealistic and *over-complicated* description of these entities - as this example shows - most people are of the opinion that the members of a psychic circle are somewhat retarded. But quite the opposite is true, unless it's a case of the common house and garden spiritism, which takes place in the bedroom or in the kitchen, next to that night's dinner preparations.

- A first-rate circle needs good and highly intelligent participants, of healthy mind, because it will be one of the participants *that will ask the questions*. And he should also be smart enough to *take a closer look* at the answers from the hereafter. If inferior members man the circle, the answers to the questions will be accordingly, that is to say, a stupid question will deserve a stupid answer.

Unfortunately there are very few good circles. But scholars, educators, professors, doctors and writers man some of these circles. These are certainly not inferior people, who would blindly accept everything and go into raptures over it.

It has never happened that the medium tapped into the knowledge of its fellow man, to then modulate it with the help of ENERGIES, as far as I know. The circle in conjunction with the medium taps into the KNOWLEDGE of the otherworldly INTELLIGENCES, that's correct!

- But where does the knowledge come from if it's something that *no member is aware of* and that goes *beyond* the experience of any of them?
- How can a medium, with the help of "concentrated energy", give a dissertation in a foreign language, *that none of the members has command of*?

Whatever the clever theologian has to say about spiritual materialisations is almost funny, if it wasn't such a serious subject. As far as I'm aware, there has never been a case where such a séance worked with one million volts or with x-rays, so a spirit could be x-rayed. Just how inadequately this publicist is informed about actual possibilities, is proven by the fact that he calls the otherworldly, materialised spirit a "phantom". A materialised spirit is never a phantom, but a spirit. A phantom is an *imagined vision*, the vision of an entity produced by thought.

But concerning the dangers SPIRITUALISM presents, one should consider and think about the *spiritual* HELP millions of people all over the world receive when they are ill. The spiritualistic healing communities are recording successes, which cannot be denied.

Apart from that, it's not all that rare that theologians are those with the greatest fear of the hereafter, a fear they like to instil in others.

- *One should only believe in what experienced practitioners of spiritualism have to say.*

These kinds of theories are not only senseless, but also dangerous chitchat!

Something about logic (Part 1) (Transmission from the year 1972)

Well, logic plays an important part in the life of people. But unfortunately there is more than just logic on this Earth, namely *many* deliberations, let's say - *lines of thought*. Some scientists for instant insist that this or the other is logical. But as soon as this happens, others are at the ready to doubt this logic, because they apply a *completely different* logic. This is a very dangerous situation, because it leads to differences of opinions, conflicts and eventually even to embittered wars.

- The Americans insist that *their* democracy is logical and therefore good.
- China insists that *their* view of the world is logical.

One can therefore not place too much importance in logic, because it exists in *different variations*. One can present even the greatest of error or nonsense as logic through a lot of gobbledygook, whereby an error suddenly becomes ingenious.

But there is an infallible formula helping you to find your way through this chaos:

- *The word "logic" derives from the word LOGOS. But LOGOS is the DIVINE, therefore TRUTH - on par with GOD!*

Something can be explained in any way or fashion, but if the DIVINE is *attacked* and violated or *missing* from it, there is no shred of logic present anymore.

Mind you:

- The tenets of atheism could never be described as logical, because they are directed against GOD, therefore against the LOGOS. - This means that they're illogical!

But the great thinkers of this world unfortunately don't think this far.

- This world lacks a *clear* concept of what's logical; it is more important than a religion!

Just as there are different Churches and belief systems, there are also *different opinions* one makes out to be logical. *Consistent* logic is especially important in politics if misunderstandings are to be avoided. But consistent logic cannot exist without GOD. But this doesn't fit in with political concepts, as most of them want nothing to do with GOD, because they have a guilt complex; they're quite pleased when a scientist proclaims that there is *no* life after death.

- *Recognising a divine PRINCIPLE at work leads to genuine logic.*

If this PRINCIPLE is doubted, logic is naturally *switched off*. This very simple recipe is unfortunately never ever applied.

Politicians and captains of industry received most of their education at universities. But this type of logic is *not* taught there. Everything pointing towards the existence of GOD is misinterpreted. What's left behind are mistakes and they are then let loose amongst the students, with theses in tow.

Just because something is hard, so very hard to understand that one could practically consider it impossible, doesn't necessarily mean that it's illogical. Unfortunately all that is allegedly illogical is declared irrational, which makes everything even worse. It's imperative that the curriculum of universities and other places of learning is changed and that a *rational* and modern DECLARATION of GOD is acknowledged.

- *It is the duty of the mind to apply logic; this means that man must include GOD in his thought process and also his judgements!*

Something about logic (Part 2) (Transmission from the year 1974)

Well, you see it happening all around you, people continuously use the word "logic" even though they make it quite clear that they *don't* believe in the existence of GOD. It's not that they're lacking common sense, it is more a case of an inadequate general education. These people don't realise that the word "logic" actually means GOD. If they believe in logic, their beliefs become nonsensical if they reject GOD!

- *If someone declares that he doesn't believe in GOD, he might as well say: "I don't believe in logic!"*

If someone believes something to be logical, he's virtually saying that there is no other explanation, as logic is synonymous with divine!

One has to be aware that even at academies and universities, a lot of nonsense is explained as logic. Sentient life could never develop on its own, this would be illogical, that is to say, not divine. But if

sentient life develops whose development one considers logical, one admits that a divine PRINCIPLE is at work.

But if one insists that science is logical, one clearly states that it is divine, even if one endeavours to distance oneself from divinity. GOD is LOGIC - and nobody can change this.

- An impenitent heart will never find anything positive.
- A repressed mind will not penetrate to any depth.

GOD cannot be explained, but HIS FUNCTIONS can. The whole universe abides by divine INFORMATION, which can't be challenged by any atheist. But INFORMATION doesn't come about *by itself*, just like an earthly law doesn't come into being *by itself*.

The INFORMER is the prerequisite for every function!

- There is within all of CREATION not one bit of evidence that supports the fact that there is INFORMATION, which is *not* produced by some form of consciousness. Every intention, every command and every wish is depending on consciousness for its existence. - Anyone who denies GOD, also denies consciousness!

The Churches haven't thought enough about this, because they forgot that there is only one explanation for the existence of GOD, namely:

- *GOD is logical CONSCIOUSNESS!*

In all their considerations, there isn't one place where consciousness is expressed in this fashion. There are so many leaders of men who supposedly have progress in mind. But all of them *reign incorrectly*, because they *don't* consider logic as GOD. Their thinking is therefore completely wrong, illogical and ungodly!

Whoever doubts this must just look at all the wars on this Earth!

They have *nothing* in common with logic and all are therefore ungodly even if one tries to present them as "holy wars". Whoever doubts this has only got to look at all the enmities and conflicts between people. All of this has *nothing* to do with logic and are therefore *against GOD!*

The time for NEW REVELATIONS is right now and necessary, so that the academies can *base* their curriculum on *logic*, meaning that the existence of GOD should take its rightful place.

- *If logic is included in man's education, divine THOUGHT is also encouraged!*

The exploration of the spiritual realm (By Herbert Viktor Speer, from the year 1968)

If the spiritual realm *were* completely separated from the secular, mankind would never even entertain the thought that there could be a hereafter for humans. *Psychic ability* offers people perceptions, telling them of an existence after death.

Science concentrated *too much* on the physical in the past; science has only started to look beyond the visible and measurable in the last decades and is now also researching the invisible. (Quantum

physics for example) But academic researchers are still adhering to dogmas and beliefs, which have been drummed into them at academies and universities.

Even thou the spiritual realm has a lot of similarities with our physical existence, *other LAWS* hold sway in the spiritual realm. University acquired knowledge of yesteryear and today cannot explore the spiritual realm. One has to *switch to mind to zero*, if one wants to research this sector.

- Any *dishonesty*, any *deceitful intention* immediately connects you with human intelligences from the spiritual realm, devoid of any redeeming qualities. Religions generally speak of devils and *demons*, but they are mainly people living in the hereafter playing a devilish game.

We had the opportunity to gain profound insights into the living conditions of the hereafter during more than 1,000 séances. If a circle - and may it be ever so small - is successful in making *genuine* contact with the hereafter, any doubt whether there is a hereafter quickly disappears. This conspicuous occurrence doesn't come about because of *positive* messages, the exact *opposite* is true. One just couldn't believe it possible that the phraseology of the fiendish otherworldly spirits is so distinctive and negative. Only after many attempts and some really serious endeavours to get to the TRUTH, will one succeed in contacting a more positive side.

- Excellent permanent contact, that is to say, a good friendship with positive spirits only happens when the participants render *faithful SERVICE* to mankind. If this SERVICE is denied or only simulated, the messages received are by no means positive, even if they are fabricated to give that impression.
- There are thousands of spiritual circles - and there are also thousands of psychic messages that represent true masterpieces of religious poetry; in spite of this, they are false and perverse. All of these circles lack the knowledge of the LAWS and opportunities of the hereafter. In addition to this, there is *arrogance* and *negative self-appraisal* of one's own person.

Humility is absolutely imperative!

But humility is *no lip service*, but CHARITY for mankind. It is not enough to love just one person or one family and regard this a charity. Humility doesn't concentrate on just a few people one considers dear friends. Humility is a good deed done to *all of mankind without one exception* and *without demands* for recognition!

This is the only way terrestrial man can assimilate with the spirits, he hopes to receive the TRUTH and the very best from. Any other friendship is *impossible* because the spiritual realm is divided into spheres. One has to *leave a sphere completely*, if one wants to have access to a higher SPHERE.

- If someone *isn't able to leave* the lower levels, he is subjected to tomfoolery, but this hallelujah is pure blasphemy, because it comes from *unclean* souls.
- A *genuine contact with higher SPIRITUAL TEACHERS* is a connection with GOD and a holy MISSION, which manifests itself in brotherly love.

The exploration of the spiritual realm (Author: Herbert Viktor Speer, from the year 1970)

The exploration of the hereafter isn't less interesting and important than the exploration of the physical. The hereafter also *belongs to the sphere of existence of man*. Everyone comes from the

spiritual realm and also return to there. Only the Churches have seriously thought about this, whilst physical science finds these considerations *unnecessary*!

Exploration of the spiritual realm primarily depends on *private* initiatives. The mediums spring from these private circles. It is understandable that these study circles can't afford expensive experiments, but in spite of that, the attained results are very informative.

But one has to make a few distinctions: Physical *spiritism* is something *else* and must not be confused with SPIRITUALISM! Conversing with the dead is also a separate issue. - But unfortunately this differentiation is hardly ever made.

- *Spiritism* is concerned with phenomenon like knocking and moving objects for instance, as well as the neutralisation of gravity, therefore it's physical phenomenon that can't be explained physically. It's absolute nonsense trying to find out whether the explanation lies with the medium or one of the participants. The relationship of the medium to this phenomenon is only as a mediating instrument. The released forces and materials are manipulated by the spiritual entity. Just how these forces are directed depends on the otherworldly entity. But limits are set for them also.
- *SPIRITUALISM* isn't interested in physical phenomenon and concentrates solely on communication. A good circle doesn't converse with the average "decedent", but with *qualified* TEACHERS. These TEACHERS, the technical term is MESSENGERS of LIGHT, give information about all the things people can expect after their disembodiment. It is amazing that this data *corresponds on an international level*, if it comes from excellent circles. All the things that are important in redeeming and improving the human spirit can be discussed. The MESSENGERS of LIGHT listen in and enter the conversation with the help of the medium. This represents an enormous help, unlike any university could ever hope to offer. But it's unfortunate that this help is not sufficiently acknowledged. One should never compare SPIRITUALISM with questioning the dead!
- *Questioning the dead* is a virtually useless affair. Questioning the dead can indeed verify that there is a hereafter where the dead survive, if it's done through a medium or at least a spiritistic circle, but what they unfortunately have to offer is below the acceptable level. Because dishonourable people are involved, practically every circle that researches the hereafter in this way, is exposed to indescribable derision. To find a reason for this kind of derision is hardly possible. One thing that is for certain is the fact that questioning the dead exclusively makes contact with the *lower spheres*. The hypocrisy and contrived praise involved always finds enough devotees, who believe these messages from the beyond only to make fools of themselves later on; they might even end up in a mental home. *This is the reason why the bible forbids any contact with the dead. But it's unfortunate that this ban has not been explained properly.* The main reason for questioning the dead is mainly to make contact with relatives or famous people. It's unfortunate but we have ascertained that instead of the desired "deceased person", almost always some otherworldly entity claims to be that person. If he's exposed, one invariably has to suffer his insolences. Some experts have insisted that the quoted dead can verify their credentials very well, but that's not true, they are very good at reading thoughts. Based on the thoughts they receive from the circle participants, they have no problems in pretending to be the particular person one hopes to contact. Based on our research work in this field of knowledge, carried out over decades, we can advise against questioning the dead; it *only leads to illness and misinformation.* -

But one shouldn't throw out the baby with the bath water!

- *Planned and rational research into the hereafter is important and more informative for everybody than any religion.*

CHRIST recognised this and made extensive use of it. As he could work even better within a circle, he assembled a circle around him. CHRIST also used psychic communication, he didn't question the dead, but had a *spiritual* connection to MESSENGERS of LIGHT. These MESSENGERS informed and instructed him. You find these contacts mentioned in the bible. CHRIST said: "Follow me!"

It's therefore very hard to understand why the Churches do not make use of *SPIRITUALISM* instead of declaring it an instrument of the devil! The Churches need experienced spiritualists and parapsychologist to save the Churches from complete collapse. Mankind is searching for TRUTH; but if the Churches *can't offer* this TRUTH, but only trample on it, their demise can't be arrested.

- CHRIST sometimes also used *automatic writing*. When answering important questions, He often bend down and wrote with his finger in the sand.

It is somewhat strange that people believe that a person living in the hereafter immediately gains omniscience. An otherworldly person *doesn't know more* than what was learned or experienced. He's restricted to a certain sphere where hardly any other spiritual entity exists that is not on the same level of development. Undeveloped souls hardly have an opportunity to master great distances; they're restricted to one particular area most of the time. A criminal can even end up in a kind of confinement.

In recapitulation one can say:

- *SPIRITUALISM* is a source of indoctrination if it's carried out with logic and the necessary respect it deserves.
- *Spiritism* and *materialisations* can be carried out and researched *scientifically*; but shouldn't enter into discussions that, most of the time, are not based on the TRUTH.
- One should *distance* oneself from *questioning the dead completely*.

We received a lot of requests during our meetings, asking for information about departed souls. These requests are futile because we don't deal with this. Our mission is to indoctrinate and our readers know just how precious these indoctrination are; *they change people* and without any doubt, raise them to a *higher* level.

- The certainty alone that a life on Earth is *not lived in vain* and also the certainty that *one survives death*, are worth more than all the money in the world.

Many letters of thanks indicate the worth these insights have!

We have also experienced the misery people feel when they have lost one of their dear ones and when the Churches *can't* give them any real comfort.

Questions and answers

Question : (1967) How does the spiritual realm envisage a SPIRITUALIST?

ELIAS : You want to know how the spiritual realm envisages a *spiritualist*? - Well now:

- Above all, you should *show consideration* towards your fellow man.
- You should endeavour to be a *good* person.
- You should *respect* your fellow man, even if he's less educated than you are.
- Apart from that, a good spiritualist must *have respect for GOD*, but it doesn't have to degenerate into a *cult*.
- Important is an *irrevocable faith*, respectively, knowledge about life after death. He must be aware that the human soul is *immortal*, even if it has to pass through many levels.
- He must *believe in reincarnation* and the karma associated with it.
- Man must *continue to work on his own development* and must avoid or compensate for any relapse. Everyone recognises his or her own faults. If he doesn't recognise them, he must go and search for them.

Is it wrong to believe that you have to forego everything?

Respect for your fellow man rates highest with GOD. *It's worth more than all prayers!* Nobody can revere or love GOD if he doesn't develop a high regard for his fellow man. Everyone of your fellow men is a *divine creature*.

He who loves his fellow man, also loves GOD!

Questions for the leader of the MFK-Berlin, November 1970 (MFK: Medialer Friedens-Kreis)

Question : Can you give me the reasons, why you are *so convinced* of the existence of spirits?

Speer : The exploration of the spiritual realm has been going on for quite a long time. We have performed well over 1,000 séances. During those séances, thousands of aspects were observed that constituted absolute proof.

Question : Respected scientists have dealt with this problem also. Why are these scientists not convinced?

Speer : This is due to incorrect management. An incorrect attitude towards the spiritual world or managing the mediums incorrectly leads to uncertainties.

Question : What are we to understand under "incorrect management" of the mediums?

Speer : The medium certainly needs a good education. If this education is inappropriate, the results will be doubtful. *Good spirits need good mediums!* Therefore the mediums have to be trained in such a way that they possess the greatest possible adaptability.

Question : What do you mean by "education"?

Speer : *Above everything else, a high respect for the positive INTELLIGENCES of the spiritual world. In addition to that, very good moral standards and a love for one's fellow man. No craving for recognition, but humility. An absolute willingness to SERVE mankind and a lot more.*

Question : What are the criteria enabling you to recognise whether a message from the hereafter is *really genuine*?

Speer : Above everything else, because I *know* the particular medium *extremely well*. At the present time it is my son. I know his capabilities, his educational level and intelligence very well. If he produces something *well beyond his capabilities*, it indicates to me that an alien intelligence has taken charge of him. *The individual phraseology* of the otherworldly, its *higher, respectively better knowledge*, and above all *its very fast reaction time*, nobody on Earth could reproduce, are also part of it.

Question : Why does academic science interpret these experiences differently?

Speer : Scientists in this field deal with *unfamiliar* mediums. The best circles are generally speaking family circles. We have informed the scientific community of our results. But even Professor Bender didn't bother in attending one of our séances. All we were left with were a few empty promises. How can one talk about a genuine interest by the scientific community?

Question : What would you do if Professor Bender or some other well-known psychologist would invite you and your medium?

Speer : I would decline, but I wouldn't say no if one of these scientists would participate in one of our séances.

Question : What are the reasons for this?

Speer : Because a séance *in our oratory* has a different ambience and atmosphere. The room used for our séances is more than a Church to us. This atmosphere could *never* be reproduced in a laboratory. A séance like that is sacred in its highest perfection. All of us are completely open-minded and certainly Church pious.

The exploration of the spiritual realm (By: Herbert Viktor Speer, from the year 1971)

The world at large, in as far as it has any knowledge about it at all, has a completely *false* concept of SPIRITUALISM. This is the reason why the TRUTH is discredited, respectively, is not believed or even feared. Apart from that, the fight against superstition has left SPIRITUALISM untouched. But because mankind is primarily informed and influenced by the publication media, like the press, radio, television and pictorials, it has to rely on the knowledge of journalists and stage directors. But unfortunately these people have the same primitive concepts as the ordinary layman. But unfortunately mankind is of the opinion that the knowledge offered is the objective TRUTH.

The reality is frightening!

False information, political *white lies* and *personal* opinions play a great part. In the mean time, mankind has not spiritually progressed in spite of the enormous publication media, but instead rather foundered morally and ethically. Even Hitler was able to utilise the power of the media to realise his negative plans.

- *Television these days prevents autonomous deliberation.*

With the help of sound and picture any story can be told in a way that the public will accept is as factual reality. We have had some bitter experiences in this respect and found out that any means is justified when propagating a certain opinion.

Wherein lie the mistakes made by the majority when dealing with the anatomy of the spirit?

One is generally of the opinion that as a soul enters the hereafter; it immediately becomes omniscient. One expects that a spirit can foresee the future, that he can predict which ticket will win the lottery, what the weather is going to do, which politicians will survive and which ones will be deposed or die. In short, a spirit represents the “dear Lord” and is omniscient. Even well-known stage directors and reporters of the world press, yes, even scientists base their questions on these assumptions. We’ve experienced that prominent government representatives only wanted to know what *their* future has in store for them. It’s no wonder that clairvoyants are asked the same questions, if they’re able to give an answer. If by sheer coincidence their predictions come true, they become famous and are revered. It is therefore no surprise that through this materialistic and egotistic way, the whole indoctrination of the spirit world and the supernatural continues to be discredited.

Our experiences made over decades paint the following picture:

- The hereafter is a spiritual realm that is *not* located at some great distance, but starts *right next to us*. Its area of dispersal *isn’t* limited to Earth alone.
- The lower spheres lie *directly* over or under the surface of the Earth.
- There are *very few positive* spirits, respectively thought carriers, amongst the enormous number of disembodied spirits, a little bit like raisins in a cake.
- It’s infinitely difficult for a positive spirit to make contact with the physical world, because they are impeded by hordes of negative spirits.
- GOOD and bad exist in the hereafter in a *superlative cumulation*, to a degree nobody could imagine.
- The thought processes of the spirits are faster than any human being’s, as their thought process isn’t hampered by a physical brain.

A good spirit, let’s say a LEADER, has *great freedom of movement* and is therefore in a good position to observe the situation on Earth. In addition, he has access to closed doors and with the help of his ability to read minds, he knows people’s intentions. He’s educated but *never omniscient*. He can make mistakes, but that hardly ever happens. If such a spirit realises his mistake, he’ll rectify it immediately at the first possible opportunity.

HIGHER SPIRITUAL ENTITIES are always active and look for opportunities *to serve mankind*. They are very involved in progress, respectively in the evolution of mankind. They help suitable people through inspiration. The spiritual body of souls is flexible; it can expand or constrict quite remarkably. The movement of good spiritual entities happens *at the speed of thought*. It’s possible for them to move from one continent to another within one second.

Lower spiritual entities are *immobile*, the worse their character is, the more limited their opportunities to move about, it can be restricted to within one square meter. Their sense of sight is also impaired. Their spiritual eyes are nearly swollen shut and are clouded with pus. The whole religious cult of Asian peoples bases itself on these perceptions, it also came into effect on other continents, where cults of spirits and the fear of spirits are prevalent.

HIGHER SPIRITUAL ENTITIES are beautiful and with increasing development become ever more beautiful, right up to angelic beauty, so that they are easily *confused* with Christian role models, like MARY or CHRIST.

Lower spiritual entities are ugly and hardly ever change. Lower, undeveloped spiritual entities are lazy and suffer from unimaginable boredom. This is the reason why they form groups, which are then engaged in annoying or even ridiculing people on Earth. They're hardly ever stopped from doing this.

With the help of the power of thought, otherworldly entities can change their appearance, they can produce articles of clothing or smaller items for instance. The fact that this happens has not found favour with scientists and Church people; it all seems too fantastic to them. Every article of clothing and every item that is thus created from memory are made of the same material as the spiritual body of the soul. But it's not the same material that is created by a medium during a materialisation.

Some spiritual entities are able to create magnetic forces; but to do so they need the Od, the spiritual substance of the medium. This Od is *especially profusely* exuded by young people during puberty. *Cases of haunting* therefore mainly take place in the presence of young people. The female sex is very much preferred.

- *Materialistically minded* people remain near their earthly possessions for quite a long time, *after* their disembodiment. If their possessions end up in someone else's hands, they suffer agonies and try to extract revenge.

Ghostly phenomenon is mainly produced by *lower* spiritual entities, this is why they are negative and cause a lot of damage. There is always a certain motive hidden behind these practical jokes. Professor H. Bender from the Parapsychological Institute at Freiburg/Breisgau has assessed well-known cases of ghostly phenomenon. He assumes that these are cases of lustful revenge by young people, whose subconscious triggers such hauntings through repressed complexes. But as he's probably not willing to admit that spirits are involved, (otherwise the research funds from the taxation department might dry up) the cause, as far as science is concerned, remains unexplained. - But in reality it is *not* a case of lustful revenge of a sentient medium, but *the motives of a spiritual entity*. But its motive could simply be an attempt to attract attention to its existence.

- If one would consult a *dependable* medium during the investigation of such a haunting, the spirit would have an opportunity *to give an actual account of what's taking place*.

In the service of science (By Herbert Viktor Speer, from the year 1963)

Academic science is asking that any experiment should be *repeatable* at any time, if scientific phenomenon is to be accepted by them. In regards to spiritual phenomenon, they demand the same. According to our experience, it is worthwhile to investigate whether this request could even be fulfilled. During more than 1,000 sésances we certainly repeated experiments, but with the difference that these experiments were not always repeatable at *specific times*.

Every one of our sésances is *discussed beforehand* with the LEADER of the otherworldly group. The group in the hereafter therefore has 14 days to prepare this sésance. But if we wouldn't be able to keep the appointed time, the success of that sésance could not be guaranteed.

An experiment in a scientific laboratory *doesn't* take these conditions into consideration. One doesn't make an appointment with the hereafter, but *demand*s proof without the necessary PROTECTION and without spiritual ORGANIZATION. But if no proper contact is established in this way, doubt is nurtured and the research literally comes to standstill.

- *The main conditions for every positive otherworldly contact are LOVE, TRUST and HARMONY!*

The question is: Can these important conditions actually be fulfilled in a laboratory experiment? Let's take a chemical or physical experiment as a comparison: To be able to repeat a scientifically acknowledged experiment, all the requirements are to be accurately observed. The slightest mistake guarantees a negative result. One repeats the experiment along predetermined formulas. Spiritual contact also requires an *exacting observance* of the requirements. But even if one believes to have fulfilled all requirements, there is *no guarantee* that maybe one of the most important factors is still missing.

With spiritual experiments the repetitions are *always different*, because the medium is always in a *different state of mind*, or the participants react mentally completely differently compared to a previous experiment. This is why SPIRITUALISM needs *its own sphere*. It needs its *own devotional room*, its *established participants*, its *selected music* and many other important requirements. If one deviates from this ever so slightly, the whole sequence of the séance changes. It is therefore no surprise that private circles exhibit better results than a laboratory experiment with all its assorted apparatuses.

- *Our spiritual LEADER ARGUN emphasised that for every positive contact with the hereafter, a high degree of TRUST is necessary. This trust should not be confused with gullibility!*

But where there is not enough LOVE or HARMONY present and where in place of TRUST only mistrust or doubt dominates, only *lower, deceitful spirits make an appearance*. But these are not the "spiritual dead" we could receive a good INDOCTRINATION from or the TRUTH for that matter.

-

- We have experienced it often enough that one *single participant*, by his negative thoughts, created such a disturbance, that the contact was interrupted.

Some academic scientists are ready these days to fulfil the religious requirement of the medium. One does these favours for the medium so that it doesn't become temperamental. But what's the good of it, if the participants *are completely negative in their inner attitude*, even if they do not let on and seem to willingly participate?

The spiritual world reacts accordingly!

The exploration of the spiritual realm (By Herbert Viktor Speer, from the year 1970)

Communication with the spiritual world is nothing new. It probably goes as far back as there were or have been human beings here on this Earth. But what is really new about it, is the *way* contact with the hereafter is made.

Parapsychology cannot dismiss communication with the hereafter, on the contrary, it has to deal with it intensively. Whilst curiosity was the driving factor in the past, we now find that serious

scientific research is dominating. The spiritual successes are therefore a lot better than in the old days.

Maybe the Churches distanced themselves from SPIRITUALISM because of some awful results. The Churches described communication with the hereafter as a kind of idolatry, because they (themselves) never achieved more than contact with the lower spheres. But most of these teething problems have been overcome.

There are excellent contacts with the hereafter in many countries, especially England and Japan are worth mentioning. The spiritual results are so good, that they can't be compared with the bible anymore, that is to say, they have been *adapted to the present*.

It is therefore even more incomprehensible that the Churches, and also other great religions don't take any notice whatsoever of this development. They stick with a resolution that has been invalid and completely outdated for many years.

Private initiatives keep *SPIRITUALISM* alive, but it isn't really the task of private scholars and spiritualists to intensively deal with it. The Churches have better finances; they also have the facilities and the reputation.

- High-quality revelations don't belong in the hands of private pioneers, but belong up there in *the pulpits of the Churches*. If this were so, mankind's level of development would be raised.
- A really good contact with the hereafter asks for significant knowledge in all areas of life. If the knowledge of the circle participants is mediocre or restricted, one can't expect too much from the hereafter.
- If you ask silly questions, you must be prepared to receive foolish answers. This is the reason why many circles, without the participants ever realising the harm they do, border on blasphemy!

We receive results from spiritual circles from all parts of the globe. But we are appalled by all the nonsense that is considered to be the truth and that is offered as divine revelations. It's therefore deplorable that SPIRITUALISM has *no professorship* at universities, where interested parties or mediums have an opportunity *to be indoctrinated*.

Practice goes hand in hand with experience!

One talks about the occult everywhere, about magic, mystics, astrology, hypnosis and other occult disciplines. One organises congresses, where one talks and talks. Mavericks and fanatics ply their trade with practices, which really don't help anybody. Enlightened experts ignore the actual, worthwhile SPIRITUALISM even at these congresses. It's no surprise then that the path is extremely difficult, if it's jealously or ignorantly obstructed by the ranks of those responsible.

Researching the hereafter, fitting in nicely with mankind's development, is an *orphan* suffering from deprivation of LOVE and welfare, so that it can't develop.

- *Genuine* spiritualists belong at the forefront of the world at large. This is the commandment of the hour, *more important* than any of the existing Church religions.

Experiences gained whilst establishing a working circle (By Herbert Viktor Speer, from the year 1963)

During Easter, all written messages were provided with little drawings. Easter Bells, Easter eggs and little kittens were drawn. The spiritual realm expressed a hearty joyousness for these festive days.

Vicious rumours allege that SPIRITUALISM avoids the light, so it can deceive. We were able to make contact at any time and any hour of our choosing. We were able to make written contact even when the sun was shining. Many other physical experiments were successful in broad daylight. -

- *But any disharmony has a deranging effect.*

From the answers we received, we could often enough ascertain that our friends from the other side observed us continuously. They were informed about everything, knew every conversation, all our problems and even our personal secrets.

The greatest difficulty arose when we considered assembling a *public* circle. We found out that there weren't enough *suitable* people available. All the people we tried out were failures. But we had the opportunity to gain some important experiences and to undertake psychological studies. Interested parties knocked on our doors, *pretending* to have an extensive occult knowledge. It became very clear during the séances that they were completely inexperienced and misguided. They had actually read a lot about it, but they had *no idea* about the actual LAWS of the divine REALM.

And then there were those who were of the opinion, that the otherworldly were *an information bureau* for all *criminal affairs*. These participants were trying to deceive the otherworldly a lot of times. One woman for instance said: "I have a sister suffering from cancer and she will probably die in the near future. This sister is destitute and has one child. I'm ready to do a good deed after her death. I will look after the child." - So far so good, apart from the conclusion that her sister has to die soon. But then the real reason for her appeal comes to the surface. "...but I can't look after the child just like that. I'm also *destitute* and the spiritual realm would have to support me. If I would win Lotto for instance, this problem would be solved. What do you say to that?" - The answer was a simple "GREETINGS IN THE NAME OF GOD", and that was the end of the séance. This is just one of many examples!

It happened again and again that the allegedly interested participants always expected *material* help from the spiritual realm. They wanted to be recompensed in any way possible for simply participating in the circle. If this help *isn't forthcoming*, SPIRITUALISM isn't good for anything. Not too long ago, one of our writers asked the otherworldly for a good luck charm, so that his wishes may be fulfilled. Once these wished were fulfilled, we could have this occult good luck charm back.

It was very hard under these circumstances, to find people who were prepared to work *on themselves*.

Many mediums also stepped forwards. But we *couldn't use one single one of them*. The dependability we were asking for was never up to the level we managed to acquire *ourselves* through hard work. We found out that especially unfamiliar mediums managed to break through our PROTECTION and brought us in contact with dishonest spirits.

The *necessary* friendship with the otherworldly *wasn't guaranteed*.

The exploration of the spiritual realm (By Herbert Viktor Speer, from the year 1965)

If I'm asked about my opinion of spiritism, SPIRITUALISM or the occult in general, as an experienced spiritualist I can only ask, *which branch of it* are they talking about. There are *two sides* to all of these disciplines. It is certainly not different to money. There is a lot of counterfeit money about, but because of this one can't just generate a "valid" thesis, that there are actually no genuine banknotes around. It is only natural that the counterfeiter endeavours to create a counterfeit that *can't be distinguished* from the genuine issue.

It's hardly different with SPIRITUALISM. It takes the experience of a *genuine expert* in many cases, to be able to ascertain on hand of extremely small and inconspicuous characteristics, whether something is *genuine* or falsified. The whole affair is made even harder because the otherworldly also *participate* in the falsifications. Those souls already wreaked havoc with their negative behaviour or committed their crimes whilst on Earth and are diligently doing the same on the other side, wherever they can. This pronounced maliciousness, so expressed, is one of those hard to understand phenomenon of psychic research.

- The layman, endeavouring to believe in SPIRITUALISM, is almost always of the opinion that *only* TRUTH and HARMONY reign in the hereafter. - This opinion is *more than false*!

Whoever makes contact with the hereafter must come to the sad conclusion that many of the souls residing in the hereafter are disharmonious and maleficent. They lie in a fantastic, sometimes *ingenious* way, they're inconsiderate and often look for victims they can gruesomely torture to death. Possessed people can tell you about it! In a lot of cases, these unfortunate spirits quite often pretend to be "angels" or "Guardian angels". They try to *obtain trust* by fraud.

Only experience can help here!

Spiritual contacts are therefore no trifle. Apart from the difficulties of making contact and the psychic factor, the greatest difficulties lie in the *assessment* of the otherworldly, whose incognito is hard to unveil. It took us at least *three years* before we could make this distinction. But we certainly deal with a *completely different* mentality here. Even if a soul takes all its character traits with it into the spiritual realm, it soon acquires another mentality, because it leads a different life there.

There is very little of "heaven" to see. One is more likely to encounter a hell, full of lies and deceit, trying to undermine our personality. It's therefore no surprise that SPIRITUALISM is so easily discredited, the *spirits of the underworld* certainly make sure of this. They block the way to the HIGHER REGIONS. One can only penetrate this hell with a lot of care and with a deeper understanding.

One can approach the *better* SPIRITS only *slowly* and if one *faithfully* applies everything possible to gain higher KNOWLEDGE and if one is *selflessly willing to make sacrifices*, a friendship with a positive ENTITY from the spiritual realm can be established. But the way there is troublesome and long and this is why most circle participants founder early in their endeavour, before they could ask a *genuine* MESSENGER of LIGHT any question.

There is ASCENDENCY as well as *further descend* in the spiritual realm. If we don't remain objective, this descend can quite easily start whilst here on Earth. If we had listen to all the advice sent to us from all direction by so-called "people with experience", the whole circle would have

ended up in an asylum, one by one. Only because we always kept *both feet firmly on the ground*, were we able to explore and ask questions.

- Eagerness is highly dangerous!

The exploration of the spiritual realm (By Herbert Viktor Speer, from the year 1968)

All religious knowledge is undoubtedly related to the existence of the spiritual realm. But science isn't really over the moon about having to accept divine EXISTENCE. The rejection, therefore atheism, is *preferred*.

The question that arises from this is whether the spiritual realm could also be explored *without* religion?

CHRIST said that the seeker must "knock" on doors. But who is a seeker, if the spiritual realm is to answer his questions?

Based on our copious amounts of spiritual experience, we are of the opinion that religion *doesn't* play a decisive role. If a completely renunciatory, derisive or doubting attitude is displayed, it is not really the ideal approach in trying to encourage the positive ENTITIES of the spiritual realm.

- The spiritual realm is not *alone* in the heavens, there really is a hell there also.

The *concepts* one holds about hell are most of the time *incorrect*. But the devil and hell are taken even *less serious* than GOD and heaven by mankind. But no spiritist can ignore this reality, even if it's only a case of being teased and lied to. More serious encounters can lead to the asylum, yes, even lead to death. Medicine knows the terms "schizophrenia" and "religious lunacy".

- Spiritism is *a precursor* to SPIRITUALISM; this is why it has a closer relationship with hell.

But we have also found out that hell is more easily *verifiable* than heaven. One would not assume under normal circumstances that one's questions would be answered in the form of blasphemies, fantastic misrepresentations and superlative vulgarities of a personal nature. As an example: A novice spiritualist makes contact with souls in the hereafter. He asks in all sincerity and with religious piety if the spiritual realm has any message for him that would assist his spiritual development. The spiritual realm doesn't hesitate for one moment and answers: "You're an idiot and we'll treat you to a night that you will not forget for the rest of your life." - Answers from the lower sphere are like this or at least very similar. The spiritualist is shocked then he didn't expect answers like that.

- *A very strange "subconscious" indeed, if the scientist are correct in this!*

But they're *not correct*, then these hoaxes can degenerate beyond description and because of ethical values, we can't reproduce them here. If scientists observe these sorts of answers, they must inevitably assume that the medium, respectively the spiritualist is crazy. Hell with all its unfortunate spirits, the so-called damned, is naturally very much to blame for the rejection of SPIRITUALISM. But if one has to look at hell from a *regular point* of view, these answers constitute *the best possible proof* we could ever hope to gain about the existence of the spiritual realm.

- *The devil furnishes definite the proof of the existence of GOD!*

This will only be a contrary situation whilst people react to it. But presently the majority still react *incorrectly*. But it can also happen that a pious spiritualist is hoaxed in his own way. The answer would be something like: “My dear fellow, we know you and appreciate you like nobody else on Earth. You are blessed, even if you’re not aware of it. There is an important mission waiting for you here in heaven. You are to help GOD, therefore kill yourself so you can be with us straight away.”

There were spiritualists who fulfilled this request!

This is where the dangers lie! - The subconscious??

Technical séances (Recording voices on tape) (By Herbert Viktor Speer, from the year 1972)

By mentioning technical séances we mean the reception of voices from the hereafter by technical apparatuses like tape recorders, radios and by other recording instruments. The general interest in this phenomenon is great and as many circles all around the world read our *Menetekel issues*, based on our extensive experience, we would like to advocate certain prerequisites, which are necessary in addition to the technical prerequisites, to ensure a successful contact with the hereafter.

It has to be mentioned right at the start that scientist try with all their might to doubt the validity of contacts, because they’re not willing to suffer a loss of prestige. The objections they present are hair-raising and downright ridiculous. *Telepathy* and the *subconscious* were made the scapegoats in this regard up to now, because one can’t talk about fraud and hallucinations anymore.

- But that a tape recorder should have a *subconscious* or could be telepathic is *impossible*, therefore a tape recorder is not intelligent and can’t answer direct questions!

But the scientist still insist that the tape recorder is *telepathically influenced* by the person doing the experiment or its owner and this on a subconscious level by the subconscious. To put it bluntly, this explanation is pure nonsense and not prone to raise the prestige of the scientist in question. The fact remains that the recorded voices from the hereafter speak in *dialects*, with *accents* and sometimes in *different languages* than the participants are familiar with. But the spiritual conditions are unsurprisingly no different from any psychic contacts, where people play the intermediary.

The otherworldly have to be deemed friends, even if they are negative souls. To hurt their feelings, not take them serious or to deride them provokes their revenge, which could have dire consequences. One should not underestimate anyone from the other side; they can *possess* you and rob you of your senses! The majority of contacts with the hereafter are with negative souls, but they too need our understanding and our help!

But chaos reigns even with technical séances, as every busybody want to bask in the limelight. It takes a lot of patience until a CONTROLLING SPIRIT is found who can bring order to the proceedings. Any sensible, positive communication is impossible without a CONTROLLING SPIRIT! The CONTROLLING SPIRIT can’t do anything without support, he needs spiritual HELPERS who provide the necessary PROTECTION, without PROTECTION there can be *no TRUTH* and the hoaxing knows no end.

The following conditions should be observed:

- Technical séances should *not* be carried out *alone*. A small investigative circle must also be assembled here.
- The circle participants must *respect the truth*, must be *intelligent*, *not* fanatical and above all *not* atheistic.
- *Certain times must be exactly adhered to, during a meeting; the hours between 7.00pm and 10.00pm should be chosen whenever possible.*
- The *introduction* should start with an APPEAL and with good, harmonious music. The otherworldly hear and see outstandingly!
- *Any excitement* is to be *avoided*.
- A circle always has to be *assembled*, even if the medium is only a technical apparatus.

Technical séances (Recording voices on tape) (By Herbert Viktor Speer, from the year 1971)

Many scientists up to now were of the opinion, that exploring the spiritual realm *was unimportant*, as it supposedly *has nothing to do* with our world. The result of this attitude eventually led to a complete *dismissal* of the existence of the hereafter. But the exploration of invisible energies and rays had markedly changed this opinion. The immeasurable and invisible *doesn't seem so abstract or impossible* anymore these days. Quantum physics had a lot to do with this.

- The exploration of the spiritual world is not just an interesting hobby, but a SCIENCE of extraordinary importance.

The layman unfortunately doesn't correctly understand this relatively difficult science. This is understandable because the layman isn't familiar with the basic rules. If we ask the average citizen how much of physics or chemistry he understands, respectively, which basic rules he knows about, we won't receive a correct answer, just an incomprehensible look. We have the same situation with SPIRITUALISM, which is closely related to magic. The Churches couldn't give any answers either, on the contrary - they feared this science. Church colleagues still can't comprehend SPIRITUALISM even today; they still believe it to be a cult of the devil, exactly the way it was instilled in them.

- *The major task of people exploring the hereafter is to make it clear to academic science, just how important parapsychology is for man.*

Mankind is in need of *good role models* and *good instructors*. But as they are scarcely available on Earth, we can find them in the spiritual realm. We must search for them, make contact with them and gain their LOVE and FRIENDSHIP. We have done this and the rewards are enormous!

- It must *be possible for other people* to achieve what we've achieved. If this hasn't been possible up to now, then the problem must lie with the way it has been handled.

Many, many reports from other circles land on our desks. But we are often horrified when we read these reports. We can hardly believe how ingeniously mediums and circle participants are led astray. What really stands out is the craving for recognition, bordering on delusion. The pathological pomposity of these people is exploited to the maximum by the negative entities in the hereafter. Instead of actual indoctrinations they receive sweet honey. Some of the protocols state: "...my dear child, you are already a true angel here on Earth. CHRIST has taken you into his heart and he's happy to have you work for him. Don't be afraid when the world comes to an end then you

are in the arms of the redeemer and nothing will happen to you.” - This is only one of a thousand examples. If one were to read these protocols one would become quite ill.

- To be able to do actual psychic work *for the benefit of mankind*, it is essential to keep *one's persona completely on the background*.
- The name of the medium is *unimportant*.
- The names of the spiritual TEACHERS play *no part* whatsoever. All we can do is to differentiate between them, because they have various assignments.

We don't need a treatise. We don't need phrases. We don't need promises. We also don't need any fantasies. We need good ADVICE, ELUCIDATION and human understanding.

- *A message from the hereafter is only a genuine MESSAGE, if it contains a good and useful INDOCTRINATION. Everything else is for the wastepaper basket!*

Pious, hypocritical behaviour offends us and only slows us down.

We haven't come across one book wherein *true guidelines* to spiritistic and spiritualistic fundamental rules are recorded. But there are a hundred of thousands of book containing nonsense that will only confuse the seeker of the TRUTH.

- *One can reduce a thousand spiritual books to just halve a book that will get a little closer to the TRUTH.*

Just simply sitting down for a little meditation and generating a few thoughts isn't necessarily INSPIRATION. But if one receives a dictation and has a few thoughts about it, like listening to a telephone conversation, that is something else. But if one isn't too sure *to whom* one is talking to, that is a dangerous situation, especially if one is inclined to *believe* the invisible entity. - This is why it is written in the bible:

- *“Man must investigate, whether the spirits are send by GOD.”*

This is easier said than done. - Just how does one test the spirits? This is only possible with the yardstick of logic! But we have ascertained that hardly a medium or circle participant possesses the absolute yardsticks of logic. It is therefore impossible to test a spirit, if one is not accurately *informed* about the TRUTH and LOGIC beforehand.

- *Blind faith, a prayer, trust, a good heart, all of this is irrelevant in such a test!*

If a fallen spirit is very intelligent, he has great powers over his listeners. He intermingles fiction and TRUTH so ingeniously, that everybody falls for it. It takes years of experience to correctly recognise a spiritual TEACHER. We are convinced that our seasoned readers are already capable of applying the yardstick of logic, when testing a spirit.

- *One has to ask the spirit questions that he has to answer. If he avoids the question and starts to talk about something of his own bat, he throws suspicion on himself.*
- *A positive spirit will politely thank you, but will not heap a lot of praise on his listeners.*
- *If a “Christ” or an “archangel” announces himself, we would abort the contact immediately.*
- *Exalted TEACHERS from the spiritual world come nameless. The MERIT of their communication alone proves their legitimacy.*

Let's take a closer look at a psycho-phone³, well known throughout the world. Many, many voices, claiming to belong to famous people, appear on this instrument. But our extensive experience tells us that most famous people from Earth *have lost their glory* in the hereafter and are confined to spheres of darkness.

- An important otherworldly TEACHER doesn't say, I'm Napoleon or Socrates, but announces himself with a FRATERNITY NAME, for instance PRUDENTIAL.
- Charity, patience, tolerance, discretion and *higher* KNOWLEDGE are the attributes of an exalted TEACHER.

Neurologists and doctors treating mental deceases should definitely reconsider the value of the psycho-phone. Whatever is played back on such a tape recorder can also take place within the brain of a psychic person. *Pathological clairvoyance*, especially *painful possession* has the *same characteristics*. One won't be able to frivolously talk about schizophrenia, but will have to consider a pathological contact with the spiritual world, that is to say, contact with the lower, negative spheres in the hereafter. People addicted to drugs and severe alcoholics make contacts like these and they're not able to deactivate them. One talks of "hallucinations. But in reality they "telephone" with the spiritual world or *they already see* the lower spheres.

Questions and answers on the subject of: Possession

Question : Are ill people *more* in danger from possession by spirits than healthy one?

AREDOS : Spirits endeavouring to possess someone don't particularly want to occupy a sickly body. This body wouldn't be *valuable enough* to them. But they do prefer to use a *wicked character*, respectively, a wicked soul, it is much *easier to control* and to dominate. A split personality can be treated in a relatively short time. It isn't quite the difficult problem you consider it to be.

Question : Just *how* does one treat this problem?

ARGUN : First one has to try to oblige this person and not contradict it. One has to try to make contact with this person, to then encourage the positive. In addition to that, the thoughts of the patient have to be accurately monitored. The patient's facial expressions should be closely observed so that one can find out what is going on inside the patient's head. One has to try to deduce, respectively anticipate the patient's thoughts, so that they can be arrested before they have a chance to develop. One shouldn't give the spirit, which unlawfully entered the aura of the patient *any chance to express itself*, meaning, not allowing it to utilise the brain of the patient.

Question : What mistakes do doctors make?

ARGUN : They don't take *enough* notice of these cases. These patient became such hopeless cases due to environmental factors, most of the time. But if they're isolated, they can certainly be healed. But they must be individually and systematically treated. Diet doesn't play any part in this.

³ The psycho-phone is an electronic broadband receiver, utilised to record transcendental voice when researching tape recorded voices.

Question : The neurologist Dr. Wickland developed an electro-shock treatment for this and it had good results. From your point of view, is this method really good?

ARGUN : The successes were there, but this shock therapy is detrimental to the physical body, but this wasn't mentioned at all.

Question : Can you, living in the spiritual realm, evict these possessive spirits?

ARGUN : This is very difficult for us. We have other assignments. Madness usually develops due to heightened hysteria: Yelling, crying, seizures and breakdowns; this is the *first stage* and it opens all the doors to the personal PROTECTIVE AURA of the afflicted person, completely letting it go unchecked. The *second stage* is indicated by aggressiveness towards others. Unhappiness and egotism heighten the delusion, especially when ungodliness and fanaticism are added.

Question : What is amok that it only affects grown-up men in Melanesia,⁴ whilst Latah⁵ only attacks women? Both of these illnesses are unknown in Sumatra and the whole of Indonesia. Can you explain these illnesses to us?

AREDOS : Amok is spontaneous possession: An angry spirit takes control of an enraged individual. Because of the high rate of psychic ability prevalent in those areas, the spirit takes complete control of these people and carries out his destructiveness. These are not illnesses but genuine possessions. These spirits hail from the lowest spheres and are at home in that region. But the victims actually coerce them mentally.

Question : What is the best way to help the possessed?

ARGUN : This statement is directed at psychologists: It takes a lot of patience to undertake this treatment. One has to show the possessed that one is *superior*. But one also has to make it clear to them that they are *healthy*! It is a great mistake to tell the patient that he's "crazy". This would achieve the exact opposite then the possessive spirit hears everything. Above all, one has to fight the *negative characteristics* of the patient, because they are the focus of the attraction.

Question : Can an afflicted person lose the possession by taking a trip?

ARGUN : Yes, it's possible, especially if the spirit is restricted to one particular region. But if the negative spirit is *not* restricted to a region, it will serve no purpose.

Question : What influence have electrical short waves on the spiritual body of a person?

ARGUN : Electrical healing rays have a positive influence. But electro-shocks are not just painful for the soul, but are also damaging!

Question : But Dr. Wickland did exorcise evil spirits. Is his method correct?

⁴ Melanesier: The inhabitants of New Guinea, the Bismarck Archipelago, the Solomon Islands, New Caledonia, Vanuatu and the Fiji Islands, speaking The Melanesian language.

⁵ Latah [malai]: A psychotic behavioural disorder attack, afflicting particularly Malaysians.

ARGUN : I can't really say whether it's correct or not, but at least it's successful, any pain the physical body has to endure is *also felt* by the soul within it. Eventually these souls escape from the inflicted pain.

Question : If this is so, then it wasn't really that wrong to give the possessed a good hiding, as it happened in the old days?

AREDOS : I can't approve of this, then these people were quite often tortured unnecessarily. Electro shock is therefore more effective, especially because it takes just a matter of seconds, whilst in the old days, the possessed were slowly but surely beaten to death.

Question : How should the possessed be treated?

AREDOS : Through clever elucidation. But where do you find doctors or healers *able* to accomplish this? They're not smarter much than the patients and it could happen that they would also become possessed. The lower souls lie in wait for just an opportunity, to find new victims. - It is therefore very important that a *faculty* is created, where the INDOCTRINATIONS of the SPIRIT and SPIRITUAL PRACTICES *are taught*; the term "schizophrenia" will then be replaced with "faulty connection".

Question : Why would this be a faulty connection?

AREDOS : Because a soul that *doesn't* belong in this body and only feeds off it, made contact with its brain!

Question : (1973) It happens sometimes that a perfectly stable person sudden commits a major crime for which no motive can be found. We assume that this could be a case of total possession. How does *such a possession* take place?

ARGUN : The term possession means something else these days, namely great excitement or idealism or even fanaticism.

- *A true possession is actually the takeover of an earthly, living person by an otherworldly spirit. This takeover happens via the brain of the person here on Earth! The spirit finds an opportunity for direct contact.*

This takeover is a *lot harder* to accomplish with children, as they are still developing spiritually.

A grownup, capable of being possessed, makes the following mistakes: He concentrates too much on a *negative* field of interest, for example politics. He thereby blocks out the environment around him and lives *mentally very one-sided*, solely focussing on his point of interest. He attracts a so-called possession, by doing this.

- *It's a distancing away from physical reality and too strong an interest in the hereafter.*

It's unfortunate that especially inexperienced spiritists fall prey to possessions. This is very regrettable in regards to the exploration of SPIRITUALISM.

- *Cases like these bring discredit to all of you - and to us also!*

The lower spirits are sometimes able to make use of the brain function of people on Earth, if the spiritual doors are open. Positive spirits will *never do this*, because it's a great sin to misuse someone like that. This is why we're *not allowed* to use *suggestion*!

Question : There are a lot of people possessed by lower spirits. This possession is a serious "illness" and is infinity difficult to heal. As you told us before, medicine wrongly labels possession as *schizophrenia*. Can you please tell us more about it?

ARGUN : • *Genuine* possession is the taking over of a medium with *psychic* or very *unstable* tendencies by an otherworldly entity, respectively, by lower spirits, which use the medium as their instrument.

The soul has an interrelated association with the physical body it possesses here on Earth. This body is controlled by the soul. But it sometimes happens that the soul is *forced to stand still*. A spirit can then take control and wreak terrible havoc with this instrument. It could easily lead to murder or suicide!

Question : Can those afflicted comprehend that they're being misused like that?

ARGUN : I will explain it: Everyone must go through training with his physical body here on Earth. From about 10 years old, he or she has to start *depending on him or herself* and they have to make their own decisions. Once they have developed to this stage, they could fall prey to possession.

- A genuine possession always proves that the medium has a *tendency to react negatively*.

Positive spirits can guide and support a medium, but wicked spirits only want bad and negative things, this is why they attach themselves to negative (or unstable) people, who allow themselves to be completely dominated in this way. In addition to that, these evil spirits enslave these people!

Question : How can one help these people? There is exorcism, but whether it will heal or liberate the patient is questionable.

ARGUN : The liberation from possession is always linked with the good *will* and the *logic* of the patient. But in most cases the experiments fail because of the *obstinacy* of the inflicted.

- Children *below* the age of 10 years are seldom suitable for possession. Possession is a state of absolute submission to the intentions of an evil spirit.

It is a grave mistake, if a doctor indicates that a medium is suffering from hallucinations or imaginations, because the medium knows too well *that it's controlled* and that it *can't fight against it*. The medium begins to hate the doctor and becomes even more obstinate. The doctor and the nursing staff have to know that the patient is *used* by an invisible intelligence. But unfortunately they don't believe such "nonsense" and the healing process is blocked right from the start.

Question : What would you suggest?

ARGUN : I would initiate a few *meditation evenings* with a number of these patients. During these sessions, I would enlighten them about the illness they suffering from. It has to be made clear to them that they shouldn't *trust* these spirits at all. But the spirits will also have to be *positively influenced* and show some human kindness, the way Dr. Wickland successfully dealt with it in America. -

These patients usually *disregard* their environment and direct their whole attention on one particular objective, which seems worth striving for, thereby abetting the possession. This objective is with these patients day and night. This is the reason why possession is misdiagnosed, because one assumes that this false objective is the actual possession.

Question : Is there a *genuine* schizophrenia or is it *always* either clairvoyance or possession?

AREDOS: There is *also* a *genuine* schizophrenia, the disparity being that it behaves differently from clairvoyance. The dangers for people with an *extended range of senses* lies in the fact that they're *unable to differentiate*, whether they're dealing with good or evil spirits. Evil spirits, approaching a devoted person with the sole intention to bring about its downfall, persuade it to accept *that they're angels* and that they have to give them an important mission.

Most mediums fall for this confidence trick, especially if they have a *psychological craving for recognition*. These people would like to be *more* than CHRIST is, they want to redeem the whole world and they don't realise just how stupid they really are!

But if there is a medium amongst them who refuses to carry out such a nonsensical mission, it is immediately threatened with: "Do you really want to set yourself against God, who has placed his trust in you? This will deprive you of your salvation." If the medium answers back with: "I don't see any sense in this mission, it can't be real". - Evil will answer: "Don't try to criticise God. Only he knows what has to be done and what is right!" -

- Unfortunately many fall for this nonsense and the worst kind of crimes are then committed, endangering all of SPIRITUALISM.

Question : There is a paragraph in the bible wherein an angel demands of Abraham to sacrifice his son. What can you tell us about this?

AREDOS: Here you have a biblical example. The CREATOR would *never* do something like that. Abraham *believed everything* he *mentally heard*. It's unfortunate that a lot of mediums still do so today.

Interjection: The medicos would have to know that something like that exists.

AREDOS: The medicos know that schizophrenia exists. But they don't point the finger at the endeavours of the hereafter, but simply state that the patient is "mad" and "hallucinates".

Question : But if the assignment *actually* comes from the divine DOMAIN, just how can one distinguish the difference?

AREDOS: This is naturally extremely difficult.

- *If the divine ASSIGNMENT is genuine, the medium is subjected to a TEST. Only once the TESTS have been successfully passed and it has been established that the logic of the medium can't be shaken, will the ASSIGNMENT be given. - It was the same with CHRIST.*

Question : Are there still psychically talented people these days who are clairvoyant and who become an assignment?

AREDOS: Yes, there are a great number of them. - But many of them are presently in mental institutions.

Question : Is it true that there are angels who materialize in front of people and talk to them?

AREDOS: Yes, that is *possible*, but it happens *very rarely indeed*. But in those cases a pledge of secrecy is asked for, therefore nobody will ever talk about it.

Question : What will happen if this pledge of secrecy is broken?

AREDOS: Nobody will believe one word this person is saying and one will consider him dangerous and mad. But one won't be able to use him for a MISSION anymore.

Question : (1975) We know that CHRIST had a divine MISSION. You also have a divine MISSION to fulfil. Can you tell us who else has such a MISSION?

AREDOS: This is a silly question! You surely know that you also have a divine MISSION to fulfil. This is why you had divine SUPPORT in your quest to search for the TRUTH, for over twenty years.

Technical séances (Recording voices on tape) (By Herbert Viktor Speer, from the year 1972)

The exploration of the hereafter has furnished evidence for many thousands of years that there is a PARALLEL to our own world, which is logically called "hereafter" or "spiritual realm". The enormous doubts associated with this conclusion couldn't be redressed so far. An exact line of argument was reserved for those who dealt with it *experimentally*; but their insights were doubted and ridiculed by those not present at these experiments. Things have changed only recently in this respect.

- Technology *verifies the validity* of the INSIGHTS experimental researchers have gained over hundreds of years.

One is now faced with the problem of how one could doubt or refute technology. Telepathy is brought into the picture to do so. The idea of thought transmission was considered pure nonsense up to now. Precise experiments have proven beyond any doubt that people's thoughts are *transferable*. The distance involved is of no concern; matter also doesn't represent a hindrance, neither gold nor

lead can influence or divert a thought. What is very interesting is the fact that thoughts reach their predetermined target.

But now that a tape recorder is available that can record voices from the hereafter, the technical proof, that there is life after death is actually furnished. But the ever-doubting scientist isn't happy about it. One is not prepared to accept something that shouldn't rightfully exist, because it could upset their view of the world. One therefore tries everything to discredit this technical argumentation. These efforts are so intensive that logic hardly comes into play and only absolute nonsense is presented. The following version is presently favoured: "The tape recorder records the thoughts of the participants. This can happen quite subconsciously, meaning the participants don't have to realise that these are their own thoughts." - To be able to accept this explanation, one has to apply some sort of mental acrobatics, because only a doubting scientist could come up with something like that. It is therefore an *art form* to explain all of this.

But as we are not just using a tape recorder in this fashion, but have been using automatic writing mediums for more than 20 years, our experiences are adequate to recognise this nonsense. A pencil can accomplish things that couldn't possibly have anything to do with the subconscious. Those in the hereafter have been attempting for thousands of years to prove their otherworldly existence. We can tell you a thing or two about how difficult this is.

But a very convincing verification is when the otherworldly use a language that none of the participants are familiar with, thus a language is used that has to be translated by an interpreter first. This phenomenon also occurs when technical argumentation is applied. There are also voices recorded on the tape, that speak in a *foreign* tongue.

- These voices surely indicate that there is life in a hereafter.

But one has to bring the fact into the equation that there are *malicious* spirits out there that will do anything to prevent or to distort these results. This applies to other experiments also.

- This is the reason why PROTECTION from such interferences must be *priority number one* if a *positive* result is to be achieved.

The phenomenon of transcendental voices (Ing. Franz Seidl, Wien)

During recording sessions with a tape recorder, words and voices were taped that *definitely* didn't originate from those involved neither with the experiments nor with the radio program. One calls these "voices from an unknown source".

- *The astonishing thing about it is that these voices answer questions and sometimes call the experimenters by their names!*

The Swedish painter, opera singer and archaeologist Friedrich Jürgenson discovered transcendental voices in 1959. After collecting thousands of voices on tapes, he approached some experts to review these tapes. They arrived and analysed these voices. Specialists from radio brought their own sealed tapes and recording instruments. "No sign of any confidence tricks; no signs of false bottoms" was their respond to the investigations.

Psychologist Dr. Konstantin Raudive from Lithuania has been dedicating his time to research these voices since 1965. His recordings were carried out with scientific meticulousness. His book "The

inaudible become audible” created a world sensation when its English translation was published in England. Dr. Raudive announced: “I don’t know how all of this takes place. I have no idea of how these voices end up on tape. I was close to fainting when I first discover these voices on tape. As far as I’m concerned the origin of these voices can’t be explained using a physical yardstick. I explain them in my own way. I’m personally convinced that these are the voices of people who have died.”

Science naturally tries to test this phenomenon objectively and critically. Investigations are carried out at universities and research laboratories using the latest investigative methods and with equipment the layman can’t even imagine. These voices are dissected here and with the latest voice analysers their tonal characteristics are studied and their oscillations graphically recorded. Sound is broken down, filtered and amplified to fractions of a second and their acoustic patterns compared with those of the experimenters. All recording instruments, like a battery operated tape recorder, the microphone and the required measuring instruments are placed in a so-called “Faraday cage”. This is a fully inclosed and well-earthed container or room, completely shielded from any radio waves or other electro magnetic fields. - These voices still appear on tape and this with the same intensity and particular characteristics. And this happens even thou no radio frequencies can enter this cage! The explanation that this would be due to random remnants of radio waves and dispersions doesn’t wash anymore.

A radio technician from Cologne stated at the end of an experiment: “The voice phenomenon is technically genuine. It is certainly not a case of a confidence trick. But from a technical point of view, there are many possibilities of how these voices could develop. Through so-called cross-modulations For example or short-term interference from out of range senders. The noises take on the characteristics of an articulated language. As the voices are very hushed we’re not able to hear them via radio with our hearing capabilities. Only the tape recorder made it possible to make them comprehensible.”

- But this radio technician didn’t have any explanation for the fact that these voices *answered questions* and addressed the people present by their name.

The psycho-phone (Research into voices on tape) (Author Herbert Viktor Speer, from the year 1971)

SPIRITUALISM has entered a technical phase. At this point in time, the world at large has hardly any knowledge about this fact. Professor Dr. Bender had this to say about it:

- “*The importance of this discovery is comparable to nuclear physics.*”

The great powers on Earth were interested in nuclear physics; they invested billions. We will see if the great powers will also be interested in a technological connection with the hereafter and will be willing to invest at least a few millions.

The *psycho-phone* consists of a highly sensitive broadband receiver, capable of receiving the subtlest of frequencies. Connected to this broadband receiver is a tape recorder.⁶ The people involved in these experiments are known to us by name, but unfortunately there is no experienced researcher of the hereafter amongst them, therefore all participants are, as far as we are concerned, amateurs of spiritism. The technological researchers of the hereafter have certainly recorded an enormous amount of thoughts and dialogues from the other side; but all of these recordings serve

⁶ Literature: *Transcendental voice research*, includes schematics and drawings by Ing. Seidl. Source: Verein für Tonbandstimmenforschung, Herr Dipl. Psychologist Fidelio Köberle, Höhscheider Strasse 2, 40591 Düsseldorf.

the same purpose as a profane moving of tables and the writing on panes of glass, common in the house and garden variety spiritism.

It happened once before that a spiritistic wave spread from America all across the world. It was a enormous sensation but it soon its novelty value, because one didn't know just how *to deal* with the hereafter. The psycho-phone is no exception to this; it purely represents a novel, state of the art medium to communicate with the hereafter. The psycho-phone certainly has an importance place in our mission, that shouldn't be underestimated, its technology furnishes *the evidence*, that our contacts with the hereafter isn't based on imagination, deceit or hallucination or misguidance.

- *Technology makes it absolutely clear that there is a hereafter, where the thought bearers of deceased people exist, thus personal surviving thought bearers.*

There are enough ways to communicate. Most of the time they are of a kinetic nature. *Telepathy* from one consciousness to another consciousness happens a lot, even if it occurs subconsciously most of the time. There would be very limited progress without this telepathy, because ingenious inspirations would be missing.

One can hear voices from the hereafter on the tape recorder connected to the psycho-phone, which originate from these invisible thought bearers. They announce themselves as Hitler, Napoleon, Stalin, Churchill, Shakespeare and others. This surprises researchers, what shouldn't really be true, often happens.

But what is the reality behind these voices?

We can only shake our heads, because we have to watch helplessly in the way one recklessly deals with such a phenomenon. We can state with absolute certainty that not one of those voices belongs to these famous people. Hitler, Stalin and other war criminals can't get anywhere near these psychophones.

As in all cases of profane spiritism, we deal with *hoaxing and lying spirits* here, they want to have their own way. The catch enough attention, they use names that were of great prominence here on Earth. But these hoaxing and lying spirits have no other objective than to spread unrest, doubt and chaos. They have certain advantages for this service.

The psycho-phone (Research into voices on tape) (Author Herbert Viktor Speer)

We agree with the bible in this respect, it warns us not to question the "dead". Experience taught us that even in regards to relatives and friends that have passed over, other spirits have always falsely claimed to be them. The proof of their identity was cleverly falsified.

- *One has to take into consideration that the otherworldly have a significant talent in regards to telepathy, which is very closely related to the otherworldly way of communicating. An otherworldly thought bearer can very easily register the thoughts of any member at the meeting. He is therefore very well informed and takes full advantage of it.*

To give you an example:

"What's your name?" - Answer: "My name is Willi."

"Please write your name!" - The otherworldly writes: Willi.

“But you’re not the Willi we want to talk to, he writes his name with a y.” - Answer: “You can go and take a hike you...”

And then a *new* Willi announces himself, trying out his own trickery.

- All of spiritism is completely useless, if it’s aim is not just to verify the hereafter or explain certain physical phenomenon. -

Only a SPIRITUALISM that is not concerned with the masses of “deceased”, but strikes up and maintains an appropriate friendship with otherworldly MESSENGERS of LIGHT, that is to say, with *authorised* TEACHERS, is of any merit. Experiments with the psycho-phone are therefore just ordinary communications with the lowest spheres of the spiritual realm. An incalculable number of departed souls are situated there, unable to leave this sphere of darkness unless they’re reincarnated by the grace of GOD.

We remember a case that happened in Switzerland:

A doctor had established a connection with the spiritual realm. He was certain that this connection was genuine, but he was completely inexperienced. The spirits led him a merry dance; they informed him that *the world was coming to an end* - that he should *save himself by climbing Mont-Blanc*. The result was that he and his companions climbed the mountain in order to survive there. The world didn’t fall apart, but the reputation of the well-known doctor surely did, one eventually declared him insane. He was certainly one victim of evil spirits.

Those “Minister Presidents”, “Popes” and “Caruso’s” etc. are well known to us, they can’t enter our circle, because a well functioning PROTECTIVE RAMPART is in place. Our questions and answers, published in the *Menetekel*, give enough information about the level of our endeavours. Our circle is known and respected throughout the world by circles of experts. Some of our booklets were translated into six different world languages.

It isn’t the *famous* from the past that use the tape recorder, but criminals, crooks and all sorts of scoundrels, of which there are plenty, so that a *positive* spirit *hardly* has an opportunity to record a sound.

As we mentioned before, the psycho-phone *verifies* our contacts with a hereafter that really exists. This discovery is tremendous in itself; it provides us with new impetus. But the TRUTH *about life* in the beyond will not be gained this way.

The main danger lies in the fact that one believes these hoaxing and lying spirits, as is already the case. These thought bearers don’t hesitate from telling us that every barbarity taking place happens in the NAME of GOD.

Technical séances (Recording voices on tape) (Author Herbert Viktor Speer, from the year 1972)

Voice phenomenon, respectively the technological connection with the hereafter always creates a sensation. Spiritualists and esoterics don’t doubt the validity of the contacts. But scientists and technologists, who have always belonged to the defeatist of this world, are considering whether they can stage-manage a *different* explanation.

The voice phenomenon is still in its infancy. But technology makes giant strides. It is foreseeable that better contacts can be established. But in the mean time atheists find it increasing more difficult the worm their way out of this.

We don't actually need these technical contacts at all, even if we have very good apparatuses at our disposal. Our spiritual GUIDANCE dissuaded us from using them. If we really think about it, we must confess that they're right. It would surely mean that we would have to *start again at the beginning*. Do we really need this? Our contacts through the medium developed and functions magnificently, and it seems hardly possible that we could improve on it. We'll stay with the best instrument there is, namely the human medium. In addition to this there is the PROTECTION we managed to establish, something really imperative for a good contact.

Those technical researchers interested in this field of knowledge however make a great mistake, one we can't comprehend, but it indicates to us just *how inexperienced* these people really are in regards to spiritual things. These experimenters, be they electronic engineers or scientists, turn to so-called experts for help. But these research experts dealing with soundwaves and vibrations are *not* spiritualists and *don't know the first thing* about the spiritual realm and its inhabitants and are not familiar with the LEGALITIES operating there. They are just inexperienced, inquisitive people, daring to examine a sector that is towering *way* above our earthly existence.

They haven't quite realised that their profane experiments deal with the so-called "Heaven" and also with "hell". We have to assume that these researchers do not believe in either GOD or his antagonist, because they unsuspectingly accept the greatest nonsense served up by the hoaxing and lying spirits. These people should at least have studied some appropriate literature beforehand, for example the books of Dr. Emil Mattiesen: "Das persönliche Überleben nach dem Tode" (Personal survival after Death) or the book of Dr. Wickland: "Dreißig Jahre unter Toten" (Thirty years amongst the dead). -

Our question is: Why don't these researchers turn to *experienced* spiritualists? These experts know how to deal with the hereafter. Experience is really very important when it comes to asking the appropriate questions and when assessing the opposite side correctly. Success can only be achieved through LOVE, TRUTH and FRIENDSHIP. If we are not prepared to help the otherworldly, we can't expect them to help us!

- *Even when utilising the technical approach, the lower spheres are always the first to make contact. One has to work one's way higher from sphere to sphere until one makes contact with the ELITE.*

That there really exists a throng of lower spirits that wants to have their say is clearly evident because we are still familiar with the names cited.

- *Atheism* is a state of temporary mental derangement, even in highly intelligent people.

This state and this fact are especially recognisable with the otherworldly. It's the same here on Earth. -

- *UNGODLINESS hinders any enlightenment!*

Questions and answers to the theme of: Technological séances

Question : (1971) We would like to discuss the *psycho-phone*, which receives voices from the spiritual realm. One knows the frequency on which one can receive these voices. We would like to know what the spiritual realm makes of this invention?

ELIAS : The spiritual realm is *very interested* in this, this applies to the positive and the negative side. The negative side tries everything in its power to get their hands on this enormous invention. This would lead to a catastrophe.

Question : We would like to know more about this.

ELIAS : *False reports, lies* and rumours *inciting panic* can be *spread* with this apparatus. The whole apparatus could be discredited, the same fate the common house and garden spiritism suffered. Therein we see a great danger.

Question : Can one confront this danger?

ELIAS : This apparatus, respectively the *psycho-phone* must not be monitored by scientists, but by experienced spiritualists, then *only they* know how to deal with the hereafter; they know the dangers and have the required respect and humility.

We actually see a great danger in regards to scientists, because there are in every respect *irreverent*. But that's exactly what the negatives utilise for their purposes. Science knows *too little* about the great POWERS of GOOD and evil, it doesn't believe in a "Heaven" or a "hell". To them GOD and the devil are figures of fantasy.

This invention is undoubtedly more complicated and in its impact more powerful than you presume. Electronical spiritual IMPULSES, namely the thoughts of the otherworldly, are electrically and magnetically recorded. This conversion is something colossal. It is not just about recording thoughts. Similar to the telepathy-recorder of the SANTINER, the thoughts of the participants *can also* be recorded. The result is a jumble of voices. What is missing here is an equaliser. When recording, the voices of those that are sleeping have priority.

A spirit speaks words you can't hear, but there are mediums that can *sympathise* with these words, which are actually *mentally* detained. These are verbal clairvoyant mediums.

Everyone can receive these words, that is to say, receive the thoughts of the otherworldly telepathically. But not everyone has the ability *to differentiate between their thoughts and their own*. Only a few are successful in training their capability to such an extent; one calls this inspired dictation, something Karl May was very good at. (Karl May: Popular German author)

- Every living person, who acoustically talks, must formulate every syllable in thought first. Therefore every thought is *above* any acoustic language.

The spoken word is *thought of first*, before it's pronounced. It still lingers on in thought, once it's pronounced. This starts a "thought stream" made up of many IMPULSES,

which can be manifested on tape recorder tape under special circumstances. This technological phase is still in its beginning.

We only hope that this development brings about a completely new religious thinking process, so that these infernal wars come to an end.

At any rate, thoughts can become acoustically expressed. This isn't something new, but what is new is the *technological way*, it can't be disputed. This offers opportunities for better knowledge!

Question : Was the author and book writer Karl May harassed by *earthbound* spirits? Once he left Radebeul (near Dresden), the annoying spirits couldn't follow him, but on returning the annoyances commenced again.

ARGUN : Those weren't earthbound spirits, but souls from the *district*.

- A *violent criminal* can be restricted to an area in the hereafter, finding just *one square meter* at his disposal. This also applies to certain *suicides*, but here the deciding factor will be *the motive for the action*.

Question : Could it be that thought waves have something in common with electricity?

ELIAS : No. - Thoughts are *not electrical*, but have a similarity to magnetism. However it's not electrical magnetism.

Question : We are of the opinion that a psycho-phone would be immensely important in *our work* also, because it *can verify* the genuineness of our contacts. Are you of the same opinion?

ELIAS : Today's humanity, surrounded with all this advanced technology, can certainly understand technical processes *a lot easier* than psychic processes. The imaginary capacity of most people isn't developed enough to imagine an *abstract* psychological process, technical means help them gain better understanding. Apart from that, these processes can't be distorted or presented as fraud. People prefer *concrete* processes to phenomenon.

Question : Can the thoughts of the participants be heard on the psycho-phone?

ELIAS : During an important congress that took place in Austria, the thoughts of the scientists were *also* on the tape. This certainly is a disadvantage that won't be easily overcome.

Question : Are you of the opinion that the psycho-phone could *replace* the mediums in the future?

ELIAS : Certainly not! - To receive really positive indoctrinations, *qualified* and *experienced* mediums are still preferable. But the psycho-phone is *better* in verifying the reality of a personal survival.

Question : But as they have not accepted the facts of personal survival until now, they talk of voices from an "unknown source". What would have to happen to make this apparatus really useful?

ELIAS : It is quite conceivable that every negative entity within the spiritual realm has the means to create utter panic on Earth, especially if *catastrophes are announced*. We await any further development of this apparatus with mixed feelings.

- *What is of importance is that man realises that his soul continues to exist fully conscious.*

But if people are in a position to have access to a deceased person via a kind of telephone, it is probably inevitable that they will *unconditionally believe everything that* they are told. Therein lies the crux of the matter *we* fear the most.

The whole affair has to be carried out in a *dignified manner*. The belief in the GOOD and POSITIVE *must have priority!* When all is said and done, the success of this apparatus depends on HARMONY.

Question : Can MESSENGERS of LIGHT interrupt this negative chain of events?

ELIAS : *It is only possible with your support, never alone.* - If scientists take advantage of the experiences of good spiritualists, they'll know then how to talk to *good OTHERWORLDLY!*

Question : Is the psycho-phone supervised by higher INTELLIGENCES on the other side?

AREDOS: These apparatuses are so much in demand that it's impossible to supervise them. The lower spheres hustle and bustle around the psycho-phones.

Question : (1972) A technological procedure has been developed with the psycho-phone, that virtually *excludes* psychic ability and makes it possible for the otherworldly to communicate with the secular. Do you agree with this statement?

AREDOS: This technological development doesn't *exclude* psychic ability! To successfully record something on tape still requires a medium.

- Where psychic ability *isn't adequate* enough, there won't be any successes!

But the very best technology doesn't bring any results if it's *incorrectly managed*. It's very important just *how* one corresponds with the hereafter. Spiritual LAWS *must* be obeyed; you are familiar with those! It is quite obvious that up to now (1972), the voice experiments have not transcended the level of profane house and garden spiritism. Hoaxing and lying spirits wreak havoc.

Question : (1974) How far advanced are the successes of these psycho-phones?

AREDOS: The development of the psycho-phone is still in its infancy. To receive *irreproachable answers* from the hereafter will not be so readily achieved. This apparatus has only managed to contact the lower, negative spheres up to the now.

- But there are a lot of thoughts from the experimenters and the listeners *intermingled*.

The thoughts of the otherworldly are interestingly enough of the same FREQUENCY as the thoughts of those living on Earth. There exists a mixture that one finds quite difficult

to deal with. The major mistake the experimenters make is that they *believe any nonsense*, if it comes from the psycho-phone.

- But the psycho-phone can certainly *verify* that a spiritual realm, where the departed souls live, exists. There can be no argument brought against this evidence!

Question : Would it be possible to receive voices from the spiritual world on our highly qualified tape recorder?

ELIAS : I would advice against it. You would only come up with negative results. To do it properly, *an amplifier* would have to be *connected in series* to the apparatus. But it would defeat any purpose to go and buy an amplifier. As far as the TRUTH is concerned, the connection we maintain here is the best.

Interjection: One is continuously looking for *absolutely irrefutable* evidence that the human soul survives. But the psycho-phone actually provides such evidence.

ELIAS : It certainly establishes that thoughts are *not something physical* and that they can be *transmitted* from person to person. Thoughts can also be transmitted from spirit to spirit and from spirit to man. Those on this side and the other side are *always* in close contact with one another. On hand of this knowledge there *shouldn't* be any *mourning* the bereaved in the first place, and in the second place *the conscience* of those here on Earth *is activated*. His conclusion therefore is: Maybe I didn't *act correctly*.

Today's human beings on Earth are *unfortunately not mature enough* for a *direct* contact with the thoughts of the spiritual realm. But the SANTINER (a hyper-civilisation from the constellation Alpha Centaury) are far superior in this respect, this explains their great advancement. -

- *Direct* contact between this side and the other side unfortunately leads to insanity in human beings most of the time. This fact is due to *spiritual underdevelopment*. Wars *verify* this situation!

Question : One of our female readers writes: GOD *is everywhere* and *knows everything*, one should therefore be able to find out *everything*, if it's *positive*. Is this reader correct?

Answer : *We are not GOD!* - And I'm aware that GOD really has *other* FUNCTIONS then to satisfy the curiosity of man. This has nothing to do with the capability of the medium.

But you can see that the word spiritualist gives no guarantees. This denotation is no identity card! You know from experience that the doors to the spheres can only be opened *one by one*. During the last twenty years you have progressed from one door to another. We have dutifully guided you in your endeavours.

The exploration of the spiritual realm (By Herbert Viktor Speer, December 1971)

The exploration of the hereafter doesn't just involve contact with departed people one would like to speak to once more, but the exploration of the unknown world of the forth dimension, where everyone will end up one day, without exception. We are dealing with one of our LIVING SPHERES here.

- *Logical deliberation must make it very obvious to everyone that this exploration is much more important than the exploration of the moon, which is not a living sphere for mankind.*

This fact alone makes it quite clear just *how varied* man's life-mission is rated.

We are convinced that we would never have gained our present level of knowledge if we had questioned the dead. We categorically reject this type of questioning; even thou it attracts the greatest interest. We have found out that *no certainty of genuineness* can be guaranteed when questioning the dead, respectively when in contact with departed souls. Even if so-called CONTROL SPIRITS announce themselves, entities of the lower regions can pretend to be the one's one is looking for. Spiritists insist that one can demand a verification of identity. We have tried this with the result that the demanded verification was *very cleverly falsified*. The bible might just have a point when we read that one *shouldn't* communicate with the dead. -

To whom in the hereafter should one turn to; they're all physically dead?

- The aim of making contact must *not* be to gain personal benefits.
- INDOCTRINATION benefiting *everybody* must be one's the *first* priority!
- CHRIST also always wanted indoctrination *for everybody*. This was also the means that opened the heavens for *him*.

Confession obstructs this aspiration; this Church dogma can influence the logic that is absolutely essential. One has to be open-minded and start *at the very beginning*, declaring one's readiness to learn from scratch.

We have amassed a lot of experience in the last 20 years, giving us the knowledge to ascertain exactly how our otherworldly TEACHERS like to proceed. Our TEACHERS don't force anything on us, they also don't just talk and talk, but only answer our questions. These questions are answered very elaborately and conscientiously. But as soon as we expect from the otherworldly spirit something of his own accord, the LEADER draws a large question mark with the hand of the medium, indicating to us that we should ask our questions.

This method is exceptionally effective and should actually be applied more often when teaching anything. If the students had more opportunities to direct their questions at the teacher and if these questions would be correctly and appropriately answered, it would constitute an absolutely correct way to conduct classes, something all the students would accept willingly. Any other way of conducting classes can naturally be applied besides this. But lessons conducted under the "questions and answers" principle is still the best method to educate people.

Our otherworldly LEADERS have always tried to offer us lessons in morality in the past. Even whilst all our themes, problems and questions were being dealt with, moral education always played an important role. We were able to learn a lot about courtesy, decency and justice from them. But we also become very aware that our sphere of existence lacks a lot in this respect.

- *Researching the hereafter is not just interesting, but unprecedentedly educational and satisfying; it turns everyone into a better person.*

The exploration of the spiritual realm (By Herbert Viktor Speer, February, 1965)

We have always found that a *pronounced devoutness* hinders spiritual investigation - yes, it could even represent a danger. We can approach the spiritual world with LOVE and respect, but absolute gesticulations of devoutness constitutes a cultic exaggeration to the spiritual world. Friendship and sincerity represent a higher level compared to devoutness. It all depends on whether it comes from the heart.

We also found out that CHRIST actually has a *leading part* to play in the spiritual realm. One can certainly make contact with the spiritual realm without CHRIST. But *foremost* SPIRITS, heavily involved in our development, come from a sphere that has definitely something to do with CHRIST. This doesn't necessarily mean that we have to conduct all our contacts through CHRIST.

- It suffices to recognise that GOD has a dependable DEPUTY by the name of CHRIST who has his MISSION to fulfil.
- Those so-called MESSENGERS of LIGHT are TEACHERS *trained* in the spiritual realm, *allocated* to circles that are open-minded and willing to work.
- It has been proven that names are of *no importance*, because *only the INDOCTRINATION is relevant*.

If for instance an ARCHANGEL should announce himself by his name, his identity would be absolutely *unverifiable*. It has never happened in all of our thousands of séances that someone from the other side announced himself as an ARCHANGEL. But one can certainly regard the spiritual TEACHERS as ANGELS, because they come from higher spheres.

- *Overestimation of self is very dangerous!*

There are working circles that are easily led astray. Their mediums allegedly have *direct contact* with CHRIST or an ARCHANGEL or in a lot of cases even with GOD! Based on our extensive and intensive research into this field of knowledge, we consider these kinds of assertions *impossible* and *harmful* in regards to the TRUTH. Lower spheres of the spiritual realm are in close proximity to Earth. It is therefore *a lot easier* to make contact with entities *from* that sphere than with INTELLIGENCES from *higher* DOMAINS.

If someone from the other side *claims to act in the name of CHRIST*, he definitely wants to play an extraordinary role. He wants to *be taken serious* by the circle participants. This is the pinnacle of self-aggrandisement and also blasphemy. Most circle participants don't realise that they *conjointly* blaspheme with these otherworldly entities. It makes them feel like "chosen ones" and this flatters their egotistic cravings; they consider themselves to be good people.

We have always maintained an attitude *that we are students that don't know their own flaws and are in need of instructions*. We are now at a stage where we are able to recognise the position of an otherworldly entity in the scheme of things. A MESSENGER of LIGHT doesn't talk with biblical rapture. He adapts precisely to the tone we set with our questions. It is therefore an error to assume that a MESSENGER of LIGHT must be omniscient. He can only tell something about an Earth dweller that he really knows and to do so he has to know him very well. For this reason a MESSENGER of LIGHT can only make comments about a circle participant, at the most about his etiquette, but not about far off, unknown people, he's never seen face to face.

- *Dealing with otherworldly heralds very clearly that there is an enormous battle between GOOD and evil is raging in the spiritual realm.*
- The hereafter is certainly not an eternal resting place, but a world of a *different* SUBSTANCE, it is in its structure *very similar* to ours. One finds practically everything there that we have here on Earth. But everything there comes into being *through willpower*.

Questions and answers (Protocol extracts, October 1966)

Question : Has a GUARDIAN ANGEL really the power to protect its protege?

Answer : In all the years I've been co-operating with your world, I have never met anyone who could say to me: "Well, these are certainly lovely indoctrinations you bring, I've tried them out but I'm *still* hungry, thirsty and defenceless." - No, I've never met any spiritualists like that.

- *I'm absolutely certain that the power of the spirit can do its work where perfect loyalty and faith rules; but not blind faith but faith based on solid KNOWLEDGE.*
- *We do our best work where we find peace and receptiveness and where the atmosphere is not disturbed by excitement and fanaticism.*

A difficult problem has to be solved and *it can be solved*; many in this world have already proven this. This applies to all of you.

If you give me permission, I can guide you and prevent any real harm from touching you. Without boasting, I may say that I have guided you and given you specific PROTECTION in the past. You can contribute to this by spreading a positive atmosphere *around you*.

- *We can only do our work if you create the right conditions!*

You are our hands then we can't use ours in your world. We can only express ourselves through the things *you place at our disposal*.

We like to co-operate with you, but *not give you orders*. Nobody is pushed away and nobody is going to be dominated. Nobody can ask *us for* anything because we *don't ask anything of you*, we allow you to exercise your free will and your self-determination.

All we ask of you is:

- *Meet us half way and we will rush towards you more than half way. - Co-operation is the LAW.*

We always present the same old TRUTH, only in a variety of forms, so everybody can understand it. The TRUTH however *stays the same*; then TRUTH cannot be altered, TRUTH remains TRUTH.

Some more advice:

- *Never look back!* - To regret something that might have been is futile.

The task of the past was to sow the seed for today, they should help to sow the seed of the present, that it might blossom and flourish tomorrow. Live in the present and draw from the *present* life *the maturity* and abundance that can be yours, if you allow yourself to be influenced by the POWER that is around you and within you.

We don't just want to teach you how to die, but also how you *should live!*

If you *live decently*, you will also *die decently*.

But you must *live first!*

Question : Is your contact with higher ENTITIES interrupted because *you come to see us?*

Answer : Yes, but there is some compensation. *I learn from you.* I see the world through *your* eyes and *your* mind.

I have removed myself far way from the SOURCES of my stimulation, but I can regain it again when I leave this world you live in for a short time.

I'm neither infallible nor omniscient. I can transmit eternal KNOWLEDGE, the TRUTH'S nobody can tarnish, but only to a certain degree. I can also show you the radiant ideals of the SPIRIT and the sparkling jewels of KNOWLEDGE, which surpass all of your earthly values.

They are eternal words, standing the test of time.

- *Accept these wisdoms, they will be precious to you - way beyond death!*

The exploration of the spiritual realm (By Herbert Viktor Speer, March 1971)

Occultists and spiritualists are often very angry with negative scientists, because they *don't take* occult findings *serious*, but *often mock them*. We therefore ask the question of how should we deal with these scientists? Should we just ignore them? Our spiritual teacher ARGUN answers this question as follows: "It all depends on individual circumstances."

Scientists are not stupid, even if they *look down* on SPIRITUALISM and phenomenon. Scientists are educated and programmed at universities to deal with *known* objects only. They must be able to experiment and achieve the same results every time. They can then draw their conclusions from these. Spiritual intelligence (soul) is, according to scientific knowledge, *not an object*. Even when materialisations are taking place, the materialised object remains a part of the medium, then the ethereal substance eventually retracts back into the body of the medium.

- Transcendental phenomenon appear *spontaneously* most of the time, it is therefore very difficult to repeat such a phenomenon.

The laws applying to SPIRITUALISM are actually *very closely related* to the Christian or at least with the theistic view of the world. This relationship *perturbs* the scientist, because he never intended to prove the authenticity of the phenomenon from the start, but on the contrary - *to refute it!*

- *The relationship between this side and the other side is so disturbed under these conditions, that even the best mediums fail. Mediums are no guinea pigs, they are mediators between GOD, HIS HIERARCHY and the people on Earth. If you're not aligned with the right side, success is not forthcoming.*

CHRIST grappled with this question also. In his parable about the rich man and poor Lazarus it states: "If someone was to rise from the dead and go to them, then they would turn from their sins." But Abraham said: "If they will not listen to Moses and the prophets, they will not be convinced even if someone were to rise from the dead." This is the reason why the most important success is mainly reserved for Christian SPIRITUALISM.

- He who wants to explore this subject will have to make the effort to *adjust* to the demands of the spiritual world. If he doesn't do so and *only demands proof*, he opens the door to the lower spheres, which in turn will attack and lie to him.

We naturally understand that scientists *have to be* sceptical; because some of the psychic messages that are sent to us, defy description. The most negative people, full of hatred and vulgarities maintain that they're "chosen by God".

Our experience, going back decades, tells us that there are *actually no chosen ones at all*. People have their freedom and self-determination, they *can* act as mediums, train as mediums or *not*.

- *GOD has never chosen a person. - But someone can feel a compulsion to dedicate himself to this MISSION.*

Even a negative person can have psychic abilities. Evil powers will *make use* of his abilities most of the time, but he can choose to turn to positive SPIRITS and thereby *improve* himself.

Even if someone has occult experiences that make such an impression on him that he becomes active on behalf of the spiritual realm, it doesn't necessarily follow *that he's a chosen one!* But if he *believes* that he is, he'll wipe out all his positive relations with the SPIRITUAL WORLD and will only remain a tool in the hands of the antagonist.

The exploration of the spiritual realm (By Herbert Viktor Speer, August 1969)

The question of security plays an important part with séances. There are circles that place great importance in impressive names. These fastidious participants are not satisfied with simple MONASTIC NAMES; they want to speak to JESUS CHRIST or an ARCHANGEL. Others set great store in famous names like Napoleon, Einstein and others. This is pure delight for the so-called hoaxing spirits, which are very adept in pretending to be the desired person. There is no control, because fanaticism and vanity forestalls any. All the *really good* circles therefore renounce any such dubious contacts.

It makes no difference whatsoever what name the otherworldly uses. The message is and remains the important thing. These messages *must* maintain the same in their portrayal of brotherly love!

Pious nonsense or illogical, fantastic promises *prove* that one is dealing with *lower* spirits. It happens a lot that the otherworldly actually *force their attention* on you, when trying to get their message across, but it soon becomes very clear that these messages are really very dogmatic.

- *The best control one can have is long term experience and co-operation with the otherworldly TEACHERS.*

The medium is of great importance also!

Experience tells us that a medium works better if only a *few* otherworldly are in a position to utilise it. Our mediums have their special LEADER, one they have communicated with for years. It is now impossible that another LEADER can write through the medium. ARGUN for instance writes very well with the medium Monika, but it would be impossible now that he could write with another medium. It's worth mentioning that the SPIRITUAL LEADER ELIAS writes with the medium Uwe, whilst Monika fails to work with him.

Once a proper SHIELD has been created, it isn't easily destroyed. If an unfamiliar spirit would sneak in, the whole séance would collapse due to this interference. The medium is so highly sensitive and experienced, that something akin to an allergy would manifest. But all of this is something that is based on long term and successful practice.

Those MESSAGES we provide with a name, full guarantee for their genuineness is given, because they are validated by many other characteristics. COMMUNICATIONS we provide with a simple "answer", originate from excellent SPIRITUAL LEADERS of world-renowned circles, which are aligned with us. But if someone should suffer under the illusion that an unfamiliar spirit could break through the SHIELD, he's mistaken. The co-operation between the spirit and the medium is such a complicated affair, that the medium would know immediately that something was amiss.

But it's a completely different kettle of fish if the circle made a *false* contact *right from the start* and then insists to *sticking* with it. It's well nigh impossible to find a way out of this devilish circle in a case like this. There are innumerable circles that just work away without a care in the world. *The sensational is the decisive factor* for these circle participants; they're not even aware that they perpetrate a blasphemy.

Some occultist have claimed that there is a very reliable control available, namely to have the spirit pledge an oath, verifying that he's acting in a DIVINE MANNER. Apart from that he would always have to start the proceedings with a GREETINGS IN THE NAME OF GOD. But our extensive experience has shown that dishonourable spirits commit *any type of perjury*.

- The more *honourable* and *high principled* the participants are, the better the connection!⁷

Questions and answers

Question : (1960) How can we recognise a psychic message as *genuine*?

AREDOS: • GOD speaks a *clear* language, understandable to the most simplest of person.

7 EACH TO HIS OWN says a UNIVERSAL LAW. – If you read these protocols under these conditions, you can easily recognise what spiritual child is hiding behind the messages. Apart from that one can also ascertain it from the quality of the participants and the quality of the medium. Every reader searching for the TRUTH, should absolutely observe this interconnectedness.

- GOD *doesn't* speak in symbols and *doesn't* speak a scholastic language.
- His MESSENGERS of LIGHT also follow his HIS EXAMPLE, but simplistic parables are acceptable.

Question : Why do so many scientists make such a fuss when it's about accepting a transcendental phenomenon?

AREDOS : If atheists and those doubting GOD want to investigate such phenomenon or mediums, one can say: The devil should give his judgment on the actions of divine POWER. What can one expect? - Do you ask a murderer's opinion of an ANGEL?

Question : (1972) Why is it that Professor Bender, with all the opportunities for research at his disposal, *still* has an animistic behaviour pattern?

AREDOS : These scientists would like to *keep* their academic status, a status they *owe* to animism. Their mission is: "If they can, they should prove to the SPIRITUALISTS that they are *in the wrong* and that they let themselves be *duped*."

- *The closer a researcher comes to the TRUTH, the closer he inevitably comes to GOD. But this is not the aim of the scientific fraternity; the existence of GOD should not in any way be verified.*
- *If the existence of the sun were the absolute proof for the POWER of GOD, one would also disown the sun or one would invent some ridiculous explanation for its existence.*

One can certainly deny or talk out of existence anything, but if someone will believe it, is another thing. But when the craziest definitions come from scientific, respectively academic quarters, it naturally gives the "truth" their "stamp of approval".

Question : Relatively speaking, most extrasensory messages are falsified. Our messages have also been falsified; our psychic drawings also. Why can't the spiritual realm exercise control over the messages transmitted through the mediums?

AREDOS : Circles are also created in the spiritual realm. But it *isn't easy to enter* one of these circles. This is why a higher AUTHORITY can't monitor them. To add to the picture, there are those individual mediums on Earth, which work without any PROTECTION.

- PROTECTION is *always necessary*, if the messages are to have any *merit*! But creating this PROTECTION often takes *years*. But for most mediums (sometimes the circle participants also) this is too long.

Question : Church elders warn us about spiritism by spreading the rumors that it's linked with the devil. Many people believe them and are therefore not interested in SPIRITUALISM either. How can one change their mind?

AREDOS : These Church elders are *prisoners of their directives*. They're not allowed an opinion. But their mind would have to tell them that there are always *two sides* to everything and also *two possibilities*. If a devil exists one can come into contact with, there must also be a GOD one can also come into contact with. If there are demons one can converse with in the hereafter, there must naturally also be ANGELS one can converse with.

It is actually a lot easier to make contact with the devil than with a MESSENGER of LIGHT. But if the Churches had negative experiences, they didn't make any progress in regards to SPIRITUALISM and naturally this has its reasons, as we have quite often explained before. The holy bible states: "Knock and doors will open." You shouldn't knock on the wrong door though, as most are apt to do.

Question : (1967) It there a *crucial characteristics*, whereby one can recognise a *genuine* communication with hereafter?

AREDOS: Yes, absolutely. A lot of time it's purely a lot of *hogwash* or *religious romanticising*. We don't consider these as genuine even if they originate from the other side. Truly *genuine* MESSAGES originate from *authorised*, that is to say, from trained MESSENGERS of LIGHT from lofty SPHERES.

- One can recognise these MESSAGES straight way *by the indoctrination* contained in them. MESSAGES without a *momentous* INDOCTRINATION shouldn't be classified as otherworldly (positive).⁸
- In regards to trance speaking, one can recognise the genuineness *also by the DOCTRINE*, that is to say, by the indoctrination of behaviour for instance and about what they can expect in the future.

With trance speaking, there usually is no full stop at the end of a sentence. Nearly all sentences are a jumble. This happens due the different speediness of thought between the medium and the COMMUNICATOR.

- *An otherworldly entity thinks a lot faster than an earthling does.*

The exploration of the spiritual realm (By Herbert Viktor Speer, May 1970)

If one were asked to judge whether spiritual contacts are difficult or easy to establish, the following would have to be said about this: It's possible for *everybody* to make such contacts. It all depends on *patience*, an *interest* in it and *proper training*. To make a comparison with something else, it's like riding a bike: Once we worked out how to do it, the confidence to write a bike grows.

- But it's a lot harder to *make solid and dependable* CONTACT.
- It is even harder to *establish* a FRIENDSHIP with someone from the hereafter.

Concerning such a FRIENDSHIP, it is very important and in respect to the TRUTH, it's most important. A FRIENDSHIP with a FRIEND from the hereafter can last for years. Our FRIENDSHIP with the MESSENGERS of LIGHT started in 1952. They were *faithful*, *honest* and *dependable* though all these years. Taking into consideration that the spiritual realm is very diverse, their punctuality is *exemplary*.

- *We are surrounded by entities that are similar to us.*

⁸ This is another one of those meaningful answers one should absolutely try to remember when reading these protocols and messages from the hereafter.

There is a common interest between the secular and the hereafter. If we make contact with undesirable entities, we have to look for the reason *in our own conduct*.

But it's particularly appalling if we *insult* or don't *take* the otherworldly entities *serious*. They don't tolerate such an insult. The lower spirits always try to take revenge. A lot of times they succeed. The end result could be a visit to a lunatic asylum.

- *If one makes CONTACT with positive SPIRITS and if one accepts their INDOCTRINATIONS, one has comparatively speaking nothing to fear.*

We have amassed a lot of experience. We not only observed the circle participants during thousands of séances, but also got to know the otherworldly. We made a few mistakes and had to redefine our position accordingly.

The conclusions therefore are:

- A circle may be *ever so good*, but it will be absolutely reprobated if it *allows visitors*. Even if the visitors insist that they are well versed in the subject, it won't make a difference.
- A participant may have taken part at all the séances in the past and he might *still* not have *learned anything*, because he's unwilling to *combat his deficiencies*. He remained the same! - One or more people may be *dragged along*, but it will *always be* an impediment, if the whole circle isn't up to scratch.

It is therefore quite understandable that circles will put up *barriers*, stopping any others from joining the circle. It's not that the circle has anything to hide. It's certainly nothing to do with fraud or with questionable activities of a superstitious cult. These are pure and simple warranted *safety measures*.

The result of this is that all visitors hoping to join the circle on a permanent basis feel affronted or mortified. A lot of times these circles call themselves a "secret society" or "secret science". But there is actually nothing secret about it, only a desire to remain *detached*.

We have had the experience that rejected people have *subsequently* written quite *nasty* letters. This was proof enough for us that we acted correctly, when trying to keep our circle untainted.

The exploration of the spiritual realm (By Herbert Viktor Speer, August 1974)

SPIRITUALISM is more widely spread than most people are aware. There are spiritual groups attempting spiritual contacts in almost all countries on Earth. But unfortunately there are a lot of mistakes made, so that the results are generally pretty modest. But there are internationally formulated guidelines that enjoy universal validity.

The following is an otherworldly DIRECTIVE, of just how a group is to be established:

- You must assemble *sensible* and *even-tempered* people, well intended on undertaking scientific experiments and unlikely to fall prey to silly sentimentalism, people that won't consider the whole thing as a game. The results will show that a group *made up of women and men in equal numbers* brings better results than a group of *only* women or *only* men.

- *Keep undisciplined enthusiast away*, they don't possess the calmness necessary for good experiments.
- *Also keep egotists away*, because they are only occupied with their *own* affairs and are promptly discontented, if they don't receive *personal* messages. These people *ruin* the meetings!
- Your groups ought to be composed of people with an *unselfish* attitude and of people who only see that in the experiments, which *is of value to the general public* and not that, which gives them *personal* pleasures!
- Once a group has been assembled, *a time and place for the meetings has to be established*; if at all possible, the location for the meetings should be situated in a *clean* environment and the meetings should take place on a *regular* basis.
- Nobody should have permission to enter the room *whilst the meeting is in progress*.
- *Before the meeting starts*, all personal prejudice has to be put aside, If your soul is not at rest, *you'll disturb* the proceedings.
- You have to observe *silently* and keep *all private conversation to a minimum*, because it inhibits the spirits.
- The temperament of the French often disturbs their meetings, whilst in England good results are achieved, because the task is approached in a *sober* manner. Apart from that, the English respect the authority of the spiritual LEADERS of the group absolutely and follow the rules that have been set for the common interest.
- But the Germans don't pay any attention to the rules, they lack a spirit of conformity and waste a lot of time with discussions, time better utilised with regular and careful experiments. They go to the meetings full of enthusiasm but are then *easily discouraged* and treat the whole thing as a joke or just give up on their endeavours. The very best mediums are ineffective under these circumstances.
- One generally seems to be of the opinion that psychic ability is a gift and that the person with this gift should place their capability at the disposal of other people *free of charge*. But one should take into consideration that the medium is prevented from gainful activities by exercising their talents. It is therefore only proper that one pays for their services. Eloquence is also a gift, so you pay your lawyers for their services. A beautiful voice is also a gift, so you pay the singer. The talent of an artist and the skills of a craftsman are also gifts. What happens if you pay the medium but there is no result? - You still have to pay for a lawsuit even if you lose.

Questions and answers

Question : (1972) Why are even *humble* mediums lied to by *hoaxing spirits*?

AREDOS: He who demonstrates his humility *in public* is unimaginably *vain* and *egotistical*. He wants to be publicly recognised and praised. His alleged humility is just a cover, hardly covering his sinfulness. But the hereafter sees everything! These apostles of humility are well-known for their ability to fast, thereby giving their acting even more impetus.

The lying spirits recognise these weaknesses and address these mediums with flattery, for instance: “My dear child, chosen by GOD!”. - They’re immediately taken in by this flattery and experience a hallelujah euphoria and from then on they believe the greatest nonsense, as long as it sounds good and contains pious rhetoric.

This is the reason why there are very few good mediums; an adequate medium *maintains* a cool and objective mind. It is therefore imperative that such a medium has a faithful supervisor, namely an experienced circle leader, who’ll protect the medium from erroneous developments and who’ll makes sure that it isn’t drawn into a circle of negative spirits.

Positive messages contain very little devoutness; they are *objective* and *informative*. But there are unfortunately a lot of people who’ll only listen to pious words, whilst any practicality annoys them. These people were programmed by the Church to be like this and it’s truly better for them that they stick with the bible, even if it’s not altogether correct.

- *The worst is surely a false impression of what GOD really represents, something the sciences also fall prey to.*

If talk is about GOD, you must re-educate yourselves so that you don’t behold him as a single person that knows everything and sees everything. GOD for you is an unimaginable ORGANIZATION of CO-WORKERS. Mankind on Earth is also part of this; it is also *a part of* GOD.

If you direct a prayer at GOD, HE will not hear it, because HE has different and more important FUNCTIONS to perform. But your GUARDIAN ANGEL, he’ll hear you, even if the prayer is only in your mind. He can contact other CO-WORKERS to discuss with them what is to be done. But the antagonist of GOD often prevents any help from getting through.

Besides, the spiritual realm is *not accountable for material problems*, this matter belongs solely to mankind on Earth. As I said before: Mankind on Earth is also a part of GOD and it has its own task to perform.

You will now reply that within this divine mankind, some very antagonistic elements are to be found, *endeavouring to create chaos*. To this I will say that the origin of mankind will not be changed because of it. Many people have fallen by the wayside, some were mislead, negatively influenced or forced to do wrong. But the way to GOD isn’t obstructed; it is there for *every* person, for *every* soul. But it is a question of time. But as people *often return to a life on Earth*, until they’ve found and walk the right path, it doesn’t really matter.

- *You can reduce your reincarnations, if you want to.*

But if someone behaves negatively and *wants to remain negative*, he’ll sink *deeper*, he will then be *forcefully* reincarnated and will start his education anew from the first grade. Negative people unfortunately believe that everything comes to an end after death. Therefore the proverb: “After me the deluge”.

Question : (1963) There seemed to be a lot of cases where even otherworldly reject incarnation. How is this possible if it's a substantiated fact?

AREDOS: Those on the other side are also human beings with their *own* opinion. Those that reject reincarnation have not had the opportunity to familiarise themselves in more detail with this phenomenon. They don't believe in it because they have not enough information about it. One tends to believe what one considers to be correct even in the hereafter, whether it's true or not.

Question : This would mean that we could also be subjected to many a mistake. What are our guarantees that all answers from the spiritual realm are actually correct?

AREDOS: The answers transmitted through our group here are *never the opinion of just one person*, but the results of a lot of experience and INDOCTRINATIONS from higher SPHERES.

Mistakes can certainly happen once in a while, but that's very rarely the case. We always endeavour *to correct* these mistakes, if there is no strong bias against it on your part. But if you remain open-minded, every mistake will be corrected accordingly.

Question : We often receive really outrageous reports from mediums and circles. Why can't the spiritual realm positively interfere here?

AREDOS: These particular announcements are an evil that affects the greatest religion that enjoys legitimate expression throughout the universe.

- But consider this for a moment, the souls involved in these announcements are *as dumb and fanatical* as their mediums and circle members.

Most of the time it's a great *craving for recognition* of alleged chosen ones, which vastly overestimate themselves. They lack the logic of true humility.

Question : What is the best way to recognise whether an otherworldly communication is true or false?

AREDOS: With your logic of course. But logic also needs experience and training. This is the object of our INDOCTRINATIONS. You have already learned a lot from us; you say yourself that you find some of the communications from other sources outrageous - this indicates that you can already judge for yourselves!

Question : Are there guidelines for the less advanced seekers of truth?

AREDOS: You have to be aware of the following:

- *Demons never herald a disaster, but act surprised. An announced disaster is always a lie. The divine REALM never ever plans any disasters for mankind and therefore cannot herald any either.*

- *GOD or HIS REALM never use disasters whereby people sustain damages as punishment, . GOD'S punishment is something entirely different; it redeems people even if it causes mental anguish.*
- *If a communication from the spiritual realm contains a threat, it is not true. But if a warning is given, because people evoke a self-inflicted disaster by their behaviour, this warning is true if it's given with LOVE.*

The exploration of the spiritual realm (By Herbert Viktor Speer, February, 1974)

The spiritual realm is a part of all of our lives. The spiritual realm is not a land of sleep, but is experienced *consciously* and offers superlative opportunities, beyond imagination.

- Spiritual contact is the only opportunity to gain *knowledge* and *orientation* about the regions of the spirit.

It's unfortunate that up to now a lot of grave mistakes have been made so that many psychic circles and individual mediums could be misused. This misuse *isn't just* initiated by the mistakes of the circle participants, but also through the co-actions of otherworldly thought carriers (spiritual entities). There are even today some quite famous mediums, having transmitted excellent messages over many years, which suddenly, *without anybody noticing it*, produced some nonsense that was accepted as bare facts.

- This certainly applies when the leaders or circle participants *don't try to improve themselves*, but only collect the messages in the belief that they *only apply to others*.
- One single member of a circle can sabotage the whole psychic work in this way! It is most important that the abnegator is recognised and *removed* from the circle in time in a case like that, before improper spirits dislodge the LEADERSHIP and *pretend to be* the former LEADERS. One single member of a circle can destroy the work of decades in an instant, and the damage done cannot be reversed.

If the spirit in question wishes to explain certain complicated facts, for instance the spiritual constitution of man and if he wishes to develop ideas that people aren't generally likely to believe, he has to overcome nearly unsurmountable difficulties and the message is thereby inadequately transmitted and distorted.

- In regards to style, the most talented poet will *only receive a plain compilation of words* through a medium *without culture!*

A GUIDING SPIRIT from the hereafter reports:

- *"We have to overcome terrible obstacles if we have to use an unfamiliar body as a medium, if the medium is in a trance for instance. If often happens that we have to partially forfeit some of our precious abilities and it gives us great pains when we try to express an idea that we don't recognise after because of the way the medium has transmitted it. - The spirit is handicapped when the physical body interferes".*

- Let's assume that a member of the circle *contradicts* the messages from the GUIDING SPIRIT, doing so he disturbs the whole contact to such a degree that evil spirits or other pathological thought bearers lurking, *immediately* gain control because the LAW of HARMONY was ignored.

Another case:

- Let's assume that a medium, brought up and influenced by *Church dogma*, receives a message through the GUIDING SPIRIT that *doesn't concur* with the Church dogma drummed into him, this would constitute an obstacle that couldn't be overcome.

If a medium *doesn't* believe in the existence of UFO's, the GUIDING SPIRIT finds it impossible to *negate* the attitude of the medium and the message that's forthcoming will bear the characteristics *of the medium*.

- *Only the greatest of open-mindedness by the medium guarantees the genuineness of the thought bearer that transmits a message.*
- *This is why the medium may never ask questions of his own, nor consciously acknowledge or think about the questions.*

To do good work in a circle is very hard because a circle has to create its own sphere. If the circle doesn't create a SPHERE around itself, it will be lied to according to all the rules of evil. But if a circle is successful in creating a *good* SPHERE, it will receive also *good* MESSAGES.

A medium - even if it's a good one - can hardly ever make a higher CONNECTION *on its own*. These mediums are led astray with flatteries like "good child", - "chosen as an instrument of God" etc.

- *Egotism and craving for recognition* are nearly *insurmountable obstacles* in regards to spiritual contact.
- A study group must *learn a lot* before it gains control. The antagonist attacks TRUTH and lies are propagated as "HIGH TRUTH".

Only years of experience and through *good teamwork* will it be possible for a selected group to gain solid control. This creates a BARRAGE against *negative* souls. Once this invisible SHIELD is activated, *peaceful thoughts, contentment and balance*, in short *harmony* reigns within the circle.

Pious carry-on makes no sense.

REVERENCE is certainly something else!

The exploration of the spiritual realm (By Herbert Viktor Speer, August 1975)

As soon as a group tries to make contact with otherworldly intelligence, two powerful forces become immediately apparent, unmistakably fighting one another. The powers of good and evil quickly enter the proceedings. But because evil often *cleverly camouflages* itself, many groups and mediums fall prey to demons.

- *But it's precisely the lower powers that confirm that there isn't just a "heaven" but also a "hell"!*

Novices in this field almost always want to make contact with deceased relatives and friends. But this is the same *questioning the dead* one is always warned about! It is not the way to progress. Questioning the dead should certainly be left alone. Once positive CONTACT has been established it can happen that otherworldly friends *make contact of their own accord*. But one shouldn't call them!

- Otherworldly SPIRITUAL GUIDES are not an *information service* about thefts and one's good fortune.
- The best results are achieved when questions relate to the common good for all of mankind!

SERVING mankind is a challenge that is always welcomed by positive spirits and where positive interest exists, one can always count on support.

Contact with the hereafter should only happen *twice a month*.

The exploration of the spiritual realm (By Herbert Viktor Speer, December 1974)

Without really wanting to, we made contact with *extra-terrestrials*, whilst exploring the spiritual realm. We were asked, by the scientific community also, just how such a contact is established. We have never seen an extra-terrestrial. But we did receive a couple of *drawn portraits* with the help of the medium. We also received *texts* that introduced us to the extra-terrestrials. The spiritual LEADER we are in constant contact with transmitted these texts to us.

The procedure is as follows:

During one spiritual séance the otherworldly SPIRITUAL GUIDE our medium works with, declared himself willing *to act as a translator for the SANTINER*. He *telepathically* receives the extra-terrestrial messages, translates it into our language and kinetically writes it down by hand. The SPIRIT GUIDE told us: "It feels as if I was sitting at the table writing with my own hand".

We have put the medium through tests and ascertained that the writings and the drawings are very accurate. The messages from the SANTINER are naturally extremely important and often quite sensational. We published the SANTINER messages in many brochures and some of them were translated into other languages. Contact with the crew of UFO's is therefore something *absolutely spiritual*. But if one doesn't know anything about the spiritual or if one *doubts it*, there is no explanation. Because of this thou we know that there is a hereafter and that there are people on other stars also who show an interest in us. We give them enough reasons to stay interested!

The medium doesn't do this work on a professional basis. For the last 22 years, the medium worked in a responsible position in a very active company, in the field of technology. This psychic service for mankind and the TRUTH was *honorary* and absolutely *voluntarily*.

But there are a lot of circles that are unaware that they're continuously duped. This is mainly due to the *behaviour of the circle participants*, which are not honest enough to *seriously* deal with the TRUTH. Personal interests dominate or it's a case of pious enthusiasm. But one shouldn't resent the

fact that they sometimes turn their psychic work into a “secret lodge”. The better and the more developed the participants are, the better will the contact with the spiritual spheres be.

When doing *research with a tape recorder* it is also imperative to know how one has to deal with the hereafter. Positive CONTACTS are only possible when harmony and LOVE reign. The otherworldly must also be convinced that the will for brotherly love is *genuine*.

- If there are *a lot* of people in a circle, the capacity *diminishes*. About *six* or *seven people* suffice.
- The circle could *even be smaller* if it's *well established*.
- One should do *without physical phenomenon* whenever possible, they take a lot of effort and are mainly articulate by negative otherworldly entities.
- Intelligent questions are preferred! SPIRITUAL GUIDES are interested in raising the level of mankind.
- Church religion is *less in demand*, because most of the time it's incorrect.
- Political questions are also *not desired*, because they immediately bring negative powers into play.

Questions and answers

Question : Can imperfect spirits use a good medium to a degree that major bogus messages are transmitted?

ELIAS : (1967) It is certainly possible to transmit *false* messages through a medium. Negative spirits for instance lead scientist astray, because scientists always need evidence. If they were told how much money they have in their pockets or whom they intend to meet later, they would be inclined to believe. *But this is exactly what the negative side wants to achieve*, they want to strengthen belief and trust first and then transmit the bogus messages. Scientists with a negative attitude (experts on warfare) can be exploited in this way. (Unstable spiritual circles also)

There are many, many mediums that are *unaware* of their psychic ability. But this is something else with circles, the created SHIELD and above all, years of experience play a big part.

- *Ethics must always be uppermost.*

I'm sure that it has also happened to you, you wanted to say something definite but suddenly express something completely different. This could have been a spiritual contact. When the FREQUENCY SETTINGS of the brain change, spiritual contact could eventuate immediately. This is the cause why many ill people are detained in asylums, because their FREQUENCIES are DISTURBED.

Question : I believe it possible that there are people who have studied your INDOCTRINATIONS very carefully, but in spite of their enormous KNOWLEDGE in this field, *remained exactly the same as always*?

ELIAS : They can only blame themselves for this. I know that people like that exist. But they still have the appropriate KNOWLEDGE. They actually have the key to the TRUTH in their hands. They can find their way out of this darkness with the help of this key one-day.

Question : Every now and then we allow guests into our circle. Can these guests have a detrimental influence on the contact?

ELIAS : A guest is naturally a foreign body, it doesn't matter whether he has a positive or negative attitude. This happens because every one of you *subconsciously* harbours mistrust and sends out defensive vibrations. Only once it has been established that the guest is *positive*, can harmony be guaranteed. Mistrust is naturally reinforced by negative experiences.

We are *certainly* placed into a difficult position.

Let's not talk about it.

The exploration of the spiritual realm (By Herbert Viktor Speer, January 1974)

Unfortunately there are limits to the exploration of the spiritual realm. It isn't possible for instance to find out everything that we would like to know and everything that is of great interest to us, from those on the other side. This gap present in the exploration of the hereafter is the fateful reason why science, respectively academics do not consider SPIRITUALISM to be *conclusive enough*.

We would like to answer this based on our past experiences:

Contact with otherworldly is *only possible* if certain conditions are *abided by*. The inexperienced forgets or doesn't know that the hereafter consists of two enormous sides, the bible knows them as "heaven" and "hell". These are not just terms with SPIRITUALISM, when making contact, they *unfold immediately* to their full extent.

As soon as the questions target the characteristic or religious betterment of people, the regions of GOOD and evil are *immediately spoken to*. A definitely visible spiritual battle takes place. Lower spirits, belonging to the lower spheres try *to disturb* the contact. This battle becomes obvious even with the simpler varieties of SPIRITUALISM. This is a special reason why the Churches forbid communications with "the dead". But the hereafter also has HEIGHTS and the Churches *therefore have no right* to do so. This ban is absolutely *one-sided!*

- SPIRITUALISM as the *higher* form of the exploration of the hereafter offers the opportunity to *overcome* the lower spheres and to make CONTACT, yes even establish a good, genuine FRIENDSHIP with higher SPIRITUAL ENTITIES. This connection represents a communication, which is mainly attuned to religious or moral INDOCTRINATION. SPIRITUALISM is a SUPER-RELIGION.

One can't for instance ask who was the thief, during these communications. Lower spirits answer this with lies and pure fantasies, or they engage in infamous mockery.

Higher SPIRITUAL ENTITIES, serving TRUTH, *reject these types of questions*, because they don't want to play the part of an informant or judge. The positive SPIRITUAL REALM doesn't tell on anyone. All similar type questions, which might *compromise* or *harm* someone are never answered. If it does happen, it will be the work of hoaxing and lying spirits.

The ever so clever sciences now say: "Well! If "ghosts" don't answer our questions or tell us some ridiculous nonsense, it is proof enough that the medium is a few cents short of a dollar. The reality is harsh enough.

One can also not continuously ask questions about politics; unless the otherworldly transmit something *on their own accord*. These questions always seem to attract evil spirits to the proceedings, they're also known as demons. A positive circle can disintegrate at a moment's notice if the SHIELD is breached because of these questions.

When the otherworldly *do* make a statement about political events, they recognise their limitations and will immediately end their discourse, if danger arises. We've experienced it often enough that the spiritual LEADER asked for the topic *to be changed*, because otherwise undesirable powers would present themselves.

Academics who are still unfamiliar with all of this *would like to experience something brilliant*. The otherworldly should absolutely dance to their tune. I still remember what someone once told me at a congress: "If I were in your shoes I would certainly put the squeeze on the otherworldly, believe you me." - These were the words of a theorist and not of a practical man!

The exploration of the spiritual realm (By Herbert Viktor Speer, November 1967)

SPIRITUALISM undoubtedly has to survive its *hardest* battles in scientific circles. All evidence is either tuned down or put on ice as a puzzle. During our explorations in co-operation with mediums and experts of the hereafter, we continue to look for the reasons of our failures. We have recorded only a few failures up to now, they happened mainly when we were still at the beginning.

How is it possible that a good and useful medium, making contact with a spirit when in a deep trance, could suddenly produce utter nonsense in conjunction with very good answers, we have ask ourselves. These occurrences are especially unwelcome, because they cause scientists to call the *whole* trance state an activity of the subconscious, and place a connection with a spirit in doubt. We have also worked with trance mediums and made our experiences. We were able to discuss our experiences with those otherworldly that were present later, on a different basis, that is to say, we conversed in writing.

This highlights the fact that:

- *A connection through trance is less reliable than a connection through automatic writing!*

When engaged in trance speaking, that is to say, when questions are answer through the mouth of the medium, there is still a *slight* connection to the subconscious of the medium. The subconscious of the medium controls the messages of the spirit giving these messages, in the background. The spirit therefore can't act *absolutely* independent, it may nor say anything the subconscious of the medium *can't condone*! Through this method, censorship comes into play, leading to contradictions within the messages.

- *This doesn't apply to good automatic writing. - It is therefore more reliable.*

To add to this we get a situation where inexperienced people assume that a spirit is something special, someone who because of his existence in supernatural spheres must of course be omniscient. Here we actually deal with a *gross error of judgment*. Souls in the hereafter can not only be dumb, but also extremely vicious. It's very odd that they commit superlative iniquities. With messages through a trance medium, the mistakes of the ignorant spirit can certainly come to the surface. This is why CHRIST warned us already by saying: "Test whether the spirits come from GOD!" To test the spirits in this respect is something that requires a lot of experience.

There are enough esoterics and spiritualists that *oversimplify the matter* by simply asking the spirit if he is from GOD. He must announce himself with "GREETINGS IN THE NAME OF GOD!". He must pledge a holy oath etc. -

All of this is only naive nonsense!

He who knows the hereafter to some extent also knows hell. All of these enumerable masses of spirits looking for entertainment here on our Earth are prepared *to commit any kind of blasphemy*, they actually experience a hellish pleasure in this. We have asked ourselves how such a superlative BLASPHEMY OF GOD is *actually* possible within these regions.

There is only one explanation:

- A vicious person, already an unclean spirit whilst on Earth, doesn't turn into a holy man straight away. But he's certainly tormented by hellish spirits of his own kind. But if he's willing to commit blasphemous acts on mankind, blaspheme GOD, lie and hoax, when he works on the side of Satan, he'll be released from specified torments. If he's a master of his trade, he will be spared.

Someone seeking the TRUTH can now just imagine how difficult it is to make a *permanent CONNECTION* with *genuine* MESSENGERS of LIGHT!

Questions and answers

Question : (1967) Do mediums always have to be in a kind of trance state?

Answer : As you can see, your medium is *never* in a trance, *in spite of that* our messages are *unclouded* and *unadulterated* . This is due to *years of practice* and co-operation. The medium must also be able to switch your world off, even if it's only for the duration of one single message.

It is certainly possible for LEADERS and CONTROLLERS to talk through instruments (mediums), *without* these having to be in a deep trance. The great advantage of trance is that the LEADER or the CONTROL over the medium is very much enhanced.

- *The more successful we are in switching off the conscience of the medium, the easier our task becomes.*

It is really immaterial for the LEADER or the CONTROL, whether the medium is in a trance, in spite of this.

Question : (1958) Why is it that there are often great discrepancies in psychic messages, which are then attacked by doubters and used to question the existence of the hereafter?

ARGUN : I'm sorry to have to say this, but it is mainly due to an *inner* and nearly unconscious *prejudice* by the medium. In cases like that, neither the spirit nor the medium is to blame for an answer that doesn't coincide exactly with the TRUTH.

Let's look at a message from a MESSENGER of LIGHT active in Switzerland for example.⁹ This MESSENGER of LIGHT and TEACHER is part of our sphere. This usually excellent medium, highly respected in the spiritual world, doesn't find it possible that physical life also exists on other planets. This medium is so influenced when reading certain messages, of which some important passages were also misinterpreted by people on Earth, that his own intellect *completely blocks* any message that is contrary to his own beliefs.

This is why I emphasise in all earnest:

- *You that are exploring and working in this field, guard against prejudice, as this proves to you once again of just how harmful it can be, if one is not 100 percent neutral during a meeting.*

We are powerless if the medium is not open-minded, for the moment we encounter the spiritual blockage of prejudice, our contact to the brain of the medium is interrupted, with the result that *it will become active* and will fill in any momentary lapses from its own subconscious. This spiritual blockage mainly happens when dealing with a trance medium, but it can also happen with a writing medium, if it is also intuitive at the same time.

- *The best security offers a fully automatic writing medium, because it has no idea of the contents of the message. This is the reason why we use the hand of the medium as fast as we can, taking the risk that the writing might hardly be deciphered.*

Prejudice or a dogmatic attitude by the medium is a disadvantage that creates a lot of problems for us. Herein lies a failure that is presented by negative theologians and all kinds of scientists to reject the spiritual world completely. This is why we urgently ask the circle members and the mediums to *apply and exercise complete open-mindedness*, then as long as we praise the circle participants, everything in in order, but blow me down, if we should *censure* them or *correct* a message from *another* circle, they will truly have a go at us, their TEACHERS.

Question : Why doesn't the spiritual realm correct these kinds of mistakes when they arise?

ARGUN : We *do try* to make these corrections, but we can only carry them out through a *different* medium, one *without* such a blockage.

- *This is how the variations come about!*

⁹ This refers to the "Geistige Loge Zürich. The MESSENGER of LIGHT JOSEF works there with a full-trance medium called Beatrice Brunner.

Only in very urgent cases can we decide to undertake such a correction, because we want to *avoid* any differentiations within the messages as much as possible, because the damage could become even greater. Contradictions are the greatest enemy of humanities, especially Church dogmas create the biggest problems for us, and they represent the greatest spiritual blockage.

- *But there are also mediums with a great craving for recognition and they don't tolerate any criticism. If one dares to reproach them or criticise their messages, they loose their self-control and immediately plummet down to the lower spheres where they will be misused.*
- *With increasing spiritual awareness, many circle participants behave simply deplorable, because they become intolerant toward any other circle and believe to be the sole custodians of the TRUTH.*

Question : (1965) How should we as circle participants behave so that we don't disturb the reception of the messages?

Answer : Every *preconceived* opinion constitutes an obstacle for the message.

Your assignment is to be ready to receive and not to bombard the atmosphere with imperious thoughts.

The more you concentrate on receiving an answer to a specific question *and only this particular question*, the more you block the whole TRANSMITTER. This TRANSMITTER can be used to communicate a lot, but this can only happen if it *is free* and not blocked by thoughts. *One single participant* can block it completely!

We can only reach you, if you're in a state of *sympathetic* and *receptive* anticipation, when you *open* the door to your heart and your soul and say: "I'm ready to receive something." But if you concentrate on a specific theme and *only* want to hear something about *it* and nothing else, it's inhibiting and you create great difficulties.¹⁰

ARGUN : (1962) GREETINGS IN THE NAME OF GOD and PEACE ACROSS ALL FRONTIERS! We have made a PLEDGE to only teach the absolute TRUTH. We are keeping this PLEDGE!

Question : Can the SPIRITUAL WORLD *prevent* wicked messages from the hereafter?

ARGUN : *No, we are powerless to do so*, unless we're dealing with a well established circle, with *adequate* protection. Spiritual nonsense is the greatest sacrilege; then the most precious human feelings are defrauded and disappointed. If people experience such a fraud, they'll never be able to belief in something good again.

¹⁰ Here the GUIDING SPIRIT give a plausible explanation of why the otherworldly very often avoid some questions. This brings about a erratic exchange of words. We have often observed that the communication becomes more fluent if the otherworldly GUIDE *selected the theme himself*. - This explanation is very, very important! Journalists, researchers, doctors etc. wanting to be convinced by the circle ask the questions and concentrate doggedly on the answer. They thereby block the séance. When an unexpected answer is forthcoming, they become discontent and distrustful. The rules must always be adhered to, even by researchers and interested parties inexperienced in SPIRITUALISM. This is the only way SPIRITUALISM can progress

Question : (1961) No person and no soul does anything specific *without advantage*. Can you tell us what advantage these negative souls gain, by appearing as hoaxing and lying spirits, so full of hate?

ARGUN : We ask ourselves the same question. But only a negative person can understand this, because advantage cannot be gained at all in this case, because they only hurt themselves. It's a case of not 'wanting to' and this is caused by a lack of knowledge.

Question : What are the conditions a connection with a high SPIRITUAL ENTITY demands?

Answer : It depends on the *purity of the participants*. But this on its own is not enough! The participants must be spiritually prepared and advanced by years of training, so that their VIBRATIONS *approximate* that of the higher SPHERES.

- *If there is just one incompatible guest or a beginner is amongst them, the whole contact with high SPIRITS can be disturbed immediately. One tiny little thought is enough!*

But this stops the *lower order* spirits from being very informative. These spiritual entities can only report on the things they know - but their knowledge is usually only on par with the knowledge most people on Earth possess. A higher SPIRIT has *superior KNOWLEDGE*, something every participant is immediately very impressed with.

There are spirits (souls) - that is, they don't like to be called spirits (ghosts), because this denotation has been discredited - who take great pleasure in hoaxing the circle participants. There are even intellectual souls amongst them who are very adept in doctoring their hoaxes in such a way that they become *quite believable*.

- *But the participants attitude is always to blame! Those circles do have continuous and genuine contacts, but they don't make any advances in their development. On the contrary - these circles are a disgrace to psycho-science! If they're censured, they become very aggressive and take revenge in some way.*

And then there are those *individual mediums*, working away *without* any build up SHIELD. A spirit can tell them for instance that he's the "good Lord". The individual medium goes into raptures and from then on believes the biggest nonsense, especially if they're worded in lovely prose or promises.

- *Scientific logic is no blasphemy; it is way above any theological phraseology!*

Question : (1958) There are mediums and circles that are seriously endeavouring to learn the TRUTH and to help their fellow man, but in spite of this, it happens all too often that they're subjected to unbelievable hoaxes. Why is it that *in spite* of their honest intentions they are still lied to, as is the case with a circle in Cologne for example?

ARGUN : Well, this is due to:

- an unsuitable SHIELD,
- an unfortunate arrangement of the *circle participants*
- and on the poor objective assessment by the *leader of the circle*.

We were not always in a position to provide sufficient protection. You always noticed it, when something just couldn't be correct and we mentioned it often enough that every now and then something is not correct, but we *always* corrected these mistakes.

Question : Why can't you accord PROTECTION to a *falsely* connected circle?

ARGUN : In a case like that, all our SECURITY MEASURES are *made ineffective*, because almost all participants and mediums are *arrogant*. If one *doubts* their messages, they become *aggressive*.

Question : Where will it lead, if a medium is affected in this way?

ARGUN : Purely physical output is still o.k. But if the medium *is addicted in any way or form*, it will be lied to and misused. But the question of what the circle's *intentions are* is much more important:

- Do the participants only want entertainment, sensations or INDOCTRINATION?
- Do they want to justify themselves or gain KNOWLEDGE?
- Sometimes they want to be duped by alleged "Archangels", because they feel so "superior".

Question : (1963) Should we only ask questions adapted to the *general* development of mankind?

ELIAS : You would have noticed by now that we discussed themes with you, which recently were *much more sophisticated* than at the beginning of our general INDOCTRINATION. This should be proof enough for you that you have already advanced spiritually.¹¹ It is a plus in your whole development. You wouldn't have understood a lot of things at the beginning. But now things are different. You are now able to really understand a lot of things. But unfortunately there are *not enough mediums* available and that is our great sorrow!

Question : Why is it that we don't always receive an adequate answer to some of our questions?

ELIAS : Above everything else TRUTH reigns where we are. Many questions are *closely related to a particular sphere*. We always teach what you're able to *comprehend correctly*, according to your level of development.

- *If we teach you a TRUTH you can't understand, we only achieve the exact opposite or your interest in our HELP diminishes.*

The soul may only advance step by step, one may not jump over one single step. The soul slowly begins to understand the things, which were impossible to grasp in the past. I was just about to talk about things, which can only be debated in very high SPHERES. You might have understood some of it, but certainly not all of it. Then again you might have misunderstood it completely and that could have done you a lot of damage!¹²

¹¹ The level of INDOCTRINATION is the measure to ascertain the quality of a working circle.

¹² H.V. Speer writes: Here ELIAS states very clearly that he's a TEACHER from higher SPHERES. ELIAS is our CONTROLLING SPIRIT, he shares the spiritual LEADERSHIP in conjunction with ARGUN. ELIAS's prophecy about the formation of the NATO troupes was published in the brochure "Occult Voices" (Die andere Welt) issue number 12 one year before it was realised. As always, ELIAS was right. The transcendental MESSAGE was received on October 26 1955, at 8:30 pm.

In the service of science (by Herbert Viktor Speer, October 1969)

Our experiences with guest mediums have unfortunately been unbelievably appalling, so that we have done without their services. Not because these mediums didn't have any psychic abilities, because some of them were very psychic indeed. But they unfortunately disturbed their own contacts because of their behaviour boarding on *fanaticism*. It therefore doesn't come as a surprise that academic science will not participate here and will continue to talk about "hysterics".

If the medium is prone to religious romanticism, otherworldly religious romantics will announce themselves, because spiritual LAWS are being applied here. It is mainly former priests, monastic brothers, nuns and similar spirits, in cases like these. But if the medium shows *due but not exaggerated respect* and for the hereafter, respectively the REALM of GOD, based on the same spiritual LAWS, INTELLIGENCES of the *same nature* and the *same willingness to help*, will make themselves known.

The environment of the medium naturally plays a big part also. The *affirmation to do good* must also be present here. In most cases, academic testers or journalists have very little knowledge of the LAWS of the hereafter, but plenty of curiosity instead. But the otherworldly intelligences are wrongly judged in a lot of cases, because one assumes them to be omniscient.

- We have never come across an otherworldly TEACHER or ANGEL about whom we could confidentially say that he *was omniscient* and answered all our questions to our satisfaction.

Knowledge in the hereafter is certainly enormous and is mainly based on better opportunities to gain information, as well as an invisible discernment into many earthly affairs.

- But a prophetic view into the future is *very precarious*. The dates mentioned are also *inaccurate* in a lot of cases.
- *We achieved the highest certainty if it was concerned with a, for us, very important signpost, something akin to the INDOCTRINATIONS CHRIST practiced.*

The readiness to help was very pronounced with any *questions concerned with health*. The possibilities of spiritual healing can't be ignored for this reason, inasmuch as it will play a supporting role with other healing methods. To strive for spiritual healing *only* in very severe cases of sickness is, according to our experiences, very foolhardy.

- The spiritual INTELLIGENCES have always and repeatedly emphasised that they're willing to help in their own way, but the fact remains that medical science is also significantly inspired by the realm of GOD.

But unfortunately most academics don't know the meaning of true inspiration and where it comes from. Especially academic scientists, lawyers, doctors etc. *reject* any TRUTH they're not comfortable with.

Apart from that, many such opinions are the results of the need to conform; as soon as an eminent psychologist invents a new explanation for the transcendental, other publicists come up with similar distortions, supporting the made-up example. Reading these treatises on contacts with the hereafter, one unfortunately detects very ordinary dilettantism.

To be able to give an *objective* adjudication takes *years of experience*.

- The otherworldly realm encroaches with incalculable graduations into our lives here on Earth!

Questions and answers

Question : (1959) Is there a great difference between messages from an unknown MESSENGER of LIGHT or some other ANGEL?

ARGUN : *The best MESSAGES always depend on the genuine humbleness of the mediums and the circle participants.*

It has nothing to do with reputation or profession. The simplest of person can receive the best MESSAGES, if he's *really* humble and modest and if he *lacks* any craving for recognition. A humble person will *not* immediately look upon himself as "chosen" by GOD and assume that an ANGEL from the highest of SPHERES, a member of GOD'S ELITE, comes to him of all people.

- *Where there is no humility, divine KNOWLEDGE is also lacking, the prime prerequisite for excellent CONTACT.*

If *you* were an exalted SPIRITUAL ENTITY, full of KNOWLEDGE and REALISATIONS, would you in spite of all the LOVE, choose to enlighten the presumptuous or would you prefer the humble?

Question : Can you explain *genuine* humbleness in more detail for us?

ARGUN : • *There is no humbleness without unsparing self-criticism!*

He, who achieves divine COGNIZANCE through self-criticism, will become convinced that he is *infinitesimally small*. He knows that he's *terribly small* and that GOD is *unimaginably enormous*.

After gaining this cognizance, he must realise that as a positive person, he can only grow the more he realises that he's actually infinitesimally small. But it is very important that he knows that - no matter how small he is - he is still a PARTICLE of GOD. He, who is a PART of GOD, can grow and in this case it means that *he'll draw nearer* to GOD. But he will also know - as infinitesimally small he might be - that the enormous POWER of GOD is at his disposal.

Question : There are people that proclaim to be "excellent mediums", but still go ahead and commit unbelievable fraud on mankind. What does someone like that look like on the inside?

ELIAS : They want to attract attention *any way* they can. They don't actually believe in it themselves. But they are of the opinion that just in case there is *really* something behind all of this, they'll have some kind of reinsurance, because they are supposed to help other people gain proper faith. But they don't consider for one moment that they actually do a lot of harm. They are of the opinion that they do something good because they help others to strengthen their faith.

Question : In spite of many, many books dealing with this subject, there is hardly one book of which one could say that it contains pure and objective TRUTH.

ELIAS : This is unfortunately true. I've already mentioned the enormous trash that is published. Most books contain the TRUTH *and* fiction. But how can a layman tell the two apart?

- *The negative is unfortunately seasoned with the TRUTH, so it becomes more palatable!*

The food of incorrect faith is seasoned in this way, so that it will be eaten. But most of the time *imperfect mediums* are to blame.

Question : (1959) Whereof can we recognise a MESSENGER of LIGHT?

AREDOS: *Not* by his "GREETINGS IN THE NAME OF GOD" or similar words! But wholly and solely by his proper upbringing and unobtrusiveness, by his patience and above all by his great LOVE for everybody. A MESSENGER of LIGHT doesn't *forbids anything*, he only *teaches* and *admonishes*. The free will to decide always remains assured, it is respected absolutely by every MESSENGER of LIGHT. A MESSENGER of LIGHT would never say: "You must!" Therefore follow the eminent EXAMPLE we have learned from ANGELS. Only evil says "you must!"

Question : (1972) What is absolutely imperative when people consider creating a psychic circle?

ARGUN : In regards to this I would like to tell you that when a circle is being established, *every one* will be allocated PROTECTION and this in the form of a MESSENGER of LIGHT, one that would like to fulfil the MISSION of creating a little paradise out of a garden full of weeds. This must be achieved *with the* help of the medium.

It's certainly never easy, but it never happens that FRIENDS of LIGHT from other circles change from one place to another. Every FRIEND stays nicely in his or her place and if I may, I emphasize that I have to fulfil my MISSION in this house and *nowhere else*. My dear friends, I'm always at your disposal, but if you happen to hear something I supposed to have said, I can tell you that it certainly wasn't me.

Question : But it's not only *your name* that is misrepresented, but also the name of ASHTAR SHERAN, because there are Canadian messages published, titled: "Ashtar Command" and also "Orders by Ashtar". What can you tell us about this?

ARGUN : Well my dear friends, it's like this, others don't like to see that someone endeavours to create something positive. This is why such a lot of nonsense happens in regards to this subject, namely nonsense with dire consequences, because it's the *NAME of the LORD that* suffers the most, the very same we represent to help you gain happiness, something that cannot be paid in kind, namely harmony and a feeling of not being alone in the REALM of the LORD.

You have FRIENDS you can't see, but who'll always be there for you. You're understood and consoled when you're distressed, when you don't believe in anything anymore and when all hope has left you, you then suddenly look up to the sky and catch

sight of the sun shining down on you. You suddenly don't feel so bad anymore. You have a feeling that you're not alone anymore.

SOMEONE is sitting next to you and listens attentively and senses whatever depresses your heart. You suddenly begin to believe in yourself again. Please remember that even if it doesn't look like we're there, we'll always understand you and your problems and we'll always endeavour to cheer you up as best as we can.

Question : Due to treacherous ignorance, many spiritualists believe that if an otherworldly announces himself with "Greetings in the name of God" or adds an "Amen", that this guarantees that this entity has proven its identity as a MESSENGER of LIGHT. What is the reality of this?

ARGUN : To announce themselves in such a fashion isn't *difficult for anybody*, but it's simply mockery most of the time! Many speak, respectively write like that. The danger lies in the way they so cleverly express themselves so that their statement can't be correctly interpreted. They sometimes speak very well, but still make mistakes. These mistakes expose the otherworldly immediately. To give you an example: "The beloved divine Lord on a throne decorated with roses." This type of gibberish is enough to make one realise *with whom* one is dealing with.

- *What's even worse is if the participants of a circle are praised. But the worst is when the medium is praised!*

Another example: "My dear, dear child, CHRIST has opened his heart to you, because you are so good. You're chosen to redeem the world; but you must show him absolute obedience." - From this moment on the whole circle is *fanaticised* and *destroyed*.

Question : (1975) But one is told that it is very important that the spirit one is communicating with, has to announce himself with a "Greetings in the name of God" at all spiritual meetings, otherwise he would be a lying spirit.

AREDOS : No, I have to disagree with this. A hoaxing or lying spirit doesn't show *any respect* for GOD and he is certainly *not afraid* of punishment, because he believes that the antagonist protects him. He unscrupulously swears any oath and even swears an oath on his salvation, which is already damned. You therefore can't rely on a "Greetings in the name of God", is *doesn't guarantee anything!* In spite of all of this, this form of greeting is a spiritual salutation for all those present at the meeting.

- *The best guarantee is FRIENDSHIP and the common GOAL to do a good DEED for mankind.*

Question : (1958) Who is ranked above you, who are your TEACHERS, respectively where do you gain all this knowledge from to be able to answer all our questions?

ARGUN : A BEARER of LIGHT is in charge of us, we call him the BEARER of LIGHT from the BLUE-RED LIGHT. This doesn't mean anything to you, but it tells *us* something, it's a reference to his aura.

Question : (1972) Are the SPIRITUAL TEACHERS tied to a certain concept or do they have the freedom to teach they way they want to?

Answer : There are authorised and non-authorised teachers. Most of the circles corresponding with the spiritual realm are dealing with *non-authorised* teachers! These self-proclaimed teachers have the freedom to say whatever they like. But therein lies the danger of spreading mistakes or of rumour mongering. But there can also be good TEACHERS amongst them, but they are *very difficult* to recognise.

The *authorised* SPIRITUAL TEACHERS were trained for decades and are supervised. However these TEACHERS have a concept that they have to adhere to. This has the advantage that they're not allowed to delve into things that are off limits to them. These MONASTIC TEACHERS are appointed by higher SPIRITUAL ENTITIES to aid mankind. They make an appearance at the circles that are *well developed* and *positively organised*.

- *These MONASTIC TEACHERS will not make an appearance when mediums work on their own or when they're not a member of a circle.*

Question : We're aware that you are MONASTIC TEACHERS. We also know that you're called MESSENGERS of LIGHT. Can you tell us something about *your concept*?

Answer : It is our main mission to prove to everybody that the soul of man doesn't experience a physical death. Those that don't believe in survival after death actually suffer a kind of death, which will detain them like prisoners. Such a soul will roam about because it's unable to orientate itself. We actually want to prevent this; it constitutes a spiritual catastrophe.

Question : (1961) How is it possible that there are so many "Christ's" that approach these individual mediums, only causing *a lot of mischief* in the NAME of GOD and confuse people?

AREDOS: These are actually lower entities, which are *deliberately* looking to do evil, because they experience negative pleasure by doing so. They still have the free will to make their own decisions, but they do themselves a lot of harm, because the result of this is mental self-mutilation.

On the other hand people are *working* with self-delusion. There are evangelists in the hereafter that believe that they have to help CHRIST in any way possible. But to be taken seriously by mediums and circles, they present themselves as CHRIST. They feel justified to speak on behalf of CHRIST, because they want to do good, but they are *not mature enough* to do this. But their knowledge is very limited and because of their own self-aggrandisement, they resist any true INDOCTRINATION and atonement. They too have their own free will, but they'll remain on the same level within a sphere because of this.

Question : How can we recognise a *genuine* connection?

AREDOS: They way they express themselves:

- *no threats,*
- *no insults,*
- *consideration* and *no betrayal* of people.

- *A high degree of sympathy* is an excellent indicator.

Question : (1970) We admire your perseverance, the way you continue to teach us, even though you receive nothing in return.

Answer : Your LOVE and your trust, as well as your good intentions to apply our INDOCTRINATIONS, is payment enough. Success makes us happy.

- *Never stop asking questions!*

We will never reject any question. But the answers might *not always* be to *your* liking, but it will always be in the best interest in regards to your HIGHER DEVELOPMENT. We have an excellent over-sight and can therefore make our judgments from a distance.

Question : (1960) Why is it that the indoctrinations from the hereafter are often so *different*?

ARGUN : This is due to the inspiration of the souls. It depends on the training the soul that announces itself has undertaken. Mistake also happens in the REALM of GOD and they have to be rectified. There are inspirational spirits that express their opinion in good faith, without having their personal opinion communally attested.

This is the reason why we work within the context of a great COMMUNITY and are very careful with our decisions. We only communicate that, which this great COMMUNITY has approved and communicate what we can *take complete responsibility for* in the sight of this COMMUNITY and before GOD. Mistakes are usually made by *one soul* and not by a panel.

Question : Is there a uniform SOURCE of INDOCTRINATION in the spiritual realm, one that is ready available to all the GUIDING SPIRITS?

ARGUN : This is how it ought to be, but unfortunately it's not the case, because the dark forces prevent this unity. But once a soul has advanced to such a high state that it is *completely* removed from the grasp of the dark forces, it will unfortunately not be able to make contact with the physical world anymore. This is why we have to fight for the TRUTH. We correct our mistakes *immediately*.

Question : (1971) When looking at older messages and revelations one finds that many prophecies have *not* eventuated. What can you tell us about that?

AREDOS : Only those things that are already in preparation or are pending in GOD'S PLAN can be prophesied. But something can also change here sometimes. The antagonist of GOD shows an interest in all developments. He snoops around so that he can plan his attacks. A lot of changes can take place just because of something like that. The development of mankind is often to blame for any sudden change of PLAN. Mankind could invent something for example that could divert everything onto a different track.

One should certainly be very careful and tentative when prophesying anything, because prophecies aren't always reliable. But changes happen very seldom so that a prophecy from a higher PLACE *eventuates most of the time*, but not always to the last letter. The process is as follows: If an alarm clock is wound up and set, one can prophesy that it will ring at a specified time. This is pretty definite. But what happens when the spring

breaks? The prophet must certainly be aware of the exact time the clock was set. This is only an example.

Question : (1964) Where did Parson Johannes Greber fail?

AREDOS: Parson Greber didn't fail at all. On the contrary - he did *a great deal* for SPIRITUALISM and for biblical knowledge. He guided thousands onto the right path.¹³

Interjection: But you told us some time ago that Greber also recorded some mistakes.

AREDOS: Apart from CHRIST, there has never been one single medium, adept or theologian in the whole world that hasn't at least made one single mistake. One shouldn't harp on such trifle, but one *should look at the whole picture*. Errors and mistakes can always be rectified.

What is to be condemned it the way some people obstinately reject any amendment out of pure intolerance. The major Churches are in this respect exemplary.

Greber for instance was wrong, when, based on his spiritual experiences and knowledge, he assumed that GOD spoke to Moses from a cloud of OD on Mount Sinai. The spiritual world saw no need to rectify this error up to now, certainly not at a time when a different explanation *would not have been understood*.

The spiritual world will never rectify a mistake unless a more comprehensible answer can be given. We prefer to *live with* a mistake than to confuse you *even more* and possibly dissuade you from all of this.

Because of your present day technology, you'll find it a lot easier to understand that the LEGISLATION received on Mount Sinai was forthcoming from a spaceship. It was a divine COMMISSION. If Greber had received this kind of INFORMATION, he would immediately have thought of hoaxing spirits and he would have doubted *all other COMMUNICATIONS also*. The works of Greber are *highly respected* in the spiritual world. This type of communication is for many people a good start, helping them to get away from any kind of dogma.

Question : Was Neurologist Dr. med. Carl Wickland's medium endangered by otherworldly entities.¹⁴

AREDOS: The worked performed by that circle was *a masterpiece*. The medium was certainly protected by a circle that was excellently manned. This was the only way to ensure that the medium would not be harmed. The spiritual world created a great ORGANIZATION to bring about this work with the co-operation of an earthly circle. It was a REDEMPTIVE EFFORT without equal.

- *We advice all spiritualists and other interested parties to study this book. We are also of the opinion that this book should have a place in the library of all mental clinics. One should finance such an objective!*

¹³ Pastors Johannes Greber's book titled "Der Verkehr mit der Geisterwelt Gottes" is very much recommended. It is an absolute classic amongst esoteric literature. Also read the brochure: "Der Tod - ein Irrtum mit verhängnisvollen Folgen".

¹⁴ Dr. med. Wickland wrote the highly interesting book "Dreissig Jahre unter den Toten" - Otto Reich Verlag,

It is devastating for us to observe how incomprehensively neuropsychiatrists treat their patients on a daily basis. We had to come to the conclusion that especially mental patients and deranged people, this includes the possessed, enjoy no humane respect at all from their doctors and sometimes from their carers. Those who are mad or mentally disturbed have *ceased to be human beings*; in the eyes of the clinic they are just another “case history”.

Question : Would the main reason for this be the fact that genuine possession is completely misdiagnosed at universities? They don't acknowledge possession by spiritual entities at universities, only schizophrenia.

AREDOS: Yes, that's true. A new broom must sweep here. This represents a very unfortunate academic error.

Question : (1962) Would it make sense to you, if we would engage in spiritual (physical) experiments every now and then?

ARGUN : We proscribe black magic. We keep a watchful eye on the work done by this research programme (MFK Berlin) we helped to establish.

Question : Does this mean that spiritism is part of black magic?

AREDOS: • *For as long as the DEVELOPMENTAL AIMS of spiritism isn't higher, it sympathises with black magic.*

Unfortunately many occult publishers have *not the best of* spiritual GUIDES, who'll indoctrinate and control them. This is why they so often publish mistakes. They lack *the great motivator*, the SEARCH for TRUTH.

It is very important for all of us to see the world in its *correct* light. It takes more than experiments for that, it takes a *selfless* LOVE for objective TRUTH.

- Unfortunately spiritists are all too often led astray; it sometimes is pure blasphemy!

The exploration of the spiritual realm (By Herbert Victor Speer)

- *Every spiritualistic séance is a scientific experiment.*

This ascertains the fact that it is an extraordinary research in the service of science. The Mediale Friedenskreis Berlin (MFK-Berlin), up to 1973, has performed well over one thousand séances, therefore well over one thousand scientific experiments and researches have been staged.

To summarise it in a few words:

- *There is a conscious survival for spiritual man after physical death.*

These results, based on the conclusions made during many exacting experiments, cannot be disbelieved. These scientific result, verifiable at any time, shows with absolute unambiguousness that the consciousness of man still functions completely immaculately *even after* disembodiment.

- *Spiritual man can think and consider; he has a soul capable of feelings and is fully aware of his existence.*

This assessment is sometimes ignored, because it apparently wasn't formulated by some academic team!

The séances of the MFK-Berlin are not based on some Church related cult, but pure research into the hereafter with the aim to *create complete clarification* and to raise the spiritual level of mankind. Moreover, the participants in SPIRITUALISM have been trained for many years and are presently working in intellectual, above average positions.

Senior medical officer Dr. Hermann Gerbis from Berlin has been a member of our meetings for more than ten years. He was absolutely convinced of the reality of the results. Other personalities, having taken part as guests on more than one occasion, were very impressed. There is no deception and no striving for material gain, only a *faithful search* for the objective TRUTH.

The MFK-Berlin doesn't need romantics or dreamers. The participating members asking the questions are well-experienced pedagogues. One therefore cannot talk about a non-academic circle. The results in part coincide with the output of other renowned circles. This congruence found in many areas is *international!*

In regards to academic science, we can definitely say:

- Scientific research in regards to the consciousness of man proceeds *along completely* wrong lines. Parallels or interrelated conditions between body and spirit should not deceive the sciences!
- Human memories *aren't* made up of engrams imprinted on the brain, but are present in the cosmos as VIBRATIONS, where they *remain constant* and always remain *ready available*. The brain isn't here to think; rather the thinking process is *routed* through the brain, while man isn't in a disembodied state!

Once this absolute conclusion is accepted, academic research has to turn about and follow the plotted course. This would bring about a complete revaluation of millions of people, especially all the "mentally disturbed".

All the results from the séances of the MFK impressed scientists everywhere and led to new results. We're aware that a lot of the results were published, but the *original source* of these results, namely the teamwork of the MFK-Berlin never got mentioned. We continue in spite of that, so we can fulfil our service to mankind.

The exploration of the spiritual realm (By Herbert Viktor Speer)

When people in America realised that intelligences from the spiritual realm could make their presence felt by knocks and by moving tables, this conclusion went right around the world like a wildfire. These types of séances were organised even in the highest of social circles. This profane spiritism is being exercised even today.

But in spite of this, this type of contact with the hereafter has been discredited terribly. This failure is due to *ignorance* shown when dealing with the hereafter. The layman had a completely false

concept, thus giving the hoaxing and lying spirits every opportunity to do their mischief. Spiritism thereby lost its reputation and credibility.

- SPIRITUALISM is *the better option* for making contact with the hereafter, even thou it originally developed from spiritism. Spiritism is the precursor of SPIRITUALISM even today.

The layman, dealing with this quite *unprepared*, believes most of the time that the hereafter is very sincere and omniscient. He also has no intentions of serving mankind, but wants to *reap the benefits* from the source of the TRUTH *only for himself*. He wants to find out from the hereafter how to make money and how to trick his antagonists. He wants to be healed from his illnesses or spy on his fellow man, yes even solve crimes.

- *These are all enticement for evil spirits and whoever deals with them, will never be able to get anywhere near the positive!*

Eventually the public is bound to say that spiritism sends people round the bend and they'll end up in a lunatic asylum.

The key to SPIRITUALISM is:

TO SERVE MANKIND!

We're often asked if one can learn to make contact with the hereafter.

Yes, it can be learned, but psychic connections with the hereafter implicitly asked for *a thorough study of the relevant psycho-sciences*. The necessary stamina for these contacts is absolute patience and tolerance, even towards the lower spirits. The mistake of *insulting* the hoaxing and lying spirits is all too often made.

Caution!

- *These particular spiritual entities are vengeful and they'll always find ways to get their revenge!*

Questions and answers

Question : Can hoaxing and lying spirits transmit diseases?

Answer : *Yes, that's possible*, but only certain diseases, those that attack the nervous system and the brain. They *can't* transmit infections. But the positive spiritual entities can also accomplish healings, mainly via the nervous system.

The hereafter isn't here so that one can ask the spirits questions on how to achieve esteem and money. The positive spirits certainly don't act as spies and expose criminals. Certain taboos apply and they have to be adhered to absolutely by the positive entities in the hereafter.

- It is almost always because of the *leadership of the circle*, if circles *mess up*.
- The highest law is called: SERVICE FOR MANKIND!

- This is why all questions should be asked *along those lines!*¹⁵

People must learn to be *happy* and to be there for his fellow man in all honesty.

- Trust and dependability are the *basic conditions* for *good* CONTACTS.

Apart from that, the positive SPIRITS are very obliging!

Questions for the leader of the circle

Question : Is it possible for *anyone* to make contact with the spiritual realm?

Speer : Every normal person can make such contact. But it depends on the way one deals with the spiritual world. Apart from that it's an exercise in patience.

- *Positive results can only be achieved if harmony reigns!*

Question : What fundamental mistakes are usually made?

Speer : Contact can be established with just *three people*. One of those three must act as the *leader of the circle*. *Egotism* may not be present. The questions can be asked speaking out loud. Experiments will establish just how the otherworldly will answer.

Many people try to obtain tips for their material advantage from otherworldly entities. *This is wrong!* The otherworldly can't convey any tips for the lottery either. Actually all monetary concerns are proscribed.

Question : What are the reasons why the Church can't produce positive results?

Speer : The representatives of the Church are also egotistic and not open-minded enough to accept the TRUTH. Their questions are most of the time unacceptable. They are forbidden to consort with spirits.

Question : Why do scientists have so little success?

Speer : Respect and LOVE are lacking. Pure inquisitiveness doesn't get you anywhere. Apart from that, mistrust is an unsurmountable hurdle.

- It doesn't appeal to the otherworldly to see their arduous attempts for contact simply *talked out of existence* later on.

Question : Are the otherworldly interested in politics?

Speer : The otherworldly show an interest in everything that's happening on Earth. But political questions conjure up *lower* spiritual entities, which then start to tell lies or simply disturb the peace with their nonsense. But sometimes the otherworldly will make some political statement of their own volition.

¹⁵ A valuable tip helping to test the value of psychic protocols!

Question : Can the otherworldly name a murderer or some other criminal?

Speer : They will not give any information on crime, because evil powers will *most certainly* enter the proceedings. Many scientists make this mistake. Many people are of the opinion that the otherworldly in the hereafter are omniscient. *This is a mistake*, they can't know everything, even though they have a better insight into world affairs.

Question : They say that an *innate* psychic ability must be part of it. Is this true?

Speer : No, it is not necessary. *Everybody* has psychic abilities, otherwise they couldn't think. Even consciousness is psychic. Feelings are also a part of psychic ability. But this ability can be enhanced, it can be trained.

Question : Does this actually mean that *everybody* is continuously inspired by the hereafter?

Speer : That's exactly right. Most people might not be aware of the fact that some of their thoughts are suggested, respectively forced on them. In almost all cases they believe that all their thoughts originate solely from within themselves.

The exploration of the spiritual realm (By Herbert Viktor Speer)

The exploration of the hereafter has been *incorrectly evaluated* for thousands of years. Even the word "hereafter" is wrongly understood. It is actually a state of existence of a more superlative standing than our material world. Everything is *immaterial* but in any possible way *enhanced*. Many spiritualists talk about a "greater world" because of this.

- It's certainly not a world of shadows, but an existence in a different FREQUENCY, comparable to switching from the "first" program to the "second".
- An otherworldly, consequently a disembodied soul has a body at its disposal in the spiritual realm. This particular body is not a phantom, the otherworldly experiences it as a *solid* body, whilst the material world is perceived as *permeable*.

But this hereafter everybody will eventually enter, is in many respects *very similar* to the physical world. This is due to the fact that people bring their thoughts and experiences and also their fantasy across. This is also the reason that there are many tribunals, associations and also larger organizations in the spiritual regions, with various objectives.

- *But there are certain basic concepts, namely a completely definite distinction between GOOD and evil. The whole spiritual realm is organised according to these concepts.*

But unfortunately hardly anybody on this Earth knows anything specific about this realm. Rather a lot of enormous lies and fabrications are in circulation. Furthermore, the majority of mankind on Earth is actually misinformed - and the Churches are unable to convey the objective TRUTH as substantiated knowledge.

The difficulties opposing the exploration of the spiritual realm are the *spheres close to Earth*. Whose spiritual entities continuously cause disturbances with their practical jokes. But it's exactly

this hoaxing and the visible struggle for supremacy that goes with it that is the all too conspicuous proof of its existence.

- *Only when experience makes it possible to eliminate these disturbances, will it be possible to make contacts with higher INTELLIGENCES.*

It's unfortunate, but most of the time the mistake is made that one wants to make contact with a *certain* personality, one that played a big part on this Earth. But as a rule, these "famous" personalities are to be found in the *lower spheres*, because the spiritual realm rates them completely differently than was the case on Earth.

The best spiritual *testimony* lies in the fact that the results are, *internationally speaking, the same*. It all depends on whether one can manage to achieve contacts with positive and highly developed INTELLIGENCES.

- If these FRIENDSHIPS *endure*, a SOURCE will have been tapped, from whence a constant stream of the *best* INDOCTRINATIONS will spring from.
- After decades we finally found out that the *smallest* circle is *the best* circle.
- Only *absolute* HARMONY with a *matching* objective will be advantageous.
- Questioners already toying with the idea that they'll make contact with a departed relative, disturb the whole circle and falsify the results.

It's unfortunate that the Churches have paid *too little* attention to SPIRITUALISM, because they have *completely false concepts* about communicating with spirits.

- The mendacious letter of the bible *inhibits* the wonderful sublimeness of a *genuine* CONTACT with the positive SPIRITUAL REALM.

The exploration of the spiritual realm (By Herbert Viktor Speer, from the year 1975)

To be able to communicate with the hereafter implies that there are actually spiritual entities, which can make contact with us. Millions of experiments have established that this *is possible*. Even if the answers one receives *don't always* portray otherworldly characteristics, but sometimes seem rather insane, it has nothing to do with the evidence provided.

- The *final argumentation* actually is in the hands of the scientists, because the broader community, as well as its leadership, relies heavily on the seal of approval given by the universities.

But herein lies the problem!

Today's scientists believe more than ever that they are the ones called to fight against superstition and unnatural cults with strong measures. But because they don't receive any instructions through their studies in this respect, *they lack the knowledge about* an enormously important realm of existence, especially important to us.

The disorder in the world, the cruelties and inhumanness as well as the discordant relationships between races and people are absolutely the results of the inability of the sciences to research and acknowledge, what *genuine* researchers and idealists have established during thousands of contacts with departed souls for years.

If the responsible representatives of science had an opportunity to *observe the results from the start*, they would be of a different opinion. A perversion or misrepresentation is completely impossible and can only come about where experience and virtual overview are *lacking*. We have experienced first hand just how impossible television representatives can behave, when they were convinced that they were about to expose some “baloney“!

Here is the manual for science! We have explored and edited it during the last 23 years on hand of the well over one thousand contacts with the hereafter:

- Every contact with the hereafter reveals the existence of *two* powers, namely GOOD and evil. It soon becomes apparent that the evil side continuously tries to attack the positive side, to spoil any contact and to prevent any positive INDOCTRINATION.

Crackpots aren't just present in *this* world, they're *also represented* in the hereafter. Anti social elements are *also* active in the spiritual realm. Apart from that there are enough godless entities, which apply *any* blasphemy and really excel in doing so.

- *Criminals also remain criminals in the hereafter!*

One can't expect the positive SPIRITS to function as traitors or denounciators.

With a preconceived atheistic attitude or disrespect, *no positive* result will be achieved. Those who deal with lower spirits will be deceived and duped. There are any numbers of sluggards willing to pass their time in this way. *Abetment to commit suicide* or even murder is part of this. This even happens in the NAME of GOD, just to receive *more attention*.

- *There are groups on the other side that will exploit any contact to destroy the belief in something GOOD. They develop an extreme finesse to do so!*
- *But there are positive GROUPS also, they are very intelligent and knowledgeable and they encourage good intentions in every respect.*

The exploration of the spiritual realm (By Herbert Viktor Speer)

To be able to make a judgement on parapsychology, it's imperative that one is an “expert”. But this implies praxis! A whole numbers of researchers and natural scientists possess this praxis, and *in spite of this* they are *no* “experts”. -

Parapsychological praxis has to be *experienced*, that is to say, one must have experienced a significant number of extrasensory phenomenon *on one's own person*. But this may not be experienced whilst in a somnambulatory or sleep-like state, but must have taken place when *wide-awake and mentally normal* and under the *severest criticism of one's own subconscious*.

Parapsychology is *not a new* science, it is actually ancient. Only the name is new, as is the denotation of “PSI”.

- *Genuine extrasensory apparitions and the extrasensory activity of otherworldly powers can be traced right back to the beginning of mankind. It hasn't been possible up to now to refute the possibility of a survival in the hereafter.*

The results of research into the hereafter by private circles are not, as wrongly alleged, “unscientific”. On the contrary - they are, in connection with international efforts in this field of knowledge, absolutely scientific! Failures, and they do happen, cannot be used as a refutation.

The experienced spiritualist knows that experiments in this field, carried out by academic scientists, are unscientific, because they are not based on the experiences of their predecessors. Science is always confronted *by a mystery* in regards to the larger phenomenon. This won't, respectively can't change, because science questions the activity of otherworldly powers.

To give you an example:

Let's assume that an electric motor runs. Science would be confronted with a mystery, if it refuses to accept electricity as the cause for this. - It's exactly the same when assessing SPIRITUALISM.

- One can only undertake research with a completely *unbiased* logic, not with any nonsense!

The TEACHERS and their mediums (Author Herbert Viktor Speer, from the year 1969)

Otherworldly GUIDES, even if they once lived on Earth, adopt a MONASTIC NAME in the spiritual realm. This is the reason why spiritual entities announce themselves under the strangest names. But a euphonious name *doesn't* guarantee the TRUTH!

- It always depends on *the contents* of the message!

But if a spiritual GUIDE is active under the same name *for years*, then this name might offer a certain guarantee for the message.

- Well-developed circles almost always work within a TEAM that has a SPIRITUAL GUIDE *at the helm*.

As our readers are well aware of, we are dealing with two excellent TEACHERS; they call themselves ARGUN and ELIAS. Both spiritual entities have demonstrated a high level of spiritual development and never abused our trust in them. According to their explanations there are certain “RANKING SYSTEMS” in place, they are known under the name of “MESSENGERS of LIGHT”, because they illuminate our ignorance and its associated darkness with divine LIGHT. It certainly isn't easy to correspond with these MESSENGERS of LIGHT.

- The required medium needs extensive development, respectively an apprenticeship. This is why a SPIRITUAL GUIDE has his “favourite medium”, an instrument *he can rely on* and one he *cultivated himself*.

Concerning the messages and answers, it's completely irrelevant whether ELIAS or ARGUN gives the answers. *Which one of these MESSENGERS of LIGHT reports depends entirely on the medium.*

Both GUIDES are always present within the circle and relay the answers from the otherworldly TEAMS. It is therefore *of no importance* whether ELIAS or ARGUN or even another proven TEACHER conveys the TRUTH.

- The GUIDES can be distinguished from one another by their *style of writing* and their *phraseology*.

The constellation of two mediums and two SPIRITUAL GUIDES has resulted in *excellent results*. Their identity could be verified through *both* mediums through their style of writing. To add to this there is temperament, it could also be verified in the same way, also the *way the paper was utilised* and various other *distinctive habits*. Apart from that, a certain theme could be *continued* by another medium, without this second medium having been informed about the beginning of the theme. This shows that a spirit *can best verify* its individuality in this fashion.

The individuality of an independent, conscious existence could repeatedly be tested and verified through the multitude of séances. There is no doubt that the received MESSAGES originated from the spiritual realm. The explanation that all originates from the *subconscious* of the medium is *absolutely false*. But there might still be individual cases where an *insufficiently trained* medium allows its subconscious to express itself. But this can be re-examined!

When we receive our answers from our spiritual friend ELIAS, then it's because ELIAS writes with his pupil *Uwe Speer*, whom he has made use of for over 17 years. Both of them are magnificently harmonised with each other. There are no problems, because the medium is very familiar with the ornateness of the MESSENGER of LIGHT'S writing and therefore can easily decipher it. ARGUN prefers to write with the medium *Monika-Manuela Speer*.

- We see in this another testimony of individuality, because the medium Uwe *could* use the name of ARGUN without difficulties, if it was just about his subconscious. But ARGUN writes *too fast* for him!

Questions for the automatic-writing Monika-Manuela Speer (From the year 1961)

The medium of the Medialen Friedenskreis Berlin, *Monika-Manuela Speer*, born on the day of penance, the 18th of November 1936, was already highly psychic during the war. Aged only 8 years old, she would walk at night, during an air raid warning, with eyes closed in a trance state to the air-raid shelter situated about one kilometre from their apartment. There can be no doubt that she was led by her GUARDIAN ANGEL, then she didn't have to be taken by the hand. Whilst in this state one could only see the whites of her eyes. Whilst in this state, Monika-Manuela climbed up and down stairs without any problems.

At age 15 she was encouraged to make *contact* with the spiritual realm through her *automatic writing*. It began to work after only a few attempts. Even though she doesn't want any publication, we were allowed to ask her a few questions just the same:

Question : Why were you really interested in the research of the hereafter?

Medium : I participated in a few séances where my brother Uwe was the medium. The results convinced me and I wanted to see whether I could do this also.

Question : Did you have any difficulties with the automatic writing?

Medium : Oh, definitely! The writing part *didn't* cause me any problems, because the unknown POWER guiding my hand was clearly perceptible. But I wrote down *terrible threats* directed *at myself*. These even threatened my life! I believed it in those days and was so terribly afraid that these invisible ghosts could harm me. I was afraid of the dark.

Question : Just when did you overcome this fear?

Medium : This only happened *after I had nothing more to wish for*. I never asked one single question myself after that and took great pleasure *in serving* as an instrument, bringing consolation and indoctrination to other people. - Suddenly everything became beautiful and harmonious.

Question : You write for about *two hours* in an *extremely fast* tempo, without having any support for your arm or your hand. Don't you get tired doing this?

Medium : No, absolutely not. My hand or my arm is certainly its natural weight, when I put my pen down to write. But the force of gravity is *suddenly nullified* and I let things happen, as they will. The hand moves *completely independently*, without volition. All I do then is to keep an eye on the squiggly lines, individual words are not separated, so that they don't overlap and stay some distance apart.

To decipher the written MESSAGES takes a lot of experience. One has to be very familiar with every character and abbreviation of the otherworldly GUIDING the HAND. *I never monitor the contents* whilst I'm writing things down.

Question : Apart from acting as a medium, do you have another occupation?

Medium : Yes, I have. I serve as an instrument for the MESSENGERS of LIGHT only *once* a week. I have a very responsible position in the public service, requiring a lot of courtesy and needing a lot of concentration from me. (Social worker)

Question : What personal advantage do you gain by doing this psychic work?

Medium : I'm not paid to do this, but *the pleasure* I get from this CONNECTION completely satisfies me. Sometimes our guest bring lovely flowers or the odd present. It's always very solemnized and *I wouldn't like to miss these hours for anything in the world*.

Question : Do you feel that your consciousness abates during a séance?

Medium : No, not in the least. *I'm completely awake*, because I have to decipher and read the written words out loud. Every word is recorded on a tape.

Question : Do you have to prepare yourself for these séances?

Medium : Yes, I do. *Utmost cleanliness is required*. I always take a bath beforehand and put on clean clothes. It's also not very good, if I shake somebodys hand prior to the séance.

Question : Can difficulties arise during the writing process that impede everything or even bring everything to an end?

Medium : Yes, this is possible, when *there is no HARMONY amongst the participants* for example. One single *disharmonious participant* or an *obstinate sceptic* is enough to make the writing process harder. It then becomes increasingly *illegible* and the POWER diminishes.

Question : Have you read or studied psycho-scientific literature?

Medium : No, not at all, not one single journal. *I never read about it*, and hardly ever discuss this topic. My explanations could never convince anybody, as I'm not really talented in this respect. But my spiritual GUIDE can do this very well.

Interjection : You couldn't be this inexperienced with all the work you're doing.

Medium : I am! I never read one single Menetekel booklet or a brochure on the subject. I'm not familiar with the contents of the bible and I have only limited knowledge about natural sciences. Whatever is being transmitted through the circle, I forget from one day to the next.¹⁶

Question : What indicates to you that your handwriting is absolutely from the hereafter?

Medium : When the weight of my hand is suddenly *nullified*. I clearly feel the unfamiliar POWER in my hand, because it moves *without my volition*. *But I consciously move my arm* to a degree so that the lines become properly spaced.

I have no inclination to religiously romanticize this, this is something *completely normal* for me! It is in no way my doing, but only the will of GOD. I continue to live a *normal* life, as before. After all, I have to think about my occupation, as I've chosen a career in the civil service and I would also like to get married one day.

Question : Do you have any other occult awareness or abilities?

Medium : No, not any I'm aware of. I did ascertain thou that the negative side always want's to do me a disservice. I'm of the opinion that I'm a *special target* for *undeveloped* people. *A lot of lies have been spread about me*. I only do my duty and I'm *against* any publication.¹⁷

Question : Would you like to show off your ability in public?

Medium : No! I'm only an instrument for our circle and whatever I do is always with the permission of the otherworldly GUIDE. An exception was made once in Hannover, but I was *disappointed*. Not about the OTHERWORLDLY, but about some people present there. I believe the very best religion is *courtesy* and a *certain degree of decency*.

¹⁶ ARGUN once wrote that for reasons of security all psychically written messages were erased from the mind of the medium.

¹⁷ To publish these lines took a lot of persuasion.

Epilogue (Author Herbert Viktor Speer, from the year 1969)

Here the original excerpts from the “Menetekel” end.

There are basically very *similar* transmissions from other working circles available, if the connection with the hereafter is *homogeneous*.

It was mentioned in the introduction that one has to apply “*the correct measuring stick*” to test the spirits, this is the *only way useful* results can be achieved. One can easily recognise *undeveloped* souls with the help of simple tests and trick questions. But increasingly more intelligent negative spiritual entities take their place. This *feeds* and *raises* the distrust within the circle. One is then forced to apply more difficult tests to be able to expose them. But most of the time the entities on the other side are in a *more favourable position* than we are. A circle testing the spirits can achieve success after success in this way.

But how large is the number of *unredeemed* inhabitants in the hereafter? - Even if every spirit convicted of deception would never ever make contact again, one single life on Earth would not be long enough to test *all* those that *could* make contact.

- These simple deliberations show clearly just how hopeless it is to make contact with the hereafter in this *mistrustful way*. This is the famous screw without an end.

Should one simply resign and give up?

It is written in the bible: “Test the spirits to see if they come from GOD”. This is a very *definite* invitation. It *doesn't* say: “Test the spirits to see *if they lie!*”

1. John 4:1-3: Dear brothers, don't trust every spirit, but *test the spirits*, to see if they come from GOD, because a lot of false prophets have gone out into the world.
You'll recognise the spirit of GOD by the following: Every spirit that confesses that Jesus Christ came in the flesh is from GOD. And every spirit that doesn't recognise Jesus is not from GOD...

Here the term GOD is mentioned. Therefore to test spiritual entities one has to apply *divine measures* and they're completely different from mundane methods!

What does this actually mean?

Divine TRUTH is *far superior* to any human opinions, speculations, philosophies, views of the world etc. It certainly doesn't have to hide behind any secrets or dogmas. On the contrary - the CREATOR wants HIS ETERNAL TRUTH, HIS PLANS and HIS WISHES *made known, spread and applied* on Earth. This is why HE gave everybody enough intelligence, an alert consciousness and sufficient emotional flair, to explore HIS TRUTH and to *experience it!*

But the whole thing is dependent on *two conditions*:

1. Individual people must take the *first step*. This signals that he *wants it!* He must decide for himself which direction he wants to take, because in his thoughts he has full freedom of choice.
2. *After* the decision is made, people have to *get on their way*. The paths to divine TRUTH are there for everybody to walk on - and the negative paths also.

As soon as someone has decided to *advance* his own perfection and to live and care for the HIGHER DEVELOPMENT of *all of* mankind, he'll receive the necessary SUPPORT from GOD. *Authorised* SPIRITUAL ENTITIES, coming from GOD and acting on HIS BEHALF, stand by these people. If the circle participants want to know whether they *have higher* CONTACT, the examination starts with their own conscience as self-realisation.

The basic question must therefore be:

“Am I really developed to such an extent that SPIRITUAL ENTITIES, coming from GOD, can actually reach me?”

This is *not* about whether one *believes* or is convinced that one is a good person, but the deciding factor is whether one *actually is*, seen from a divine POINT of VIEW!

- There is no need to begin testing the spirits for their divine ORIGIN, if circles and mediums *don't* possess this maturity, because they *can't possibly be* from GOD!
- If a circle shows *tendencies* for HIGHER DEVELOPMENT, it *automatically* attracts the attention of the positive SPIRITUAL REALM. It will be allocated otherworldly *HELPERS*, which in turn will create the necessary PROTECTION.
- *If the positive progress continues*, SPIRITUAL TEACHERS will make contact and affectionately lead the members of the circle,
- until they *have gained* the necessary maturity, so that *MESSENGERS of LIGHT* can make themselves known to them.

Hoaxing and lying spirits can be tested and sorted out with simple and also ingenious test methods.

- *High spiritual entities come from GOD and can be recognised by their divine CHARACTERISTICS!*

This implicitly presupposes that the circle participants must be developed in their *entire* characteristic attributes, so that they're able to *recognise* the divine ATTRIBUTES of these eminent SPIRITUAL ENTITIES. Test methods, which ignore these prerequisites, completely fail here!

- To be able to test otherworldly inhabitants for their deceptive manoeuvres, an equivalent intelligence and its associated *experience is necessary*.

It takes a lot more to recognise MESSENGERS of GOD!

It takes the dedication of the *whole* man with *all* his good attributes, his positive abilities and *all* the available possibilities. But not just during the contacts with the hereafter, but *at all times* and in all areas of *daily life*!

- *This primarily means working hard on oneself!*

How many people are willing to strive for this and to realise it?

The circles and its members that *could be considered* for a higher CONNECTION are *selected* and *sorted out* by the positive spiritual realm. Everybody must be prepared for this.

- A circle testing in a *mistrustful* way whether the spirits are lying or deceiving, cannot count on the MESSENGERS of GOD to make themselves known.
- To achieve successful work with a circle is mainly based on *asking the right questions at the right time*.

These questions shouldn't be too complicated and end up in specialized jargon, but they should also not be below a certain level. The ideal situation would be if they would be just slightly *advanced* of the prevailing level of development of the group. The positive SPIRITUAL REALM is interested in enlightening the circle participants, according to their ability to absorb, in all questions *completely*.

- Those who want to have the best otherworldly TEACHERS must make an effort to be an attentive, diligent and *co-operative* student.

The divine LAWS are perfect and absolutely just and therefore should be applied when working in a circle. These LAWS will *never be altered*, just to please some people or to adapt them to someone's speech.

- *If all circle participants implicitly abide by these divine LAWS, they would reap great success!*

It is only natural that *working* circles are *observed* and assessed by their fellow man. Terms like "black magic" and "white magic" can be heard. Comprehensive observations are necessary for a just appraisal. There are always *two sides* to every contact with the hereafter, otherwise it's not a *genuine* contact. Both sides have certain objectives, therefore *the motives* of both sides have to be explored.

- According to existing LAWS, only contact with the lower otherworldly spheres is possible, if a circle dabbles in black magic. Here the term for *both sides* applies in the full sense of the meaning.
- The whole situation looks completely different if the circle participants are of *positive* character and willing to *unselfishly* apply themselves *in the service of mankind*. If they *look* for contact with the spiritual SPHERES with this in mind, they immediately become *preferred targets* for demons. One can't assign it simply all to black magic in this case.

Attacks come exclusively from the negative side!

It is their tactics to *embroil* the circle participants in *quarrels*, to *hinder* them from gaining HIGHER DEVELOPMENT or even dissuade them from all of this altogether. One has to examine the motives of *all* circle participants very accurately *before* a verdict is given.

- If the motives are *noble* and *serve* mankind in a *positive* way, the demonic attacks with its associated black magic are indirectly *a mark of quality* for the aspiring circle. During his life on Earth, JESUS CHRIST was also exposed to temptations and attacks from the negative side!

If the good intentions of the circle participants are *visually present*, they should be *supported* and *promoted* as best one can. A devaluating assessment *strengthens* the *negative* side in these cases and under certain circumstances can destroy or greatly hinder a burgeoning development. -

Who will benefit from that?

- It is of decisive importance that all people with a positive attitude *stick together*, even if their individual paths towards HIGHER DEVELOPMENT are ever so different!

The negatives, in their underhanded way, try to portray the *natural differences* in the development of the circle participants as contradictions. If the people involved see it as a contradiction, it is very easy to create *dilemmas* and to suggest enmities. Unfortunately this happens all over the world and not only with contact with the spiritual realm!

As human beings we should really try not to listen and not fall for the proven tactics of the negatives. It is best to see through all of this and to eliminate this terrible influence completely.

Through its MESSENGERS of LIGHT, SPIRITUAL TEACHERS and all its HELPERS here and yonder, the spiritual realm gives us the necessary KNOWLEDGE. Acceptance or rejection of this KNOWLEDGE is in the hand of our free will to decide for ourselves.

Whichever way we decide, we will have to live with the ensuing consequences!

Herbert Viktor Speer
